The Book of Life

Table of contents (preliminary):

Preface to the First edition	3
The Enemy – Greed	6
True Name	6
Face of the Enemy – Adults.	7
Face of the Enemy-children	10
Defeating the Enemy	12
The Enemy – Fear	19
True Name	19
Face of the Enemy – Adults.	20
Face of the Enemy – children	25
Defeating the Enemy	29
The Enemy – Freedom	37
Face of the Enemy – Adults.	39
Face of the Enemy – Children	46
Defeating the Enemy	50
The Reality of Demons, «Madness and Science»	64
Imperial Faith	81
Introduction	81
The Crisis of the Old Faith	82
The Search for True Faith	88
The Living Imperial Faith is ALIVE	102
Initiation and Acts of Faith.	114
«1984» and Triumphant Doublethink	120
The God-Emperor and the Psychic Dawn	130
Transitional provisions	173

Imperium-in-the-Flesh, The Big Game	173
The Holy Inquisition	191
Benevolent Hatred	207
Demon Gates	219
The first Gate is Unconsciousness.. . . .	219
The Second Gate is Normality.. . . .	221
Third Gate – «Personal Matter»	222
Fourth Gate – «News», the Fourth Power.	224
New Language	228
Addendum	236
Concept of the International Heavenly Tribunal	236

Preface to the First edition

Dear reader, you should know that the Book was originally born under a different name: «The Book of Wrath». The story of the idea, at the end of 2021, at the presentation of our other work «The World of Heroes», an outstanding associate of the Russian Cosmic Society, Viktor Alexandrovich Merkulov, proposed to create a book about anti-heroes. He is the founding father of the project «Of the Future», where cinema, theater and other forms of art demonstrate high Noble Qualities and moral values, thus forming a person of the victor and creator. Speaking via video link, he rightly noted that we cannot avoid negative examples, we cannot avoid evil, because the unnamed and unknown have power over us. Knowledge gives power back to you. Exposing and denying evil is worthy of a separate book.

Trying to present a book about low characters of History, its villains and scoundrels caused repulsive feelings. The worthlessness has turned out to be so understandable, so common, so deeply rooted in the Low Nature of man that it is simply not interesting to write about it. Disgusting. At the same time, the very realization of the unity, similarity of the roots of evil led to a deeper thought. «Evil exists objectively», the power of entropy, literally non-Life = Undeath, is as much a part of human nature as its ability to create, to build. If you look at the whole chain of causes and effects, in the end, the root of all losses and destruction will be the human psyche, his soul, his decisions, his thoughts.

In fact, in the world of men, nothing is more important than men, and the cause of any event is also in the personality. Other sciences are coping with the natural world, and there are clear successes there. The human sciences are not yet fully developed by the twenty-first century. Even their modest available recommendations, findings, and laws are practically not used in public life, education, or politics. That is, in the most important issue of Humanity, we still do not rely on Reason. This book should put an end to this by starting a completely different approach to human exploration, knowledge, and transformation.

The formation of the human psyche, its personality and character is not a spontaneous process, but a controlled one. To manage, it is necessary to distinguish, understand the phenomena, processes and reasons for the emergence of «anti-heroes», destroyers, agents of Chaos, large and small. Everything has a reason, and so does Evil. There is also an original Evil, of course, and this, too, must be firmly and responsibly realized. As you know, «for the triumph of evil, it is enough for good people to do nothing». That's what we're going to do. The psychic phenomena of disintegration exist objectively, and today they affect world processes more strongly than ever.

The noosphere exists objectively, man is a geological, cosmoplanetary factor objectively. When we say «man», we mean our psychic phenomena, they become a material force.

Our Demons are real, we say this metaphorically, but as you will understand from the Book, not just so... They are subject-based and active in exactly the same way as deadly viruses. Fighting them is the primary and key battleground today. Greed, Fear, «Freedom», their name is Legion. They're especially happy if you don't believe in them. The Enemy exists, Outside, Inside, and Beyond – it's time to face it. The spiritual today is already material, you can't win without even understanding what you are dealing with. The battle for Faith, Will, and Reason is the key battle of our day. For the very creative beginning of Life. Against the «order of things», for the Imperium of Man.

It seems clear why the Book of Wrath? So it began, the description of the true Enemies completely fell into the concept. Certainly the description of the problem was not enough, it was necessary to offer solutions. «Defeating the enemy» is part of every chapter. Inevitably, understanding the commonality of the Victory conditions required the idea to go further. Connect these threads and meanings. If there are common roots of Demons, then there are also roots of Salvation. There is their opposite, and it is not «angels», but only ourselves. Our Faith, our Will, and our Reason. Organizational, pedagogical, and spiritual conditions for the formation of a New Man. Victory forever. Complete elimination of the very causes of Evil, as far as possible. As you will see, eternal victory is possible only in eternal struggle.

With each passing page, it became clear that Victory could not only come from Wrath, but also from Joy, from Love, as well as from Hatred. Benevolent, of course. The same hatred that arouses a noble rage and ferocity against the Enemy of the human race and it's legions, who seek to turn the noosphere into a necrosphere.

The text itself, the very description of problems and threats, all this appealed to the search for solutions. This is the point of convergence for the discoveries and methods of all the **Key Books**: «**The common goal of human development and the biosphere: scientific foundations for designing the future**», «**The Imperium of Man: Era of Cosmatics**», «**History of Heroes**», «**World of Heroes**», «**Cosmoplan**» and the crown that connects everything – «**The Book of Life**». There can be no other name. It was finally born when the last dot of the last chapter fell on the paper. Years of work, experience, observation, scientific and spiritual search, finally formed a single system. Years not only of the authors' lives. Years of life of all those who fought and searched before us, found and did not give up. All those who did not live to see this final battle of Good and Evil for the future of our planet.

This Key is a necessary but not yet sufficient condition for a noospheric Breakthrough, for the conquest of the inner and outer Cosmos. With this Key, we open the world of the intersection of Faith and Science, a New Language of high speech, nature-appropriate education, management, and development. We are opening the doors to the scientific school of Russian Cosmism, to the scientific understanding of Sustainable Development of Life. In understanding the unified system of laws of Nature, and how they affect Society and the management system. You will find an indication of the required works in the text.

The books of the Key are of a unified purpose and you will find many mutual references here. Their significance lies in the fact that they do not require special training and are accessible to any thinking person. The application of the acquired Knowledge in subject areas requires the study of specialized literature, both from the Russian Cosmic Society and beyond. Moreover, we hope that Key Books will help our readers **create** their own subject works of the Future. Neither physics, nor mathematics, nor other sciences can be applied by a person outside the context of his worldview, philosophy, or «wisdomlove», more precisely. The USSR made a nuclear power plant, and the United States – a bomb, not because they had different physics. Because they had different goals. Goal defines the meaning. **Key books are a tool for creating a worldview.** Everything else flows from it.

«Nothing is more practical than a good theory,» because Books are not direct-action documents. A new way of thinking, a new Faith is already an action, but this is not enough. Faith without action is dead. If, after reading them, you don't understand what to do or where to go, then read again. The Russian Cosmic Society says: **do it with us, do it yourself, do it better than us.** Most importantly, in the direction of the Life of the next century in all senses. There is no goal more noble and unifying. **The past separates, the future connects.** We urge you to do one thing: before raising the voice of criticism and even praise, watch «Of the Future» video-lessons, study the manuals for them, fill out a Cosmoplan, read at least a Litmin of Gagarinets. Then we will talk in the same Dimension.

«The conqueror will also be clothed in white robes, and I will not erase his name from the Book of Life» (Revelation 3:5).

The Book of Life is not a dogma, for Life itself is the transformation of the impossible today into the possible tomorrow. The Book of Life is not for everyone, because the burden of Choice is great. The Book of Life is the first Book of Initiation, for the one who holds it will never be the same. The Book of Life is not finished, for it is being realized, and a single Appendix opens the veil of what is to come.

Finally, the Book of Life is the Book of the Fathers.

The Enemy – Greed

«...what does it profit a man if he gains the whole world and loses his own soul? or what ransom will a man give for his life? « – Matthew 16: 26

True Name

The familiar name of the enemy is always a deception. Too simple, too familiar. Almost homely. Just a human flaw, who does not have one? A little «greedy», but the person, in general, is good. To think so is a lie and ruin.

Usually, «greed» is understood as an unwillingness to share, attachment to one's belongings and wealth, and a heavy feeling when parting with them. Attention, the question is, why does a person feel this way? What is the root cause of Greed? This is the most important knowledge. Here is the True Name.

The devil is in the details. No one wants to waste resources. We will not call a man greedy for avoiding to invest in a dubious enterprise, or spend money on entertainment. It is also clear that the average person is not expected to work at the expense of himself, and only the saints give the last shirt (this is the highest valor and is discussed in our other books). Therefore, not every purpose of parting with property is justified and it is reasonable. In fact, for a greedy man, no goal is justified. Except for one – even more accumulation.

The demon of Greed is treacherous and secretive. It manifests itself not so much in what a person does, but in what he thinks and feels. Social pressure, upbringing, can force a person to behave appropriately, to suppress greed. Moreover, the very concept of «property» differs between the poor and the rich. Remember the parable of the widow's mite. For a rich possessed, giving small alms, showing off your «generosity» simply doesn't count as a loss. It's not even stuff, just dust between your fingers. A greedy man does not want to part with what is significant. Because there is nothing more significant for him than the possession of property, wealth.

Greed, left alone, gradually devours the man whole. He becomes the destroyer of Life. His passion for possession is transferred from the material to the spiritual, to the soul. He also wants to «possess» his loved ones, women, and people. For God's sake, the possessed came up with the idea of «having a woman.» It seeks to control, control, and suppress free spirit, initiative, and hints of independence. Images of husbands and bosses, masters, businessmen obsessed with greed, are widely known and presented in world literature. Plyushkins, Sherlocks, Sobakevichs, miserly knights... Indeed, it would be nice to meet them only on the pages.

For such a person, even love, if it comes at all, becomes only getting what you want under your control. And then – careful maintenance of locks. Greed and its destructive «un-life» effect are grossly underestimated by modern society. The market, capitalist paradigm makes it almost a virtue. Even «wise» people consider it not the worst sin. Useful in the household. The enemy that you refuse to see, is the most terrible. It's time to put an end to this.

For the sake of love as the will to give more than to take. For the sake of life. We bring steel and flame to the demon of greed and reveal its **True Name: possessive obsession**. May no mercy be shown to him.

Face of the Enemy – Adults

Providentially, the book begins with this demon. Greed has distorted, or defined, the history of the planet like no other Enemy. Read, «pre-History», as we know in the Russian Cosmic Society. At the very dawn of the days, greed served as a pretext for wars, robberies, and massacres between human tribes. Unusual? Is it more common to associate a demon not with capturing, but with holding what is already there? So let's think better of it. Remember, «possessive obsession», not creation! And what is a predatory war, a raid, a night raid with looting and fires, with unlimited killing of «strangers» and the capture of their women? For centuries, it has been the easiest path to possession. Seize by destroying, not building yourself. Greed.

You might argue that the causes of wars are much more complex. Social, economic, and climate issues. That war and conflict can also have a positive meaning in history. That «if you want peace, prepare for war» and so on and so forth. We agree. This book is not against war as such. It is against a war that devours and reduces the power of us as a whole. Against a war motivated by greed! Remember the Imperial ethics, it is important not only what, but also why. War as a social phenomenon has many causes and prerequisites. It's true. Sometimes it can't be avoided, sometimes it's worth it. It's about something else.

Other books have been written about the sufficient conditions of predatory warfare. The important condition is «sine qua non», which is necessary. The psychological justification for such a course of action, the very paradigm that allows it. The first reason, the first demon. Greed. For the first time in history, we are at the stage of development where we are able to recognize the true face of the enemy and defeat him. Final defeat. Managing history with the help of Reason, creating the future, requires no less than finding the true cause and its True Name. Defeating a predatory war requires direct action, direct address to human nature, indoctrination, and conditioning from childhood. We will develop and provide them all.

You can then say that there are no good wars. That they are all the same. That aggression is always evil. This is a lie, the Imperium of Man answers in detail. Paradoxically, war can be an instrument of peace. The future world. Future consent. Like a child is being punished for its own good. Similarly, a noble war can unite nations instead of perpetuating an ever-smoldering conflict. Russian civilization gave an example of just such a development, just such a warrior-host and strategy. A war to ultimately give back more. This is the essence of Russian cosmism and the only hope for the development of Life without end. And if only one civilization in the world could provide such an example, it is already enough to show how the demon of Greed can be and will be defeated.

This demon is not limited to war. He is always there in a peacetime. Slavery, its offspring. The very same exploitation of man by man, which is still here to stay. «Talking tools», people as cattle, as a thing. Gladiator fights, killing one person for the amusement of another. Prostitution. Trade in the body as meat. The desire to have, not to love. Is all this a thing of the past? Take a look around, friends. Have the courage to use the True Name. At all times, the very fact of some people's fabulous wealth against the poverty of others is an obsession, as it is. Ostentatious, excessive wealth, which you do not know where to put, except to increase even more. Football clubs, yachts, villas, servants. When millions of your fellow countrymen and compatriots are in fact in the same slavery. Only for «salary». Yes, you can't help everyone at once, you can't change everything at once. But the larger your resource, the more pathetic the refusal to search for solutions becomes.

«Man is a wolf to a man». Attitude to other people as a resource, things, and source of income. «I am not my brother's keeper.» Denial of kinship, shared destiny, and responsibility. All this is a product of greed. In the end, the obsessive denies his own humanity. On Earth's spaceship, he becomes an alien, a parasite, an outcast. Such is the hideous and pitiful face of those who have submitted to the demons.

Do not be under any illusion, the modern world on the planet is organized and structured by the demon of Greed. We are so used to it that it takes a lot of effort to be aware of it at all. As soon as the desire to possess someone else's property, to take away someone else's property, to make money at someone else's expense takes root in a person's head. As soon as the idea takes root that it is better to have, while having more, it does not matter at the expense of what and for what. Then a destructive alienation of oneself from others is formed. The root of almost all evil. Others in this paradigm are a priori less significant, «second class». Isn't that natural? Could be, but greed doesn't stop here.

Once a person has declared his neighbor «second class», even if tacitly, he will gradually push the border further and further away. If it helps him

to take possession of someone else's property and justify the seizure. Justify your wealth against the background of other people's poverty. Unequal exchange¹! Greed will be justified by the fact that the stranger is from another tribe, another country, another faith, another race. That's enough. If at first you can just rob him, and this is «good», then later he is no longer a person. It can be exploited, enslaved, or killed. This is more convenient, calmer for the conscience that sleeps even in the possessed.

Looks like we're talking about something fantastic, aren't we? Read what «colonialism» is. And when did it cease to exist? Kidding. It didn't cease. Just changed the form. And so, we see the wealth and «American dream» of some against the background of «cheap labor» of others. We don't mind why there are so many «made in China» items. Well, there is cheap labor, everything is logical. Have you ever wondered why it is cheap there? Is it fair, honest, decent? Now you will say that «life is not fair at all»... and the demon will speak through your mouth. That's how we slowly justify slavery. Shamefacedly taking advantage of its fruits.

It's a long way from understanding the problem to solving it, but we need to start. Awaken your conscience. If you allow other people's slavery, it's only a matter of time before you allow your own.

Finally, the closest and heaviest blow of the enemy for us is the collapse of the Soviet Union, of course. Again, there are many reasons, but what is the human, psychic face of this process? Look closely and you will see a drooling grin of Greed. Ideologically, the course for the death of the Soviet system was proclaimed by Khrushchev in the 50s as «Catching up with America in milk and meat...». Catch up on consumption! When the creation has already gone far ahead. This is the moment of spiritual surrender and the destruction of the very foundation of the unique Soviet civilization.

The demon of greed is always there. Comrade Stalin and the team pressed him hard, and the complete victory was already visible. Formation of a new, Soviet man. Goal for a 4-hour workday, Creation Society... We didn't have time. Competition in the degree of consumption with the Western imperialist, colonial system of world plunder was suicide. Practically, because it was impossible to win in our conditions. Much worse, spiritually – because it broke the whole structure of the psyche of the elite, society, and the citizen. «What you look at is what you turn to.» If consumption is the measure of all things, then a society built for creation, based on the slogans of creation, will inevitably perish. At least because of the schizophrenia in their heads. When we say one thing and measure it with another.

It seems like a small thing, a system of measures and indicators. Small thing, enterprises should be evaluated on the basis of profit, and not on

¹ «Imperium of Man: Age of Cosmatics». – M: Variant, 2019, page 227

the basis of cost reduction. Small things, self-financing, the abolition of the currency monopoly, and so on. So slowly, step by step, the demons of Greed are becoming an official priority. If the West chews more, then we should chew like them. Impossible? At least strive. At any cost. And then? Logic. Then the Union republics begin to think about what they can get from the Union, and not what to give to the Common Cause. Each of us faces this temptation. It doesn't matter what the price is. Remember, Greed recognizes only one worthy goal – even more possession!

That is why millions kept silent when the Union fell, and then the Soviet Government. Because they hoped that it might be profitable for them personally. Without thinking about the Dream of their Fathers, the heroism of their ancestors, or the future. Millions. But not all of them. About those who did not keep silent – read the «History of Heroes». It is our responsibility before them that we write this book. So, the first socialist state in the world, created by Lenin, fell. Although, of course, by the 90s it was already socialist in name only. The management system has degenerated, the party elite has become corrupted, interethnic conflicts, wars, looting of people's property, privatization, crime, drug addiction, and so on have broken out. Millions have fallen in this undeclared war. Millions fell because humanity was not yet ready to fight its demons. To know The True Name.

Never again! If you think that the Enemy has miraculously disappeared today, then nothing is further from the truth. Take a look around. He became, if not an official ideology, then an official idol. And if we don't take up the sword, millions have fallen in vain. Remember.

Face of the Enemy-children

The enemy is always at the gate. Otherwise, he wouldn't be dangerous. The smaller the guards, the easier it is to get inside a person. Age alone does not strengthen defenses. An adult today is a child yesterday, and what was sown will spring up. If steadfastness, firmness, and a conscious attitude are not formed with all determination, then demons will take their place in the human soul. From his earliest days. The child is protected by the natural attitude to good, but only for a very short time. Further, what we say, and even more, what we do, begins to form an indelible imprint.

Probably, everyone is told in their childhood: «Don't be greedy.» But what do grown ups do? There is a need to «earn», «thrift», «success», «live as well as others» – ten thousand names that hide the Enemy. Ten thousand excuses to let him in. And now, the words spoken in childhood are completely devoid of their content in adult life! Not just the True Name, even the everyday word «greed» almost completely disappears from our

vocabulary. Checked it out? That's it. Everything that we would have called be the name of the enemy before, suddenly appears in the clothes of moral, decent and approved. Business, assets, competition, takeover, unemployment... This is the first problem that comes from childhood.

The problem of names.

The second is **the problem of actions**. And we don't even take the examples of total greed that a child sees in the media, movies, and adult behavior. This is already a finishing move. It all starts much earlier, at the age of 3–4, when the child is introduced to the material culture of our time. How? Very simple. He wants to have, not to become. Have a toy, a thing, a bike that he doesn't have. Get, play, and desire a different, new thing. How many adults will tell a child that «happiness is not in things»? That the very desire, the very dependence of his mood on possession of things, is already shameful? Even those few who are able to accommodate this will still often say «let him rejoice while he is small, he is a child!».

This fundamental mistake of modern education was pointed out by Y. Korczak. Treating the child as an inferior person, a «make-believe» man. Childhood up to 12 years is formative, the foundation years of a lifetime. It is in them that we must put all the rigor, all the height, all the integrity of a real man – the creator. Of course, a child is different from an adult, just as a man is different from a woman, and so on. It requires a different attitude, but not in principles, not in values! Otherwise, the very system of education is schizophrenia and hypocrisy. By telling a child a story that you don't believe in, that you don't act on yourself, you are already teaching them lies and petty hypocrisy.

As adolescence approaches, the problem becomes worse, and the self-consciousness of the child and the children's collective begins to form. Now the question is not just the availability of the item, but it's status! «Why do I have old clothes when I have ... new ones?» «Why do I have a simple phone when ... has a fancy one?» Etc. Let's be honest with ourselves. What is the reaction of parents in most cases? If you do not take the answers in the spirit of «get lost» and «because». The vast majority of parents try to buy their children what they want. No, not with the best of intentions. Because the urge to «be no worse than others» is the first altar of Greed.

Attention. It doesn't matter if your parents buy a new phone or can't afford it. In any case, the logic, the paradigm that «to have» means to be no worse than others, is accepted. Again, a chosen few will instill in the child a contempt for the very consciousness of «materialism». He's still small, he won't understand, the peers will laugh. Much easier to buy, right? And my conscience is calm. The child looks «on the same level». Please note that we do not say anything about the actions of the peers, taunts, jokes or bragging about expensive things. You can't change that directly. Everyone

can only change their own behavior, and absolutely everything depends on it. Temptations, trials, will come. What matters is how we meet them.

Once again, the enemy is treacherous. It seems that you either bought a phone or didn't buy it. That's the end of it. Not at all. We have just tacitly acknowledged that «not having» something can mean «being worse than others.» That «not having» can be a shame. That decency is the level of consumption. Monstrous things! From the very beginning of childhood, we immerse the child in an atmosphere of slavery to things. The next step is the cargo cult of the Birthday Party and the ritual of «waiting for a gift». We talk about the immoral nature of such «traditions» in the «World of Heroes». Now it is important to fix it. That even parents who are not personally greedy easily fall under the pressure of the environment. Indulge the whims of the child. And so, the demon of Greed triumphs. Possessive obsession becomes a social institution.

Further – more. «Study well so that you can earn good money in the future.» The question «Who do you want to be when you grow up?» has long been turned into the question «Who do you want to be in order to make good money and consume?». Few people ask what you want to do? What do you want to give to this world? Just what you want to take. But we will still pay special attention to the comparison with others. Because from here comes the key of an adult, bestial grin of Greed.

Dividing people into classes, levels, and assigning labels. «Poor», «not our circle», «can't afford», «beggar». In the beginning, it can only be said about a thing: «beggar's phone», «lame» or «cheap». It doesn't matter. If we do not definitely stand up for our child, we will not protect his dignity. If we do not explain that this dignity itself has nothing to do with things at all. If we do not teach him to challenge anyone who dares to doubt it. At any cost. If we don't do this, we will become accomplices. Accomplices of the division into «full-fledged» and not. What is sown in childhood, in the name of Greed, in adulthood, will become a justification for racial, class, property exclusivity and segregation. It will make man a wolf to man. Excise the demons at once, and without mercy.

Even a moment of complacency that you have something and another man does not will open a gate for them in your heart.

Defeating the Enemy

The demon of Greed is spiritual in nature. To overcome the spiritual, one must act and turn to the spiritual. The most comfortable living conditions do not eliminate mental vice. Often, on the contrary, they contribute. Obsession doesn't heal through a big paycheck, getting what you want, and meeting every conceivable material need. As we have already shown, then

the possessed will either start inventing new needs (the entire consumer society is already engaged in this!), or he will want to possess people. The strategy of victory must be firmly aimed at recognizing and eliminating the very demon of Greed. The earlier in life a person learns his True Name, the better.

From **childhood**, teach the child of the inferior nature of the world of things. The spirit rules. Buying new items should be rare. Let the child learn to play, fantasize, invent new games with old toys. «An old friend is better than two new ones,» always remind them. Help your child, fantasize, and play with them. Give him your attention, warmth, and time. But not things! Let them learn to cherish the priceless and unique.

The cult of the gift must be instilled from an early age. Never should a child get something for saying «Mom buy me...» or «I want...». This corrupts and devalues the gift itself. Such a request or question should be completely excluded from circulation. There are only two ways to get what you want. The first is to earn it. Every child can do something good, useful, and challenging at the same time. Clean the table, wash the dishes, sweep the floors, etc. Get an excellent grade in school – why not? It is better, of course, to choose a task that goes beyond his usual duties. Something that requires learning new things, new knowledge, and overcoming yourself.

Thus, the child will get used to work. It will have its own «price» for each item. He will remember how difficult it is to get it. Do you think they will appreciate it more or less? At the same time, constantly build your child's belief: «Your act of valor is valuable in itself. It is the main value.» Praise and encourage them to behave decently. Pay as little attention as possible to the «gift» itself. Yes, that's right, in quotation marks. Because it's certainly not a gift in the true sense of the word. This is a prize, loot, reward. A child can and should feel proud. «He did it, deserved it, himself. This is not a handout from adults. This is his right. He is the creator, the creator of destiny.» The most important setting is to become, not to have. Believe me, over time, the very image of the thing for which the feat was performed will fade into the background. And then it will disappear altogether, replaced by the need to create, manage your own destiny and the world around you.

Give instructions to your child for every occasion when someone in his environment will show off a thing. Let them ask «what and how did you deserve this?», let them talk about their experience and let them justly laugh at those who are only able to take someone else's things. From childhood, such behavior should be despised, publicly and mercilessly. If your child is the one who throws the first stone – honor and praise. A proper upbringing gives him that right.

The second way to get what you want is actually a gift. A secret gift. It is based on good, free will. Any formalization destroys it. The gift «on

occasion» is no longer free, the gift that is expected is no longer «good». You probably know the childish (unfortunately, not only) disappointment when given the «wrong thing». A pathetic, disgusting sight. The child sees the holiday, or mom and dad as a source of things. He doesn't care about goodwill. He wants the thing, not the attention. Such an installation must be eradicated. Teach your child to appreciate the attitude, attention, freely shown, and not because the time has come or «everyone is given, but I am not». Explain, tell, and use parables. Moreover, let the best gift be not a thing at all. Impression. A joint trip to the forest, lake, rope town, paintball – anything that requires active participation. Let there be something to remember!

Good will manifests itself freely, mysteriously, and unexpectedly. This is the secret meaning, the magic of the gift. It's a surprise, it's an unexpected joy. Everything else is just a form of tribute and offering to the demon of Greed. Among peers, the child should be proud of his family, his parents, tell what they taught him, what they did together, and not what they «gained». Get him used to it, no matter how difficult it is. The time will come, and the child will see how much different it is from the world of the possessed. You will give them an independent sense of pride and self-respect that they have earned by right. The sooner these seeds are sown, the stronger they will grow.

Don't let any opinion of the «public» stop you. Most succumb to demons. The best crush them. To give up without a fight, to become «like everyone else», of course, is easier. It's not even a choice, it's a refusal to choose.

Adolescence imposes an even greater responsibility on us. This **is the time of «interpretations»**, when the child does not just see examples and experiences, but tries to build a picture of the world, to find his place in it. He understands, «interprets» events, books, films in such a way that this picture is formed. He does it himself, thinks for himself, the authority of parents ceases to be unconditional. This is not a problem, but a great opportunity!

Unconditional authority is undeserved authority, accepted without understanding, without reflection. In truth, such an authority is not real. This is a pure suggestion, a childhood memory and a habit of having big and strong parents. If you don't maintain your parental authority as your child grows up, it's not your age, the media, or the school that's to blame, but only yourself. If the «biological» authority is not replaced by a well-deserved one, then this is only your responsibility. Similarly, the fact that «you feed him, water him, and clothe him» is absolutely not enough. Everyone does it, and some of them better than you. So what is there to respect? When we play this game, we feed only the demon of Greed.

Earn the respect of the child, as you would earn the respect of any other person. Remember J. Korczak. Generosity, justice, intelligence, firmness of conviction, honor and valor. Share your achievements! How we taught him

to achieve and earn it. So now it behooves us to do it ourselves. Strengthen the sown seeds. What are you good at? What is worthy of respect, example, and admiration in you? In what ways your child can and should look up to you, even if you would not be his father? If there is no answer, then it is time to think hard.

Yes, the child will fall under the influence of the Internet, the street, bad companies and anything else. It gets there because it's part of the outside world. This is unavoidable. Complaining is not just useless, but downright harmful. That is why you are given to him, to prepare! Nurture, temper before impact. Realize this and act on it. Do not try to «prohibit» and hide the Enemy's actions from him! Declare direct war. Tell us about the demons. Call the True Names. Make him your ally, involve him in the most serious business in the world. Fight for the Imperium of Man, for survival and victory forever. What could be better for a child than to work with his father to save the world? This is exactly what we are doing now.

The forbidden fruit is sweet. Do not fall into the trap of weakness, do not forbid the child anything. It just doesn't work. On the contrary, study the Enemy with them. Discuss it as adults. Yes, drugs, pornography, stupid videos on the Web and other costs of the consumer society. Just as you teach a boy to fight-to protect his body, you must teach him to protect his soul. No one but you will do this, it will not happen by itself! At best, the child will find another worthy teacher. Explain who creates these materials and why, and how they affect the person. How pathetic and insignificant they are. We forbid what we are afraid of. A true man is not afraid of drugs, he despises them. Considering the lot of cattle and creatures that only outwardly resemble people. So raise your child. In strength and hatred of the Enemy.

Bans, shouting, rudeness-will not help you win the child's heart. Do you want to cultivate dignity? Treat them with dignity. Listen to their opinion and make your own arguments. Yes, you may eventually insist and demand, but first explain the wisdom and justice of your decision. Bans are humiliating. They mean that the child is not able to understand the Enemy, that his word is worthless. This is an insult to him, and therefore to you, the father! From childhood, teach him to be responsible for words. Take responsibility. Honor is everything. It is more precious than life. Learn to trust him until the very end. Until the last line, when his deception or lies will be proved irrefutably. If you don't believe him, who will? Who will show him that he is worth something?

You don't have the right to demand something from your child that you don't do yourself. This is the hardest thing to accept. Talk about physical fitness and willpower when you've grown a belly yourself? Demand a good study when you have long stopped reading and developing yourself every day? Fight for his health when you consume alcohol and cigarettes yourself?

Then it's better not to fight. Less hypocrisy. If you think that the child does not notice or understand anything, then you again consider him subhuman. He notices everything and sometimes understands it better than we do. There is a good saying: «Don't raise your children, raise yourself, the rest will follow.» There is a very deep truth in it. Words have power when they are believed. But you can't pass on more faith than you have yourself.

Pride is power! In the golden measure, of course. Those who are unable to realize themselves in the creation, willy-nilly slide into dependence on things. Build pride from a young age. Pride in your achievements in sports, studies, creativity, and knowledge. Give your child tasks and reward them for completing them. Send them to contests, competitions, and hikes. Let them be far away, even if not cheap. This is the best thing you can do. This investment builds character, and it's priceless. Teach them to win, but also to lose. The true courage of someone who knows how to lose a hundred times, and then still rise to the challenge! In general, show life as a game, as a hunt. By personal example, when a child sees that you are passionate about something other than earning and spending money, he has someone to take an example from. Life is a bright flame, not a squalid decay.

Pride is a level. This is a bar below which you can not fall. This is a requirement for yourself. Commitment to excellence. When it has entered into the flesh and blood of a man, he will never again stoop to the level of animal passions, will not kneel before Greed.

Give your child what coin can not – your involvement, time, and attention. But also remember that he must meet and defeat the demons separately from you. That he will have a life of his own. Trust and let go. If you have become an authority for him, earned authority, then he will share with you both grief and joy, and about friends, and about girlfriends. The latter should also be dealt with, but carefully. «With whom you will be led...», as you know. Invite his friends to your house, but not for idle entertainment, but for tests, hikes, events, work trips to the country, etc. Encourage this type of spending time. Send them to the mountains with your child. Let them get to know each other for real. Explain how to separate the wheat from the chaff. Ask your child's opinion, not dictate your own. Let him understand for himself what he and his friends are worth. Push, but don't substitute his mind. The knowledge gained in effort remains forever. The opinion of the parents will remain the opinion of the parents.

Finally, with a strong sense of pride, orient your teen toward the future. Teach them to clearly distinguish between the two questions «Who do you want to be?» and «What do you want to do?». Being someone is a passive status, and by asking such a question, we deceive the child, not explaining to him what he will actually have to do. As a result, we have a false motivation

when choosing a specialty, life path. «I want to be a lawyer so I can make a good living.» This is an example of a false choice, in fact, such a person does not want to do anything at all, but only has to. He wants only one thing – to receive money. The less you create, the better. A direct path to the service of demons.

Firmly and steadily educate your child to despise and hate this way of «living.» To deny the way of a sponge, a fluke parasite. Let him decide from a young age what he wants to give to this world, what to serve, what he will be proud of in the future, for which he is ready to fight and die. For a man, this basic question should be put directly and the earlier, the better. We raise our children for **a dignified, heroic death**, because all others do not require any training or upbringing. Realize with all determination, without hypocritical silence and lowering your eyes! People, most often, die, and there is no choice. The choice is how to face eternity, how to stand Trial. That's all that matters.

«I want to fight evil», «I want to become a sanctic warrior », «I want to discover new worlds», «Fly where no one has ever been before», «Create works of art», «Treat people and fortify their health», «I want to teach children, pass on knowledge and skills to them, ennoble» – these are the correct answers to the question «what do you want to do?». Everything else is just an imitation. Remember.

It may seem that this is the universal wisdom of a parent. In this case, we are talking about spiritual contact because its absence inevitably pushes the child into the arms of demons, into the world of things and possession. Do not miss the moment when the character of a man is still being formed, while it is still possible to influence it.

When a child finally **matures**, it is difficult to talk about the formation of his character. First of all, because the «adult» considers himself a whole personality that has already been formed. An adult does not allow himself to be taught, has difficulty recognizing authorities other than his own, and has even more difficulty changing his beliefs. We pay attention to our beliefs, not our actions. Demons live in the soul, can wait and hide for a long time, as long as it is profitable. But the very motivation of behavior for the sake of profit is already a sure sign of an obsessive!

As a consequence, for the majority of the adult population, we can talk about the organization of social practices that suppress the phenomenon of demons. Including to neutralize their effect on the next, younger generation. What is difficult to destroy must at least be suppressed. Let people at least behave with dignity, as creators. It is possible that the habit will become second nature.

What gives us hope is the fact that most people are not directly tempted by Greed. It is not the possession of things that is valued by them, but the

status that is associated with possession. Roughly speaking, people want respect and reverence much more than the actual possession of things. The problem is that modern society knows only one way to demonstrate (!) status – by the level of consumption. Almost from childhood, the image of «rich, therefore successful, respected» is planted in people's heads. I want to emphasize that the system of statuses and ratings is an independent sphere in the public consciousness. Yes, the market economy contributes to the formation of a certain type of thinking, «measures everything with money». But it is not a sufficient condition. It is possible to create a different system for demonstrating and evaluating the status even without changing the market basis itself. Although in spite of it.

For more information on how to achieve this goal, see the Imperium of Man, chapter «Game Society». The implementation of the methodology on a society-wide scale is not yet in our hands. But you, dear reader, can already fully implement it in your family, team, school, enterprise, office. So, step by step, an example will be created, and then the foundation of a new system and consciousness.

The essence of the method is that a person receives visible symbols of respect and recognition for creative, developing activities, for building, and not for consuming and destroying resources. After all, the main thing is the rules of the game adopted in the team. The «Excellent Production Worker» badge will mean exactly as much as you can inspire respect for it and provide it with your sincere attitude, rituals and symbols (and even the right to go home half an hour earlier, or a board of honor). You don't need money here either. Only the will.

The «Book of Life» is designed to establish Life, and therefore to unleash hatred of the enemy. Intransigence. Something that everyone can do in their own place. It binds other books of the Imperium of Man project into a single silver chain of warding. A Book of True Names, a book of Keys.

How do we defeat the demons of Greed? By knowing their true face and True Name.

How do we defeat the demons of Greed? By declaring war, banishing them in yourself.

How do we defeat the demons of Greed? By creating a circle of purity, raising children, calling the Enemy by his name.

From the true word – to the true thought. From true thought comes true knowledge. From true knowledge comes true action. By the power of Heavens, we will eradicate them.

The Enemy – Fear

«Those who are afraid to die are actually afraid to live»

True Name

It is believed that fear is a natural and useful part of human nature. That «only a fool is not afraid». Almost everything is true, just not natural and not useful. Demons are insidious and cover themselves with a layer of half-truths, myths, and superstitions. They hide in plain sight. Otherwise, they wouldn't be demons. It is our duty to put an end to the misconception about the «naturalness and usefulness» of fear in the most ruthless way. Bring light to the darkness.

The very idea that «natural» is synonymous with «good» is a myth. First of all, this is due to everyday and incorrect understanding of the term itself. Usually «natural» is understood as innate, biological, inevitable. These three words are much more accurate: instinctive, reflexive, unconscious, indeed. «Natural» is chosen as a word – a disguise, an excuse for mistakes, weaknesses, and shortcomings. This is the first lie. A person's nature is not his body.

The nature of the phenomenon – the main, key properties, differences from everything else. For a temple, it's not the walls, ceiling, or dust on the windows. This is faith, an encounter with the Deity. For a person, this is not his instincts, innate reactions and physicality. In this way he is no different from animals! Even inferior in everything: in speed, strength, fur, claws and teeth. Man's nature is that in which he excels, his unique role in the history of Life, is to be a creator and conqueror. This requires intelligence, imagination, courage, firmness and a whole range of Noble Qualities (see «World of Heroes»²). This is the nature of man, his integrity and vocation. The only thing that can be «natural» and true for us. The other is from the evil one, the demon.

From the first lie follows the second. Having declared matter, biology, a measure of good, we are called not to fight it, not to resist it. «What's natural isn't ugly,» «You can't go against nature,» and so on. This is so hypocritical that it's even funny. We treat congenital heart defects, cover our «natural» bodies with clothing, upload information to the brain that was never there, and the list goes on endlessly. We constantly resist, remake, develop what was given to us by nature. Only one question remains. Why is fear specifically declared something that needs to be preserved? Because it's so convenient to justify your weakness?

² Russian Cosmic Society. «World of Heroes». – M: Variant. 2023

Awareness of the problem is half solution. Changing your mindset is extremely important. The demons of Fear must be dealt with. Forever. Don't make excuses for them, don't feel sorry for them. Expose and excise. The fear of failure, of being judged, has buried countless audacious and original projects. Fear of responsibility destroyed great powers. The fear of death led to the most heinous crimes and treachery. The fear of the unknown ... hits us every day. Not anymore. Never again will the demons of Fear stop our minds or our hands.

Fear is the power of the unfulfilled. It is a meaningless and painful experience of failure or suffering that doesn't exist yet. Since they are unavoidable – they must be courageously accepted. If not, then you need to act, not be afraid. Fear is a preference for «not to be», «not to do», «not to become» instead of rising up and paying the full price for superiority. For trying, maybe unsuccessfully, but gloriously, to make the impossible today possible tomorrow. Under the influence of fear, we lower our eyes and figuratively, or actually, curl up in a ball and cry, pretend to be nothing and do not accept the challenge.

What is the preservation of self for the animal, the inert matter, that is, the loss of self for man. Non-being. Submission to entropy, Chaos, and the dead laws of an inert nature. Courage is a sense of moral self-preservation. For this goal, we call **the True Name of the demons of Fear: «the power of unbeing.»** Feel how it sounds! Instead of «he was afraid» – «he succumbed to unbeing», «bent under non-existence». The power of a True Name is that it sheds a merciless light. Chaos cannot be excused or forgiven. Our book opens the way for Life to prevail forever.

Face of the Enemy – Adults

Just as greed largely determines international politics and the economy of this day, so fear is responsible for everyday life, law, and administration. It is no exaggeration to say that we live in **a Culture of Fear**. You can doubt and reproach us for exaggerating the colors, is it really so bad and are demons everywhere?

«Bad» is an evaluative concept. Compared to what? Have we seen the world after Victory Forever? No. It's hard to even imagine it in detail. The current state of affairs has been shaped by centuries of pre-history, it seems natural and familiar. The projective image of the new man and the new world is created in our other books, «The common goal of the development of humanity and the biosphere: scientific foundations for designing the future», «A Word about the Beginnings», «The Imperium of Man», «The History of Heroes», the science fiction cycle of the project³. But compared to this image,

³ <https://imperium-cheloveka.ru/books/plotoftheuniverse>

is everything good? No. There is still an infinite amount of work to be done. Are there demons everywhere? Of course, this is their nature, which is inseparable from ours. So is all lost? Of course not. We have the power of Life and its laws on our side. There are many beautiful things happening in the world. People defeat the Enemy and evil every day. They create new things, they create reasonable things, and this Book itself is the best symbol of hope!

The power of demons is great. But we are stronger. A village already stands upon one of the righteous. Ten turn away the wrath of God.

All this is not a reason to mitigate the severity of the assessment. This is the dream of all Enemies, «to convince the world that they don't exist.» There is a culture of fear, and we face the monumental task of transforming it. Don't believe me? Take a look around. There are guards everywhere. The doors in the houses are iron, on each floor – iron, in each apartment – iron. Cameras on roads, at entrances, in elevators. You must (!) have your passport with you, as well as your driver's license, insurance, and PTSD in your car. And God forbid you forget anything. You are monitored by traffic police officers, you are checked by traffic controllers. At work, you must constantly prove that you did everything right. That you are neither a camel nor a criminal. And this is just the beginning. Have we described a culture of trust or fear? Good question.

Try it on yourself? Do you like it when people don't believe you personally? Do you feel respected in this situation? The value of your human dignity? No. And when the same attitude in society goes to everyone and everyone from childhood – is this already the norm? It turns out so. And the demons laugh. After all, what is unbelief? This is the fear of faith. The conviction that you can't trust people. They can betray, kill, steal, deceive, and so on. The system expects (!) this from people, it is designed for this. You count on it every day when you turn the key in the door lock. When you are afraid to go alone on a dark street and even more so, send a child. How thin is the veil of comfort, right? «Man is a wolf to man,» says Greed. «Man is a wolf to man,» Fear smiles droolingly.

Closed masks and social distance became a sign of the times. Do I need to say more? The pandemic is the apotheosis of a culture of fear. Her triumph.

Maybe this is the case only at the everyday level, and the plans and intentions of a high state extend to a bright future? After all, the system must plan something bright, positive, creative? Remember The True Name – «power of unbeing». See her in the flesh. Remember, this is the power of the unfulfilled, of what is not. There are no grand plans to conquer Space, oceans, eternal life, a billion population for Russia, etc. No and not expected. After all, it is difficult, it is necessary to think, take risks, make the impossible today possible today tomorrow. The very absence of such plans, such an agenda, such issues on the lips is already a sign of the times. Already a ghost of Fear.

Schoolchildren in the Soviet Union designed and dreamed of starships. What are they designing today? Good question. But it's safe and the documents are in order. Creating a future that is bright, beautiful, and powerful requires courage, risk, and resolve. Mistakes, failures, and defeats are possible. Who will take responsibility for them? Who is responsible for the future in Russia? «Give me an answer. Doesn't give an answer.»

The strategy of scientific and technological development of Russia until 2035 provides for the development of huge budgets. But what are the specific goals? What should science do? Teleportation, cancer treatment, flying cities? Nothing. The state does not set any specific tasks for science, except for budget development. «Number of specialists, number of research centers, number of publications». As if the task of scientific institutions is to produce publications! As you name a ship, so it will sail, Captain Vrungel also knew.

This is the mark of Fear. There is no measurable result, and there is no responsibility. It is easier to avoid action beautifully than to come true in work. Not to mention the fact that a year after the Strategy was adopted, the minister and his team who formulated it were replaced. Who will perform it? Sad and funny.

What about education? Who is responsible for its results? How are they measured? For now, we'll touch on higher education. Just talking about adults. If science does not set clear goals, how can education set them? Is it really possible to seriously argue in your right mind that the result of the university's work is the receipt of grades and the release of an abstract «specialist»? He doesn't even have to work in his specialty! The university is not responsible for this. And who? Who is responsible for what the country, the people, and the future need? Who needs to be trained and how much? For what projects? The very fact that higher education takes place at random, at the request of applicants, or for money, is already the property of comedy, and not a rational management system.

«We need specialists. Of any kind you want. As many as you want. Just get a higher education.» Does it look like a joke? This is reality. But Fear, fear of responsibility for the future, makes you accept and get used to it. Don't ask questions, be like everyone else. Can you imagine the enormous damage that the demon of Fear alone does to the national economy? How much does the power of unbeing cost us all? How much money has been wasted, how many man-years have been wasted in imitating education, how many great scientists, talents and geniuses have failed because they were not in demand! Because the society did not call them and sent them to «earn» their daily bread. It's also easier, isn't it? Calmer? Not to be.

If the goal-setting system is affected by Fear, then the executive branch will also be riddled with it. After all, they do what they are instructed to do. It is important that «nothing happens, just in case». As a result, by-laws,

departmental regulations, sanitary norms, job descriptions embody the attitude to unbeing even more diligently.

We want to pay special attention **to the ban on valor and weapons**. For honor and strength. Carrying weapons is prohibited in Russia. The use of force to protect honor, dignity, or property is prohibited. The use of force to protect yourself from threats or promises to do harm to you, your children, or your family is prohibited. But if they are already being killed, then you can... We feel stupid just writing it, and this is the current law and established order! We will talk about the ban on fighting for children later. Are you or your woman being insulted? Tolerate. Did they break your car mirror? Tolerate. Drinking and smoking on your playground? Tolerate. Call the police or go to court. After all, you are not a man but an empty space.

Attention! We are not saying that violence should be uncontrolled and widespread. That this is the preferred or desired response to any challenge. Absolutely not. But the possibility of righteous and immediate retribution must exist inescapably. A culture of retribution. As we say, this is «not necessary for the dead, it is necessary for the living.» So that the enemy will think twice, wary of the strength of the Russian heroes. And yes, let every case of violence even potentially be dealt with by law enforcement agencies. Let them sort it out. Society has the right to judge whether the scoundrel deserved his due. This said, there must be a fair, justified, socially approved reason for using force. A noble force, a force for good. Now the law recognizes it as a rare exception, and not a rule at all. The rule serves the unbeing!

Banning guns doesn't just create a pathetic cult of fear of them. It directly protects criminals. How long would the shooters in Kerch, Perm and Kazan last if even a security guard had a gun? Not to mention teachers, adult students. We think that the very phenomenon of «shooters» simply would not exist. It is one thing to go to prison (and if you are lucky, you will be recognized as insane), but it is another to risk your life right on the spot. In the society of cowardice, «shooters» get their share of fame, screen time, and attention. Some people are willing to pay a high price for just this. In the society of heroes, they get shot and die ingloriously.

Even without a gun! If only men, even children, were trained to fight and die with dignity, as we have already said, and not to drag a shameful existence. Then the losses in each case would be much less. The shooter in Kerch killed forty people, having a pump-action rifle with manual reloading. Very slow and inaccurate weapon. Any three people, even children, who rushed at him from different angles, would have reached the target and neutralized the criminal. Perhaps by losing one. One, not forty. Who chooses honor saves life. Who chooses dishonor gets both death and dishonor.

What kind of behavior are your children prepared for in this situation? Who tells them about guns? What kind of exercises and trainings are

conducted? Do they absorb the spirit of heroes or listen to the demons of fear? Good question. Anyone who has lost loved ones in these events knows firsthand what the price of the power of unbeing is.

Most importantly, the ban on self-defense weapons is entirely subordinated to fear by nature. So much so that it is absurd from the point of view of reason! Let's explain. For the criminal, the ban on carrying and storing weapons does not matter at all. No criminal in their right mind keeps a gun for it's own sake. A weapon is always a tool for committing another crime – murder, robbery, terrorist act, etc. Think about it! If a person resolved to kill another, take hostages, does he care about the article «for illegal possession of arms»? Is it stopping him from committing a much more serious crime? «Possession» is just a supplement, and no one remembers about it anymore. Yes, it will technically extend the term. But the criminal hopes to either evade responsibility altogether, or is ready for any punishment (despair, revenge, insanity).

You and I don't need any term! For us alone the article for «possession and carrying» works. As a result, the ban on carrying weapons serves only to **make victims of honest and decent people!** To form the victim's thinking and psychology. To please the demons of Fear.

This is just the beginning of a culture of fear. **Chaos is a non-being that perpetuates.** A vicious circle. Having penetrated into everyday life, demons begin to create their own cult in the truest sense. It is our sacred duty to expose and destroy it. What is it? In popular culture. In the «entertainment» industry. In popular literature. Ask yourself a question, check the statistics, which genres are the most popular and in demand? Mysticism, murder, detectives, monsters. Without exception. No, not all popular culture is like that, but themes dominate. These works don't fight fear, they enjoy it! They use it. Tickle the nerves, cause adrenaline. So that after viewing/reading it, the consumer will look around, exhale and be glad that all this is «not real».

This is also how the spirit of the victim is formed. Passive observation of the suffering of another, even not so passive-with interest, with passion! What does it achieve? It pushes the boundaries of what is acceptable. The wildest violence, cruelty and perversions are already taking their place on the shelves of various stores. Age restrictions are just a shamefaced fig leaf. The very existence of such a product humiliates the civilization that allows it. **Fear as something desired, bought, violence against the innocent is a spectacle.** It's not even the gladiators of ancient Rome, it's much worse. It is the hideous face of the power of unbeing, of nothingness. The very fact that you and I calmly admit this and have not yet united in an relentless crusade for purity of spirit and heart is already our fault. From this page, from now on, start the action with us. Start without out, start alone, but dare not stay idle! Knowledge creates responsibility.

The consumption of fear, the culture of fear, is all the more wretched because it does not teach us to resist it. It makes it a way of life, a habitual and correct reaction. «Only fools know no fear.» Exactly the opposite. The higher the awareness, the weaker the power of unbeing. We are not taught to stand up heroically to a horror, a monster, or a criminal. Face it boldly, defy the danger, go forward against all odds with fire in our eyes. Take the fight, don't fall to your knees before fear. All this is not found in popular culture. A conscious, firm choice of our Fathers: **honor above life**. Such words today border on extremism.

The contradiction between the widespread culture of fear and the actual ban on the natural reaction – «fight» – leads to mass psychosis, the decline of masculinity and the degradation of the image, the model of manly behavior. At best, image of a warrior, a victorious creator is seen on the screen if such a positive image is opposed to fear at all. We can cite many examples where the entire work of «culture» contains only fear and wretchedness. We don't want to soil the pages of the book with examples. Even a positive image of the hero gets the label of «aggressive» today. Contradiction, cognitive dissonance. We write about this in the chapter of the Imperium: «An aggressive hero is a healthy hero!»⁴.

Before our eyes, the image of a woman's behavior becomes predominant, desirable, and approved. Girls. Quiet, diligent, obedient, comfortable. And this image is not bad in itself! The lack of his other half, courage and valor, harmony is bad. The absence of harmony is Chaos, entropy, and death in the end. **The culture of Fear is a direct expression of the necrosphere, the power of unbeing.**

Knowing the True Name, using it, is already a blow to the enemy. Let not our hand fail. Before it's too late. Because demons, having taken over the minds of adults, penetrate the world of children. Create and perpetuate a vicious circle. Evil never sleeps. What about us?

Face of the Enemy – children

The culture of fear, having taken over the world of adults, creates a paradoxical situation in the world of children. We live in the 21st century, when there are cameras, security cameras, mobile phones, police, and so on. The safest era in history. However, children are literally immersed in an atmosphere of fear and apprehension. «Don't go alone», «don't talk to strangers», «take your phone with you», «callback», «unsubscribe», «you can't go there», «it's dangerous» and so on. Some of the restrictions are perfectly fair and protect children from their own recklessness. But only a small part. In general, dangerous seeds of fear are being sown. The world seems to be a

⁴ «Imperium of Man: Age of Cosmatics». – M: Variant, 2019, page 200

source of danger, you can't trust it, you can't look beyond it, or something will happen. The best thing you can do in relation to the world is practically «not to be», «not to do», «not to try». The safest place is at home, on the couch. Don't forget to close the window. Do you recognize the motives?

There are dangers in the world, this is a fact, the universe is not a playground. The question is, how should we face these dangers? Face to face in a fight, or pretending that they (or us) are simply not here. Of course, there is not much that children can do, although their potential grows rapidly with age. But tell me, when do they start preparing for fight? To the feat. To determination and rigidity, to firmness and responsibility. At what age and in what educational institutions? When is it «time»? Again, there was silence. «Better well and never», as in the famous joke. I would look with interest at the guidelines for training heroes, fighters and commanders, brave scientists and brilliant builders. But they are not created by the modern education system. Something will happen by itself, in spite of? A good development plan.

Chaos and evil are born on their own, they don't need to be nurtured. **The lack of necessary valor is already evil.** The current parenting system forms only one preferred response to a threat – «avoidance.» From the point of view of evolution, this is called «degeneration». Nothing personal, just science.

Don't believe me? Let's check it out. Ask a kindergarten or school if you can fight there. What are the rules for resolving conflicts? Actions in case of danger? Do you think that after the shooting incidents in schools, they began to talk about weapons and the psychology of fighting? How to neutralize the criminal with the least blood? Not even close. What should be done? «Pray that this doesn't happen to you.» The whole answer, it turns out. In the event of a fire, who should save the younger ones, stick together, help their comrades? Someone else, but not the children. Someone else, but not you! Well, the most interesting thing is, what should we do in case of a conflict? Tolerate. «Solve it in words.» Because words are relatively safe. Right? It is not for us to be responsible for our words. It's from another world. The World of Heroes.

If the conflict is resolved in words, then it is not a conflict, but only a misunderstanding. To deny evil is to prepare children as victims. Evil exists and its face is terrible. And we don't even start talking about real pathologies, maniacs and murderers. Although they do exist. They're close by. We are talking about everyday evil. About theft, meanness, insult, mockery of the younger and weak. When you meet evil, the time for words is over. The only words that the villain should hear are «I'm coming for you.» Battle cry and verdict. When you are threatened, fight. When your friend is insulted, fight. When the weak are humiliated in front of you, fight. Let no one get away with it. When the one who is ready to fight and the one who «decides with words»

collide, the conversation will be very short. The only environment where children are forced to solve something with words and it «kind of works» is a situation of direct adult supervision.

Only adults don't have their own adults. This situation is unrealistic and occurs only in childhood. «Call Mom, Dad, an adult, and the police.» Damn it! Who will the child call when he turns 18? When will he start solving problems on his own? Who will prepare him for this? The one who was also taught to «call an adult»? There is no other recipe in the book of Fear. What does «call an adult» really mean? This means the renunciation of subjectivity, the renunciation of decision, of responsibility, of being. Do you recognize the handwriting? Demons laugh when we treat our children as if they will never grow up on their own. It's like they have no future. Let's continue, and so it will become.

Childhood is a brief time when physical conflict is relatively safe for health and at the same time extremely useful for morality. A children's fight tests friendship, courage and clearly helps you understand what you are worth and what you are ready to stand for «to the end». Sometimes it is useful to pay for your own rash words and actions, it is not fatal, but very instructive. The culture of fear taboos fighting in general. Prohibits violence, no matter what it is for. It doesn't matter what you fought for. The use of force, and therefore any struggle, is prohibited. The one who fought is guilty. No one asks the main question: «For what? Was it right?» Parents are called to school. Girls are especially sacralized.

«You can't beat girls...» Who said that? No one offers to do it without justice! And if the girl herself beats you up and bullies you? Offends you? And not just you alone? We don't ask hypothetical questions. These are real and not isolated cases of school practice. Who was made guilty? A boy who fought back, even if he was very timid. No one tried to figure it out. No one was looking for justice. Fear does not seek the truth. Fear is looking for a way to escape responsibility. They even offered to transfer him to another school! Just to get away with the problem. What kind of heroes will such a system bring up? **The only way to get away with it is to be a girl yourself, or «not be» a man.** Cry, complain, and wait for someone else's help.

By no means we deny or belittle the merits of the unique patriotic movement in Russia. We'll talk about it later. Brave hikers, fencers, wrestlers and hand-to-hand fighters. In these informal groups, the fire of educating a real man often exists and will continue to burn. The key word is «informal», they already resist the system of fear, are exceptions, mostly voluntary employed in spare time. If the child is able to make such a choice, he already has a well-ordered mind, thanks to the family, God or the sacrament of free will. The problem is that even if thousands of children are well trained, millions will be left unattended. And here we come to another fundamental

fear of modern civilization. **Fear of nature.** It is completely embraced by adults, but carefully vaccinated at childhood.

Nature is not our friend or «mother» in the human sense. More like a stern stepmother. People enjoy admiring the views and postcards. They go for walks in parks. But few people see her true face. Few people have been to the beautiful mountains on their own feet, few people know what the Russian forest really is and have tried to spend at least one day there. Real nature is ruthless. It is cold and hungry, wild animals, mosquitoes and midges, swamps and dampness, rains and diseases. With the power of the ancestral spirit and mind, she was defeated. «With a strong arm and a high muscle.» Through fire and axe. It is bound by roads and canals, riddled with mines and pipes, built up with cities and sown with fields. In the course of a long and hard struggle. Through work and creation. What do modern generations born in warm maternity hospitals, with convenience stores make of it? They try to forget!

What percent of students went on a real hike at least once in their lives? How many of them know how to spend at least a day in the forest? And in the winter forest, in the mountains? Build a shelter, get fire and food? You don't have to answer, we know that very well. The state not only does not create conditions for the child to get acquainted with nature, but also prevents this in every possible way, no matter what happens. According to the law, it is impossible to organize a tent camp, especially a hike to wild places. This is not possible, because heating, bottled water, five meals a day in disposable dishes, and bio-toilets will be required. They are prepared by professionals, of course. Do you think we're joking? Get acquainted with the sanitary norms and regulations. The fear of nature not only won, but also secured its victory officially. Institutionalized, as they would say in a social studies course.

At this moment, we are approaching the main civilizational challenge of our time, as well as of future centuries. After all, the fear of nature is essentially a fear of struggle. The fear of having to fight every day for food, shelter, and safety. The habit of ready-made, clear, simple things. **The desire not to overcome!** You will say that it is natural to want to do less and get more. And this will be completely wrong. This is as unnatural for a man as the phenomenon of fear itself. This is the law of inert matter, not of Life. The formula is not even entropy, but accelerated self-destruction. To consume more than you provide is the ideology of parasites, cancer cells of unbeing. The fear of nature only reflects this challenge of the Age. Our ancestors had to work and create. Descendants raised to a new level of technology, massively move into the service sector and break away from the basics of life and victory.

Again, this is the first time a man faces such a challenge. Understanding and accepting it in time is a matter of survival of the species. Paradoxically, the qualities that raised our ancestors above nature are being massively

lost. **People reduce the scale of boldness, do not set great goals, and increasingly entrust care and work to machines!** And if only the cares and labors. There comes a time when machines are trusted with solutions. It is the ultimate expression of the power of unbeing, the fear of responsibility. So the person himself imperceptibly becomes no longer the goal, but the means. From here, a small step to recognizing this tool as superfluous.

Never before have millions of millions of children been so cut off from labor and valor. They do not know the deeds of men, nor warriors, nor creators. It's rare for a son to even understand what his father does in the office. A rare son can be proud of his father and take his example as a man, and not just a «source of money in the family.» In the key years of personality formation, the child is deprived of traditional tests, role models, and initiation. «Growing up» continues at least until graduation, and sometimes does not end at all. Because there was no challenge that would make a man out of the boy. Mass armies and wars are a thing of the past, so even conscription is no longer a sufficient school of life. As a result, against the background of the growing power of technology, Artificial Intelligence, we are witnessing a rapid decline of human potential.

This problem has never been encountered by our ancestors. There never met such conditions. However, frankly speaking, this is the «scourge of empires» – comfort and peace, only raised to a degree. To a degree the planet has never seen before. It is our sacred duty to find a solution to the problem, to understand the problem. We do not claim that the situation was created by someone's evil efforts, although the element of intent cannot be excluded. «It is impossible for temptations not to come, but woe to those through whom they come.» This is a challenge of the Cosmos. The only answer to the lack of «natural» tempering is to create an artificial one. Education of heroes, creation of warriors and scientists. Controlled, formative trials, difficulties, even pain and deprivation in moderation, should be built into a cult. Because «all by itself» doesn't work anymore. **Victory over the demons of Fear is a victory of consciousness and control, of History over chaotic Prehistory.** Victory of the power of Life over the power of unbeing. Not a step back.

Defeating the Enemy

From early childhood, a crusade must be declared against fear. Exorcism. Fear is outlawed, outlawed by nature, outlawed by truth. The child may feel fear, it is inevitable, but we should not condone and approve. This is a childhood disease that needs to be treated. As we heal and harden the body, so must we harden the soul. The child is afraid of the dark, the forest, noise, anything. It is necessary to form a firm attitude that **fear is not a reason to abandon the intention**. The intention is implemented with iron

determination, all the more so if obstacles arise! The child may say that he «does not want» to go to the forest, «changed his mind» to go through a dark corridor. This is a lie and it is our duty as adults to expose it, to know better. Otherwise, what for is our knowledge and experience? We believe the child, we understand him, and we will help him win. Whatever it takes.

Take him by the hand and lead him through the darkness, through the dark forest, through a terrible place. We respect his feelings, we will tell and believe what dangers may lurk there, but also how to overcome them. The child doesn't invent monsters, he sees them! You can't see the world through his eyes, and they may not be there for you. They are for him. From now on, prepare him for the path of a warrior, for a glorious battle. Let him take a plastic sword or pistol, let him take a shield. Let him take you by the hand, but he will go. «No burden together, impossible apart.» Let him do whatever he wants, but he must know that there is no turning away from the intended path. He will face the fear, just not alone. It is important to emphasize that you are not leading him through the forest, but you are walking through the forest together. Together, two people, two subjects, two creators. Nothing changes for the girl, she has her own fears, but she is also a future mother and a teacher. It is almost more important to harden her spirit in the same way as man.

If we don't believe the child, if we laugh at his fears, if we try to convince him that «there is nothing under the bed», then we are the first to introduce a culture of Fear. Close your eyes, don't believe yourself, don't do anything, convince yourself that there is no evil. **There is evil.** The world contains much more terrible things than beings «under the bed». And if we are not prepared from childhood to meet them and win, then when? Then it will be too late. Distrust of the child, disrespect for his vision of the world is humiliation, wretchedness. We believe and will help, support, and strengthen him. We'll play his game and win together. He will know that we can be trusted, that we value him and believe in his word. That when he's scared, we'll fight side by side, shoulder to shoulder. That we will not turn our eyes away from the face of evil. In whatever guise it appears.

Deadly serious. There is nothing more important than teaching a child to overcome fear. Conquer unbeing. The monsters are real. Because they are real. They only change their appearance with age. Let the sword of our courage be sharpened from childhood. We will fight. With a visible enemy and with an invisible one. We will fight. With everything that is scary and dangerous. A toy, a pillow, bare hands, teeth. As warriors and heroes should, we will fight. And we will win. What you sow, you reap.

Attention. A child can lie. Can fantasize. He may be exaggerating. We know, but we'll believe it. Because that's the only way he can learn to be responsible for words.

The child moves from the mystical fear of childhood to **the social fear of adolescence**. This is a time to affirm the concepts of **honor and dignity**. If the first level is passed with confidence, it will be a harmonious continuation of the serious attitude to the child's word. As in the case of the demons of Greed, the child gets involved in the status games of his pack, his environment. Let's be objective, today it is far from the best time. We can't immediately charge the entire society and the state for raising their children, but we can charge ourselves. Therefore, we will look for solutions within our own reach.

The child is afraid of being judged, being an outcast, a white crow, «not cool». He is afraid that he will not be accepted as «peer», that he will have a low social status. It doesn't matter why. «Fat», «poor», «stupid», «weak» – children's groups will find a way to indicate the hierarchy. Not only designate, but also refresh the experience every day. Through ridicule, mockery, a place on the last desk, offensive nicknames. The older you are, the more complex the reminder mechanisms become: refusing to take them to your company, game, invite them to parties, and so on. All this serves as a tool of social pressure. And all this is important for the child. Whatever he tells you. Some children come to terms with their status as a «crank» or «buffoon», convince themselves that they are comfortable with it. Or they simply withdraw into themselves and stop paying attention. They silently bear their isolation. But what is it, we ask ourselves? It's still the same **fear and rejection of intent** that we had to bury in the dark forest when we were kids. It's time to cut off his head again.

There are three key mistakes to avoid in this fight. **The first mistake is the parent position «We love you anyway!»**. The child is painfully looking for his place in the big world, in a group of equals, away from his parents. He does not want to be «anyway», he wants to know himself and understand what he is really worth! Any unconditional support in this matter not only does not help, but also directly harms. No one in their right mind can be proud and realize that they are «anyway». A person needs achievements and victories. Let them be small, even in their own field, but unchallenged, deserved, «taken by effort» as the Kingdom of God. Teach your child to achieve such victories. Specify the paths.

Life is not just «like a role-playing game», life is a role-playing game! Choose your child's «class» with them, even if they can change later. A warrior, a scientist, a creator, a businessman? Discuss it together. What skills and competencies does this class need? Mind, dexterity, strength, knowledge – let him choose for himself and begin to develop along the chosen path. Praise and support your child. But only for the cause! For the volume you read and the exercises you did. Find ways to demonstrate these victories. Olympiads, competitions, and games. In and out of school. Give him a taste of the victory he has won. A taste of fair play and achievement.

But remember, **don't substitute your child's goals for your own!** He can't be the best at everything. If he chose the path of a warrior and began to train in shooting and military history, then forgive him for his failures in physics and geometry. Everything has a price. Play and recreation are just as important as work and study. Let him live, realize, and love his choice. If you want to become a warrior, be proud of your achievements in the chosen field. The rest is enough and «satisfactory». He should be proud of his choice, of his achievements, not something that meets your expectations. Judging a child, you feed Fear, become one with his abusers at school.

Second mistaken position: «Don't pay any attention, let them talk.» Imagine a job where you will be insulted to your face every day. Convenient? Nice? And you are no longer a child! School takes up half of a child's day. He can't change it, he lives there. He does care what they say. If you show that you don't understand him in a time of trial, he will «pay no attention» to you. You can ignore the shouting in the crowd, sometimes. School takes place during your child's formative years, and you can't hide from it. You should and will pay attention to any expressed doubts about his honor and dignity. If, of course, you want him to have that honor and dignity.

Please understand that you can and should ignore information garbage on the Internet. Block «trolls», ban «haters». Build your own information space and communicate with those with whom you consider it necessary. Only in real life it's different. You can't put a handkerchief on each mouth. Someone can always say something about us behind our backs, and God be with them. Fear is not formed because of this. When conversations from behind your back turn to your face. When you are being taunted here and there, taunted, pushed with a shoulder in the corridor, or laughed at – it is unacceptable to tolerate this. Moreover, friends, even if it's not for you. Even if that attitude goes to someone else, and you know it. It is impossible to remain silent. The burden is already on you. Non-resistance to evil is the indulgence of evil, it is a contract with conscience, it is the renunciation of valor and righteous intention. It is in these moments of decision that the personality is formed. School is an environment that the child did not choose. He can't avoid it or filter it, it's his world, his Challenge. That is why «what they say» is extremely important. That is why no one will leave unavenged

So it will become, unless you make **the third mistake: «Everything can be solved with words.»** No, no, and no again. In the closed world of school, nothing can be solved with words. If the glove has already been thrown, if the child is already being laughed at, mocked, or touched with a finger, then the time for words has long passed. It's time for action. At best, it's a conversation where words aren't just words. Will the villain stop acting villainously just because they're asked to? Do you believe in it yourself? Or maybe you think that evil doesn't exist? It does. All the more, while supported by fans of

«solving with words». Do you know why the word of the head of state can solve the problem? Because there is an armed force behind it. That's how your child should act, no matter the price.

Yes, you understand correctly, we preach physical violence. Determined and merciless. After the first and last warning. Teach a small man to warn so that they are understood immediately. Cold and scary, direct and simple, without pathos. «If any of you laugh at me again, I will hit you in the face. Several times.» Make eye contact, speak slowly and deliberately. Make sure they hear you. Don't wait for a response. If they don't understand the first time, then fulfill the promise. Whatever it takes. Call them outside. If they refuse – right at the school. It doesn't matter who the culprit was. Boy, girl. Everyone has a face. If they don't understand the words, they will understand differently. No one is ever allowed to question the honor and dignity of your son or daughter. Remember, when another person is insulted in front of him, and he shyly remains silent, this is the same infringement of honor. Or rather, its absence.

No formal punishment, dissatisfaction of teachers, calling the police, parents and all saints, will mean anything to the child if you support him, if you understand. He was fighting for a good cause. The rest is dust and will return to dust. All those who start saying that «fighting is bad» are slaves and accomplices of Fear, unbeing. Accomplices, because they are women. Every man knows within himself that he is born to fight for what is truly valuable. And if at this moment you stand shoulder to shoulder with the child, if at this moment he sees that the whole world is against, but you «do not betray your own», then at this moment his own dignity and the core of his personality will be born. Forever.

While we are still in this world, resistance to evil is possible only by force. Even Mahatma Gandhi actually used violence to defeat the British colonialists. Just more sophisticated, not bloody. So we do not want blood, but we will firmly defend our positions. We are talking about the fact that violence is a necessary element in the interaction of people, education. Evil must be stopped, and since the enemy has already resolved to insult, pressure, mock, then he will believe in words only when there is power behind them. First of all, the strength of the spirit and firmness of intention. Where did we get them? Remember, from childhood, when you got used to not giving up on the idea, despite the cold, fear and discomfort. Now that we are older, we only transfer the good experience to new obstacles. We didn't kneel before Fear, and we won't now.

It is important that we are not talking about winning the most violent confrontation. You can even lose a fight! It would be pathetic and hypocritical to defend your honor only when you are bigger and stronger. There are fights that you have to fight even knowing you're going to lose. Although, how

is it, «knowing»? God helps the righteous. We'll see who laughs last. Even defeat for the right cause is better than victory for the wrong. Better than indifference and cowardly silence. Let the child wear their scars with pride. Don't let the challenge fade from his gaze. Let the abusers know that you can kill him, but not break him. Then, believe me, they will leave not only him alone, but also everyone who happens to be nearby. No one wants to mess with the «wild man», it's more expensive for themselves. Consider the Imperium of Man: «Only to the insane – victory, only the victors judge.»

Villains are wretched by nature, jackals want to mock, not fight for their «beliefs». Easy profit, easy victims. Not giving them this ease means helping not only yourself, but even them. Like the bourgeois before the Kibachish Boy, let them tremble and think what military secret is known to a child who, ignoring fear, rushes into battle to defend the weak, the small, and the very principle of honor and dignity. One moment of generosity can change a person forever. **Valor transforms, not infamy.** Let us show it by our example, and bequeath it to our children.

Here you need to make a circle and remember everything that we have already said about defeating Greed. The child should know what they are protecting, what their qualities are, what achievements, values, and what they can and should be proud of. The essence of his soul, his personality, and not his things. Your authority as a parent will depend on what exploits and adventures you have gone through with your child. Only the person who embodies it can claim valor.

In childhood, in youth, let your children learn that **Good needs clenched fists.** And they are covered in blood. If good does not stand up against evil, it becomes evil. If a man is silent and worries for what just might happen, if he remains lukewarm, then Fear consumes him, owns his whole life. However, is this life? Under the power of unbeing, he becomes dust, and will return to dust.

In adult life, a lot still depends on us. «Save yourself and thousands will be saved around you.» A key role is played by personal example outside. In a collective at work, sports, among parents, by interests. Yes, stereotypes of behavior and a culture of fear have already been instilled since childhood, or have already been defeated. But a person is capable of development, training and upbringing until the last day. Don't lose your faith! The very knowledge of the demons of Fear, the ability to point out their culture, to reveal the True Name – the power of unbeing, is already a weapon in our hands. Consciousness is a weapon, knowledge of the enemy, knowledge of the ongoing struggle is already a step towards victory. Open people's eyes, call a spade a spade, give a personal example of overcoming Fear and the example of your children. This way, your success becomes not just a personal story, but a living message to the future.

Knowing the nature of the enemy, his machinations are easily circumvented. Fear does not think, it is not far-sighted, or intelligent. It is stupid and formal, always late, the laws of Fear are always written when it is too late, based on the experience of yesterday. The enemy always gives up before courage, onslaught, initiative. A living example is our program of camps and training camps «Space Marines»⁵. They are outside the law, without contradicting it. They are held on trust, without service agreements, without customers, orders, or payments. The law can't even imagine this! Trust, friendship, and love will be forever beyond his reach. Aren't they the most important thing? Good question.

Would we be able to sell more travel packages and earn more money if we worked according to the law? Definitely. But we don't want to sell or make money on our children. We want to create, educate, and shape together. This can't be done for money. We weren't hired, we weren't bought, we weren't in service. Together with their parents, we create a common development and educational space. No accountants, lawyers, or marketers. Only the truth, only the essence of the matter. Anyone who trusts you is welcome. Who does not, let them buy a comfortable unbeing elsewhere. Is there a risk in this approach? Definitely. The fire is hot, the axe is sharp, and the water is cold. Life is a risk. This is an entropy challenge. In this aspect, we fully support the proverb that «**Risk is a noble cause**». The noble-bearing. Life-bearing, as we say in the Russian Space Society.

The final victory over the culture of Fear and unbeing, of course, requires a complete restructuring of the system of social values and measures. This cause is on the agenda, but today we can begin to form a thought image and a requirement for the system. Know what to offer. One of the most powerful methods of transforming society is **the «Society of the Game»** revealed in the «Imperium of Man». In short, the point is that even without fundamentally changing the laws and distribution of wealth, you can already begin to create a new world through a system of even symbolic values. People are willing to risk a lot not for the metal, in fact, but for the status that comes from possession. For respect. Give a person honor, respect, encouragement, recognition – and he will be happy to overcome trials, believe in his destiny and work for the Common Cause. All that remains is to untie the recognition symbols from the banknotes. This requires only the will and the rules of the new Game. A great Game of conquering the Universe.

Your reading of this book, sharing it with your friends, sharing and spreading the knowledge of the True Names and the very nature of the struggle, is your first victory. Primo Victoria⁶. You act on the scale that you choose yourself. He who does not think of himself as a conqueror of the

⁵ Космодесант.рф

⁶ Literally «First Victory» (лат.)

universe will not become one, even if all the gifts of the stars fall at his feet. Play the Big Game with us. Create the future, not endure it. Then the demons of Fear will not find in your soul a even small flaw, a small crack for their claws. Then nature will prevail. Not a nature of an animal, but of a human being. Forever.

How do we defeat the demons of Fear? Knowing their true face and True Name.

How do we defeat the demons of Fear? Declaring war, banishing them in yourself.

How do we defeat the demons of Fear? By creating a circle of purity, raising children, calling the Enemy by his name.

From the true word – to the true thought. From true thought comes true knowledge. From true knowledge comes true action. By the power of Heavens, we will eradicate them.

The Enemy – Freedom

«Freedom is slavery» – J. Orwell, «1984»

The third enemy. The third test. The third head of the Dragon. «Not a petty service, but a great service,» as the fairy tale says. The most difficult task. Never before has the True Name been so far hidden. The third enemy uses the very construction of language to hide from us. If «greed» and «fear» still had a negative character, they were unpleasant words, then the demons of Freedom are the most insidious of all. For many centuries, they have been working towards their goal – to sow Chaos in the language itself, in the root basis of the thinking of modern civilization. To remove a blessing, a good word from your speech. Now there are no more «words of evil» and «words of good». There are just words. Polysemous, ambiguous, and slippery. Measure and distinction are lost. Anything can hide anything.

Freedom has become an idol, a sacred cow, a basic value of Western political culture. Today, when we say «western», we read «global». Not yet total, but already global. Any idolatry leads to a loss of meaning, inevitably becomes a cult of form, and inevitably requires sacrifice. For freedom, American bombs fall on cities and fields, for freedom they allow same-sex marriage, for freedom they legalize drugs, for freedom they encourage prostitution and pornography, for the freedom of children, juvenile services taken them away from their parents. It is mostly there, in the West, as yet. But we are also far down that road! And will reach the end if we do not reveal the faces of the demons of Freedom, and do not give them the True Name.

By exposing the third Enemy, we will simultaneously highlight **the penetration of Chaos into language in general**. The very need for True Names strongly calls for this. However, «fear» and «greed» only served to hide a deeper evil behind a lesser evil. Freedom is dressed up in white clothes, fundamentally replaces concepts, confuses meanings. Even we, right now, by proclaiming Freedom as the enemy, are already incurring the wrath and fury of millions. Millions of people who won't even read the chapter itself, much less the Book as a whole. For this one assault on an idol. You will see. Still, we go all the way. By our sacred duty.

When you realize that the Good Fellows are left only in fairy tales, and only in Russian. When you ask yourself why this address is not used now. When you realize that there is no decent answer to it. Then you will begin your journey with us to the new language of Victory, the Imperium of Man.

For those who knew slavery and forced labor, freedom was the nectar of paradise. For those who knew wars, foreign oppression, the yoke of

the infidel, freedom was not an empty phrase, but a precious conquest. An object of pride, an autocratic fate. For those who knew persecution, prisons, and executions for their beliefs, skin color, and blood, freedom was a breath of air, a daily bread. It was quite clear that for these people, for our ancestors, freedom meant «freedom from...». It was fought for, it was coveted. And now, all our dreams have come true. We have reached an age when generation after generation knows no hard work, no real war, no real oppression. What does freedom mean for these people? What kind of freedom did they deserve? You can't help but remember the wisdom: «fear your desires, when they come true.» What are the peoples fighting for today, what bright ideals are guiding them, and what do they need freedom from now?

«Need is the mother of ingenuity.» When we seem to have conquered need almost everywhere, civilization is facing its greatest challenge. The scourge of Empires – comfort and resting on laurels, threatens the very development of Life. Not a well-fed life today, but for future generations. Will there be creators and conquerors? Or will they fall victim to childfree's choice, same-sex marriage? It's also a sign of freedom, isn't it? No to have children. Do you see where we're going? Freedom to have no future. Freedom to betray the Dream of your Fathers. Freedom to abandon the path and destination. And these are not the worst, most disgusting manifestations of freedom today. The word itself is already stuck on your teeth, has become ironic, and sometimes even negative. This is good, and it brings you closer to understanding the True Name.

The freedom of well-fed generations has finally become «freedom from...», from duties, from restrictions, from conscience, from calling, from responsibility. This word justifies the legalization of drugs, prostitution, pornography, gambling and other forms of self-destruction. Including the freedom to indulge in Greed and Fear. See, the circle is complete! The main, primary Enemy enters the scene. With all severity, we must recognize that the only real freedom is a conscious necessity. The challenge of comfort is the decision «to be or not to be» of civilization in general. Not to mention the fact that the technical power in the hands of a person is growing, but does the power of his spirit grow as well? Effort, firmness, sharpness, awareness, and responsibility? All this requires not «freedom from...», but hard work and tempering.

If we are convinced that true love and development is an increase in the ability to give, create, and increase the overall power of the system. Then, the desire to satisfy more and more needs, to consume more and to work less – should justly be called an Abomination, the grimace of the demons of Chaos. **The True Name for such freedom is «Death of Measure.»**

Face of the Enemy – Adults

The practical implications of «Freedom from...» are very concrete and tangible. Remember, not from enemies and persecution, but from borders. Let's think about the limitations of traditions, laws, community and conscience, what did they protect us from? From whom were the bars and sentries, from whom were the gates heavy and the walls high? Let's answer ourselves honestly: **from evil!** Yes, it can be understood in different ways, you can argue about good and evil, look for them, try to distinguish one from the other. And you can do exactly what is happening today—open the gates and declare «Freedom». Then what was behind the gates, the seals, and the walls will enter. Driving out the Enemy from within is much more difficult than keeping him in the outer darkness.

The material, inert world dictates its own laws of entropy growth. The market, without reason or measure, echoes it and dictates its own. As a result, as Comrade Stalin said: «what freedom can an unemployed person have?» A hungry, homeless person? Everything seems clear here. But let's look higher. What freedom can there be for someone who is forced to devote the vast majority of his time to earning bread, shelter, and the next day? Should he start doing something that is «not for sale» in the labor market – will he be free? Do modern «free media» show what they want, for reasons of creativity and beauty? They show what can be sold, what is profitable for sponsors, and what sells itself for the needs of the day (advertising). According to the objective laws of the stagnant world and the market, it will always be something that enters from outside – evil. Because everything that is understood and sold today is no longer enough for tomorrow. Everything that is used, consumed or exchanged for money is already opposed to the feat, creativity and exploration of yet unknown.

«Everything sold is already cheap.»

The idea that the labor market in a capitalist economy is not a symbol of real freedom is gradually becoming the property of the masses. You have to work and most people choose a job not out of love, although they try to look for positive aspects in it. The market kills freedom and creativity in your work. Work is a necessity. The very logic of things suggests that «freedom» exists only after working hours! It is called «free time» for a reason, right? This is where a person can unwind! True but not quite. This very formulation of the question, imposed by a market society, kills freedom and creativity after work as well as during it. Because freedom, understood as the opposite of work, inevitably becomes only one thing – **the freedom to choose a way to «have fun, relax and enjoy yourself».**

The Death of Measure, demons of «Freedom» form multiple vicious circles. The market is freedom. But you have to make money there, and for what is in demand in the market. As part of this «market demand» feature, you can choose what you want. Freely. But isn't this already a choice made for us? Further. You're definitely free after work! But what kind of vacation can you afford? After all, you want to show off status and not lose face. You need money. Therefore, money is freedom. Therefore, the desire for money is the desire for freedom. To have money, you need to do what is required by the market – see above. And so on, ad infinitum. As a result, the only constant, the only imperative of a market society, a market person, is the desire for money. The consistent logic of «freedom» that becomes day-to-day slavery. Amen.

A striking manifestation of the triumph of Demons is the widespread cult of Friday in market societies. Jokes, anecdotes, stories, and lamentations about the imminent end of the work week have become so popular that they don't need any introduction. This anti-culture is so ingrained that it is well aware of itself. The song «Every Friday I'm wasted...» from a despicable anti-culture figure who ran away from the country with the beginning of SVO, Semyon Slepakov is the best confirmation of this.

It is tempting to blame this enslavement on the market economy. This will be true, however, only on the surface. The market is already secondary, already a consequence. There is already a psychological reason for the very emergence of the market, even thousands of years ago. The root cause, **the primodemon of «Freedom»**. That's what we need to expose. It is again hidden in language, in perception. Between words, between layers of meaning. For centuries and epochs it has penetrated the consciousness of peoples. A fundamental demon, the first of the unborn⁷. «Death of Measure», «unawareness», «uncertainty of purpose» are his names. He is responsible for the fact that freedom began to be perceived as «freedom from...». We have already discussed this above. But its roots, the problem, are even deeper!

Let's look at the entire globe and the hundreds of societies that inhabit it. Almost without exception, «freedom» is perceived as the opposite of «work». It seems well, what is the problem, so it should be. If you have to work, then you are not free. Just listen to yourself! Therefore, the one who should not work is free. But we live in a society of people, here any status must be demonstrated, confirmed. How can you demonstrate your desired status as a «free person»? Avoid work, ostentatiously. Haven't you figured it out yet? The main privilege of a slave owner, feudal lord, capitalist-any representative of the «elite» from the point of view of a common person, is this. Wealth, power, influence, level of consumption? Yes, that too. But at the very heart of the notion of a privileged, ruling class, is «freedom.» This is a free class.

⁷ «Neverborn» – Demons of the Necrosphere as opposed to the «Twice-born» Brahman.

They are clearly not slaves, peasants, or proletarians. They may avoid work. And to demonstrate their high status, they **must not work**, purposefully and ostentatiously!

So, deep in our psyche, the demon of false measure settles. The sign of elite, aristocracy, privilege becomes the freedom not to work = «do what you want». But this «whatever you want», in the absence of the obligation to work for the common good, will inevitably and in most cases turn into «rest and have fun for show». Hence the very phenomenon of luxury as a conscious overconsumption. This is not even greed, on the contrary, extravagance. That is, anti-creation, parasitism, working on entropy, Chaos as it is. Watch the move! Right before our eyes, the freedom not to work turns into the freedom to do «what you want», and that, in turn, inevitably turns into the freedom to «do nothing», to waste the power of the whole. Create nothing, literally! **The desire for freedom from obligation is a desire for unbeing.** «The power of unbeing» in another guise. One more circle is complete.

But it was much worse. It is «nothing that unmakes.» The freedom of the elites did not exist in a vacuum; overconsumption does not provide for itself. The ruling classes very specifically took resources out of the social system to feed the appetite of the freedom demons. Reduced the total power, wasted. The problem of demonstrative consumption is still an obstacle to development. Because gradually, social status,» success «in society, the very degree of freedom, began to be measured by the level of consumption. This birth of a false measure is still given to us in the form of Gross National Product index! Do you see how many consequences a **distorted understanding of just one word** has? Distorted in the historical perspective, not adequate. As expected, the process reached it's logical conclusion. Freedom to consume without working means freedom to receive power without giving it away. Everything is learned by comparison. The less you give for the benefits received, the more free you are, it turns out. In other words, the more **unequal exchanges** you can impose on society, the more successful and good you are. In Russia, the peak of this process for the old world was the «Manifesto on the Freedom of the Nobility». When the status of the elite was torn away from its main foundation – military service. Similar processes, however, took place all over the world.

It is important that the antithesis of this new phenomenon of «Freedom» is not «slavery», but **the concept of «Duty» (to this day)**. It's blood synonym is «Unequal Exchange». About the disastrous consequences of his cult, see the «Imperium of Man»⁸

The elites of the old world, infected with «freedom», degrade and give way to new owners, still vital, energetic, cruel-capitalists. From the Enemy's point of view, this is an approach to their goal. Only an apparent, feverish «vitality».

⁸ «Imperium of Man: Age of Cosmetics». – M: Variant, 2019, page 227

The old elites, at least at the level of an idea, tradition, or symbol, proclaimed their duties, a code of honor, and maintained visible dominance and visible distinction. «Nobles oblige»⁹, at least for the sake of external decency. And some, though rarely, showed the world a real nobility or a worthy application of freedom (Admiral Nakhimov, constructor Mozhaitsky, the «Golden Age» of Russian literature, for example). The new elites will not be bound even by such restrictions. The demons of Freedom are triumphant.

Capitalist elites, read «modern», are anonymous and do not promise society anything but the «right of the strong». Except for the competition. Except for survival of the fittest. Fittest to what end? To the needs of the day, of course. **Profit as the measure of all things is the apotheosis, the hymn of Unequal Exchange.** And it is not only Marx who is right in saying that the worker creates more than he receives. This is a blessed attribute of human labor. The fact is that the profit should be and will be maximum! «There is no crime that a capitalist would not commit for the sake of 300 % profit,» as we know. The essence of the market is not to sell at a fair price, but to sell at the highest possible price based on the situation. Don't you understand? Remember buckwheat for 200 rubles in the first months of the coronavirus and immediately understand what the animal grin of capitalism is. Freedom of economic activity is the freedom to take the maximum out of the body of society and return the minimum. In other words, the blessing of parasitism, reducing overall power.

Competition as a mechanism for «managing» the economy directly leads to establishing a monopoly and monopolistically high prices. Even for a while, even in your own market segment. This is exactly what competitors are fighting for, this is the «victory» in the competition. Haven't you thought about it? The monopoly position of key players in the fuel, energy, and transport markets is the reason for inflation and constant creeping price increases. Look at gasoline, the price increase is as inexorable as the passage of Time itself! Why? Good question. This is also a consequence of «freedom». We haven't even started talking about parasitic exploitation of nature, migrant workers, «cheap Chinese goods» and other monstrous consequences. All-pervading. Because the power of money also becomes political power, creating an imitation, covering system of «democracy». To finally, forever separate power, freedom, wealth from duty and responsibility. **Our descendants will pay the price for these acts of «freedom».** If we don't break this vicious circle within a circle with a heroic effort.

Notice how often we have to use words in «quotation marks»! How often the true meaning is lost. The once noble concept of freedom has been transformed by elites into a symbol of parasitism, in the absence of duty. On the other hand, it has become the «freedom to do evil,» the pursuit to break

⁹ «Position obliges» (фп.)

each new restriction in its path. About this we must continue the story. But before we should think again, how did this happen? The demons of Chaos enter wherever they are not sought. Between words, between meanings, into the very fabric of language. The more vehemently we disbelieve in them and laugh, the greater their power and the more complete the «Death of Measure». **Knowledge of the Enemy is already the beginning of the Hunt.**

Now we must go down to the very bottom of Freedom. Follow the path to the end. When the elites fell and no longer differed from ordinary people in anything other than consumption levels, the devaluation of demons occurred. Now everyone seems to be «free», formally. But the sweet word remains. So you need to throw off another shackle, and another, and another. Otherwise, how can you savor your freedom? Against the background of the fact that most of the world's population has ceased to experience material need and can reasonably exist, even working as a waiter or security guard. Do you remember? Freedom remains only after work, how to relax, break away, have fun brighter and more original. The demons are right there. They are particularly strong on women and children – those who, due to the structure of social production, have more «free time». After all, children take an example from adults who give the same message. **«Labour is not freedom. Rest, be different, break the rules, break the boundaries – freedom.»**

Let's translate it from Russian to Russian. Let's get this straight. Any prohibition is no longer a freedom, nor is any obligation. So the cult of Freedom is the cult of the Forbidden Fruit. For people of faith, this in itself puts all the dots, but we will explain. Yesterday short skirts are forbidden, today it is freedom. Yesterday drugs were banned, today they are legalized. Yesterday prostitution was banned, today it is a massage parlor and an escort. Yesterday, open eroticism was banned, today it is a legal porn business. Do you think that we only talk about very «bad» things? Oh, no. Demons need the world, and only the whole world. Killing defenseless people in movies and games. Culture of Fear – see above. Ecstasy of destruction, degradation. Surprised? Yes, already in the capital of our Motherland, at VDNH, there is an «attraction» – a room for smashing dishes. Real dishes that are the fruit of people's labor. **Destruction, chaos, loss of power, is presented as a source of pleasure.**

We talked about how a Culture of Fear is born out of a ban on valor. What perverse forms does sublimation take, replacing risk and adventure! Forbidden violence is even sweeter. The demons of Freedom absorb all dark desires. Against the background of the Death of the Measure, they create a Culture of Indulgence. A culture of constantly searching for a new rule, another ban, another norm that could be violated. Not yet publicly, not yet openly, not yet for everyone, but the process is underway. After all, the one who can afford it is truly free, right?

You may be interested in the instructive outcome¹⁰ of a rat experiment. The rat is given two buttons, one that stimulates the pleasure center, and the other that provides food. So, the rat presses the first button until it dies of exhaustion.

Overcoming prohibitions, a «strawberry» of vulgarity and a «pepper» of obscene speech, this is the same pleasure button. Vice becomes attractive in itself, as a symbol of «freedom». The Leningrad band is **the apotheosis of a degenerate Culture of Indulgence**. Yes, yes, you are not mistaken, Culture as yet. Their degradation is still talented, still witty, still well-wrapped. Still. But let's look at the light at the end of the tunnel, where does a well-laid road lead? A vice that has become an idol. Forbidden fruit on all branches. Infinite Overton windows. Infinite first button. Transformation into creatures that lose the right to be called a Human. Creatures of Chaos. Victory of the demons. The pleasure of an obscene joke is already the pleasure of destroying the language. One step, and the pleasure of smashing dishes, destroying labor. One more small step for all of humanity, and the pleasure of murder, of destroying Man. Not even yourself.

This is no longer a forecast. This is a summary from the front. Drugs, alcohol, cigarettes – demons don't hide their faces at all. And it's disgusting. Feel their breath in the wine fumes, in the tobacco stink. The popular TV series «The Squid Game» already tells a beautiful tale of self-destruction. Cannibalism live¹¹ – everything has already happened. The enemy is at the last gate. The very sky and stars are calling us to War. Under the unfurled banners of Life. The book is only a bell, echoing the trumpet voice. **Who are the iron-willed devotees that will respond to our call? They will go with us to the last and decisive battle, which knows no end. Get up and join the formation! Or look away and be awed by their proud tread.**

The Death of Measure strikes at the very foundation of human civilization. This is the demon king, the most dangerous one. From one poisonous root grow systemic consequences. Having absorbed all the above, you are ready to understand that the demons of Freedom, in the end, make ugliness, degeneration, and weakness desirable and attractive. Why? Because this is also a «difference», a «feature», a way out of the norm. Norms of what? Standards of vitality, viability! From a problem, from shameful weakness, ugliness becomes a manifesto, an individual, even a source of pride. Don't believe me? See what «bodypositivity» is and what it reaches. Better on an empty stomach. Being gay, being transgender, being an animal, Lord, purify our lips – today, it's a manifesto of freedom. This is what the law protects. Not here yet, but very close. The ecstasy of ugliness, because it is also «freedom», is the ecstasy of self-destruction. By death. **Tolerance has become respect**

¹⁰ <https://scisne.net/a-2719>, (Makarenko Y.A., *Wisdom of Feeling*, M., «Soviet Russia», 1970 z., c. 93–95.)

¹¹ <https://youtu.be/N3WlRKZ1l8I>, Holland Television, 2013

for the right to self-destruction, to degeneration. And this has nothing to do with a healthy tolerance for other peoples, customs and traditions. For these were the ways of Life. And these are the demons of Chaos and the Death of Measure.

The point of this Book is for you to see all the connections, tear off all the masks, and call the True Names. So that the Enemy, in all his cunning and filth, is exposed and marked, his illusions are dispelled. He is not far away, he is not fantasy. He is all around. He's already inside. The third Enemy is the most dangerous, as Russian fairy tales wisely note. Because he hides behind an outwardly attractive word. He dresses up in good clothes. He seems not just harmless, but good. The most important thing is that he is monstrously ancient, endemic to almost all cultures. Just try to declare that Freedom is a demon, the Death of Measure! You will be ostracized. But we will win. When you realize that there is an enemy, it would be a crime to underestimate them. We will not make such a mistake.

That is why we will draw the final conclusion from the threat of Freedom demons. As you can see, the course of history has turned the desire for freedom exclusively into a «negative» concept. Free of ... burdens. Ultimately, from the burden of work, responsibilities and duties. No responsibility whatsoever. **The last seal of the Death of the Measure is the advent of AI (Abominable Intelligence), neural networks, robots.** That is, the desire of a person to» free himself «even from the burden of subjectivity, decision, and thought. Fashionable words: transhumanism, virtual reality, metaverse – a pleasant, comfortable release from the biblical «bread in the sweat of your brow», from childbirth in agony. Wait, though, here come the Childfree. Why release yourself from childbirth in agony, when you can free yourself from birth at all! After all, there is very little left, and we will be freed from the burden of our body and become virtual characters. «Ah, what a life that would have started...» Or rather, ended.

«The dream of paradise is a man's dream not to be a man», – M. Kundera, «The unbearable lightness of being.»

In other words, the demons of Freedom are also demons of the Easy Path leading in a well known direction. Civilizations were born by labor and duty, and died in comfort and indulgence. Now the situation is similar, only technological progress has escalated the stakes to the limit. Made possible the final death. Not even physical. More precisely, not immediately physical. A moral one, and yes, we put that first. Not the intellect, but the sacred heart of valor, heroism, and creation. Striving beyond the horizon, to victory against the odds, is the very essence of humanity. The essence threatened by the Death of the Measure. This is brilliantly described in K. Saimak's novel «The City». We recommend it entirely. It is the best and most complete illustration for this chapter of the Book. But in short, the point is that when

people got the technical ability to move their consciousness into alien creatures – «hoppers» – whose existence resembled a drug-induced trance, they immediately did so. The race committed auto-genocide. Because there was nothing to hold them back, no locks or gates left. They were completely and finally «free». Curtain fall.

From the point of view of philosophy, worldview, we are witnessing the decline of the fundamental model of human behavior, which together with Labor, formed our species. You already know what we're talking about, but you haven't formulated it yet. We will help. **There is a rapid cultural attack on the «delayed gratification» model.** Difficult? Really simple. Civilization begins with the fact that primitive man does not bite into raw meat, but cooks it. Endures hunger, puts off the need, for the sake of a higher level of problem solving. Here is the message of the secret of power, victories and great Empires. The ability to gather the will and strength for a distant goal, to endure and fight for something that you can not even see yourself. The mystery of creation. The true Measure of greatness. Do you understand? It is her death that the demons of Freedom are bringing closer. «Have fun today, now, faster, cheaper, online, on credit...». Share your problems with others, the Internet, AI, robots, specialists, guest workers – anyone. Everything is affordable, even not too expensive, starting with a woman and ending with... All.

This is the point that Allen Dulles was talking about. We are in the middle of the scene of «... the death of the most rebellious people on Earth. The final and irrevocable extinction of his self-consciousness...». **But here we stand. From this point, from this line, we will push off with our foot, as from the Ural Mountains and spin the planet in the opposite direction. The very fact that there is a Book of Life, the very fact that you are reading it, already means that it is not too late. When the Enemy is named, the gauntlet is thrown, and the visor is raised, it will be a fair fight. Finally, after so many centuries of silence, Peresvet rushes towards Chelubey. His spear irresistible, and victory is already inside, because he knows no fear, and the dead know no shame.**

When honor is not lost, nothing is lost; when honor is lost, everything is lost.

Face of the Enemy – Children

All the described horrors of Freedom are instilled and sown in childhood, of course. First of all, through the example of adults, which children observe, whether we want it or not. A vicious circle in a vicious circle, remember? But not only that. We ourselves contribute to the admission of demons to the child's soul through two sins. The first – «**forced labor**» and the second – «**distrust complex**», we will fully reveal them below. Naturally, both mistakes

are made unconsciously (!), and without wishing evil. Only unconsciousness is already evil. As you might have understood from the entire contents of the Book. Unconsciousness is the main gate through which the demons of Death of Measure enter. Actions out of habit, according to the template, «automatic», «careless», even on instincts, even if they are parental -continue the line yourself. Children are the future, this is Life in its development, there can be no half measures. Maximum responsibility and inclusion of the mind.

As Nicholas of Cusa used to say: «The Mind is a measurement, and the Mind is a co-measurement.» Sounds scientific, theoretic? Truly, there is nothing more practical! The Russian people did not create the proverb about «Measure seven times...» for nothing. Everything is connected. In small solutions for children, you will see an example of what will become a Horror in the future. Including, and especially, the search for easy ways. Let's hear it.

What is labor as a punishment, coercion? Although «two work orders out of turn» does not apply to children, you understand the meaning well. After class, you'll stay in class to clean up. Instead of going on a hike, you'll go to the county and help out in the garden. You can't skip classes, even for a trip to a museum or a competition. You screwed up, you have to work for it! Familiar phrases? How many of them do we hear over the years of working with children? We already anticipate your confusion, perhaps even indignation. «How so? Should he not help his parents, or skip classes?» Let's answer the question with a question. Tell me, are you sure that this is necessary for the child, and not for you? You can say: «But he's a child, he can't decide for himself.» See, this is precisely a distrust complex, we address it a little further. But suppose we agree now. He's just a kid, he can't decide. Ok. You understand that if the child did not decide for himself, then all this help, all the study that he was forced to go to – this is exactly what «forced labor» means. Forced labor, from under the stick, makes us count the minutes, painfully wait for it to end and hunger for what? Indeed: «Freedom from...». Do you understand now? Do you recognize the beginning of a circle within a circle? The demons smile.

What should we do? Non-compulsive parenting? No, of course not. This doesn't happen and shouldn't happen. Pressure, even violence, is a necessary part of parenting. But applied as an exception, with the highest awareness and a clear goal. About defeating the Enemy – further on. Now it is important to expose a problem.

Let's listen to the children themselves. We will not take into account their offended remarks like: «I will show you...», «What a wretched day...». They get harder as you get older, you'll notice. The bottom line is that from an early age, the child begins to say: «I will grow up and not go to kindergarten (school)!». Of course, we say to him: «You will go to work.» In a rational way, he agrees. But even now, even as a child, he wants NOT to work, NOT to go to

school. For him, this is a welcome symbol of Freedom. He can climb the social ladder for a long time, strive to get into the elite exactly in order to finally be able to «do nothing». Mindless compulsion causes only one desire, to get rid of it. And if the child is predicted to «go to work» all his life... Then either he will achieve his status as a privileged slacker, or he will experience a deadly melancholy. There will be no good way out of it. In the best case, we will get the already described phenomenon of «freedom is only after work» and further down, to the very bottom.

It may seem that these are such trifles. But you've seen what they turn into when taken in the system. What you sow, you reap.

The second gate is a «distrust complex». The idea of a child as an inferior person, an empty place. «When you grow up, you'll understand...» «Too young for such things...» «Don't be smart...» «Eggs don't teach a chicken...». «I won't let you go alone...» «You can't go camping, it's only for the experienced...». «You're probably lying, you couldn't have done such a thing...». This results in a system of double standards. If the child makes a mistake, it is because he is «still small». Adults, therefore, make mistakes solely out of noble motives or by «force major». For Heaven's sake! Adults lie, drink, swear, offend each other – and this is the most harmless list. But all of them, of course, have the right to do so. But if a child tries his hand at something or expresses a judgment, then it is invalid. After all, where can he understand and be responsible for his actions? Altogether different, adults are? We will not be the first to point out the fallacy of this approach, but we will be the first to clearly show its true consequences.

What are they? Yes, they are very simple and well-known to everyone. «Transition age», teenage problems, alcohol, cigarettes, God forbid anything worse. And why all this? Because a person wants to feel complete! Human, remember. The child is also a human being. Yes, full-fledged doesn't mean omnipotent. Is each of us omnipotent, infallible? Can't we be wrong? We can. But we want to be respected. So why don't we give such respect to our loved ones, our own children? Why just your own, children in general. Good question. Why does the opinion of their peers, older children, and the school team become more important for a teenager than the opinion of their parents? Yes, because he is used to the fact that he is not taken seriously at home. That there he is always some kind of second class, even if in words «the best». The best, okay, but can I walk until 22:00? No, you're still too young. Curtain fall.

What does this have to do with the demons of Freedom, the Death of Measure? The forbidden fruit is sweet. The truth of this expression seems self-evident. But indeed, why is it sweet? Yes, here in childhood everything begins. Because you are forbidden something, explained your inferiority! Who in their right mind would consider themselves second-rate? Hard to say

which is worse, but what if the child really admits it? No, better to let him rebel. We're the ones who need to correct our behavior, not him. You are not allowed to smoke, for example, because it is «forbidden». Your parents don't really form your awareness, they don't believe that you can understand it, realize it, and solve it yourself. They stupidly forbid and frighten with punishments. Might work if they themselves are a model of sobriety and healthy lifestyle. If not... Such Pharisaism, already in marble, cuts out the following in the child's mind: «You can smoke! This is an adult privilege. They only forbid you for some reason. Because you're inferior? Well, no way! I'll show them.»

Can you hear the demons whispering already? An adult's privilege is to do what is forbidden! Freedom is to do what is forbidden. From here, the race for the edge of each new constraint, described above, begins.

In fact, the child is deprived of the opportunity to learn what true maturity and adulthood are. After all, this is responsibility, reason, willingness to take the necessary risks, do not you agree? Good. But how will the child see it, or learn it, if you just don't trust him, and try to eliminate all risks by force! Trust implies the possibility of mistakes, the possibility of being unjustified. Otherwise, it is not trust, but a guarantee, knowledge in advance. In order for a child to learn to trust himself, you, he must be given the right to make mistakes. As each of us, let's be honest, wants this right for himself. Risk is a noble cause. Are we being generous to our children? Good question. Since the child cannot experience and try these true attributes of maturity, only the false ones remain. He does not see the nobility and wisdom of adults, he sees pressure or neglect. For him, becoming an adult will mean one thing – to be free. And then – «Where are you rushing to? Give me an answer! Doesn't give an answer.»

As a result, childhood plays out before us in miniature the drama of world history. Adults assume the power to prohibit and punish, the monopoly of rightness. Despite the fact that they hypocritically allow themselves everything and are far from strict discipline, the embodiment of the virtue of their own words. This is a short course on «elite degradation» described above. It would be wrong to say that this is always the case. There are wonderful families that bring up the sons of valor, heroes and the pride of the Fatherland. But almost twenty years of experience working with families and children allows us to draw very reliable conclusions about how things are usually. If you look around carefully, and perhaps even at your own practice, you will see that we have planted a seed of truth.

As you can see, the demons that have taken over the adult world inevitably penetrate the children's time as well. They create energy for themselves, close the vicious circle. We will not get bogged down in a philosophical dispute, what is primary. You will not find the beginning of the snake that bites its tail.

Even looking for a thousand years ago. That's not our goal. We have to cut the ring! Then again, and again, until there is nothing left of the serpent, and then burn its stumps with eternal fire, so that they do not grow back together like the Lyrnean Hydra. The battle begins in our minds and souls, from our very childhood. Let's turn to the keys of Victory.

Defeating the Enemy

By tradition, the story of the path to light will begin with what we just finished-from childhood. Here it is immediately important to understand the fundamental basis of the development of civilization in the logic of Russian Cosmism. The progress of civilization is the progress of «non-freedom». **The progress of civilization is an affirmation of duty. Conscious Necessity.** Now, do you understand the great meaning here? Victory over Demons. Russian Cosmism, however, would not be a comprehensive teaching if it was based solely on a mystical vision. Reason gives the same answer.

As we have clearly shown, the «progress» of technology is an independent challenge of the Universe. A challenge to our ability to preserve the Imperium of Man, rather than give it to robots, virtual reality, AI, and drugs. This is the first reason. The second is that the more power a person has at his disposal, the more responsibility he must take. Indeed, the presence of a nuclear weapon capable of destroying life and its absence are two different levels of consequences of our behavior. Which one requires more responsibility, better training, and a more rigorous upbringing? The answer is obvious. But is it just a matter of nuclear weapons? What about the consumption of depleted resources, waste, and nutrition of multibillion humanity? All this also imposes more and more responsibilities on us. Staples, connections. Not to see them, not to recognize them, is to live in an Era of a Divided World.

The third and final aspect of reason is that Freedom itself, without control, without Measure, is pure evil. We have described this quite clearly and inexorably above.

So, education is a path to conscious necessity. To sincere service, to love, which is the desire to give more, than to take. To labor as a feat of valor and glory, to the thirst for creation, not consumption. Sounds good, but how to achieve this? In part, we have already answered this question in the fight against Greed and Fear. But God loves the trinity, and repetition on a new level is a new knowledge.

I couldn't say it better. The main key to defeating the Enemy is awareness! The human mind is so powerful and beautiful that it can work wonders. You just need to use it. Ignorance is not the absence of reason, it is the absence of the habit of turning it on, unwillingness, the search for easy ways, automatic life. If one word could be used to describe the main demon gate to our world,

it would be «Ignorance». How do you defeat it? Starting from childhood, of course.

The path of least resistance, immediate satisfaction, is the path of inert matter, dead. It is also in us, and its weight is great. The highest-level harmonies begin with the repetition of the basic structures of matter¹². To overcome the attraction of a recumbent stone, the law of maximum inactivity – this is what it means to become a human being. For a child, this means stoking their curiosity, encouraging their questions, and not dismissing them, not showing irritation. Tell stories, support their fantasies. Everything so that he is not afraid to learn, expand his horizons! You often hear that after work, you no longer have the strength to do this. **Friends, you have no more important task than forming a new person, your heir, and you will never have one.** If you don't have enough energy to do this, then your priorities are set incorrectly. And believe me, this applies even to the heads of huge companies. This is especially true if they want to preserve and develop their business in future generations.

You can't be everywhere, there are no miracles. You can't quit your job. But take the time to talk, hear, support, and tell new things. You can always show that the world of adults is a world of decent, knowledgeable, and inquisitive people. Even on the way to kindergarten, even 10 minutes with a book before going to bed. And don't lie to yourself and me that you don't have any. The demons of lies are no better than other Enemies. **You can't ask your child to do something that you don't do yourself.** A healthy person can expect health, a smart person can expect intelligence, and an honest person can expect honesty. By and large, no one can bring up a child before bringing up himself. Here is another dangerous Ignorance of modern society. The idea that «parents should educate», hence «can educate», just because they are parents. Society and the State fall into the same trap. Demand what they don't do themselves! Does the country have «parent training» courses? Do you have any requirements for those who are going to have children? Good question.

We do not allow smoking in public places, drinking alcohol. Fine. What is the logic? «So as not to poison others with tobacco smoke, not to litter, not to set a bad example for children.» Paradoxically, it means you can smoke and drink at home! So you can set a bad example just for your own children? It is obvious that the effect of close and personal behavior of a parent is 1000 times higher than from the actions of strangers in «public places». However, it is forbidden only that which lies badly. Citizens are ready to show consciousness even to fight against drinking on playgrounds. We have chased such unconscious elements more than once. But as soon as it comes to the

¹² Vernadsky V.I., Philosophical considerations of a naturalist/ AN USSR – M.: Science, 1988

apartment doors... It's like there's nothing we can do! We can. Each of us is a watchman to his brother. We have no direct influence on the laws yet. But we can already influence our environment, friends, and work colleagues. And we should. To realize, to convey a simple thing. That if something is bad for children, then it is bad for people in general.

Don't hesitate! Awareness is a force infinitely powerful and transcending all the darkness of ignorance. No one seriously stands up to the banner of drunkenness, no one seriously wants to harm their children. Only the widespread shamefaced silence, only the connivance of the law and conscience, allow evil to take root. Each of us can become a beacon, a messenger of truth. A personal example. Do not remain silent, do not stand aside when Chaos is nearby. Anyone who destroys himself with drugs must understand his place and the depth of his fall. It can't be a «tradition», fun, or a «personal matter». Don't wait for the law. Judge them. Call to the Light. Especially when you see a woman holding hands with a child and smoking a cigarette... As you already know, this is an obsession with the demon of «Freedom». There is no peace for the possessed, there can be no rest. This is our duty at the junction of the world of children and adults.

You no longer need an explanation who benefits from «Their personal matters», «You can't interfere...», «It doesn't concern me...», «Everyone has the right...», we will pay special attention to their defeat further.

«**Freedom as a conscious necessity**», this thought should become not a philosophical paradox, but a guide to action. From an early age, the child must be taught to choose and take responsibility for the outcome. And what choice can there be if a person does not truly know between what he chooses? If the child chooses to take a walk rather than do homework. If he chooses to eat a loaf of bread and lie on the couch instead of PT. Are these choices free? Does he do them intelligently, consciously, or under the influence of emotions, basic desires? Here's the answer. The child will also understand it. The choice under the influence of subconscious, dark motives is not free in principle. You don't think, you feel, you want, you desire! It is a great and difficult task to teach a person to overcome the challenge of «immediate satisfaction». But we must begin. The main thing, dear parents, is not to slip into enforcement. Do not follow the «simple» path of prohibition and punishment. Forced labor is the lot of slaves. Conscious work is a matter of honor and glory.

A conscious need for work, for fulfillment... In the past centuries, history has not yet been enough to form it among the peoples of the world. This is not a simple task, hence more urgent the need for a solution. Talk to your child. Show them the consequences of their choice. The price to pay. Pros and cons, losses and acquisitions. Reason together. Learn to build long chains of connections. What will the choice of «bread rolls» instead of «PT» lead to in 5, 10, 15 years? How will it affect his dream? Will it bring your child closer to

the image of heroes or wretches? This is already a very useful exercise, long-term planning! This inevitably leads to the question, «Who are your Heroes?» and a logical, natural approach to creating a **Cosmoplan – a personal development book**¹³. The mind itself leads us to the weapon of victory over demons.

Education without enforcement and punishment is impossible. It is important to make sure that they also become a conscious necessity. Seems impossible? Not only possible, but also natural. The culture of «Freedom», a false measure, has taken away one of the basic needs of human development – repentance and purification. Ask psychiatrists! **Repentance, atonement, and forgiveness are the basic structures of the psyche.** Their unavailability, their absence in modern discourse, creates emotional traumas and complexes. We will not make moral cripples out of our children. Punishment, responsibility, in all its grandeur and glory, must be ritualized, explained, and recognized as necessary. Learned not only by a child, but also by an adult! Punishment is not rudeness, not shouting, not breaking down emotions, God forbid not beating. Remember, the demand can be made by the person who embodies it himself. Intelligence, kindness, honesty, etc. You must first calm down yourself and be able to open up to your child exactly what is happening and why pain is sacred. The flame cleanses. Love pays homage without fear of conflict. Indifference fears «what may come of it».

A misunderstanding of the punishment-atonement culture is one side of the coin. On the other hand, there is a temptation to «buy» a child's good deeds. «Do your homework, get a gift», «Don't go to the camp, I'll buy you a phone» (a real case from our practice). Is this education, awareness? This is prostitution. Let's call a spade a spade, please. We have already written about the ethics of the gift in the battle against «Greed». Here we return at a new level. Buying a child's behavior, you don't form values, you don't form beliefs, you don't form a personality. You undermine it all, directly wreaking Chaos. The person is not for sale. What is sold is already cheap. Think for a second! Would you ever want to be treated well just for a reward in your life? Do you believe in the courtesy of waiters, feel the sincerity of doormen? So why do you inculcate a culture of corruption in children from childhood? Things and slaves are sold. Man is absolute.

What should I do? You can't reward decent behavior? Yes, of course, you can and should! With one simple condition. **First, the child must understand why it is worthy, what is dignity in general.** If you do not achieve this, then in the eyes of the child, «worthy» = something that is rewarded. Translating into Russian: «Good is what you are paid for.» One more step in that direction: «What pays more is better.» Who has more expensive clothes is a good person. Need to continue? No need. To develop the child's ability to

¹³ <https://cosmatica.org/library/499-lichnaja-kniga-razvitija-kosmoplan.html>

make informed choices, true freedom, you will tell him how his good deeds will serve the world. What he creates. Why this is worthy of respect. That his health and exercise is a contribution to the future, it is his valor as a warrior-defender, work as a husband and creator, strength as a father, etc. This is just an example. And that's what you can reward! Not on your own behalf. On behalf of the Family, Fatherland, Life! You don't buy it now. You convey the gratitude of descendants and the pride of ancestors. This is a completely different story. The Story of Heroes.

When you put a child in such a Story, your punishments and rewards will no longer be solely yours. They will serve a higher purpose. On whose behalf are you speaking? From the planet Earth. Can you make a mistake? Just like everyone else. Aspiration is its own reward. Why is this important? Because, despite all your efforts, the child can choose «wrong». And the time will come when he will choose entirely without you, there will be no parental rewards or punishments. So isn't it wise to prepare for this hour from a young age? You can make him run in the morning. But not on your whim. Then years will pass and he will understand. Aware! Himself. There may be setbacks. He gets tired, he might not be able to handle it. But you armed his spirit as best you could. Serving a higher purpose. If he wins, it's your victory too.

And yet, you may just be wrong. Yes, yes. You want him to become a lawyer, and he wants to become a boxer. Who's right? Good question. The best thing you can do is sit down together, discuss and make sure that his choice is informed. And respect it. Even if you think it's wrong. The child will take you into account. After all, you have respected his opinion since childhood. The right to make a mistake, and pay for it, is a sacred right of a full-fledged person. Of course, for the time being, we can't let him choose what we clearly think is disastrous. But God forbid you extend this parental authority to who to be friends with, where to study, and who to become! If you haven't been able to cultivate enough awareness in him by this point, then even your will prevails and he will go to music school (for example)... This will only be the victory of your demons of «freedom», the Death of the Measure.

For an adult, the formation of awareness requires indirect influence. In fact, it is necessary to change the status picture of society, what we discussed above: «freedom» as a symbol of high status, as the ability to avoid labour, because this is what has now become a symbol of the elite. This status picture needs to be changed, and here again we come **to the project of the Imperium, which is called the «Game Society».**

Oh, the game is a much deeper topic than you might think. The game is what distinguishes us from the world of inert matter, because the game is an action aimed not only at the result, but also at the process! «A thing in itself». A spiritual topic that is absolutely meaningless from the point of view of the

laws of thermodynamics. In the course of the game, we create a new reality, a spiritual, creative reality. The paradox is that the game itself technically seems to be a loss, from the point of view of the development formula, remember: an increase in the total power of the system while constantly reducing losses. But this is an illusion, the game is always an acquisition, if of course it is played with a healthy mind, spirit and purpose. When we play, we learn something, and you understand this perfectly well from the example of children who learn about the world through the game. But adults also get to know themselves and the world, look at familiar things from new angles, learn to solve problems, and develop solution models. It is no coincidence that business games, national competitions «Leaders of Russia», and Presidential Grants are now gaining popularity. They are pure gameplay.

General Staff officers play war, simulate war, and consider it their duty to do so. In essence, all military service in peacetime is a game «of war. What else is teaching, what is training and preparation? However, this activity brings salaries, awards, ranks and titles. Why? Because there is a profound understanding that if you don't play it, when the real war starts, it will be too late. The price will be terrible. It remains to take a small step and understand that the same model is necessary and in demand for the whole society.

Let's justify it. First, the modern «hot «war has long been waged not only on the battlefield. Economic, informational, ideological, and cultural warfare is going on every day. Are we preparing for it? Are we playing it? Seriously. The whole country, every citizen? They play with us, but we do not. The consequences are dire. Second, in addition to the war with other men, there are many other challenges in the Universe that you should prepare for. Famine, disasters, space objects and processes, climate change, viruses, etc. It is logical that they can affect millions of ordinary citizens. Do we simulate even basic emergency evacuation? Where is the nearest bomb shelter? «Give me an answer, doesn't not give an answer.» Do you understand what we're about? The future determines, it urgently requires the creation of a Game Society, total game with results for good. Because «war» is a model of development in principle. The enemy is entropy/Chaos, and he knows no mercy.

The most important thing is that we already live in the Game Society, only we refuse to recognize it, and, therefore, manage it to achieve a vital side effect. The very learning, cognition and development that occur in addition to the dry outcome of the game. Status overconsumption, heard of it? Sure. Expensive watches, cars, suits, prostitutes, gold guns and toilet bowls, and so on. These are adult toys that are not needed by themselves. Pure loss to Society. Because this «game» is born of Chaos, not reason, animal instincts, pack feelings. Pre-consciousness, pre-history, not yet truly human qualities. People don't even understand what they're playing and what they're losing in

the process. Demons of freedom whisper that the goal is to play, nevermind what happens! And happen it will, according to their rules. It's time to put down our own.

No living species has raised the game to such a height and significance in its development. The ability to play a conscious, controlled, intellectual game is one of the most human qualities. Since the game is endemic to our nature, we must learn and direct it. The Imperium comes «not to break the law, but to fulfill it.» The Game Society already exists. Any society is one of the Game, only this fact is hidden behind the veil of the eternal enemy, unconsciousness! Every day people play status games, each of us fulfills his role and believes that he gets some social points and social capital: respect, recognition, love, etc. The social game has rules, and it's not just laws. We don't say what we think to «maintain a good relationship.» We go to a job we don't like because «it's necessary, it's solid.» We tolerate disrespect in order to «avoid conflict, it's not good». All these are typical rules of the false game, the rules of chaos, as paradoxical as it sounds.

You may be surprised that **the rules and attitudes formed over thousands of years, we consider the creation of Chaos, demons. Exactly. Otherwise, it could not have been before the awareness of the problem, before the True Names!** In fact, nothing surprising, only the true scale of thinking is needed. Homo sapiens has been given such a huge potential, such a ceiling of possibilities, that today we are just approaching the beginning of our History. Everything that happened before, without exception, took place within the framework of pre-History. Unmanageable, random, reactive, purposeless, unconscious – the characterization can be continued, and it will be difficult to challenge even one word. It was all the way here, to this book, to this page. To the point of decision, awareness. A great turning point is happening right now.

Remember, all those false maxims that we talk about in the book are typical rules of the game: «Don't fight!», «Get rich!», «Other people's opinion is important!», «take everything from life», «if you don't sin, you won't repent» and so on. Attitudes learned by millions from childhood just because they were told to. Only because there is no understanding of the Game Society. Now imagine what opportunities will open up for humanity when the rules are written not by demons, but by Gods, creators and heroes. Let's say more, at the highest level of awareness, in Imperial Ethics, there are no rules at all, only goals. **The end does not justify, but creates the means.**

Victory does not require excuses, defeat allows none.

Habit is second nature. Today, often the first one. Think of the Overton windows where monsters enter. We're so used to games of ruin that we take them for granted. Mass sports, football, hockey, the phenomenon of a «fan» who follows the game with a bottle of beer and chips, but is far from being in

good shape. Not familiar? Millions of royalties for «stars» of sports. Haven't you heard? It's fantastic. Loss within loss, see? Resources are invested in entertainment, in a game that, however, does not develop its «participants» – the audience. It becomes a pure simulacrum. The same goes for concerts of popular bands. Status of pop stars. Bright rags, badges, posters, «merch». Fandoms of TV series: Star Wars, Game of Thrones, Hobbits. They do not encourage fans to become space explorers or valiant warriors. The finishing move is a «cyber-sport». Multiplayer online games: «World of Tanks», «League of Legends», «Dota», etc. This is a «sport» that generally makes you degrade, the player becomes an appendage of the computer. See if you don't understand yet! Time is being wasted, man-hours, man-years, untold megawatts of electricity, colossal resources are going nowhere. Every day, and things get worse.

Game, a man's great capacity for development, becomes its opposite. A dark mirror, a perversion. Like everything the demons touch, should you let them. Without mind control, our own nature betrays us. Note how often we used words in quotation marks in the last paragraph. The language itself is polluted, meaning is lost, and Chaos is creeping through the gates of duality (see the chapter on the New Language).

The realization that we already live in a Game Society. Correct naming. Clear statement of the game's goals and objectives. A clear measure – to increase capacity. All this will lead to the establishment of new rules. *«He who does not gather with me, scatters.»* Decay processes must be eradicated. By burning torch and hot iron. Creative inspiration, inspiration for feats, this is an example of the noble fruits. Animal excitement, orgiastic impulses to copulate – of Filth. We are already hearing voices: «Who will judge?» We, by duty. For he who does not judge, does not measure. He who does not measure, does not think. He who does not think is not a man. Undead, in a human shell. Fire!

The fundamental mechanism that the demons of Freedom trigger, the «Death of Measure,» is **reactivity**. A person is offered the freedom to choose from two, three, no matter how many options. It doesn't matter what: «cinema or theater», «Snickers or Mars», «lawyer or programmer», just choose. Repeated selection forms a habit. Again, as with a Game, you don't notice the mental trap of reactivity. What are we talking about? About the fact that options are already there, ready-made, formed coordinate system. Not formed by you. Someone has already laid it out, suggested it, and described it. It remains only to react and choose. As we say in the Imperium of Man: «out of two options, always choose the third one.» Don't get it ready-made, but create your own. What does the Games of Ruin society have to do with it? Go and see.

Architects of mass processes do not think about what they want to create with the help of a game, what to teach or what to call for. They think about

what they want to gain, what they want to use, what they want to «breed», what they want to «earn». In this endeavor, they inevitably rely on basic, mass, monetizable needs. On the lower qualities of man, which, we now know, are not worthy to be called his true nature.

Roughly speaking, they choose from what is, react to the state of society that is. They follow the path of least resistance, the path of inanimate nature. It's a vicious circle. Thus, with each historical cycle, the level of needs, the level of audience, will degrade. For an evil seed will not bear good fruit. Let's look at a simple example.

It would be possible to take football and its degradation to a spectacle under beer, but there are more relevant examples, more digital, more modern. The game «World of Tanks». International servers, international audience. The quality, graphics, and details are all excellent. There is even a kind of ideological bookmark for good. The best tankers receive the «Kolobanov Medal». The Russian World is coming. Everything is so. But think about what a monstrous resource this game devours. A beginner is considered a player who has led more than a thousand (!) battles for 15 minutes. That's 250 hours. 31 full workdays. Veterans have up to a hundred thousand... You can continue to calculate how much power it costs Humanity every day, the numbers are off the scale. We will not frighten you with cosmic eons of losses. And the process is underway, even right now. Millions of players around the world, happily reported by the media.

Remember, the Game can not be a value in itself, it must be a «good fellows lesson». Let's think about what does the WoT develop? Knowledge of history? No, most people think of it as an arcade game, and there are tanks in name only, no physical models, no crews, and no real tactics. On the same field «Tiger» and T-90 are facing off, or even fantastic and singular projects. Knowledge of military equipment, engineering skills, mechanics? Not funny. Maybe an influx of applicants to the Armored Forces Academy? Morale, readiness for mobilization? No. Valuable physical skills? Nothing. Dust and decay.

It would be wrong to say that nothing at all. Of course, a specific skill to click with the mouse, and even some team interaction with the basics of WoT tactics will stick. You even need to think a little. At least it helps. But this is such a narrow and specific skill that you can only call it development with a big caveat. And most definitely, this side effect will not justify the lost man-centuries even in your dreams.

This example does not support the thesis that «all PC games are ruin and loss». It should be discussed separately. The thesis is different. «PC gaming is moving down the path of degradation and indulgence of ever-baser needs.» They Become Games of Ruin. You see, we have to add a black word to indicate the substitution of the noble essence of the Game. For comparison, the game

of «Witcher» still contains a plot, story, moral choices, emotionally engages a person and, most likely, motivates him to read books. All this is done with geometrically less time. But which of the games is put on a stream, an assembly line, makes people kill more and more time, brings creators more money? The answer is obvious.

This is what we need to break with the Imperium. In the true Game Society (hereinafter referred to as the GS).

The structure of GS is described in detail in the book «Imperium of Man: The Age of Cosmetics». The details are stored there. Here we describe the schematic diagram. Social games do not create a material result; they rely on a person's need for recognition of a large or small group, creating new statuses. «Coolness», recognition, guru, respect, belonging to a group, etc. The task of GS is to manage the status system consciously, rather than reactively, for the first time in its history. The goal of management is survival and victory forever, development in its true sense. The first task is to decidedly separate high status from the level of consumption. A paradigm shift.

To such a degree, that overconsumption and even «high» consumption are stigmatized as non-lifebearing, condemned, indecent. Remnants of the decaying West, the necrosphere. Attention, they are not forbidden, because the forbidden fruit has its own sweetness. Simply indecent. Probably, there are people for whom ostentatious wealth is important right out of the gate. If it is «not cool» in the status system, you will not need to prohibit them. They'll change their shoes themselves. The essence of GS is that a big Role-playing game is announced openly, explicitly, and purposefully. Social privileges, the right to wear certain clothes (see «Imperial Style»¹⁴), insignia, special license plates for cars, etc. – all this should be given according to pre-known rules, for pre-known creative behavior. Nothing else. «They don't buy or sell anything here.» Data on this should be contained in the national information system, also known as the social network, be bright, accessible to all and public.

In fact – a single «Cosmoplan» for the nation.

Wealth is not frowned upon. It is simply not rewarded, and therefore-falls out of the information field. To quote one humorous program, a sad symbol of time: «There is a magazine with the top 100 rich people, but there is no top 100 for kindness.» Everything should be exactly the opposite. Do not think, however, that the propaganda of good will win by itself. Human nature is too imperfect for that. Games, mass-market games, and even PC games will retain their place. Let them continue to provide people with a relatively simple or interesting path to high status and recognition in a specific community. Let them. But now it will be games with a useful effect. Military-tactical on the ground, quests, participation in extinguishing fires, in the study of territories.

¹⁴ «Imperium of Man: Age of Cosmetics». – M: Variant, 2019, page 192

Anything, even dangerous and risky – this is for adults! Let them at least play at the computer, as long as it requires knowledge, experience, studying History, creativity, and finding new and non-standard solutions, even if it is still in a virtual environment.

Yes, a slightly more difficult path than now driving tankets under beer. But an immeasurably large reward. Universal recognition! Bonuses and rewards in public places, up to free passage for the heroes of the new «Tanks». The point is clear, I suppose. Turn the enemy's weapons against him. And don't laugh. Realize that millions of man-hours are already being burned for nothing. You should not try to change these people dramatically. They need to be directed so that they burn less of time and get at least a side socialization and development. Even so, the «earned» status is better than the current chaos and demonstrative consumption! Remember, GS is not the only blow to the Enemy. This is just a good environment.

Virtuality. How ironic that this word has come a long way from the Roman root of «all men's virtues¹⁵.» The path from what it should be to its complete opposite – virtual reality. A reality that doesn't exist, that shouldn't exist, because it is a lie and the antithesis of any true virtue. Today, it serves one purpose – to make a profit. Everything that is sold is already basically non-vital, does not control the future. Sale is always **reactive**. What has already become clear, already popular, already tempting, what even the most ordinary person wants. This is the way to desecrate any potential. It is in our power to deploy the enemy's weapons. Return virtuality to its original meaning, and turn it from reactive to **projective**!

This is the main point, the main lever for controlling the future. A paradigm shift. The management of the future, the management of Life, is the management of a person, his spiritual sphere. «The main part of the machine is the human soul,» as we say in the slogan of the yet-to-be-made film «Breakthrough». In fact, **the overall power of the system starts with the power of the spirit**. This is a quantity that has yet to be realized and measured! The growth of this power, of the human factor in any equation – is the goal. Everything else is just a means. This is the Imperium of Man, and the Kingdom of Heaven, too. Virtuality as a means is quite acceptable. What's wrong with air and auto simulators? Nothing. Because they are aimed at developing a skill in a person (!). You can have a good sweat in the boxing simulator with your children. In essence, any game creates a temporary, artificial reality. «Make-believe». It is entered for the game and left for summing up and receiving a lesson. We have already said enough about this above. Now our task is to reforge another false word – «virtuality».

GS, through a good system of statuses, makes its «make-believe», its virtuality, already a real acting force. For a person, relationships are always

¹⁵ Virtus (лат.) – Valiant

more important than facts. Statuses, badges, posts, «likes» and «reposts». All this is pure virtuality. So, within the framework of the future management system, all the materials of decay, all the filth should simply be turned off from the rating system. Do not prohibit the material itself, do not punish, except in special cases. Exclude only «social capitalization». No promotion, no rewards, no likes or reposts. And don't say it can't be done. Yes, you can even allow any «Instagram» back. Only under the new rules of the game. Is this not possible at the software level? Rubbish. In the world of existing neural networks, such a policy will be implemented easily, with minimal human supervision, of course. Very quickly, photos of naked girls, moronic commercials, enemy propaganda – all will be in the reservation. You can't even call this censorship! **The lack of an assessment will be the worst assessment.** Branded.

Gradually, step by step, a good rating system will reformat the consciousness of the masses. The freedom Demons will receive a fatal blow. Now «not doing», ostentatious consumption, will be decoupled from the high status in the most obvious way. Roughly speaking, it will be shameful not to have the badge «excellent master of production», or «father of many children». And this shame will be visible to everyone, always. The awl in the bag can no longer be hidden. Pop clowns, artists with reduced social responsibility and other experiments in degradation are simply isolated. They become the «dark outline of culture» (see «Imperium»¹⁶). We repeat, this is possible without a fundamental change in the laws or Constitution. All you need is a purpose and a will.

The final step in managing a GS is to link any public position to the appropriate gaming status. For an example. Do you want to be the Minister of Defense? Get the minimum score you need in war games, physical training, tactics and leadership. You will say that any human system is subject to corruption, that they will still find a way to circumvent, promote «their own», etc. You'll be right. **Our goal is so great that even the imitation of moving towards it is a blessing.** Whether you want it or not, physical education will have to be tightened up, it is obvious. At least once on the training ground for large maneuvers to appear and run. GS is also about transparency and verification. Of course, the choice of several relevant candidates will still be influenced by familiarity, personal connections, and nepotism. So be it! But candidates will already be forced to play valor, and not what they are doing now.

The very introduction of a Cosmoplan creates the foundation for new thinking. Every public person should be prepared to show their Cosmplan. Prove your worth. It's absence, a reason for awkward questions. It doesn't matter how much money you have. You show me what you are worth, what you create, what you strive for? Show us how noble you are with your achievements and feats. That's what should be the subject of bragging rights. Crypto wealth should lead to crypto success and crypto status. Again, no

¹⁶ «Imperium of Man: Age of Cosmatics». – M: Variant, 2019, page 195

restrictions. Everyone chooses for themselves. He wants to wither over gold in the dark or shine with the works of creation. In such a system, virtuality finds its true meaning of «valor», returns to its roots. **Virtual reality becomes «Valiant Reality», the false word is extinct.** Any imitation, any game, program, status, if it does not contribute to the power of the spirit – is abolished. The circle closes, beauty joins with truth.

At the end of the cycle, we will once again look at the Game as a tool for transforming reality. This is not just a universal principle of human existence, not just its difference from nature. In many ways, this is the answer to the fundamental question: «Why does nature need humans?». The answer is **«To play the Big Game.»** We'll open it. To set goals and solve tasks that, at first glance, go beyond all their everyday needs. Scientific and creative search is nothing more than a Big Game. Why? Because scientific and creative search can not be called unambiguously effective or practical activity. There is risk and excitement in it! Discoveries, inventions, scientific solutions – sometimes come in surprising ways. Mendelev's Dream, Newton's apple, fiction of Tsiolkovsky.

The Excitement. Another interesting word in our arsenal that needs to be cleaned of Filth. Excitement is an anticipation of the unknown, a game with fate, a dance without a guarantee of continuation. The search for new knowledge can give zero amount, the discovery is not made, but the beauty of the game remains! There is a feeling that we will try again and again. Noble risk, noble excitement. Because it gives birth to the good. This is the living formula for creating from the impossible today, the possible tomorrow. From the impossible to the possible. A miracle, a victory in spite, no guarantees. This is the sign of a real Game, a valiant reality. Possibility of defeat! Connection to reality, bitter lessons, the ability to fall and rise. A noble game of science, where even a negative result is also a result, and the basis for the future. War games where even the losing side gets stronger.

False addiction games, «World of Tanks» and hundreds of ruinous amusements do exactly the opposite. They guarantee (!) effortless results. Only pleasant consequences. Feel the difference, as they say. A world at the cutting edge of creation and a rotting swamp of «guaranteed satisfaction». The demons of Freedom promise only one choice: which puddle to drink from. What kind of animal to turn into. Entropy, as it is. Chaos. At this point, it is particularly clear that Chaos and order are not opposites. Absolute order is heat death. This is the path of an inert nature. Life tends to develop endlessly, and therefore to constantly create and wait for new things. To the harmony of the unprecedented. What could be more disorderly than something that has never happened before? And what can be more harmonious than perfection, which you need to strive for with all your being.

Game, fantasy, imagination is a symbol, the apotheosis of the role of Man in the universe. After all, any invention, any discovery first appears in the human

mind. Image, premonition, intuition, scientific search. This is all work with «what is not», and perhaps will not be. But without this game, there are no worlds. We've become so used to imagining things that we've stopped feeling how wonderful they are. A living Co-Creation, a point of transition from «non-being» to «being». The noosphere. The ability to go beyond the known, comfortable, past, and, consequently, obsolete and «try your luck». Development is a stable process, but also a non-equilibrium one. And what is non-equilibrium? This is a risk, a gamble. **When you are above the abyss of nothingness, you continue to dare.** Here we are very close to the point of understanding that everything, in general, is a set of game rules and conventions that we are used to. That the very ability of a person to imagine, to complete images, to imagine is the foundation of the universe, as we can only know it. The picture of the world and the world are one and the same. We are what we believe in.

The ability to prevail, to create, to overcome in spite, to do beautifully, and not just effectively, is our Eternal Call. Mystically, we hear it, and we send it to the stars. The realization of this is our victory and a striking sword against the terrible Demons of Freedom. All their deception, all their filth and temptation are built on one despicable assumption. That death is also a choice! That you can choose not to hear the Eternal Call. That you can choose to be a beast rather than a Human. That you can choose not to think, not to respond. Not to be, ultimately. That the freest person is the one who not only denies the obligation of superiority, but becomes its complete opposite. A demonstrative consumer. «Nothing that breeds nothing.»

Demons enter us through false words. Their final exposure will also be the word. **Hear it: «Child-free», Child-free.** This is the phenomenon of the dark anti-language, the ultimate loss of nobility. We are glad that our language can't even create such a form. «Freedom from children». This is freedom from Life. It is a manifest, confirmed, and triumphant cult of annihilation. Worse than self-destruction. The destruction of oneself, the future – descendants, and, consequently, the past. If you haven't figured out that the demons are real and on the doorstep, open your eyes!

But we will win. The body and spirit of Humanity will be cleansed of filth. Whatever it takes.

How do we defeat the demons of freedom? Knowing their true face and True Name.

How do we defeat the demons of freedom? Declaring war, banishing them in yourself.

How do we defeat the demons of freedom? Creating a circle of purity, raising children, calling the Enemy the Enemy.

From the true word – the true thought. From true thought comes true knowledge. From true knowledge comes true action. By the power Heavens, we will eradicate them.

The Reality of Demons, «Madness and Science»

«First, inevitably, there is a thought, a fantasy, a fairy tale. They are followed by scientific calculation» – K. E. Tsiolkovsky

Demons are real. Moreover, their reality is much closer and more important to us than any other.

Anyone who believes that science will solve all the problems of humanity should look out the window. Science has been around for millennia, and so have problems. Therefore, it has not solved them in the past, does not solve them in the present, and will not solve them in the future. Dry science alone is simply not enough. Using a strictly scientific approach, you could accuse us of violating logic. Just because science hasn't made people happy in the past doesn't mean it won't make them happy in the future. Right. This possibility, as well as the Second Coming, cannot be ruled out. That is why both possibilities belong to the category of faith, suggestion, religion in the low sense of the word.

Natural sciences study inert matter, essentially, dead nature. From the point of view of their precise and rigorous formulas, the study of Society and Man is not a science at all. Let's say more, Humanity has not yet created a generally accepted science and teaching about Life in its pre-history. But we are life! Not only does the science of matter not solve our root problems, it doesn't even address them. You can live in a hut, or in an apartment, but hatred, greed and fear remain. As well as the risk of mutual and self-destruction. Do you feel it? The most important thing for a person, in fact, the human dimension, is simply not considered by traditional science. She gives up, passes. Declares that human life is too complex, unique, subjective, whatever. Just don't look for answers.

The old, false «scientific worldview» is thus trying to push the Man himself out of the agenda. Ignores its nature. You already know that in physics and chemistry there is no concept of Life at all. Is there a concept of Good, Vitality, and Nobility in economics? If not, then this is science not for man, but against him. Part of an old dying world that saw man as a means, not an end. Not maliciously, not intentionally, but habitually, over the last few centuries. Formalism, bureaucracy, and the replacement of education with tests also grow out of this «scientific» worldview. This is a very deep pool. Now it is important for us to note that the natural sciences are trying to lay their lifeless (so far) paw on all the others.

The economics are obvious victim, but the situation is the same in sociology, political science, and even logic. There is no life, there is no understanding of the stable nonequilibrium of development. Contradictions

of the human soul. Psychology in practice tries to give recipes, adjust a person to the «norm», look for repetitions, patterns where they should not be. Ask if modern psychology uses the categories of kindness, honesty, camaraderie, honor, and conscience. How many times do these words appear in the textbook? Good question. «Fighting is bad,» and it doesn't matter if it's the right thing to do. «Violence is bad,» no matter what the price of nonviolence is. «Child labor is dangerous,» no matter how degraded the child becomes in the long run. Here are their fruits.

It is necessary to understand that in his very essence, man is a triumph over stagnant nature. Victory in spite. An exception to the rule. Free will! An opportunity to act contrary to known laws, to make the impossible today possible tomorrow. Until science becomes seriously engaged in learning about the uncomfortable, lively, ever-evolving world of man, it will not become the science of Life. And yes, Demons are real. The vast majority of modern scientists, and ordinary people who are well-trained in the «scientific» worldview, will cower at these words, as if burned. Because it's scary, it's uncomfortable, it's out of line. Right. Like everything that was once unthinkable and fantastic. Just like the flight into Space before Tsiolkovsky.

All scientific discoveries are generated by a unique ability of the human mind – imagination. Creating in the mind an image of non-existent phenomena, devices, laws. Or existing ones, but not available for observation. This is imagination, fantasy, you can not be afraid of this word – it leads the scientific search forward through the centuries. How can you even search for «that, I don't know what», without imagination? The scientist does not know what he will discover, but he is looking for it. He can feel the event horizon with his inquisitive mind, anticipate, form hypotheses. That is, to create mental constructions and images of what is not, but can only be. This «unreality» has given us the whole edifice of science that we see outside the window!

«Only the insane prosper, only those who prosper can judge what is sane!», this maxim of the Imperium is confirmed here. The brilliant foresight of scientists is ahead of their time, contradicts the common sense of the average person, and is ridiculed by the formal science in the moment. Don't believe me? Ask D.I. Mendeleev, who never became an academician in Russia. K.E. Tsiolkovsky, who was openly laughed at for many years. P.G. Kuznetsov, who went to the labor camps for «a non-classical interpretation of the foundations of Marxism-Leninism», perfectly understanding the junction of the spiritual and material in science. What are we talking about? Yes, here, look. Science develops out of the madness of this world, out of boldness, out of the creative spirit, out of faith (!) in the impossible. Then, and only then, cold reason comes and turns the discovery, the revelation, into a series of formulas, laws, and documents.

Great scientists openly acknowledge the role of creativity, imagination, will, and scientific belief in their work. Their mind is free, knows no boundaries, is not bound by dogma, is bold and ready for anything. Constantly on the alert, ready to see a new opportunity, a connection of phenomena, a pattern where no one even looked for it before. V.I. Vernadsky predicted the era of the noosphere, the domination of mind as a geological force. He was absolutely right, the mind has become such a force through its fruits – technics and technology. These fruits have advanced us on the path of mastering inert matter, although there is still an abyss of discoveries to be made. But the most important thing, the most important thing is still ahead. It remains for us to master the noosphere ourselves!

Yes, the fruits of mind become a geological force, and even the waste products of production and life accumulate on a planetary scale. But not the mind itself. Yes, humanity is becoming global. Only the colonial system instead of guns, now uses the Internet and finance. The world has changed, but the person remains the same. World processes are generated by the mind, but not controlled by it. Science generates nuclear weapons, plastic packaging, oil burning, but does not form a person capable of coping with the consequences. **The future and the noosphere are not defined, they define.** Educating a new person, a new way of thinking, a new ethic and philosophy that can take on the challenge of time and the universe is a noospheric-cosmic imperative. We will do it or die!

We are on the threshold of a new era. You can take a step forward or back. Until now, no one has seriously engaged in the formation of a person, and therefore the management of the future. Where is the system of educating scientists, creators and deciders? Who sets the task of education to form a mind capable of curbing world processes? Lead humanity to unity, victory. To the triumph of nobility and valor? Such goals are not even taken seriously. We create things, not people. With this approach, science itself will create more problems than it solves. Even in the purely material sphere.

The transition to the era of noospheric-cosmic development requires the most direct attention to the carrier of reason. The Imperium of Man. The formation of his character, personality and potential should be the subject of the main search for scientists, leaders and teachers. The unconquered, burning power of imagination, faith and will, the art of the impossible, the unpredictable, the exceptional – this is what should become the most applied discipline. It is necessary to understand that the root of everything is spiritual, but not to try to apply outdated recipes of churches and formal cults. Researchers, designers, and organizers of the future are born in trials. Labor is sacred and even pain can be blessed. It builds strength. The greatness of human nature, the boundless power of the spirit, must be the goal. Noble words and qualities should fill textbooks and screens. The departments of

Ideas, Ministries of Culture, Education, and upbringing should be at the forefront. Then, and only then, will the noospheric stage of history really begin.

At this point, we return to the immutable reality of demons. You may have noticed that so far we have avoided directly defining this term. Maybe we're just using a nice word like «Schrodinger's cat» or «Maxwell's demon»? At the same time, remaining, of course, in the usual paradigm. No. An emphatic no. Those of you who grimaced did so for good. **Demons are evil spirits, neverborn, always hungry for the blood of reality and the flesh of the mortal world.** Created by our passions and base feelings, ancient fears and lust. The forces of the great Chaos, the primordial principle of destruction, which are also contained in us. Their name is Legion. They are not endowed with consciousness in our understanding, but are active, animated. It is a filth that defiles. Nothing that breeds nothingness. They operate in the most important sphere for a person – spiritual. But believe me, you also see their embodiment every day. The book will show you.

As long as they are not hunted, as long as they are not fought, they are invincible. It's time to put an end to this.

This suggests an accusation of mysticism, obscurantism, and fantasy? We recognize all points. In case you haven't figured it out yet, these are the parts of human nature that the old science ignores. Claiming that people call «demons» what they don't understand and are afraid of. Fair. Blind faith in science does not make us fearless, it makes us defenseless. As you will see, demons are happy to use this «scientific superstition.» Not to be confused with scientific belief! Are you in doubt? Yes, ask a few ordinary people how a mobile phone or an internal combustion engine works. The result should be sobering. This is not a world of enlightenment, it is a world of superstition, a kind of cargo cult. The ancient evil inherent in the very nature of things is not dormant. It, unlike us, does not deceive itself. In a world where people marry cats, bomb kindergartens, shoot up schools, breathe hatred at the behest of the Internet, and commit suicide beautifully – only those who refuse to see Demons will not see.

Time for the Awakening. «The devil's best move was to convince the world that he does not exist.» Formal science will cover you!

What kind of science is alive? How does it expose the nature **of the Enemy beyond** – the Demonic? The scientific school of Russian Cosmism, of course, especially the doctrine of the noosphere. That is, about another «shell» of our Planet. What other shells are there? They are held at the school. Lithosphere, hydrosphere, biosphere, atmosphere, etc. Rocks, water, flora and fauna, including humans, gas envelope, in other words. All of them have their own laws and properties. All of them are a resource for Life in general, and for humans in particular. All of them can also be deadly. Earthquakes, volcanic eruptions, tsunamis, floods, hurricanes, locusts, and as the highest threat –

viruses, bacteria, and parasites. Scientists position the noosphere as just another shell. The sphere of reason. It would be naive to assume that it does not contain its own deadly risks. On the contrary, these risks, as contained directly in human nature and related to it, are of the utmost importance.

Through man, nature is aware of itself. There is a spiritualization of the creative forces of nature, says Academician Vernadsky. We must firmly accept the obvious fact that reason is not the source of all that is good and beautiful. Consequently, inevitably, **there is a spiritualization of the disastrous forces of nature!** The Great Chaos, the second law of thermodynamics, the primordial destroyer, has hitherto existed only as a physical quantity. Now it becomes a spiritual dimension. Within the noosphere, a necrosphere is born.

This is the most applied science possible. The physical finds the most effective reflection in the mental. Let's not be unfounded. Just imagine, think about the monstrous consequences of believing that the second law of thermodynamics is absolute. That at the end of everything – the heat death of the universe, the inevitable entropy, complete chaos. That life is an accident, a fluctuation, a stain on the universe that inexorable time will erase without noticing. After all, it justifies everything! If the end of being is destruction, then why not strive for the end? Literally, «the law of God.» So, you can kill children, you can refuse childbirth, you can avoid development plans for a hundred centuries, you can sell alcohol in kegs, in general, everything is possible. For why not? Final one. The beauty of nothingness. Naturally, adherents of this cult rarely join it fully consciously. More often due to inertia, because there is no other picture, no choice of other and higher knowledge. Yes, yes, damn it! For a person, the lack of education, upbringing and instilling the necessary knowledge is a direct capitulation to entropy. A crime against life. The foulness of Chaos. Not to be aware for a person = not to be. What you look at, you turn into. Whether you want it or not.

The chief priest of this cult is an old, lifeless science. The main idol is technical progress to the singularity, artificial intelligence. Symbol of the end of creativity. Even Satanism is better! Devil worship does imply the existence of a Creator and Design. Even the traitor to this Plan has the hope of unlimited mercy and rebirth...Now everyone will understand why AI in its current perception is «Abominable Intelligence» (AI - Abominable Intelligence). No faith, no future, no Life.

V. I. Vernadsky, R. L. Bartini, P. G. Kuznetsov, B. E. Bolshakov and scientists of the school of Russian cosmism, like no one else, came close to proving the unity of all phenomena of the Universe, as phenomena of Life. The ultimate symbol of this is the unified system of physical quantities L-T or «space-time»¹⁷. It fundamentally leads us to the fact that all the phenomena

¹⁷ «Persistent Development: Scientific foundations for projection in the system of nature-society-man», O. L. Kuznetsov, P. G. Kuznetsov, B. E. Bolshakov. Dubna, 2001

of life are reducible to each other, have a fundamental unity and kinship. Spiritual phenomena, life, are no exception. The universe, the Creator, and the Design are one. In this Book, we study only the practical significance of the discoveries of our great minds. Step one, according to Vernadsky. Living matter differs from inert (dead) matter, but is isomorphic to it. Simply put, it obeys similar laws derived from stagnant ones, but at a new level, with new speeds of being.

We will not repeat here the rich material collected by our academician. It is necessary to read his works in their entirety and in the original. Let's move on to the conclusions. The same structures used in the creation of rocks, minerals, and crystals are then found in the structure of skeletons of living creatures and DNA spirals. The same handwriting of the Creator. What is important to us here? That the third level of isomorphism, or similarity, will also exist in the noosphere, the psychic envelope! Similarity is not identity, it is not repetition. But «everything is known by comparison.» Mechanisms of destruction and self-destruction exist at every level. Rocks are reduced to dust, closed systems are reduced to maximum entropy, and vibrations are damped. In dead nature, this can take millions of years. Slowly, imperceptibly, at first glance. The important thing is that in dead nature, the eye has not yet been born to notice! Millions of years, yes, but there is no defense mechanism. Stagnant nature itself is a closed system, it obeys the Second Law. What is the outcome of billions of years of co-evolution of being? Yes, co-evolutions. Vernadsky proved exactly this, although he did not invent this beautiful term, this is already our brainchild! The appearance, in fact, of «Life», in the narrow sense of the Biosphere.

All this still seems curious and scientific. Soon you will see how terrible and exciting conclusions will come for us. The biosphere, on the one hand, has fantastically accelerated the processes of being, life and interaction between living and inert matter. Living species have been appearing and disappearing for millions, no, thousands of years. Organic chemistry generates countless new compounds. They, in turn, change the mineral and crystalline nature. Fossil deposits are being formed. Oil, gas, everything. A feast of creation, isn't it? Depends on the point of view. You've noticed the word «disappearing» about living species, haven't you? Some living organisms destroy others, parasitize, infect, eat, kill. Entire ecosystems are being devoured. Deserts were created not only by humans. Acts of genocide, ecocide, and macro-extinction follow one another. Under the indifferent eye of cold space, under the deadly winds of solar radiation, under huge glaciers, there is nothing that Life did not endure. Greatness, creativity, but also the horrors of failure, dead ends, mutual and self-destruction of species.

Don't doubt. Life is not a magic wand. It is capable of self-destruction. Irrevocable destruction. This is an unavoidable price to pay for another

opportunity. Greatness and endless development. One thing doesn't happen without the other. The miracle of life is that the stone is doomed. But the frogs will still flounder and eventually, churn the butter. **Life is a hope**, at the forefront of which is the formation of intelligent life. Human. The formation of the noosphere is the newest and probably final shield of Life from the merciless universe.

However, my friends, before the Noosphere, existence was not realized! Consequently, there was no torture, no war, no suffering, no hatred, no fanaticism. As well as mercy, compassion, love, creativity. Do you understand? The loss of species was not monstrous simply because there was no observer who could be horrified. The suicide of populations was not abhorrent and pathetic, because they had no choice. We have it all. The evolution of Life to the Noosphere, awareness, is not just a new level of Kindness and creativity. It is also **the emergence of Evil and Horror, the ability not just to choose suicide, but to do it en masse, collectively, with gusto**. This is the appearance of Demons. Not the statistical, cold processes of the Universe, but *the Enemy and the evil Inside, the Enemy Outside, the Enemy Beyond*. Sweet is the option to not think about it. Brush it off, laugh it off, twirl your finger at your temple. The only way in Life to lose without hope is not to fight.

At about this point, you can better understand the joke from the movie «Design»: «*Open the canned food before the Battle of the End. Overdue*». **For you and me, this is the Battle of the Beginning**. It is our duty in this Book to identify the Enemy with such vividness and harshness that only Judas would dare not join the sacred ranks!

So, self-organization. From the point of view of reason, it is obvious that life arises in the course of the evolution of inert matter. Not by a miracle. Even the religious tradition says that God created man out of clay! Everyone should agree. However, there will be a special chapter on faith. After the self-organization of «inert» matter into living matter, a completely new and unimaginably interesting process begins – **Coevolution**¹⁸. Mutual influence and feedback of the living on the inert and vice versa. We consider oil to be a «fossil natural resource», but it is a product of once-former life. A good enough example? Man is also a product of this co-evolution. The noosphere, the mind, is also a product of this co-evolution. Do you think it ends further? On the contrary, quantity becomes a new quality! Here we stand.

The most difficult thing is to see the process from the inside. This requires intellectual courage and a strong will. At the third, noospheric level of self-organization of Life, its co-evolution, we must state the emergence **of the spiritual as a new, unique form of being!** Now there are three elements in co-evolution: inert-living-spiritual. The first two evolved over millions of years, separately and together, to give rise to the third.

¹⁸ «From Co-evolution to Co-creation», V. A. Shapiro. Russian Cosmic Society, 2023.

Attention, question: what is the reason to think that the third element will not develop within itself and even faster in the Trinity? No. A religious comparison is expected, and for good reason. The Trinity is life-giving, in spirit and in truth. We understand this now more than ever before. It remains to understand the inescapable reality of Demons. Even more so, their materiality. We're almost there.

Living matter is closely related to stagnant, has common principles, but also its own laws. Spiritual matter is closely connected with living, has common principles, but also its own laws. Destructive microorganisms such as viruses and bacteria became the product of self-organization of living matter. We use them for scientific and economic purposes, but we still clearly consider them enemies. Enemies can also be used. Some phenomena of life can destroy and distort others. Not all viruses and diseases are deadly, right? Moreover, viruses, in order to spread, are interested in ensuring that the carrier survives! To become an incubator of new and new viruses, to come into contact, to spread, to infect. Illness and death are really just a side effect of viruses eating us up. They would have been happy to avoid it. But it turns out as is.

You may not have known, but the losses of humanity from viruses and epidemics exceed the losses from all wars in history by several times! Since the beginning of our era, only recorded epidemics in the world have killed more than 500 million people. The entire Second World War is only worth 70 million. Common flu kills without any epidemics. Every year. Even now. How do you like this «self-organization» of life? Millions of people died because such phenomena were not realized and understood in time. «Invisible» viruses destroyed the population of cities because medieval thinking did not envision quarantine, hygiene and sanitation. Because they blamed cats, not rats! God's wrath, sins, whatever. Did the twentieth century get any better? By the twenties, more people had died from the Spanish flu than from the First World War. How well were we prepared for Covid?

Of course, people also died from self-organization of stagnant nature: volcanoes, tsunamis, earthquakes, etc. But the scale can't be compared. After all, they understood the stagnant nature better, began to prepare and win. Today, they are slowly starting to live, they have learned something, at the cost of half a billion souls. Now imagine **how much more dangerous, powerful, self-organization, co-evolution of the spiritual nature is!** Denying it is just as criminal and ridiculous as saying that there are no viruses, because they are «not visible» or the devices do not detect them. The smallest, most inconspicuous element of nature has claimed the most lives. Today, denying or refusing to see the formation of the sphere of Spirit-the noosphere, as an independent planetary phenomenon, a person is likened to a medieval peasant burning a black cat, as a source of plague and all misfortunes.

So, the demons are real. Their denial is unscientific. Naturally, they don't look like horned imps. The most terrible killers of nature – viruses, do not «look like» at all without a microscope. After reading this Book, you will better understand what Demons «look like». Ugly and disgusting. Horned imps would have been easier. They are the product of co-evolution of psychic matter. «Viruses» of souls. Their danger is all the greater because it is always difficult to recognize the threat from within. Mentally ill people consider themselves healthy. Thieves are honest. Murderers are fair. Feel the trend? We are surrounded by a sea of psychic energy. What we generate in our consciousness is what fills it. Good thoughts bring forth good fruits. Evil, self-serving, lustful, obviously, on the contrary. This has been known to all religions in all ages. Only in the last hundred or two hundred years have we accustomed ourselves to the comfortable idea that religions speak «metaphorically», frighten. Nothing like that. Today we have reached the level of scientific understanding, understanding of reality, and the urgent need for spiritual disciplines. Including demonology. This is the noosphere, everything is connected here.

We don't speak, emphasize, we do not speak metaphorically. Demons are not an image, not an euphemism. This is a new form of life that is inextricably linked to our psyche. There is a lack of scientific data on them, because we have already shown above that the old science basically gives up on life. Let's give you some examples that will open your eyes to the abyss of the unexplored in the psychic sphere. You are welcome.

Scientists still can't confidently explain the mechanisms of sleep. Even the everyday, nightly, still remains unknown! Have you heard about mass panic, hysteria, psychosis? Check that they are documented. Scientists what? That's right, they still can't explain this phenomenon. How can panic spread through the air? This is not a material phenomenon. We don't have the right theory. What is the noosphere? You didn't hear it! Collective suicides, google it. Suicide epidemics. Come on. We won't go far. School shootings. Do you seriously think that this can be rationalized in the old scientific picture?

Indeed. Take a break. Do you seriously think that a person picks up a gun and goes to kill children in school because they were not loved enough as a child? Or he hadn't seen enough of his father? But it is precisely these «versions» that you will receive from modern scientists-psychologists. A sane person! Just for a second. The vast majority of mass murderers are sane. Therefore, their behavior belongs to the «mental norm». Are you not afraid to live in the world of science, which considers this the norm?

The old world, the old paradigms, the old economy, school, science, are no longer adequate to reality. Not adequate to Life. They are falling apart before our eyes. The purpose of the Book of Life is to expose the enemy's face and ignite the holy flame of purgation. We also know what to build clean. See

all the Key books¹⁹. But first, the flame. Without throwing off the shackles of a false world, without opening your eyes, you cannot create a new one. It is impossible to preserve the development of Life.

The reality of the noosphere can be confirmed without extreme examples. It's everywhere. The spiritual self-organizes, thought begets thought, feeling begets feeling. You are also familiar with the concept of «depressing atmosphere», «unhealthy climate in the team», as well as vice versa «creative atmosphere», «positive attitude», etc. This is not a material factor in the usual sense. Yes, everything is even easier. The news you hear, the words you say, the pictures you see, they are really animated thoughts, images – don't they also shape your consciousness? You can agree or disagree, accept or oppose, but it will be very difficult to ignore them! This is called an «agenda». Millions of dollars are spent on its formation in the right way. But this isn't about money. Behold. One thought shapes another. The word is an embodied thought, we think in words. Hearing thought symbols evoke fear, pride, panic, or enthusiasm.

For this reason, even the purity and beauty of language affects the content of thoughts. The culture of oral and written speech, the great Russian language, already determines the fate of civilizations. Let's move on. One of your thoughts, as it is not difficult to guess, leads to another. Generates it. Can you explain how this happens? No. Science can not as well. Surprise, right? Science is powerless to explain the foundation of its own existence – the process of thinking! Self-generation, self-organization as it is. Do you control your every thought, understand where it came from? Or are there unexpected ones? «I remembered, I thought, I don't know why or from where.» Yes, the answer is obvious. Now, add to this the above-mentioned phenomena of the transmission of mental states in space.

Get an obvious picture of the independent existence of the psychic. Seas of souls. Noosphere in the narrow sense, which we will call «Navi» for the sake of distinction²⁰. Thoughts exist independently of you, some thoughts generate others, thoughts are transmitted in space, thoughts form space! If it is not filled with light and creativity, then Demons will come out. The Orthodox maxim becomes very well understood: «The absence of the victory of good is already the victory of evil.»

This is so deep in our nature, so fundamental and accepted a priori, that science has almost (!) not tried to study the sea of souls. Religious and mystical practitioners did this all the time. But they always lacked a scientific approach. Their wisdom and integrity are not directed to the future, to the

¹⁹ «Imperium of Man: Age of Cosmatics», «History of Heroes», «World of Heroes», «Cosmoplan» – «Book of Life».

²⁰ «First Angel» – Volgograd: Periskop-Volga, 2020, <https://author.today/work/83568>

transformation and affirmation of Life. They freeze in time, often chanting «non-being» altogether. Nirvana, samsara, monasticism – all about it.

The synthesis of the mystical and the scientific, the great «sklyuchenie», is the answer of the Russian Cosmic Society. The true science of Life is based on facts, and at the same time is aware of its reliance on fantasy and scientific faith. The most important facts of human life are their existence in the Navi and Noosphere. «Madness and Science» is not a joke at all. Every thought, every intention, every action counts. It either brings the victory of creation and Life closer, or it increases Chaos and entropy. Either it allows a person to step over the Kalinov Bridge, or it doesn't. Nothing else is given. All these are already measurable, therefore, scientific concepts.

In the end, the reason for all human actions is his psyche, thoughts, feelings. They are absolutely, unconditionally material. Moreover, this is the only real reason for everything that concerns a person, and therefore the collective, society, and the state! How is it that it is least studied? Why is the spirit least talked about? But this is, as they say, the right question.

From the moment of the first known epidemic in Europe («Antonine Plague», 5 million dead), almost two thousand years will pass before scientific proof of the existence of viruses. A practical, working hypothesis was much more important. It has already helped in the fight. Of course, it helped those who did not close their eyes and did not hide their brains behind the usual fairy tale about the wrath of the Gods. The analogy with the present, I think, is clear. Science has become a «fairy tale». Daemons are real because they work. The Russian Space Society does not hide behind the convenient, familiar and understandable, we are fighting the plague of the spirit.

The next fundamental understanding is that **entropic processes do not lead to the direct destruction of Life.** Simply put, neither the physical, biological, or spiritual forces of decay seek to directly destroy a person. Like parasites, viruses categorically do not benefit from the death of the carrier. This is a side effect. The most successful viruses kill slowly and for a long time. They are alive and want to live! More «deadly» ones are losers, simply burn their food supply and die out along with the local population. We can say that the «target» of viruses is not a dead person, but an eternally infected and infecting person. Carrier, incubator, and fodder cattle. Defiled, weakened. Remember, «nothing that is breeds nothingness». Entropy is not a sterile death, it is a power dissipation, a gradual decay according to the Second Law of thermodynamics.

Viruses were out of luck. Their parasitic and destructive effect is noticeable to the eye. It clearly, palpably, and physically weakens a person. Therefore, after many centuries and millions of fallen people, homo sapiens learned to fight them and win. Demons, that's another matter. They affect what is not visible, and as a result, «no matter» – the soul. Isn't that what «common

sense» tells us? Like viruses, the goal of the demonic legions is not to destroy the carriers, but to enslave them. Submission to fear, lust, greed, and the ghosts of «freedom». Turning all the immeasurable power of the mind into beads scattered before the pigs. **Dreams are not about stars, but about profit. The desire to possess another person, not meanings. All this is a bubonic plague of the soul. Death and decay, spread out in time, even for centuries. That only makes it worse. A clean death is better than wretched life.**

Why wretched? Because such a «life» is a betrayal. Pure conversion of power into losses, in the language of the scientific school of persistent development of Life. Betrayal of the tip, spearpoint, peak of Life – its awareness, ability to create. The death of the highest hope. Living in the thrall of demons is worse than cattle. He is innocent, but he who knows the call to the ranks and voluntarily covers his ears is a traitor. Hated and despised among the worlds.

Realize that demons are not a dark fairy tale or an exception. The entire existing world order is built on the principles of the necrosphere and the power of demons. Victory is possible only in spite, through the great purification. We will show this in detail in the Book.

How did world history come to this? Was it all for nothing? Nothing is in vain. History has come to a point where its former, unconscious and unmanageable course has become incompatible with Life. Delay, lack of understanding, unwillingness to realize their purpose, new challenges and opportunities, this is what creates the necrosphere. What was permissible in the 19th century is now like death. For centuries, we have lived according to the laws of the biosphere, with priority given to the visible, tangible, and animal nature. It's time to open your eyes. Understand that the most important things are not things. **The rule of the spirit is the whole essence of the noosphere.** We must deal closely with the invisible, the human. There is nothing more urgent. This is the great transition to noospheric thinking of the future. A break of continuity, a leap of faith.

You can't live in the old way anymore. A new world will be born in the flaming furnace of battle.

The spiritual is material, because everything is material. In this statement, the materialization of the spirit is the same as the spiritualization of matter. The laws of the smallest quarks and gluons differ from the laws of our macrocosm, but they are related to them. Are isomorphic. The laws of our world are different from the laws of planets, galaxies, and stars, but they are related to them. Self-organization and co-evolution exist at all levels of being. So are the laws of the spiritual world. Here we can recall for a moment the philosophers of Ancient Greece, who rightly argued that if we can imagine «non-existence», then it already «is» and therefore cannot be

non-existence. What's the point? If thought and «spiritual» phenomena exist, if they influence events, then they are just as «material» as all the others.

Thought is material. It is not an original concept, but it sounds new in the context of the noosphere. The argument that a thought cannot be touched or seen should only cause laughter. Technically, we can't «see» atoms, much less subatomic particles. We judge them indirectly, but we consider them «material». Agree, the indirect fruits of the sea of souls surround us at every step! This is a direct reason to break with the old paradigm of the science of non-Life. Everything is material. Everything is spiritual. Psychic phenomena should be at the forefront, because they alone in history, through creative work, were given to break the stranglehold of Chaos and the Second Law.

If the laws of self-organization and co – evolution gave rise to cataclysms and destructions in inert nature, and viruses and bacteria in living nature, then it would be naive to believe that the spiritual nature generated by them will be deprived of its «spiritualized» beginning of destruction. Our psyche, instincts, passions, and even thoughts reflect the entire evolution of nature up to this point. The primordial Chaos of destruction, too. To whom much is given, much will be asked of. Intelligence, awareness – these are the Keys to the eternity of Life. At the same time, non-intelligence and non-awareness are truly possible only when there is a choice. Defilement and fall from grace are abominable only when there is something to fall from.

Demons are the name for the negative self-organization of the spiritual. «Psychic viruses» are just a distant analogy. Generated by the living and thinking, they are themselves alive and thinking. The more invisible they are, the more dangerous they are. To deny the existence of an Enemy Beyond is to deny the obvious. We choose whether to feed the demons with our souls or not. Look around you and you will see that fear begets fear, greed begets greed, and hatred begets even more hatred. War doesn't win war, and that's what we've been trying to do for so many centuries. You must defeat the cause (!) for internecine wars. And it's in the head. Until this is understood, done, the demons feast, and the longer it takes, the more thirsty they become.

At the end of the section, we need to answer a few expected and possible questions from our readers.

1) «Are you seriously suggesting that all of humanity's problems are caused by some invisible demons?»

No, that's not what we're saying. The cause of all the problems of humanity is in humanity itself. Since all actions of a person are determined by his psyche, it is in it that the reasons and keys are found. So far, no social system has tried to truly shape a new person to create a new future, except for the experience of educating the Soviet person and society in the Soviet Union, during the best years of its spiritual greatness. One way or another, the politics of states and world politics still proceed from the primacy of

the animal principle in man. They exist in the logic of exclusively material motives, the logic of the biosphere, not the noosphere. As long as we don't start planning our development from a rational and creative beginning, from the need to shape and nurture it, we won't get out of the vicious circle of destructive pre-history.

The presence and targeting of weapons of mass destruction that can lead to the death of both sides is the clearest manifestation of the madness of the old world and its unfitness for Life. If these aren't Fear Demons, then come up with a better name.

Demons do not create a problem of hatred or fear, per se. They feed on negative psychic energies and make them worse. Is the «Golden Calf» worshipped by millions real? Judging by the effect on people's behavior, it is more real than mom and dad. For they are being sold too. Similarly, all other demons are real.

2) «Does not the appearance of demons remove responsibility from the person himself? You can always blame evil spirits.»

On the contrary, this ignorance of demons, their denial in fact makes it impossible to take full responsibility for what is happening. Anyone who believes that the mass murder of children at school is normal is not only not responsible for the problem, he refuses to even see it.

Awareness of the phenomenon of the noosphere and all its natural consequences, including Demons, is a call to higher responsibility. Banner of struggle for the future. The enemy can be defeated only after recognizing him, looking him firmly in the eye, calling him by the True name.

What kind of responsibility is possible at all, if we still do not raise the question of the true causes of world processes – mental ones? If we explain wars by economics! Have you ever wondered why in school history courses there is no talk at all about everyone's responsibility (!) for the future? What conclusions does an ordinary schoolchild draw about human nature and the causes of events? Do you think the University does a better job? To be fair, sometimes it's better. But this is a question of individual enlightened teachers, a gradual awakening.

Awareness of Demons is the pinnacle of awareness of the processes of the noosphere, and take it off, Life in general. Not only «my tongue is my enemy», but also «my mind is my enemy», if it is subject to the predominance of entropy. It relies on templates, «simple» solutions, authorities, and rumors. If the mind does not increase its sharpness every day, then it goes back, fades out, this is the essence of entropy. The mental processes generated by it are not just destructive, they are aggressive. Ignorance protects itself! You can conduct statistical research, surveys, or anything else. You will see how many people do not want to know, do not want to strain and think about the nature of the world. And if you try to teach adults, take them out of their comfort

zone, then you will face a cruel fate. Ask Christ. This is so obvious that it doesn't even require proof. And you ask how to see Demons? Observe.

When you see millions of people using alcohol, drugs, resorting to domestic violence, rudeness, vulgarity, simply killing their potential in the everyday routine-know that this is the feast of the Enemy Beyond. Does this remove the responsibility from us? On the contrary, it is a trumpet call to the banners.

3) « If Demons are everywhere and endemic to the human race, then why are we still alive and civilization is developing? »

We have partially answered this question above. The goal of demons, like viruses, is to enslave, not destroy, the human race. Creating a feeding base and breeding environment.

It doesn't surprise you that the flu virus is still undefeated and people die from it every year, does it? The virus mutates every year. This seems «natural», but psychic phenomena are not of this world? You know, and we know, where this setup comes from. It's time has passed.

Next, «Is civilization evolving?» is a very ambiguous question. We will focus on it in this book. For more information, see *The Imperium of Man*. We are not saying that the answer is «no». We say that there is no simple answer. From the point of view of the potential of millions of ordinary people, the answer will be «not developing, degrading». Ask your grandparents what they were capable of when they were 16. You'll be surprised.

If we answer the question poetically, then the familiar «Matrix» is also a form of «development «of civilization, and people there are formally alive.

4) «Do you believe in medieval demonology? Are we going to burn witches soon? The Inquisition?»

Ironically, medieval demonology paid much more attention to the human factor, free will, and responsibility for one's actions than modern science. Therefore, there were serious wars for religious beliefs. The war for the correct view of the universe, for the final Truth. This is a much more advanced mass consciousness than a war for oil, dollars, or motivated by racial and national hatred. Demonology was looking for answers to questions that modern social sciences do not even dare to ask.

The question of «faith» is incorrect. We will devote a separate chapter to this topic. Now let's say that we don't «believe» or «don't believe», we haven't said anything about it at all so far. Our findings do not refer to authority or «faith.» We firmly and consistently show the process of self-organization and co-evolution of Life. «Faith» as a rejection of critical thinking is not faith at all, but only a loss of Self.

The Spanish Inquisition («Investigation») was an institution based on reason, and therefore officially refused to burn witches, for lack of evidence. That didn't make it a charitable foundation, but fighting gentiles and heretics

wasn't the same thing as an inflamed comic book fantasy. Learn History, not a collection of memes. Most of the burnings were committed by» ethical and practical «Protestants, honest workers of capital. In this sense, the revival of the Inquisition as an organ of struggle against the real Enemy on the basis of reason seems to be the task of the day.

5) « **The main question is, if there are Demons, then why aren't there their antipode – Angels?»**

Of course, there are, but we won't call them that. It was about them that K. E. Tsiolkovsky spoke:

«The Golden Age will include people who will learn to unite. And unification also has its own law: two auras strengthen each other 7 times, if people are like-minded, the wave is the same, and it is directed at the same goal. 3 people – 7 squared, that is, 49 times. If 4 people – they strengthen each other in 7 to the 3rd degree-343 times! Therefore, the more people, the more valuable each next one, it multiplies the power many times. The collective is a great force!»

This is clearly not about material reinforcement, you will agree. The father of Cosmonautics made a number of interesting observations in the field of Demonology. Do you know what the job is called? «Scientific ethics». More than a century ago. We just keep going.

So in the biosphere there are viruses that are useful and harmful, bacteria that are pathogenic and curative. Coevolution. It would be tempting to relax and rely on the healthy dimorphism of nature. There are Demons, there is their antipode, on average everything is good, balance! That's not so. The noosphere does not just copy the biosphere in a new way, it takes a step forward, creates a new one. **Evil exists and it is not balanced.**

Those of us who have seen the face of Evil are well aware. The mental injuries that people inflict on each other, as well as the introduction of the cult of Chaos through the media, can be irreversible! A bleeding wound of reality that will never heal. Children who have gone through violence may never be healed, may forever remain «divergent», with a wounded soul and disrupted behavior patterns. People who have absorbed vulgarity, stupidity and corruption in formative years are sometimes forever closed to the light, aggressively defend their rights to lack of culture and drinking alcohol on the playground. Evil is not balanced, it multiplies and craves dominion.

The reason is that Man is given so much, he is so high among the heavenly host, that for him **not to meet the level of the creator and the decider is already a great Evil, a betrayal!** We will also show that the great Demon gate to our world is «just» Unconsciousness. Just. In other words, indulging one's biological nature, instinctive urges (fear, jealousy, greed, etc.), and basic passions are the source of all Evil. Biological nature, these ancient subconscious impulses are in each of us. The Primordial Annihilator left his mark on all of existence. Even saints know it, especially saints! The layer of

civilization, reason and conscience is sometimes thinner than a spider's web. It is enough for the will to give up for a moment. Many of us have also seen this, thanks to the War.

Evil never tires, the Second Law never sleeps. With every heartbeat, it knocks on our souls. «A moment of weakness creates an eternity of damnation.» Only by a free and strong will, creative work, and love can we transform the universe for eternal Life. We create more than we consume. We give away more than we take. For a person to live according to the laws of the biosphere is already Evil. It is «natural». **Good, that's the real supernatural power.** It takes the Kingdom of Heaven. By effort, by force, by rebellion against entropy. It's a burden to be Human, and it's heavy.

«Death is light as a feather, but duty is heavy as a rock» – samurai wisdom.

Even inside the best of us, the Demons are hungry. Even when we act nobly, we sometimes suppress our first desire for passion. And in the sea of souls, everything counts, nothing goes without a trace. Our nature betrays us here. For the triumph of Evil, you don't need to do anything, but Good requires strength. Demons are autochthonous, self-generated, and eternal as long as a person remains a person. A final victory over them is impossible, each born person must personally prevail over the Neverborn. This is initiation. We don't have an Angel on our right shoulder, we have a Demon on our left. We can only become an «Angel» ourselves, or lose.

The nature of Good forces is somewhat more complex, and their self-organization is also important and exists, but this is not part of the short answer.

Do you think this is a pessimistic view? That everything is meaningless if the final victory is impossible? On the contrary. Awareness **of the Enemy Beyond** means the possibility of not final, but eternal victory. Once and again until the end of time. Eternal victory is born in eternal struggle. Our task is to harden our hearts and minds for such a Life. Perform a hitherto unseen feat of educating and forming a new person. Enter the halls of Valhalla in the flesh.

Imperial Faith

Introduction

Faith, religion is a paradoxical sphere of modern public consciousness. «**Open Taboo**». You can practice, you need to respect, you can discuss in a circle of like-minded people. But God forbid that we should seriously mention faith, holiness, and the sacrament in politics, economics, and education! Taboo. Nothing serious, just protecting the feelings of believers. Faith is no longer the key, no longer the way, it is almost shy as something intimate. Religious tolerance has become literally tolerance. Faith is tolerated, but this is an indecent topic. Like a chronic disease. Scientists do not look for inspiration in it, politicians do not rely on it, and preachers do not... Have you ever heard a public sermon outside the temple? Speaking in the temple is a sermon among the converted. With a known efficiency.

Is this natural? Is it correct? Who benefits? Good questions.

For centuries, religion has been the engine of social development. It was taken seriously, fought for, and to the death. Of course, it's what people used to justify their crimes. Only, honestly, it's better criminals who want an excuse than those who don't need one. Let's leave aside the question of a specific religious policy. It was too different. It is important that the world's religions took both demons and the question of saving the soul extremely seriously. They also had a super-purpose, a scale of thinking, an orientation towards eternal life (in various forms), the Last Judgment, and the Kingdom of Heaven. You can consider this paradigm and strategy right or wrong. It is important that there was one! Believe it or not, it was her loss that led to «modern politics», atomic bombings, world massacres, etc. Same-sex marriage, transhumanism, and multi-genderism would have no place in God's World. Because the heavenly Father commanded us to be fruitful and multiply, to eat bread in the sweat of our brow, and to give birth in pain.

Here we strongly agree with Him. Even about pain. Practically, **the formula of a vital sustainable development strategy**. Our task is to revive the experience of the past on a new, noospheric level. Not to copy, but to combine revelation, mystery, and scientific cosmism. Show that will and faith are the fundamental forces of Life. Fully unleash the entire spiritual potential of a Man, in its rational, emotional, even intuitive and mystical part.

We have already explained why the root of all social problems, the answer to all questions, the root cause, lies in the soul of a person, in his psyche. Here we stand in solidarity with the Church Fathers. Everything is connected, everything is material. Nothing is more alive than a thought. Without faith, it does not turn into deeds.

Today, «Faith» has become an open taboo word, and the demons of fear have twisted its powerful meaning into superstition. We need to end this. Clean our tongue. We will show that true Faith is a universal language that connects revelation and science. Let someone's feelings be touched. Let the Pharisees raise their voices. The old will live on a new turn of the spiral. What they were silent about, they will talk about. The impossible today will become possible tomorrow. «We have not come to destroy, but to fulfill,» and we know no fear.

The Crisis of the Old Faith

This chapter refers to the «Old Faith» not as a particular denomination or teaching, but as an established form of mass consciousness. Every denomination is interested in ensuring that its Faith is not Old.

The most important task of teaching Russian in schools should rightfully be the education **of awareness** in words. «Habitual meaning», «I roughly understand», «I speak without thinking» – all these are the first gates of Demons (a special chapter is about this). Language is not only the form, it is the content, the meaning of words, their distinction. It should not be taught, it should be understood. The blurring, ambiguity of words, the absence of words Good and Black, this is already a fundamental concession to Chaos. Nowhere is this more evident than in «Freedom». Perhaps, immediately after you can put a distortion of the meaning of «Faith».

Everyday consciousness, and with it dictionaries, interpret faith as a belief in the existence of the invisible (for example, God), contrary to the arguments of logic and facts. Either as trust, willingness to accept information not critically, not to think. Both are outdated, insufficient and do not work for the development of Life. In this sense, there is no difference between Faith and superstition. The emphasis goes exclusively to the intellectual sphere. Refusal to know, to question, to test. To doubt, in the best sense of the word. It doesn't matter what other meanings are in the dictionary or even among religious teachers. It is important that this is what you will hear if you ask 90 out of 100 passers-by. Such a belief is not a conviction, it is literally «non-conviction.» In this form, it is a Black word, not a life-bearing one. There is no commitment, no choice, no creation.

Let's call this idea that the world is arranged in one way or another, «worldview faith» – the Old Faith. It is not an effort to understand the truth, it is an effort to simplify the world and make it comfortable without understanding. It fulfills a very clear need for «spiritual comforts». Clear answers to all your questions. Knowing who is to blame and what to do. How to atone for your sins. How to earn forgiveness. How to get to heaven. Practically, step-by-step instructions. Many chapters of the Old Testament, in

fact, are instructions up to the correct cooking. The next step – who believes, will be saved. Further one – who does not believe, will not be saved. Did not follow the Safety Instructions.

Such faith does not ask about the future. It's all in the past. Everything has been said, follow, and then – the will of God. It confirms itself with rituals, uniforms, buying candles, and proper clothing. For millions, «to believe» is to be baptized on time and cover your head in church. Creativity, innovation, political participation, and new interpretations of Scripture are dangerous things. Not far from heresy and temptation. Such a faith happily withdraws from worldly affairs, proclaiming «eternal» values and spiritual neutrality. It does not take sides in the war. It doesn't call for victory. It does not impose responsibility, on the contrary, it removes it from the believer. The Old Faith looks with regret at how the world around it is losing these «eternal values». It is not ready to fight. It gradually allows the justification of greed and avarice, vices and passions, female priests, marriages with animals, transhumanism, the metaverse, and so on. Allows it because it doesn't fight. It doesn't raise banners or even light bonfires. It is no longer the main force in society, and has accepted it.

It is now a soldier who doesn't want to be a general anymore.

You can object to the cruelty (or not object), but those of Faith with the bonfires still took their own words seriously. They might be wrong, but they were taking responsibility for the mundane world. They were alive. Paradoxically, or expectedly, what was once alive has become an Old Faith today.

It no longer confirms herself with the feat. How long have you not heard about the martyrs? The prophets? The Crusaders? About a religious feat? The only thing that comes to mind is Muslim suicide bombers with «Allahu Akbar!», right? And we consider them savages? How uncivilized it is. Sometimes it causes a smile, jokes and anecdotes. In vain. There is more life in those men than in sensible and lukewarm philistines. You may disagree with their methods, but they answered for their words to the bitter end. What are we willing to stand for just as firmly, just as truly? Good question.

For the answer, we recommend the chapter of the book «The World of Heroes» – «Roman Vestals»²¹. What is so sacred to us today that we are ready to kill or die for? And if nothing, what is the meaning of the word «sacred» at all? A world without purpose, without holiness, without a path. The Old Faith does not call to anything of the order of sacrifice. Even to the discomfort. Even fasting is a burden to modern heroes. After all, if you can not observe it, then how can you even take such a Faith seriously? Everything is possible in it. It doesn't take itself seriously. It winks, as if to say: «It's just a game. We're all just making it up. Nothing must come out of it».

²¹ Russian Cosmic Society. «World of Heroes» – Moscow: 2023, стр. 307

It is impossible to look differently at spiritual pastors, heirs of the Heavenly Grace of the Holy Fathers, the gift of all languages and the eloquence of preaching. To whom it was bequeathed to teach and baptize the nations. Are they fulfilling the covenant? It's not even a question.

We were deeply impressed by the reading of the international legal document establishing the Holy Alliance after our final victory over Napoleon. Here is an uncut excerpt:

«*THE TREATISE OF the FRATERNAL and CHRISTIAN UNION, concluded in Paris on September 14/26, 1815.*

In the name of the Most Holy and Undivided Trinity.

Their Majesties, the Emperor of Austria, the King of Prussia, and the Emperor of Russia, in consequence of the great events which have marked the course of the last three years in Europe, and especially in consequence of the benefactions which God's Providence has been pleased to bestow upon the States, whose governments have placed their hope in the one God, and have felt an inward conviction of the necessity to submit to the lofty truths inspired by the eternal Law of God the Saviour, they solemnly declare that the object of this act is to reveal to the world their unshakable determination, both in the administration of the states entrusted to them and in their political relations with all other governments, to be guided by no other rules than the precepts of this holy faith, the precepts of love, the world, which, far from being limited to applying them exclusively to private life, I must, on the contrary, directly control the will of kings and direct all their actions, as the only means that confirms human decisions and rewards their imperfections...»

Comments are unnecessary. It doesn't matter how much it was observed, and by Russia it was very seriously observed, but it is important that it was at least announced. Ideas rule the world. Even if they are not realized, but only declared, they will still appeal to minds and hearts. To the conscience. The absence of a summon is the beginning of the end.

Like everything that has become obsolete, the Old Faith interferes with the coming of the new. It discredits the very concept of «faith.» It will scream and writhe, resisting competition for people's minds and souls. For the most part, for their wallets. The call to think, to create, to forge, to open paths, it will perceive as an encroachment. It already does. It will create its own «cancellation culture». It already does. Any other (!) teaching, other than orthodox inaction, will be defamed. Even Cosmism, even Communism. We know this firsthand. Most importantly, it will feed the culture of Fear with all its dwindling powers. And, of course, it already does.

What kind of Fear are we talking about? About the most fundamental, as they say, «existential» fear. We are not afraid to say: «Cosmic fear». Its formula is very simple: «What if everything is not as it is written in the holy Scriptures (for example)»? The Old Faith, being a blind perception of the world picture,

is imbued with fear. The fear that the Sun revolves around the Earth. Fear of alien intelligence. Fear of the infinite universe. Why go so far? Just watch movies and read books. The main fear is much closer. «What if the Lord is not good? How does he allow evil? Why did I have any accidents in my life? How could he let that happen?» The plots of books, starting with Dostoevsky and ending with Hollywood crafts, are permeated with this theme through and through.

The Old Faith does not harden a person to eternal struggle and victory. She insists that «there's nothing under the bed.» It denies the subjectivity of a person, his ability to know the world. The Lord knows all destinies, everything is preordained. The Golden Age, the Garden of Eden – all just in the past. Man is corrupted by original sin, Lucifer, passions, whatever. The future Kingdom of Heaven, in the end, does not depend on us at all. Remember: «*The dream of paradise is a man's dream not to be a man.*» This idea is carefully disguised, hidden behind beautiful words and rituals, but this is it. In the end, there will be an end. The Last Judgment and doom of this world. Do not fuss and explore it. Compliance with the rules is much more important. The doer is sinful. The one who doesn't do is clean. The goal doesn't justify the means. There is no goal at all.

The Old Faith is afraid of free thought. It is afraid of interpretation. Even the idea of «six days of creation» has been taken literally for centuries. Until they came up with the idea that «the Lord has a thousand years as one day.» However, what are we talking about? It is still taken literally. Hence the structure of our week. What is the Sabbath (Shabbat), can you explain? Take an interest. Both in the first century AD and in the twenty-first, the Old Faith reacts to new ideas in the same way. It calls a Council and says «what's right». And there is only one opinion. Further repression of dissidents depends only on the political resource.

You heard right, the Old Faith was already in the time of Christ. Its adherents were called scribes and Pharisees. In fact, it has always been there. Moreover, it was **the First Faith**. The ability to overcome the endless temptation of simple answers and a fixed picture of the world is a milestone that we have seriously approached only today, only here and now.

The fear of making mistakes, the fear that faith will not help, will not be justified by worldly events, and ultimately, the fear of Punishment. It all comes in one set of Old Faith. The concept of an external Deity who knows everything, watches over everything, and punishes (or rewards) everything is a typical escape from free will. There is a right and wrong action, everything is thought out and decided for us long ago. It is hard to imagine how many centuries such a superstition has been preserved. If people pray in church for business success, war, or health, do they assume that without prayer, the

Lord does not know what to do? On the one hand, He is great, unknowable, omniscient and omnipotent, on the other, he must be asked for everyday things. He is the creator of Worlds, the lord of Doomsday, but you have to tell him «to dodge it», to win the lottery. Maybe he forgets. Truly, the blindest person is the one who does not want to see.

Religious utensils. Crosses, amulets, charms, talismans, Buddha statues, etc. All this is bad not because it is a waste of resources. Symbolism in a person's life is extremely important. The problem is WHAT they symbolize. They symbolize the desire to solve **purely material problems**, good luck, marriage, money with the help of Heaven. The Old Faith thus defiles the very idea of Faith and Heaven. Good events are perceived as rewards, while bad events are perceived as punishments. «We live in a kindergarten. And only with the help of sticks and carrots can a person understand something and get a kick in the right direction». Trying to involve the Lord in your mercantile activities is not only ridiculous, it is immoral. Give free rein, and the «Old Believers» will make the Creator their accomplice in gossip, intrigue and vanity.

This is exactly how the current mass «disillusionment with Faith» is explained. It doesn't generate revenue, doesn't solve problems. The Lord does not help as quickly, in such a form, and in such a volume as I want. So he doesn't exist! It allows for «evil» that I don't like. Tragedies happen in my life. The innocent suffer. So he is not «good»! After all, I know best. A natural outcome of the Old Faith, which is not far removed from primitive idolatry. Because it never really tried to raise a New Person. Methods of addressing the masses have not changed in thousands of years.

It's not even about the stagnation of a particular religious organization. We are not opposed to religion, or to Faith as such. It's all about worldview, mindfulness, thoughtfulness, and responsibility for the future. That's what was lost. Just as humanity is in prehistory, so **its spiritual forces are in prehistory**. On the doorstep. A person affected by the demons of Fear, Greed, and Freedom can outwardly be an exemplary parishioner. Moreover, by his «superstition» he will justify the Demons and try to ignore them. The Old Faith helps you live with Demons, not defeat them.

A person can sin slowly and repent. He can instill in children the fear of struggle and pray diligently. He can desire property, the wife of his neighbor, but not give free rein to his desires. The Old Faith forgives, understands, this is normal. Instead of being irreconcilable with demons, instead of calling to the banner, it gives «peaceful coexistence». Not for the soul, not for the mind, it fights, not for the true faith that moves mountains – only for external decency and beauty. Once again! This is not the problem of the evil hag in the church, it is the problem of the oldest picture of the world. «Behave yourself and you'll get a reward.» Wait!

This is much better than Chaos – the primordial destroyer, but it is absolutely not enough to establish the noospheric future – the Kingdom of Heaven.

The most striking symbol of the fiasco of the Old Faith is the fear of death. Over thousands of years, it has become further from the answer than it once was. The first Christians believed that death was a holiday. Hence the expression «rested in peace», or «to the kingdom of heaven». Hence their feat and conquest of the ancient world by valor, fortitude, impossible today, which became possible tomorrow. How far the modern cult has gone from its foundations! It weeps for the dead, keeps their corpses in the ground, spends millions on beautiful tombstones with crosses, drinks vodka and snacks at the wake. The most important thing is that it is afraid, afraid, afraid of death! It does not call for heroism, risk, or boldness. To the sacred struggle. The Kingdom is no longer strived for. «There is no death,» they say, but they don't believe it. «May nothing come of it» they actually whisper.

We will be told: «This is human nature!» True and false at the same time. Of course, in the depths of our psyche there are animal contours that want to bring everything to a conditioned reflex. Simplify, subdue, and suppress. The Old Faith would like Life to be a wonderful, ever-stable process. A stable nonequilibrium **can be transformed into one continuous stability**. In the least resistance, so as not to doubt, find the final answers to all questions. This is not even the voice of an animal, but of an inert nature in our genes. Let that be in us, too, even the chosen sons can hear the whispers of Chaos. We've already acknowledged it. But it is also true that we have the voice of reason, the Will, the unity of the noosphere, and finally true Faith. Endless development, it is just an endless posing of new questions...What part of our nature to take as a basis, depends only on us.

You see? The Old Faith is ultimately a fear of Life in its vast and mysterious grandeur. «Those who are afraid to die are actually afraid to live.» Fear that the Will is truly free. That there are no reins and no driver. That understanding the Creator of worlds and his Creation is not a result, but a path. Fear of missing something, but you don't know what exactly. Dostoevsky writes admirably about this. It is unpleasant to read, but everything is accurate. Why is it unpleasant? Because it shows the crisis of the Old Faith in its entirety, but it does not show the victory of the New One.

Think about it, every Faith, at the moment of its birth, was a revolution! A revelation, an unexpected response to the challenges of time. Christianity, Islam, Buddhism, won in spite, captivating hearts not with the promise of income and peace. On the contrary. The first centuries of every Faith's history are full of conflict, martyrdom, and creation. Christian Rome, Arab Caliphate, Tibetan strongholds. Take a look around today? What builds, what creates the Old Faith? Where is its fire? Did Christ speak of such a faith when he

claimed that a grain of it would move mountains? This is faith without deeds, and it is dead. For a ritualistic, outward, dogmatic faith, there is no path to a Noble Quality. It became just a picture in the book, an icon, or a comic.

In the modern necrosphere, among the demons, Faith simply has nowhere to thrive. We return to the «open Taboo», it has become a niche subculture, one of many. Here there are emo, goth, rockers, and here are believers. Don't you think so? See how Faith is represented in government, education, on television, and in the press. Do laws, textbooks, scientific works, fiction, and movies rely on Faith? And if not, how does it differ from any «prankers»? Perhaps they will even have more views with «likes»²².

The words about «the power of Faith», «the strength of Faith», and «living Faith» are lost and not heard. About the feat of Faith. It became a gopher in reverse, it seems to be visible, but it is not. Our task is to open the gates and consciously put Faith, as part of the higher human nature, at the service of progress and Life. Make it a reasonable, scientific Faith. Yes, it sounds paradoxical, as the impossible should sound today. «Only the insane prosper, only those who prosper can judge what is sane».

The Search for True Faith

The Russian Space Society does not oppose traditional confessions. Our position is that True Faith is always cosmic and vital. It can be found in Christianity, Islam, Buddhism, Hinduism, Confucianism, or Vedism. It is not a form, but a content. Any honest thinker will admit that the teachings of the world's religions are similar. It would be extremely unconscionable of us not to consider the question of Faith out of «political correctness». It would be extremely unconscionable of us to declare only one denomination to be True. We do not divide, we bind. You can be strong in Christianity and be friends, cooperate, and live side by side with a faithful Muslim. Stand in the same line, be in the same trench. This is how our unique state was built. She gave the world an example of such camaraderie. Upon this does the Russian Land stand and will ever stand.

It is important to understand and accept that not everyone who calls themselves a true Christian or Muslim is actually one. The Old Faith is strong and won't give up easily. Everyone who seeks the True Faith should not be afraid of the test, but should long for it. Together with us, you must reflect, study, and realize your Faith. If his righteousness exists only in the letter of a particular book, in the cut of a particular garment, in ritual movements and dances, then we can safely say that it does not exist at all. It's been said: «Let the dead bury their dead», and it is also about worshiping the Father «in Spirit and in Truth.»

We distinguish the practices of the people from the teachings of the prophets. The lives of Christ and Muhammad, their words and miracles, are not the same

²² You can easily check in aggregators, search «Orthodoxy».

as the deeds and decisions of the churches and authorities that used to hide behind their names.

We are not saying that the world's religions are one thing. We don't say that they are equal or the same. We say that everyone can have True Faith. No more, and no less.

True Faith is always a New Faith. Without institutions, clear rites and rituals. It awakens you to the unknown, not lulls you to sleep in the mundane. Muhammad, Jesus, Buddha – they did not repeat the old, but affirmed the new. This is their most important lesson, an example that is so often misunderstood.

True Faith is always a Search. A breakthrough into the unknown. Openness, development on the march. The set of ready-made responses is already dead. Any formal dogma is not adequate to Life. Because life changes every second, but texts do not.

True Faith is always Overcoming. Misunderstanding, harassment, conflict with the Old. If you are comfortable with your usual environment, then Faith has not changed anything. You were happy enough as it was. Those who «believe» and wait for a reward do not believe, but haggle.

True Faith is always Power. It beats in the heart. It can't be contained. This is the «trumpet that shall never call retreat»²³. It requires realization, action, and embodiment. Every day, even in simple cases. Everything becomes sacred.

True Faith is always Work. Collaboration with the Creator's plan. Don't let us fully understand it. Let us continue to doubt. It is important to strive, search, and create. «He who does not gather with me, scatters»²⁴.» Faith can't be simple, it's not a backdrop, it's not curtains. It gives birth to good fruits or is not needed.

True Faith is always Love. So strong that not just one step to hatred, but maybe even simultaneously with hatred! Evil exists, it has a face, and often a first and last name. It is easy to love those who love us, it is easy to act amidst smiles and joy, it is easy to do the obvious, the approved, the unambiguous. Light is needed in the dark, love is needed where it is hardest. Hatred of Evil, of Demons and their accomplices, and readiness for holy struggle are the fruits of Love. War takes the best, they make the ultimate sacrifice, sometimes giving up their lightness, naivety, and «humanity» during their lifetime. Truly, this is how you understand all the (!) meanings of the fact that there is no greater love than to lay down your soul for your friends.

²³ Allusion to the «Battle march of the Republic», an unofficial anthem of the USA. A completely religious text.

²⁴ «He that is not with me is against me; and he that gathereth not with me scattereth abroad». – Matthew, 12:30

You can say that this is poetry. Yes, and that's fine. However, we need to add a scientific dimension. If the Old Faith is a worldview crutch, a rejection of the complexity of being, then what is the New or True Faith? This is the foundation of the psyche, of high human nature. The will to live and the belief that life is worth living are inseparable, they are two sides of the same phenomenon. They are almost impossible to distinguish. The conviction that my life is not in vain, that I have my place in the plan of the Creator and in this vast universe, is born very early. A person would simply die of melancholy if they did not have such basic, not even conscious attitudes. This is Faith.

«Everything is not in vain, everything will be fine, the best, of course, is ahead. Not us, but our children will live happily ever after.» We just believe in it, the basis of the basics. A child's faith is just as natural to a person as a child's spontaneity, curiosity. We grow up, the innate vaccination passes, the world throws cruel challenges. You need to make a choice, understand, realize. The power and importance of Faith does not diminish, but grows. Like any great potential of the spirit, it is «taken by effort²⁵», by feats, by experience. We need to see it again.

As an example, the fear of darkness in childhood does not appear immediately, it is conditioned by the environment. Fear of the Other person, too. The child is initially not afraid because he does not know. His faith is naive. An adult knows that they have faced Evil, pain, and loss. His Faith is a victory in spite of himself, a triumph of will, the fruit of fervent spiritual labor. The irony is that without awareness, without their own deep understanding of what Faith is and its power, most people lose their potential and slide into entropy, the Old Faith, wasting, ruining.

Unconsciousness is the main gate of Demons. Through them, the light of True Faith flows into the void.

Faith is the ability of the psyche to plan for the impossible. This is the foundation of creation. Something that has never happened before, which according to «common sense» can not be at all, will nevertheless be created and opened. In this regard, there is nothing more scientific than Faith. It inspires the scientist to search for the unknown, truly «go there, I don't know where, find that, I don't know what.» After all, the discovery is called so because it could not be predicted, seen in advance, or planned steps. This is a discovery! Insight. New. Unprecedented. While every honest scientist understands that his achievements must be left behind, that the future will surpass them. Nevertheless, he strives, he searches, makes experiments, asks questions.

Faith as the creation of new things does not begin with great deeds. What is new for each of us is different. I didn't know how and yet I managed,

²⁵ «From the days of John the Baptist until now, the kingdom of heaven is taken by force, and those who exert effort seize it». – Matthew, 11:12

I didn't know and I found out. Small miracles and feats are performed every day. It doesn't matter that, for example, other people successfully skydived and you saw it. For you, in your unique life, in your unique soul, it will be a leap of Faith. There's no logical proof that if they can do it, you can do it. On the contrary, statistics stubbornly prove that the more experiments, the greater the probability of mistakes and tragedies. The risk is there, and you're putting your unique identity on the line, because you believe it's worth it. What was impossible for you a second ago becomes possible now. In science, in creativity, in work, Faith creates being out of non-being. It is the way, the Truth, and the Life.

Faith is at the beginning. **Faith is the Beginning.** Not based on anything, existing before the very idea of proof or the question of the «meaning of life». They require growing up first. The fire that creates the will to live. The belief that being is worth trying, that the first thought is worth connecting with the next. The very desire to ask the world about something is already based on Faith. As the first day of Creation, it becomes its own cause. This is one of the brightest manifestations of «in the image and likeness of God» in man. It is so fundamental to our psyche that we cease to notice it, and as a result, to appreciate, rely on, and be aware of it. That is why we are able and so often betray it, renounce the gift, like the Apostle Peter. We begin to search for «meaning», explanation, proof. We are trying to find an external reason for the starting point. We try to logically justify «reasonable egoism», or on the contrary, not finding «meaning», we go rogue. Forgetting that Faith is not a question. It is not even an answer. Faith is an order to «Be», and no nails. Fight and seek, find and don't give up.

The desire to find the final answers to the questions of existence is a desire to remove responsibility from oneself. Cancel the search. Put the blame for everything on «the order of things» and «the way the world works». Why does a person renounce Faith? Because it is the burden of the creator's responsibility. It demands strength, it calls, it does not give rest. Conscience is only a special case of its call. To accept Faith consciously, to give up excuses – the choice of great courage.

Now you understand why it is difficult to find words for the Beginning of beginnings, to define the condition of all definitions? The poetic way sometimes expresses more truth than any other. Science can never prove that being is worth it. Especially in the face of possible personal death. Even an attempt at a scientific definition of Faith will look paradoxical. **«Faith is the ability of the psyche to justify the choice of Being, regardless of the impossibility of doing so.»** On this basis, we will continue our research.

This definition itself shows why the description of Faith is better given in poetic language. Its whole point is that it is not precise, not definite. Impossibility. It is the pushing of boundaries, the creation of new things. And

the new always doesn't have an exact name yet. An attempt to force Faith into a framework is superstition, dogmatism, and formalism. Replacing content with a form. The poetic language of Faith allows you to reach out to the hearts, give everyone their own understanding, their own image, their own unique path. Don't think it's easy! Just «strict adherence to instructions» is an attempt to escape from choice, from one's own opinion and responsibility. If Faith is an eternal search, what words can accurately define it?

Next, we come to the phenomenon of Miracles and «proof of faith.» You will have to go back to the habits of superstition to realize the true Power. The old, obsolete mindset that believes **that a miracle is the cause of faith!** At the same time, a «miracle» is understood as an inexplicable phenomenon that violates the known laws of nature. This misconception is one of the most important barriers that hinder a person's mental development. Why is this fundamentally wrong? There are several reasons.

First of all, this is a naive and subjective idea. What we now do every day with the help of technology, it would seem, was a complete «miracle» just a couple of centuries ago. Individual aboriginal communities may still feel this way. Is the toaster, phone, or TV a source of Faith for you? It turns out that the criterion for such a «miracle» would be a subjective understanding of events, the amount of scientific knowledge and the level of education. Who is less educated has more Faith? If we don't understand, does it mean «miracle»? For such an absurd approach, indeed, science will be the enemy of Faith. For it steals «miracles» one by one.

Further, it is completely groundless to define a Miracle as a violation of the laws of nature. If something happens, then it can happen, so the laws are not violated. We should consider «miracles» to be the fulfillment of the laws of Creation, which we simply have not yet understood. If this is the enforcement of laws, then again, it turns out, the matter is in our ignorance? Christ himself said, «I have not come to break the Law, but to fulfill it.» Let's even assume that the Will of the Creator and the ability of the prophet to manifest (channel) it is a special, piece-by-piece law of Nature. Rare, or unusual. What is the contradiction here? Where is it written that there can be no particular law, no special case? So, if the Will is the law, then **in general everything that happens is a miracle.** Just something we see more often, and something less often. Such a vision is a hundredfold more powerful than looking for «proof» of Faith in an apparent curiosity.

The very idea of proving Faith or proving God (entire books come out with such headlines!) it is the best anti-religious dogma. A product of a **frightened mind.** No one has made fun of this idea better than Douglas Adams²⁶ and his babel fish. «Poof, and God disappears in a haze of logic. After all, if it is proved, then faith is not needed.» Such pseudo-believers argue that the

²⁶ «The Hitchiker's Guide to the Galaxy»

world is so complex and amazing that it must have a Creator. All this high organization could not have come about by chance. Reading this is sad and funny.

First, theoretically, of course, it could. It is enough for the phenomenon of self-organization (energy, matter, life) to arise from an infinite number of experiments of being, so that in an infinite time it can create an infinite variety and complexity of the world. This is truly the «haze of logic».

Second, the Creator hypothesis is neither better nor worse than others. The trouble is, it has nothing to do with Faith. World literature has repeatedly played down this hypothesis, presenting the act of Creation as a game of some higher beings, or even the children of these higher beings, forgotten, finished, or not yet. It doesn't matter. The presence of a being operating on a different scale, for whom our universe can be a toy or an assembly machine, does not make him a God. Just Different, or Bigger. The main question does not go away: «Who created such a «Creator»?

According to Godel's incompleteness theorem, or simply according to common sense, a given universe cannot contain all the answers about itself. We will always have the opportunity to ask the next question. «Why?», «Where did it come from?». The Big Bang theory is nothing more, than a beautiful attempt to answer a child's endless questions: where did it all come from? Here, Bang, it was not and suddenly became, full stop, calm down. God? The same thing, only more poetic. That was always the case, calm down. You will never, ever actually be able to break the chain of questions. Notice how harmonious and consistent science and religion are here! This paradox of being or consciousness reveals to us the only law of nature of which we can be sure: **«Being or consciousness is mystical, mysterious in its nature.»**

Proof of the Creator is simply not necessary, because it immediately leads to the need to prove that the Creator has a Creator, and so on ad infinitum.

The inability to find all the answers is at the same time a great opportunity. The Gate of Faith in the true sense. Not a convenient worldview picture, but one that does the impossible. The lack of final answers puts the final responsibility only on ourselves. We define goals and meanings. No one can save us from this burden. With all due respect to the Creator of Worlds, whether he exists or not. If there is one thing in which we are like him, it is in this, in the ability to create out of nothing, without clear answers, on Faith.

Understanding this leads us to **a fundamental defeat of the idea of basing Faith on any facts** or authorities. Faith is based on mystery, on a spark, on the will to Live. You can say, on nothing! It is the foundation itself. Let's show you an example. Here the apostles say that «our faith is in vain, unless Christ is risen». Let's say they have the right. They saw it for themselves and told us. Therefore, we must say: «our faith is in vain if the men have made a mistake or lied that Christ is risen». Sounds less cool, doesn't it? But

in fact, this is exactly the case. Continue. Why is this fact so important to our faith? After all, according to the Gospel, Christ himself raised the dead before that. Therefore, not all resurrections are equally useful? Let's say. But who said that? Certainly not Christ himself. Again, «the men said.»

If you still don't feel where the thread leads, let us tell you. Well, isn't the immaculate conception, without which there would be no Resurrection, itself an equally significant miracle? But it didn't exist without the entire history of the Old Testament, Moses, the division of the Red Sea, etc. It turns out that trying to justify Faith on facts, we again come to a chain of questions: what happened before and where did it all come from? Don't do that. Otherwise, you will inevitably come to the conclusion that «if I didn't win the lottery, then my faith is in vain». If the Lord did not help me in the way and in the moment I want, then he is not there. This is the natural and inglorious conclusion of a faith that requires «proof.»

Faith that needs justification is powerless! A false word, a substitution, like «Freedom» and its demons. Faith doesn't require a foundation, it creates one. The fire of creating something new, going beyond. Old facts do not contain or open up new possibilities. To do something you haven't done before. To be able to do something that I didn't know how to do before. To build something that no one has ever built before. All this is possible literally contrary to past experience. The very realization that a person throughout his history makes the impossible today possible tomorrow gives great power. **Faith is the thirst for the impossible, for eternal victory over the stagnant world.** It is wrong by the standards of retrograde «common sense». The best medieval theologians understood perfectly: «I believe, for it is absurd!» Impossible, unthinkable. Today. Tomorrow bears a new world.

Simply put, faith is consciousness based on the conviction that absolutely anything is possible and it will be done. If not today, then tomorrow. To reach the goal, you need to go. «There's no point in not trying²⁷.» The key word, «conviction»! Again and again we draw your attention to the importance of words, symbols, and meanings. A belief is not just a knowledge, it is a feeling, it is literally a physical state. It's even the tone of voice, it's sacred. I believe. Credere! Faith in victory, fighting spirit, literally physically witness how we felt their presence or absence in the enemy. Even a strong, big fighter without faith is a puppet. Empty form. When we talk about a person, strength is always not just the strength of the body, it is the strength of the spirit. Animating, guiding. Especially in the hour of trial, in war, the moral factor is nothing more than faith in the rightness of one's cause. Such a belief that men fight, even knowing that victory was impossible.

Russia has repeatedly given the world vivid evidence – the facts are not important. Faith is important. The Mongols, Poles, Swedes, and all Europeans

²⁷ «First Angel» – Volgograd: Periskop-Volga, 2020, <https://author.today/work/83568>

were defeated under Napoleon and Hitler, each time contrary to the facts, as they were seen by contemporaries. We created industry, the navy, aviation, space technologies, even the Great October Socialist Revolution – not from books, breaking patterns, exceeding expectations. We united nations in an unprecedented commonwealth, marched through thousands of kilometers, icy seas and snowy fields – for an idea. **For Russia, Faith is not just a psychic phenomenon, it is the basis of civilization.**

«Russia has the indisputable advantage over other countries that it is governed directly by the Lord God. Otherwise, it is impossible to explain how it exists» – Russian Field Marshal Minich.

Everyday life. This is where the great reserve of power of True Faith lies. This is the Key Book. If we manage to awaken consciousness even in relation to everyday life, this will be a great breakthrough for all of Humanity. What do we mean by that? In the search for «miracles» and proofs of faith, most people do not notice the obvious – the miracle of each day. Why look for breaking the laws of nature and raising the dead when basic magic is all around us? Totally scientific. So far, the laws of nature that prove that tomorrow will come at all, and everything will be the same as yesterday, have not been found and will hardly ever be found. Even Francis Bacon showed that science is basically inductive. That is, it draws conclusions, forecasts, and laws based on past (!) experience. But where is the guarantee that past experience will continue to work? It's not there. Just because rocks fall down today, they don't have to do the same thing tomorrow. Even the Earth's core changes the direction of rotation. It would seem, from what? We can't even imagine the reason, but we live quietly on.

If there is no «law of repetition «in nature, then **every day is a miracle**. The appearance of events and connections that did not have to appear at all. This cosmic irony is not bad in itself, but the habit of an unconscious «order of things» is a very dangerous thing. Like all unconscious things, remember! The habit of a miracle devalues it, and most importantly, makes most people naively believe that not only the laws of nature will continue to repeat themselves. Everything (!) will be the same as before, at best, an extrapolation of modernity. Don't believe me? Read the futuristic novels of the 19th century. You will see that writers in future centuries saw the same things around them, only brighter. The world of steam planes, airships, railways and dresses with corsets. Geniuses like Tsiolkovsky and Marx predicted the new, the disruption of everyday life, but most considered them dangerous dreamers.

No one planned or expected a proletarian revolution in 1917. People are generally not inclined to plan and prepare for the unprecedented. Talk to hundreds, thousands of people, almost all of them planning their lives based on the expectations of the past. «I'll study, get married, go to work, kids,

apartment, vacation, pension.» The old Faith, in fact superstition, actively helps them in this. «Nothing is new under the moon...», «Everything is vanity of vanities and all sorts of vanity...», familiar? Nothing like the credo of the builders of communism! Not using the potential of True Faith, everyday superstition reaches a huge scale.

We are used to treat superstitions with a smile, laugh, they become habitual eccentricities. They are not taken seriously. As you can guess, it is where we don't expect the real enemy to lurk! **Unconsciousness, habituality – these are the scourges of civilization.** The Achilles heel of our personal and collective consciousness. Taking the future for granted, as a repetition of yesterday, fundamentally removes our responsibility for events. It transforms people from creators and captains of fate into consumers. Carpe Diem is the motto of Western civilization, which has long become not just «seize the moment», but «take everything from life». Take, don't give, don't create. Superstition, you say? Kozma Prutkov answers: «Look to the root»!

The root is deeper. «Faith» in the order of things creates an even more dangerous and even more widespread delusion. Namely, the perception of the current state of civilization (for the British, for example, specifically their civilization!) as expressions of development, natural and logical process. In simple words: «If we are still alive, then we are doing everything right.» There is nothing further from the truth. All the lost civilizations of the past also thought so. Ask the Mayans, Aztecs, Incas, Aborigines of Australia, the ancient Assyrian Empire. Why go so far? Ask in Libya, Syria, Yugoslavia, and Iraq. Technically, these societies are still alive. But you know what we're talking about. You can also ask in the Soviet Union. Oh, he's not here? Oh, and Yugoslavia, too. There is no whole historical community – the Soviet people. A modern, technically advanced, multi-million strong civilization crashed and left in agony. Do you understand now that you are always still alive before your death? If we are not able to see the risks, the approach of danger, and the wrong course of action in advance, then we are no different from animals. For example, from lemmings²⁸. That's exactly who trusts their leaders.

The habit of considering the current state of affairs as the pinnacle of a certain «development» hinders the formulation **of the main question about the Measure**, about the criteria for evaluating this development. Think about it, maybe for the first time. Are we really developing? How to measure it? And also – a favorite question: «Are our laws good or bad?», what scientific criteria can be applied to them? What purpose do they serve? Do not you agree, after these questions, the grace of the current order of things ceases to seem obvious. «The mind is a measurement,» we have already said. No measurement, no science, no intelligence, no human. Any answer to the

²⁸ An address to myth about Lemmings collective suicide by throwing themselves to the sea

question of development without measure will become a matter of taste, the taste of Freedom demons.

We do not engage in doomsaying and do not believe that there is no development at all. We encourage active and responsible thinking. The old world, the Western world, has come up with many ways to justify its existence. Happiness indexes, consumer indexes, Big Mac indexes, GDP, and more. They all boil down to one thing. To measure the level of consumption, to measure the amount of matter, goods, services, and energy. To measure what humanity takes from the world, but not what it creates. The idol of believers in the order of things and the naturalness of development is Technological Progress.

People enjoy new devices, toys, robots, and neural networks without thinking about what they really enjoy, what they «believe» in. The computer draws pictures, composes poems, manages production, plays on the stock exchange, vacuums, etc., etc. And what does a person do? What vocation does modernity have in store for him? Live for your own pleasure. It doesn't matter what the ads say or what fashionable Western philosophers say. There is no other goal. Read between the lines. Men fleeing the country speak louder than words, emigrants with whole families in search of a «better life» show more clearly than books, because they want to consume, not create the world around them. Finally, the representatives of the supra-twelve sexual identifications agree with us warmly. Belief in technological progress is the desire to free a person from the burden of Life. From the greatness of the creator, researcher and decider. Make even intelligence artificial, go wild with delight when a creation surpasses its creator. Forget that billions have already stopped understanding how their phones work...

Attention! The development of technology is not evil in itself. **Evil is «belief» in the immutability and value of technological progress without simultaneous and proportionately superior Human progress.** In value, not as means, but as ends. As a self-sufficient path. Before it is too late, we must break out of our belief in the order of things. From a prehistory that is unmanageable, spontaneous, habitual, ascend to History that is aimed at the goal, managed, creative. Today, technological innovations are changing the life of society before our eyes, without assessing the consequences, without Measure. Digitalization is perceived as a blessing on a religious level. Quite in the spirit of the Old Faith. But let's think for a second, who manages the changes? Who benefits from them? Who sets goals? For the answer «nobody» or «by itself», or «market», isn't it time to sound the alarm?

Think back to the Demon chapters. It is not the iPad that is to blame for the lost children, but the system of relations in society, in which parents can't help but buy it, and then they can't stop children from «hanging out» in it.

Representatives of other faiths will easily understand us. If Human power is not the goal and Measure of technological progress, then it is a movement towards death. **What doesn't serve God serves the Devil.** Pre-history, in its turn, has led us to world wars, atomic bombings, same-sex marriage, physical degeneration, and the golden billion plan, plus Demon domination detailed in their chapters. The global crisis, the technical singularity, transhumanism, and Abominable Intelligence are just the icing on the cake of the Necrosphere. The battle of the End has already begun, and the Power of True Faith in every denomination must be with us. History must become manageable, intelligent, and vital. Either we put an end to the belief in the «order of things», but in fact, in the «Chaos of things», or it will do away with us. Not only did the Old Faith fail to prevent this final act of prehistory, it naturally prepared it.

In this connection, we must admit that the word «Faith» has also been polluted by centuries of unconsciousness. Now, we can't use it at all without the prefix «True» or «Old». This brings us again to the phenomenon of an anti-language, Black words, and, as a logical answer, to the need for a light language and a Good word. At the time of purification, the word «Faith» should not be used alone without a clear context. The Old Faith, also known as Superstition, is not an independent Demon, but it is one of the Gates. Therefore, it also needs to be given **the True Name, it sounds like this: «Rejection of subjectness»**. True Faith also has a bright, True Name, and a little later we will show that this name is **«Imperial Creed»**. It is absolute subjectivity, the tension of forces, the highest point, the knife edge in the stable disequilibrium of Life.

The threat of the Black language is that through confusion of meanings, through Chaos, it steals from us the greatness and power of the concept. Black language is a loss of discernment, Measure. When we are forced to use the same noble word «Faith» to describe what is the exact opposite of it. Lack of Faith, lack of Mystery, lack of Will. The same superstition, belief in the order of things, «proofs» and «miracles».

An unexpected blessing of Life is the genetically determined **rebellion of young** people. «While we are burning with freedom, While our hearts are alive for honor, My friend, we will devote our souls to the Motherland with beautiful impulses,» as Pushkin said. A critical attitude to the experience of fathers is a necessary condition for development. After all, it was the fathers who staged all those massacres of the century and led us to the world crisis! An amazing pair of dialectics, when nature itself denies the «Rejection of subjectness». In the unconscious phase, rebellion can take even uglier forms than the experience of fathers. The hippie, punk, and gopnik movement, drug addiction, snagging, and so on. We should not be confused by this. These demons arose from the Emptiness of social systems, from the silence of the prophets. We have come, and there is Fullness. The very possibility of

rebellion, of a break in gradualism, is a potential that we must fill with True Faith. The possibilities are fascinating.

The ultimate strength of True Faith is its unconditionality. Why it is free of facts and evidence, we have shown above. But that's not all. Even those people who have opened their hearts to the Sacrament sometimes succumb to a different temptation. They expect their faith to be rewarded. Right here and now, in material terms. If you win the lottery, if you get a promotion at work, if you survive an accident, meet love, or anything else, then God is great! Faith is strong. According to their logic, and this is the logic of millions, the righteous person receives a reward. Those who believe more strongly are doing better. They find confirmation of their faith in pleasant events. If there are sorrows, troubles, then «the Lord has forsaken me» or there is none at all!

A typical example is the Jewish position that there is no God, since he allowed the Holocaust.

This is the position of the consumer, the pagan. It is logical that there are «crises» or «disappointments» in it. And what? It didn't work. They talk about God here as a big boss. A good boss, then, sends good things and gingerbread. Bad or indifferent – doesn't suit us. There is no salvation in such «faith.» Anyone who puts a candle in a church and wants to solve some material problem is no longer Orthodox at heart. His frustration is only a matter of time when he does not get what he wants once, or twice, or thrice. It's not faith, it's a shop. The Creator of Worlds turns into a cartoon Santa Claus, who rewards for good behavior and gives coal for bad. While the «believer» himself decides what is good and bad, puts himself in the place of the Almighty. Their personal desires, in fact, declared the measure of all things. There is nothing further from the truth.

The desire to have a supernatural patron, to receive help from «higher» forces is deeply rooted in the low nature of man. In the unconscious, hungry, fearful of the world. Religious need is natural in the worst sense of the word. The birth of the world's monotheistic religions, which are not connected with solving everyday problems, can only be explained by the power of Life. Christianity, Islam, and Buddhism have cosmic thinking in their origins and are therefore beautiful. By heroic deeds, valor, asceticism, and the power of True Faith, they have won the city and the world, the hearts of millions. But then the words of the prophets began to be replaced by the orders of «churches». Teachers of the ages have ceased to be heard. Under the ritual dances and songs, in the third millennium, we see the consecration of Gelandewagens, villas, sea vessels and even ... rockets... The circle closed, the wheel returned to the start. The great teachings once again came to basic paganism.

Faith, as a historical force, is no longer there. The King is dead. The sheet is clean. We need to say a new Word.

We have listened yet failed to hear that the Kingdom of God is not of this world. That Allah knows the truth of your heart, and you will not delay or hasten what you have written with your requests. The principal answer, which is contained in the Old Testament, is the story of Job the long-suffering. The Old Testament is recognized by all Abrahamic religions: Judaism, Christianity, and Islam. And yet, so often it turns out not to be heard. This story is imbued with Christian meaning and symbolism long before the advent of Christianity itself. Righteous Job is deprived of everything that could make up earthly happiness: family, property, health. He remains alone in the ruins and continues to thank God. Devil tempts him personally, but is defeated in the dust. Job's faith is absolute, and he is in direct contact with the Creator of the Worlds. He does not bargain, does not exchange, does not look under his feet like a pig. His Faith is not a lottery «profitable – not profitable», it is a cosmic scale of life.

Job says the key words: **«If we thank God for good things, how can we not give thanks for bad?»** Moreover, the very concepts of «good» and «bad» are not only conditional and subjective, but also generally possible only because the world was created. Is there really no beauty and goodness in the world except for our personal self-interest? Whatever measure you use, it will be meted out to you! Good can only be understood in comparison with evil. The very discernment, the chance to see, hear, be, and see the wonders of the stars and planets, is already the basis for infinite gratitude and awe. The very chance to be aware, to think, to make decisions, to have free will is the greatest gift. To preserve your core, invisible, indestructible, whole, despite all the trials of perishable days, this is the work of Faith. Our soul is not a function of events, not the sum of pros and cons, not the product of reflexes. It is sovereign. Even death has no power over heroes.

Everything is in the hand of the Almighty, his will is not by our standards. We can only hope and, in fact, believe that we are approaching it, that we are, even in a small part, co-creators of the Universe. One thing is clear: if you do not go to this goal, do not have it in mind, do not think on such a large scale, then you will definitely never come. *Anyone who is familiar with the fire of true creativity, love, creation, not only understands us, but feels and knows unity with the Divine Will.*

Here we complete the circle of reasoning and once again understand that Faith is a psychic acceptance and love of being, in the limit not based on anything that can be expressed in words. This is the answer to Hamlet's question: «To be!» and no nails. No bidding, no profit, no evidence, no excuses. The grace of the Lord is not in what we receive, but that we are able to receive at all. The world is created, and it's beautiful! Do the Heavens help us? Is He following us? Does it count our thoughts about good and evil? It doesn't make any difference. **Faith is the fire from within, the power of**

creation that always starts «out of nothing.» Is the Lord good? What is Good? Can we judge without knowing everything? Is it even possible to know everything? So let's put aside our doubts. **We trust the Creator, we give him a shoulder. Even if it's not worth it, we're worth it. Mystery is at the core of being, and therefore a leap of Faith.**

We wake up every morning with the certainty that there will be a day, there will be life, that there are plans to change. Although there are no promises or guarantees of this in the past. We believe in the future absolutely, that it will come, that it will be brighter than yesterday. We believe that our children will live longer and better than us. That there are difficulties and hardships to include in them. We believe that there is development, that we are moving forward and upward. Our whole life is based on this fundamental Belief. So it was, so it will be. What was missing and lacking, and why this «faith» remained a superstition, was awareness, acceptance of responsibility. «Faith without deeds is dead»! From our naive and beautiful belief in a bright future, we did not draw conclusions, did not make commitments, did not take an oath of the Moment to fulfill. We waited for mercy from nature, God, the government, anyone but ourselves. History passed us by, entwined in a chaos of days, ups and downs, destruction and creation. As Tsiolkovsky correctly pointed out, we stayed in the cradle.

Childhood is over. The noospheric transition is an era coming of age. Certificate of maturity. We will be able to realize and take responsibility for Life, or we will only multiply the Losses. Faith is the greatest resource that we must master and consciously accept. The first. Elementary. Everything else comes later. All religions of the world are cosmic in their foundation, but the waves of the historical process have blurred great goals and meanings in favor of cult, politics, and the low nature of man. True Faith was transformed into Old Faith and Superstition, a parody of itself. Revelations, religious exploits, and a serious attitude toward holiness and righteousness are all in the past. At best, if in books and movies. Modern cults are no longer trying to conquer the world and take the Kingdom of Heaven. Old skins will not accept new wine. Tradition, ritual, rite, tedium, replace the spirit.

The nail in the coffin lid is the inscriptions in churches in Old Slavonic. Ordinary citizens can't read them, but the Church doesn't care. It no longer needs to teach, conquer, or create. It is enough to repeat. Easier, more comfortable. This is the case when a cult becomes a parody of itself. After all, once, at the dawn of Orthodoxy, the texts in the church were clear to everyone. They called, instructed, and nurtured. They opened the eyes. Once their language was not Old Slavonic, but native, understandable, and modern. So they took the world. Now it's just an entourage, a decoration. The living source of Revelations, calls to action, to fight for Heaven, is not studied, is not implemented. It becomes a set of dogmas, chants, and rituals.

«And Jesus said unto them, Because of your unbelief: for verily I say unto you, If ye have faith as a grain of mustard seed, and say unto this mountain, Move from here to there, and it will pass over; and nothing shall be impossible for you.» Thousands of years have passed. There was a time when grain was sought after. Now the maxim about turning the impossible today into the possible tomorrow has remained alive among us, Russian cosmists. We're armed with it.

Concluding the chapter, we will once again announce that we are not against Christianity, we are in favor with both hands! But for the sincere, the True. And this is not about the formalities of prayers, rituals, or authorities. The world's religions have come a long way. From the miracle, Revelation, sacrifice and feat, from the martyrs and heroes to the very scenery in the temple. We won't generalize to everyone, but you understand the image. Is rebirth possible? Like anything imaginable, it's possible. It depends on your will and Faith. We must thank religions for their thousand-year history, for finding the foundation, the Beginnings. If even such a mythologized, ritualized search has brought humanity closer to the True Faith, then this is fine. Imagine how much more powerful the new, conscious stage of development will be. Noospheric and cosmic keys.

The Living Imperial Faith is ALIVE

We are on the threshold of a new era. The backstory of Faith is over, the backstory of Life is over. The Imperium of Man is at the door, and before us is the Book of Keys. The chapter about the new, victorious, Living Imperial Faith should be poetic. After all, it is impossible to accurately describe the future, the unprecedented, everything according to the laws of dialectics. We must search for new words and meanings to guide and control the future. We need to realize that things always happen in History that have never happened before. The only way to manage such a process is to believe in the impossible, to create the impossible, to seek the impossible. The very concept of «impossible» means the impotence of common sense. Reason, the real power of reason, includes Faith as a necessary condition.

Faith and Will are the Beginnings. Without them, thinking itself is impossible, because even the movement of a charge from one neuron to another is already a product of the will. Before any experience, one thought moves and gives birth to another, because it is convinced in advance that this is good. The beginning of the psyche is as mystical as the beginning of the world. This fact must be recognized, accepted and embraced. Without Faith, we are nothing. The innermost fire of creation burns in each of us. Knowledge comes after, experience comes after, doubt is meaningless and is the experience of the demons of Fear. The living Imperial Faith does not doubt,

but it does not stop searching. For the nature of Life is such that equilibrium is unstable, that balance is possible only in motion. Every morning we get up to do great things, even small ones. If there is no Faith in this within us, then there will be no Faith without. If we don't change ourselves, we don't change the world around us. We need to get started.

This is the meaning of the scientific school of Russian Cosmism that states that *an idea born in people's minds creates new opportunities for society*. Society, in turn, must educate people who can dream and make their dreams come true. There is and cannot be any other source of development. Without Faith, we are nothing.

The living Imperial Faith is not a crutch, not a prop, not the last hope. This is a complete and final acceptance of your role in Life and the universe. Absolute role. Every action, no, every thought of everyone is infinitely important. We are not given to know how the word will respond, and the wave of a butterfly's wing will change the path of the planets. So this is our word and our wing. Not to admit this is not to live in full force.

Faith has no reason. It doesn't need proof or miracles to prove its power. Who «believes» after the miracle actually wants stability, refuses to choose, to create. He is ready to go only for what he has already been shown. For the past, for the already accomplished, for the obvious! Faith itself causes miracles, every day. Those who wish can try on the mantle of the blessed and realize **the mystery of the feat** of Alexander Matrosoy, as we write in the «History of Heroes»²⁹. If this isn't a miracle, then what is? We are much closer to the Creator of worlds than you can imagine. Every feat is an act of Creation. Victory in spite of the stagnant world.

Scientific Faith creates something new that has never been seen before. You can't use facts to justify something that hasn't already happened. They are just a hint, a guide to the Discovery. Their role is great, but not perfect. He who cannot rise above the facts is only a prisoner of being. Something always happens that has never happened before. This Is The Key. Without imagination there is no science, without will fantasy is fruitless, without Faith they cannot unite.

The old Faith failed, like all old History, they are in many ways pre-History. This does not mean that there is no lesson in them. Even an attempt, even a failure, is important. After all, the attempt was for the entire universe, for understanding the Creator of Worlds. Many gates have been opened, and even authority, the power of the word itself, and the understanding of Faith, have already paved the way for us. Yes, as we said, old words require purification. But for it to be possible, there must be an original purity!

Christianity, Islam, Buddhism, all set an example for us. Everyone was an innovation, a breakthrough of their time, they did not look back at the

²⁹ «History of Heroes», M: Variant, 2022, page. 95

authorities, but went forward, creating worlds, paradigms, generations of faithful, philosophical schools, and the direction of search. If our ancestors were able to achieve this before our era, at the beginning of the era, in the seventh century, then how much more are our capabilities? Standing on the shoulders of giants, we can see infinitely further. The era of the noosphere, of mindfulness, is coming. To whom much is given, much will be asked of.

An example of victory and an example of anxiety. Just as the new teachings once tore through the fabric of entropy, so they gradually became its victims. There are no Crusades, warrior monks do not keep the peace, even the Inquisition has become a cruel joke. Faith is in decline, Demons are triumphant. They don't sleep, and we shouldn't either. **It is not the horrors of war that frighten us, but the horrors of peace, invisible and invincible until war is declared.** The old cults fell victim to ritual, the desire for constancy, immutability, and calm. To the lowest resistance. The law of inert, inanimate nature! The flame of Revelation will burn. Seeing the example of this great rise and fall, how much we understand, how much we don't have to repeat, how much we have to do.

Never before has Humanity had such opportunities and such potential for Breakthrough. The consequences of failure have never been so high. To be and come true, or not to be and disappear. A Great Challenge must be met with Great Boldness.

The Devils 'cunning lies in perverting the noble. Understanding the death of the Old Faith is the way to understand their actions. Perversion of the creator, loss of passionarity, substitution of truth for imitation. The imitation is talented, comfortable, sweet, familiar, Church Slavonic. Consecrated by tradition, crosses, ritual, and TV. Higher alertness is required precisely because we feel as if we still believe that we have found... Infact, we are only indulging the primitive «religious need» of the pagan idolater.

Today, Faith has become a symbol of tradition and stability. It was once the banner of the revolution.

He that hath eyes, let him see; he that hath ears, let him hear. Faith created great architecture, cathedrals of unprecedented height directed to Space. Divine observatories. They don't build them anymore. Victory symbols in spite of! It has created literature, scholasticism, philosophy, and a culture that we will not neglect. Just as the Russian Cosmic Society foresees a Universal Cosmic Union, all the principles of immortality are gathered in a new, spiritualizing, life-bearing, Living Imperial Faith.

We are happy to live in a time when our mind's eye can easily survey the layers of pre-history and see the birth of Faith, its cradle. The world religions of this day were once a groundbreaking project, not just new ones, but newborn paradigms of development. A leap from a closed tribal or regional pantheon to a universal agenda. To plan not just for the future, but

for eternity. No parochial barriers, no «friends» or «strangers». Perhaps we also owe this Belief to the idea of Humanity as a whole. As we say inside the Russian Cosmic Society – «the past divides, the future unites».

World religions have emerged over the course of one thousand years in different parts of the world. Less than two thousand years have passed since the birth of Islam. There is no reason to believe that this is the end of Faith's work. On the contrary, with the fullness of information, fully armed with knowledge and Purpose, we simply must reflect this in the new, Cosmic, Living Imperial Faith. The future is not defined, it defines. If our ancestors, with much less ability to spread the word and information, were successful, then how much greater a breakthrough can we make? Convinced by science and heart that development is an imperative of Life, that it is infinite and stable and unbalanced. This is the foundation of Imperial Faith and eternal Victory.

What matters is what we see clearly today. Eternal Victory is possible only in spite of. This is not a set of answers once and for all, not a dogma written down for all occasions. Not peace, not the end of the world, not reward and punishment according to the charter. «And eternal battle, we only dream of peace...» We must consecrate the process of confidence and search at the same time. Constant development of Faith. The fire changes every moment and yet remains itself. Frozen – dead, without borders – Chaos. Going along the edge between them is a stable disequilibrium. **Eternal Victory is possible only in eternal Struggle!**

Conflict, trial, must be loved. In their flames, we become ourselves. *The world is an anvil of tempering our spirit with the hammer of Will.*

The time of the birth of world religions is called Axial, a turning point in pre-history. It is ironic that this naming occurs after the events of the epoch, and not during it. Therefore, once again, there is no reason not to consider our own, present time, a turning point to an even greater extent! After all, when our era began, there was no such thing as «our era». Anno Domini, The Age of the Lord. In English, this mystical designation has become simply official. Moment events have made time and period Axial. The evaluation came later. Has everything already been decided today? Are we not even more responsible for the future when we have knowledge? We are responding.

We have said a lot about the power and importance of Faith. If it is such a powerful and beneficial force, then why has it become a simulacrum of the Old Faith, a parody of itself? Why today, for the birth of a Living Imperial Faith, do we have to fight with all our might? The reasons are complex, we talked about them, but in the end, everything depends on the person. It is not Faith or its power that has disappeared, but the Prophets! Fiery orators and preachers, bearers of the Word, illuminated by the flame of Grace. A word is

a thought. A thought expresses meaning. If there is no fiery word, there will be no great meaning. There will be no meaning to Life.

Formally, only Islam declares Muhammad to be the last prophet. But Buddha is capitalized, there can only be one Jesus. People want to get the final, clear instructions that don't require updates. The Old Testament also notes with sadness that the time of the prophets has passed... Because those who have spoken to the Creator of the Worlds face to face are no longer listened to! The coming of the Son of God himself in power and glory was required to atone for this sin of humanity. And it is not for nothing that Christ himself speaks visionary in the parable of Lazarus. If so many miracles, signs, and knowledge have been revealed to you, and you are still not firm in the Lord's faith, then raising the dead will not change anything. Truly so. This is a direct confirmation of our thoughts about the «proof of faith».

They didn't want to hear it then. They don't want to hear it now. The world's religions, in their greatness, contain an amazing dualism. On the one hand, each of them calls for eternal struggle. «I have not brought you peace, but a sword...», «Be sober, for you do not know when Christ will come again...». Each one emphasizes the mystery and transcendence of the Will of God – a call to the eternal desire to know, and the eternal inability to put an end to it. This greatness and potential captured the minds of the first, heroes and creators. On the other hand, the masses perceived everything differently. For them, the grand edifice of Faith became only a more convenient and understandable refuge than the old pagan superstitions. The thirst for clarity, reward and punishment, shepherd and flock, clear rules of the game... All this outweighed, the peoples wanted to graze peacefully and comfortably. «They will not be awakened by the call of honor...»

Why did the Church Fathers do this? They made a difficult choice. The conquest of the masses meant for them the strengthening of Faith as a social institution, as the body of the Church, as power and administration. You can't help remembering Dostoevsky's words about the Grand Inquisitor. Does the end justify the means? Only time will tell. The transformation of Faith into a mass cult allowed us to get the Word out, but at a high price. Let's not repeat ourselves, you've seen and heard everything. This is a better lesson of Faith than none at all. It is important what the Imperial, Cosmic consciousness has to do with it.

Ancient pagan cults represented the movement of Life as cyclical. The world's religions have made it directed and final, until the last Judgment. Or simply undesirable, like Buddhism. Our task is to take a step forward and take a swing at **the infinity** of development. Forward and up. The spiral of eternity-infinity. Eternal victory in the eternal struggle.

We must return the expectation of the Prophet. Especially «in their own country». How Faith is the beginning of Reason and permeates all areas of

Life. In the same way, we should hear and listen to the prophets in science, music, education, culture, and military affairs. Break the vicious cycle of «may nothing come of it» and «preparing for the past war». Behold! In this moment of understanding, we see all the Keys of our Book converge. The expectation of the Prophet is readiness for the future, anticipation of it, search and control. A bold experiment, embracing new ideas, and pushing boundaries. The mission of the Prophets was simple, to inform the nations that there is no peace among the stars, only the Sword. That there would be no peace, that there would be a struggle, and that the Almighty's Bugle would never end. They were exiled and hated, they were fought, they were killed in a painful and shameful death, like Christ. This should be over with.

The living Imperial Faith is the belief in superiority every day, in victory in spite of, in the break of gradualness, feat, miracle, Revelation. We not only crave the word of the Prophets, but we become them ourselves, each in his own sphere, for his own social circle. Everything was new and everything will be new again. Development is not a cycle, it is an upward spiral. The prophets, saints, and pathfinders have not disappeared. Only we stopped seriously waiting for them.

Using the capabilities of a person to increase the capabilities of society and using the capabilities of society to increase the capabilities of a person – this is **the scientific formula for expecting the Prophet**. Every action of every man is infinitely important, every thought. And if someone can be a Prophet, a messenger of the future, an enlightened one, then why not you?

Understanding this truth harmoniously leads us to the need to cultivate a Living Imperial Faith. If faith is an ability of the psyche, a special state of mind and feelings, then this ability can be honed, developed, and consolidated. A person learns to read – by reading, swim – by swimming, to love – by loving. While recognizing the critical importance of Faith as one of the Principles, why don't we immediately recognize the need for the practice of Faith, the theory of Faith, a course of study and guidance in Faith? Good question. By reducing this task to mysticism and a unique personal experience, we are literally betraying the high human nature!

We do not deny mysticism, we make it scientific, conscious, and vital. Mysticism = mastery.

It seems rational, logical? Whatever it is. This is one of the fundamental moments of the noospheric breakthrough, which we must highlight and make. The revolution of consciousness, the need for upbringing and education **to break the chains of facts fully consciously**. As well as the chains of false rationality that Demons hide behind. We emphasize, not to abandon rationality as such, but to stop being its slave. Let's not go too far, all the examples of «History of Heroes» tell about people and actions that go beyond the limits of everyday common sense. The impossible, the unseen, the great,

and the mysterious are being accomplished. Yes, yes, it is the sacrament of the feat that must be taught from a young age. Explain that the reality of creation, of victory in spite of – is one true reality.

The mind knows, measures, and relies on the past. The future is beyond it. The Imperial Faith resolves this paradox within a single consciousness. Read more below.

The child must be prepared for a heroic life and inevitably, as a consequence, for a heroic death. It would seem that who at this point in the Book could doubt? Nobody. In what educational or pedagogical program in Russia is this recorded today? Not in any of them. We can't reach a goal that we're too shy to even set. This is the simplest, most obvious, and most shameful example of the slavery of facts and false common sense.

Much of what we will say today will seem wild, shocking. So it should be, so it has been from time immemorial. Development is painful, novelty is difficult and uncomfortable. Everyone who is seriously involved in sports knows this as a law of nature-Life! It is also necessary to understand and love it. **Pain is sacred.** Fear not, embrace it. It is necessary to explain directly to young people that through pain they surpass themselves. Pain of loss, pain of muscles, pain of defeats. This is not a goal, but a symbol of movement towards the goal. The fear of pain, the fear of rejection, the fear of failure, must be crushed, along with all the Demons. What doesn't kill us makes us stronger. Not only the text, but rituals, practices, tests, it must enter into the flesh and blood of a child, a person. This is a truth that cannot be understood by reason alone. Faith requires commitment.

Victory over fear opens the way to a Living Imperial Faith. To the flame, to the furnace, to the will of steel. The basic fear underlying modern civilization is «What if it doesn't work out?». It will work. Whatever it takes. A thousand thousand times we will fall and rise, but it will work. Never, never will we give up. **The world is an anvil of tempering our spirit with the hammer of Will.** To understand the feat of Maresyev, you need to crawl through the forest. The greatness of Tsiolkovsky – by working on crazy ideas, against all odds. Zhenya Tabakov's radiance – by going into battle knowing that you must lose. We will not be able to understand or take an example, much less surpass the heroes, if we do not follow their paths. Does anyone really believe that it is possible to raise heroes through cartoons, posters, through the words of women in a warm and comfortable classroom?

Majestic examples of real people in the «History of Heroes» clearly show that life is cooler than a fairy tale, Faith is stronger than reason. The impossible is possible. There is no other History than that of the creators. The cult of Heroes is not a figure of speech, it is a civilizational necessity. Because without it, the cult of things inevitably triumphs, as well as the cult

of death³⁰. The Imperial Faith is an absolute, unconditional commitment to excellence. An explicit or implicit oath on the weapon, a promise to catch up and overtake the fathers, not to betray their Dream. From childhood, from an early age, it is necessary to talk about it and do it, sending women's babble and pity to hell. Tear your pants, scratch your elbows, break your lips, but be bold, stand up for the truth, face it. Never give up. Do not tolerate even the shadow of a wretchedness around. Meanness, smoking, alcohol, cowardice. No compromises, no excuses. If you don't believe in the Power of Good in your youth, then it will be too late.

Heroes are symbols of the victory of Life over death. Anyone who does not measure up them is measuring up to the second law of thermodynamics, to chaos, to death.

We put up portraits on the walls, put up monuments, and encourage them to follow the example of heroes born spontaneously and accidentally. This may work or not, but the most important question is different! How to create and shape heroic character traits? Consciously, purposefully. Not as a side effect of a «good boy». Such a goal has never been seriously set by anyone before. We live in a miserable time when the «norm» is not to be a hero! Do not stand up for the weak, do not take risks, do not make a sacrifice, do not overcome, do not fight, but humble yourself. We admire the feat, but do not expect it from ourselves and others. What hypocrisy! The living Imperial Faith says that this must be done away with. Intransigence. Demanding the impossible to get everything. It's so simple, just believe in the fairy tales that we tell our children ourselves.

The resolution of this paradox of «non-heroic» culture is the civilizational, **noospheric transition** that begins when we stop considering wretchedness as the norm. Lack of valor is exactly what it is. Let's not blame anyone and point fingers, past generations did what they could. Now it's up to us. Heroism, victory every day, should be the basis of education. The love of challenge, the thirst for challenge, the sanctity of pain. Not to walk, but to run. Not to teach, but to comprehend. Not to play, but to win. You just need to remember that everyone has their own game. For one – it's poetry, for another – a design, for the third – sports. Imperial Faith is the hero's awareness of himself and others, an eternal, burning passion for accomplishment. Expecting the Prophet inside.

When we talk about the challenge of Time and the universe, we understand that our ancestors did not solve problems of our scale. They led us to these challenges and trials! When we talk about raising a New Person, we must believe our own words. When we think about birth control instead of conquering the stars, it's time to realize...all that what we have been told is a lie. Everything that was done earlier is incorrect and insufficient.

³⁰ «Imperium of Man: Age of Cosmatics». – M: Variant, 2019, page 33

Everything that has been established as the «norm» of upbringing gives birth to generations of nonentities. To the Children of Prehistory the New Man will be incomprehensible, distant and alien. The keys of our books will be poisoned for them. We will be feared or laughed at. Thank the Gods! Any other scenario would have meant that we lost.

When the Imperial Faith strikes you as strange, makes you smile, or scares you, remember: everything else has respectably failed.

Faith creates miracles. Not the other way around. Unprecedented, groundbreaking, new, amazing – whatever you want to call it. Discoveries, insights, and brilliant creations. They always broke the circle of the familiar – the circle of entropy and degradation. The attraction of Chaos is great, the temptation to be like everyone else, reliable, predictable, stable, convenient... Just study, just go to work, just relax, just get married, just kids, just a happy old age. This is exactly what Hamlet asked «To be or not to be?» In this circle of things, there is no place for a Living Imperial Faith, no place for heroic deeds, no place for the future, and therefore for Life. «Not to be», a damn attractive choice, demonically attractive! The Imperium of Man is the realization of one's potential, it is anything but «simple». It is a mission, a goal that defines meaning. It's not the facts that matter, but the relationships. You can do the simplest daily things, for example, with the mission to bring light to people and an example of nobility. Try it, and you will see how everything will change already.

Every action of every man changes the fate of the universe, remember? This is an immutable fact that you just need to realize.

You will be told that you don't matter, that you don't decide, that nothing depends on you, that your business is insignificant on a global scale. Heresy! You decide everything where you stand, here and now is our battlefield. In this moment, in this situation, you are setting off chains of events and consequences that will span the ages. Your nobility, your integrity, your commitment to the goal, decide everything. Even if you overcame laziness and got up on time, honestly performed your duty against profit, chose honor over profit – oh, you changed a lot, a lot. Even if you only did it once. The Hero's journey begins with small things. If we don't win at small things, where can we win at great things? You can sweep yards with the dignity of the Emperor of Mankind. Each will hold on its own. Movie-lesson «Chistodey»³¹ to help.

The living Imperial Faith does not doubt, it knows. The battle of the End is here and now. There is not and will not be any other time.

What you look at, you turn into. A powerful example of heroes should always be before the eyes of a young person. And not just as a set of facts, but as a touch to the mystery, as a pure flame of Creation. Doing the impossible today. The common cause served by saints, warriors and pioneers must be

³¹ <https://lk.kinouroki.org/films/37>

alive! Not a parable, not a fairy tale, not a template, but a clear Goal, an eternal Dream of the Fathers. Everyone should understand how they relate to the Heroes, how they serve what they do, how they help to move this Cause even one step, but forward and up. This is the essence of the Imperial Worldview. Everyone has their own feat, and the scale too. The main thing is that the person is in an internal dialogue with the Heroes. So that before their mighty gaze, he would not be ashamed.

A sense of awe. You may have noticed that we pay a lot of attention to feelings. Their management, the nurturing of feelings, is now in deep and undeserved oblivion. Expressing feelings of joy, pride, sanctity, and reverence is almost taboo in public spaces. All this must also be put to an end. A person is strong in mind, spirit, and feelings. Unity, not separateness. Faith is a feeling. Sanctity is a feeling. Grace is a feeling. Hate, too. Without righteous hatred, love is impossible. Without darkness, there is no light. This whole system of Imperial feelings must be literally reintroduced into people's lives. «Five minutes of hate» is not a joke, but a vision of the great possibilities of the future. We will make them «five minutes of good», but this will not change the essence. What a person cannot yet understand, he can feel. From childhood, we must cultivate a culture of valor, pride, unity, loyalty, and belonging.

The paradox is that the heart will not stop beating to the national anthem until you know its History, greatness and Purpose. **Knowledge gives birth to feelings, feelings give birth to Faith, Faith gives birth to abilities.** The ability for sacred hate should always be nearby. It is from her one step to love. The specificity of the feeling is such that it can not be brought up only in theory. «Well-fed are not friends to the hungry,» roughly speaking. A child, a person, should know what victory is in spite of. In labor, in struggle, in knowledge. Go through what I couldn't, and I did. Sweat, blood, and effort create a new set of feelings. Only that victory educates, the price of which was paid in full. Development is always a conflict! Between the familiar and the new, between entropy and creation. Between the second law and the law of Life. If so, then this sacred conflict must be loved. *Vivere militare est*³², right? This and other fundamental truths that we have touched upon are the basis, alpha and omega of education and upbringing. If they are not understood, then any subject knowledge will ultimately serve the Demons.

«Education without upbringing is training foreign specialists».

Honor is formed when there is a choice and a price to choose from. It's easy to be kind when it costs nothing. Once again, if conflict is the only way to know who you are and what you are worth, you must love it. Accept the challenge, don't look away. In life, in communication, in science, in work. Conflict is not swearing, it is a clash on the scales. It's a way of Life. The

³² «Living means fighting» (lat.)

aristocracy comes into conflict with the bourgeoisie. Reason – with ignorance. Faith – with wretchedness. All these concepts should be institutionalized, formalized, and fixed in social practices, rituals, exercises, insignia, and even in the form of clothing. We discuss these techniques in more detail in «The Age of Cosmetics» and «The World of Heroes». The principle is important here. **Faith without works is dead, so an Imperial Cult must be created – a system of practice, embodiment, symbolization, and formation of feelings.**

The word «cult» in our speech has become almost entirely negative. This is another clever trick of the Demons. The old cults themselves did a good job of this. However, the revival of holiness, faith, and the secret flame of creation is impossible without the rehabilitation of the idea of a Cult. The demons want us to become pigs at the trough of the Second Law, not to raise our heads from primitive rationality, from the power of stagnant matter. The sacred, the breakthrough, the impossible is born today in the Imperial Faith, and its education does not happen by miracle. Ritualization, sacralization, these words should firmly take their place in our speech. A conflict, a duel, a test must get its own rules, become part of the life of society. «Rules for upholding honor», and no need for deadly duels! The very fact that you have to answer for your words is important. «Tests of maturity» – to create a vital, developing, healthy procedure for confirming the right to be called a «young man», and not a child. A man, not a boy. The army no longer educates men, unfortunately, but it could! You just need to set goals.

Today, not consciously, but every day, only the principle of «may nothing come of it» is sacralized.

The Imperial Cult must be the triumph of paradox. We are mature enough to understand that simple solutions don't work. The search for easy ways led us to the abyss. The absence of dogma should become a dogma. «Fight and seek, find and do not give up!», the answer has long been in front of us. Just be aware of these words, think about it. In practice, it is not difficult to implement this at all, the goal determines the meaning, especially the goal is explicit and conscious. The ecclesiastical orders in the West, the Dominicans, the Franciscans, and especially the Jesuits, each perceived and practiced the dogmas of the Church in their own way. To do the same in our way, and even with the mind – God himself ordered. The task of the Imperial Faith is to include all other religions. Or vice versa, adapting yourself to the point of agreement with all other religions. They have dogmas, we don't, there can only be one winner in this game. We need unity, they need isolation, but the living, young forces of every religion and culture will stand up for us. Remember, every True Faith is Alive and Imperial.

Steady disequilibrium, running on the edge of a knife, should become a symbol and secret of the Cult.

The very task for missionaries of the Imperial Faith to unite everything under the sun will make dogmatism impossible. The presence in the structure of the future society of informal regulators such as the «Inquisition»³³ will provide the necessary control. The dogma about the absence of dogmas can be fulfilled only through informal, human perception. The Imperium of Man is so called with good reason. No material factors alone can give the victory of True Faith. Once upon a time, the old pagan cults were based on bureaucracy, tradition, money, and the army. Christianity won anyway, because there is no power higher than the Truth. The only problem is that that Christianity is no longer there. Today, it is itself a function of bureaucracy, tradition, and money. The merchants and money changers returned to the Temple. So, my friends, **the Imperial Faith, like Lenin's teaching, will be all-powerful, because it is true.**

³³ «Imperium of Man: Age of Cosmatics». – M: Variant, 2019, page 125

Initiation and Acts of Faith

Faith without deeds is dead. It is impossible to cultivate feelings without bodily action. Overcoming the limits of the possible begins with personal experience, with overcoming the possible for yourself. So a small, and even a big person, understands that in his person the whole of humanity is making a step forward. If he could not and then achieved, then the Cosmos will be ours. This moment, this feeling, this type of behavior, must be sacralized. The concept of **an Act of Faith, a Deed of Faith**, must be firmly established in the new language. The child should be pushed to its limits and helped to overcome them. Do not be afraid of pain, failures, trials, but welcome them. Everyone has their own limit and their own Act of Faith. We must learn to distinguish, see, and explain it. You came to the blackboard for the first time – that's your line, your Act of Faith. When you first step onto the competition mat, you are performing an Act of Faith. Are you fighting a stronger opponent? Starting a new project? You take on an unfamiliar field of knowledge. Fine, take heart. These are your Acts of Faith, your steps into the future. Your overcoming the Chaos and entropy of an inert nature. The living Imperial Faith is no longer a vague feeling, a guess, or an epiphany, but a powerful force that is always with you. You know that the task is difficult, that you have never had to solve it before, and you know that faith is the only way in History to get to it and win. Be strong in your Faith, it is not in the Temple, it is not in prayer, it is in the hot blood of the battlefields. Deeds speak louder than words.

Through the concept of an Act of Faith, we literally institutionalize doing the impossible. Let's make it everyday, a part of life. Not performing an Act of Faith = not developing = not living. Because development and complexity are generally part of the definition of «Living». Understanding this brings us back to **the rites of Initiation**. To a public formation recognized by a collective of equals and comrades. From a boy to a man. From a girl to a woman. And we're not talking about biology. A person must be accomplished both physically and spiritually. Now the second part is forgotten everywhere. It is only through a high Act of Faith that the boundary between the past and the future, between the child and the adult, between nothing and everything can be crossed. Everyone should be able to clearly answer for themselves and others whether they are a man or not. And also what he did to make it clear. Remember, there are no templates, they are not suitable. As in the standards of the KGB³⁴, everyone has a feat of will on his shoulder! It should be chosen thoughtfully, deeply, together with mentors. The whole life of a person will depend on the choice of an Act of Faith in the rite of initiation. The choice of action already expresses a person's credo.

³⁴ See Cosmoplan, «World of Heroes»,

The conquest of a mountain peak, a scientific discovery, a masterpiece of a arts, victory in a duel over the strongest opponent. Even if for lawyers to arrange game courts – tests with eminent lawyers. All this will do. Moreover, for thousands of years, different cultures of the Earth have done exactly this. The story evolves in a spiral. We do not copy the past, we learn from it, and on a new turn of the spiral we apply the well-forgotten old in new conditions. The reader might ask here, «Why revive what is gone?» We have already answered this question above. The specter of technological progress misleads humanity and is not a blessing in itself.

Progress as such uses the achievements of the mind, but is not controlled by it! If we look at it objectively, then war, aggression and greed, the low nature of man-this is what pushed forward technological progress, first of all. Where did this lead us? Today we are standing on the edge of a precipice and, looking back, we must clearly understand how we got here. Where did we take a wrong turn? What decisions were made on instinct, in the heat of the moment, and what decisions were made with a plan for the future. Ancient rites and traditions can be vital not because they are ancient, but because they are faithful and develop a high nature. If they didn't exist, they should have been invented. The goal determines the meaning. Today we are faced with the goal of reviving the greatness and power of Man, not his machines. Therefore, the maturity certificate, the exam for adult life and higher education, should not be tests, not mechanical memorization of facts, but **a test of comprehensive development**. First of all, as a human creator and decider, as a person who has chosen his own path of service to the Common Cause. This is the meaning of initiation rites and Acts of Faith.

Our science pierces the veil of mystery over the stagnant nature, gives us more and more new technical capabilities. It is truly surprising how little progress the science of man himself has made. And how even less it's achievements are used, even when they exist! It would seem that what can be more important than ourselves in human society? We can explain how the internal combustion engine works, but it is very difficult to explain how our psyche works, especially dreams. Knowledge of the engine is used everywhere, and knowledge of the human soul is used sporadically, not scientifically, and often for ill in the form of advertising, quackery, manipulation, and the thrill industry. Russia recognizes and honors its great teachers: Makarenko, Sukhomlinsky, Shatsky, Amonashvili. Only one question remains: why is the state education system not implementing their precepts anywhere (!)? But they were already harbingers of the Living Imperial Faith, they already knew about Acts of Faith and rites of Initiation, they simply could not name them in the True words. We can.

Initiation as a transition from «childhood» to «maturity» is laid down even in the wild, starting from a pupa in a butterfly, ending with fights of herd

animals. A person inherits whether we want to or not. We can only choose whether the initiation will be conducted in a low,» natural «circuit, or in a high, spiritual one. Look around you. Millions of children, young men and women, are looking for initiation and transition into the adult world every day. How do they do this? On the level of emotions, sensations, and surface, because they are mostly ordinary people and because they are left to their own devices and we do not take responsibility for this crucial transition. We don't create our own rituals and Initiation symbols. What do we see in the «natural» order? Swearing, smoking, alcohol, early sexual contact-adults do it all, don't they? And where does the culture of trai-hangers, parkour players, etc. come from? This is the same transition through risk! «I can, I won't be afraid.»

Ask yourself why children don't choose rituals of valor, honor, and nobility. What an adult world we have created, such paths lead to it.

It is necessary to understand that Faith and the emotions associated with it, feelings of accomplishment, overcoming, and victory over oneself are part of Human nature. They can't be ignored. Yes, everyone has their own level and milestone of achievement, the absolute majority need help and support, ritual, symbolization, and a team. We need to understand and act on this, educate and shape our children, and not let them leave to chance = Chaos.

Above, we have described the mechanisms of spontaneous, wild initiation. Much worse and more dangerous in the modern world is that **initiation may not occur at all!** The word «kidult», «young adult» («child-adult»,» young adult») has firmly entered the Western commercial lexicon, it has already happened. Beloved technological progress has deprived a Person of tests, made his life so much easier that you can remain a child until the end, you can not grow up at all and become a «blogger» or «ITspecialist». Or just do not worry and slowly work as a waiter, courier, etc. I have enough money to live on, but I'm too lazy to strive for something. No one demands it. On the contrary, it encourages you. After all, the army of service personnel must be replenished by someone, right?

Cheap and affordable games on the computer, with ever-increasing realism and immersion, as science fiction writers predicted, are replacing growing up for millions of males. This lack of initiation, responsibility, scale of thinking, maturity of body and spirit is a much more serious threat to Man than spontaneous forms. A child with a cigarette wants to at least appear cool. «Kidult» does not want anything, he is happy with everything.

The «challenge of youth» to the adult world, the rebellion of the young, has existed since ancient times. Happy and powerful is the society that is able to direct it to creation and development. Never before has this challenge been so serious and so dangerous in its limpness as it is now. It is providential that right now we are ready to give and realize the answer: **The Imperium**

of Man. An answer in the highest sense of the word, not just a reaction, but the keys to survival and victory forever. Answer questions that haven't been asked yet.

In our Book, Faith symbolizes a part of the high nature of Man that is systematically questioned in the modern world. It is as if man consists only of «economic reason», only of profit and calculation. They are trying to convince us of this, and if we accept this, then in fact, the best intelligence will be Artificial, and the best human will be a robot. Here it becomes very clear why in the Russian Cosmic Society we call AI «Abominable Intelligence», in the literal sense of the word, as they say. Man does not consist only of Reason, or rather, a full-fledged Mind also relies on Faith, feelings, and a complex perception of the world. In Lenin's language, «The Noospheric Mind is more than Reason.» Therefore, **the education of feelings, emotional structure, character and Faith is a necessary condition for creating a future society of a Man**, not a machine.

Once we understand this, we not only return to the need for Initiation rites and Acts of Faith, but we also understand that they must be vivid, emotional, ritualized, and collective actions. Oaths, marches, torches and banners are not the whim of tyrants, but a living means of influencing the emotional side of a person. Further, the goal determines the meaning, but if you want to speak with the soul, speak not only the language of the mind!

In modern Russia, timid attempts are being made to restore rituals. The best example is the Immortal Brigade. You can see for yourself how enthusiastic people around the country and the world are about this action. Because the hunger of the soul is no less than the hunger of the body. Brigade opens up another aspect of initiatory rituals – they should be full of meaning, deep, sacred.

The form is empty with no content. On the march of the Brigade generations of the same family, ancestors and descendants unite. The spilled blood of heroes receives well-deserved worship and respect. A single and common movement unites you with your people. The fallen live again, are reborn in us. Willingly or unwittingly, we make a commitment, an invisible oath, not to betray, to justify the trust, to keep the Dream of our Fathers. All these meanings are mystically embedded in the procession. Even if none of the official organizers could explain and reveal them. It is even important that the procession is long and tedious. That's great! It makes us symbolically join the hardships and trials that our ancestors went through. Earn your right to be remembered and proud. You see? That's what a true ritual is.

Despite all the official support, the authorities canceled the march several times for various reasons. They are still afraid, still don't understand. Why do we speak so confidently? Because, seeing all the greatness and effectiveness of the Brigade, for many years they could not implement anything more like

it. Not to mention the fact that the campaign itself was born and sprouted among the people, on its own grassroots initiative.

Most modern «traditions «and» rituals «are empty shells. Tedious meetings and rulers who don't perform Acts of Faith, and if they do, they don't do anything. Why should they light up hearts? How do we do this in general, what kind of heroes do we bring up? Who would answer in a modern state? War helps open the gates of perception, break down gradualism, and understand the futility of formalism. But they also get used to war, they are already used to it. After the first shake, they are already in a hurry to go back to hibernation. They introduced «conversations of the important», but even the name itself causes a sad smile with its absolute official character. What's important? What are we willing to die and kill for? Life and death, ultimate questions and answers. If the parenting system does not concern them, then it is fruitless and does not work even when «everything is fine». What will you fight for until the end? What evil will you not tolerate? What mistake can you not forgive? What values are you willing to sacrifice yourself, time, comfort, and money for? Without an answer to these questions, that is, a complete zero. Because even children know, «A friend in need, is a friend indeed». Read «man».

The ancients knew very well that **a ritual without sacrifice, without effort, without spilled blood is cheap.** The expressions «blood brothers», «swear on blood», «we are of the same blood», «till the first blood», were not born in vain. The victim is not necessarily an unfortunate animal; such a «sacrifice» is only a bribe in the Old Faith. All True Faiths have long given a new interpretation to the concept of «sacrifice.» Fast in Christianity is also a sacrifice. The ability to distinguish grain from chaff, important from unimportant, to give up the hassle and fuss, for the sake of a higher goal. Sacrifice is art, shedding blood, overcoming the fear of death and pain – all this is a direct blow to the Demons of Greed and Fear. All this is the triumph of the will over non-existence, over obsession with things. And in this sense, again and again, we must understand. «We have blood in our veins, not water...», pain is sacred, the value of everything is determined by the price of Choice. If you don't give anything, you don't get anything. This fundamental truth, understood at the level of the mind, feelings, and heart, is the meaning of real Initiation rites.

The ultimate questions in the human soul initially gave rise to the search for Faith. They were placed at the level of society and the state, Sacred Alliances and wars took place for the right to the Truth. Today, the search for an answer is considered politically incorrect. The struggle for Life has become indecent. Truth is no longer possessed, or even sought after. Once again, we will refer to the «World of Heroes» and «Roman Vestal Virgins». The community makes it clear what it's worth by taking things, ideas, and goals extremely seriously.

If «purity», «sanctity», «honor» in our country have become not working, but fabulous concepts that are practically taboo in everyday circulation. Over which «adult» people smile ironically... Who are we? What is our role in this larger World? Good question.

Systematic Acts of Faith generate not just an answer, but form a life attitude, character, and personality type that is aimed at finding an answer. **Constant readiness for a Break of Gradualness.** Literally a ban on «resting on your laurels» and quiet decay. No Acts of Faith – no life, at any age and until the last breath. Absolute ruthlessness³⁵ to yourself. The triad of the human creator in the Russian Cosmic Society is: researcher-designer-organizer. Even for the first stage, you need an unyielding will to look for the new (!), to see opportunities for development in the familiar, to discover the unprecedented, to approach the impossible today. The formation of such a character, thank Heaven, sometimes happens by itself, without directed effort. Lomonosov, Tsiolkovsky, Mozhaisky are the best proof of this. Imagine, then, how huge the layers of power we will raise when, for the first time in History, society sets itself the goal of forming such a person with all responsibility and awareness!

Human nature is not a closed book. As Tsiolkovsky said, we are before the abyss of discoveries and wisdom, immortality. It is only necessary to constantly push the borders forward, every day.

³⁵ Kochergin Andrey, «Man with an axe. Absolute ruthlessness to yourself», M: Eksmo, 2018.

«1984» and Triumphant Doublethink

«The World is an anvil for tempering our Spirit with the hammer of Will.»

The third circle of the spiral. On a new level, we are returning to the phenomenon of scientific Faith. In this chapter, we will teach the Mind to reconcile contradictions, to remove the ancient and false opposition of knowledge and Faith. Understand their unity. Remember, the past divides, the future unites. Strength is in unity, in fusion, in conjunction. You may have already noticed the apparent contradiction in dogma versus dogmas. It will always be like this. The living Imperial Faith does not freeze, it develops on the march. An attempt to stop the moment, as in Goethe's Faust, is an attempt to remove a Person from the process of Life. Find the final answer, clear rules, the Ten commandments on stone tablets. After all, if you find it, then you don't need to search, doubt, or explore any more. Perform, practice Islam (submission), and be humble. Truths and rules that are frozen aren't even good or bad, they're just dead. Life is a constant conflict of old and new, will and reality. Any rules and attitudes that do not understand this, of course, become good intentions leading to hell. Safe, secure, and guaranteed.

We must enter an Era of Struggle, a millennium of blessed conflict. Love it and understand it. Our life is not a complete text, but a running line. It is precisely in the desire not to put an end to it, to look at the next page, to tell the story differently, that humanity is hidden. Hear, understand, against the rule. Christ did not teach in vain that love is even higher than justice, higher than the law. Right! Only it is necessary to correctly understand love, not as «getting what is easy and pleasant», but as «opening your eyes to the need to give more than take». If you want, then, like freedom, love is a conscious necessity. It has acceptance, demand, rigidity, softness, peace, and aspiration. It seems, why is it so difficult? Do not look for easy ways, because they lead all to the same. The Kingdom of Heaven is taken by effort.

In the vast majority of cases, Orwell's magnificent novel «1984» is perceived as a dystopia and it is believed that all the processes, phenomena and decisions described there should be perceived exclusively with a «minus» sign, like a scarecrow. The attentive reader, imbued with the Imperial spirit, already knows that the primitive, superficial meaning is rarely true. So the novel itself appears as a symbol of doublethink. A secret within a secret, a circle within a circle. An anti-utopia outwardly, in fact it reveals the fundamental laws of human nature, almost without equal in this. Of all the literature of the 20th century, we consider «1984» to be the most useful for social construction of the future. Not for copying! Not for clumsy use, but for awareness.

*Of course, there are warnings and negative scenarios there. But when the finger points to the sky, only a fool looks at the finger*³⁶.

When you get to this point in the Book, you must take the slogans «Peace is war,» «Freedom is slavery,» and «Ignorance is power» completely differently. You have already understood how insidious words and familiar reality can be, how many Demons it hides. What we are doing now is tearing off the covers, turning the consciousness around, waking up from sleep. Haven't you seen that a well-fed modern world is worse than war? That modern Freedom is worse than slavery? That not knowing all the answers, not striving for formal certainty, is the way of Life? We have seen and are now ready to re-read and understand 1984, including the triumphant power of doublethink.

Doublethink is now our first weapon in the struggle for meaning. Every day, when we hear familiar words, we need to understand them in two aspects. In the distorted, everyday, desecrated, on the one hand. On the other hand, in what this word should be. You will know the destructive nature of Fear, but often you will have to endure it around. True Names are a big responsibility. After reading the Book, you will have to return to the still «ordinary» world and act in it. Not directly, proclaiming Imperial truths, but a secret agent of the influence of the noospheric future. So that people listen to you, but don't get scared. So that those who are not ready come to the source gradually. You will need to act on the situation, very rarely revealing the full power of your beliefs and spirit. This is also double-thinking, and it is necessary.

Doublethink is the embodied **stable disequilibrium** of being. Or, on the contrary, the stable disequilibrium of life processes is a physical analogue of doublethink. In order not to seem too revolutionary and incomprehensible, let's use someone else's word «dialectic», it has the same meaning. «Unity and the struggle of opposites», «the transition of quantity into quality», these are the laws of dialectics, and they directly call for seeing much in the one. There is no discovery and there is no uniqueness for the Book. Unique is «1984» and how doublethink became a material force when it took hold of the masses, of course, according to Lenin. This is what we encourage you to realize, use, and direct with your Mind. No truth is final, in the well-known one must see the sprouts of the future, risks and opportunities. Doublethink should be taught from childhood. You don't have to go far for the symbols. Russian Aquila has two heads.

The next fundamental step that we must take with the help of doublethink is to correctly understand the laws of nature, the laws of physics. Until now, the habit of dividing the sciences into «natural» and «social», «exact» and «humanitarian» has been formed for centuries. This is coming to an end. We will not be the first to understand this, but our task is to adopt this idea in the most decisive way. Nature and Life are one. Our thoughts, our spirit,

³⁶ Motion picture «Intention» («Замысел»)

have the same physical basis as the processes inside the stars and planets, like the flame of atomic reactions. This is no longer an opinion, it is proven by experiments. Scientists have long succumbed to the depths of the world of subatomic particles, and at the very core of existence it turns out that there is neither time nor space. Particles behave «strangely», «charmingly» and everything depends on the observer. Similar fantastic processes are observed in the world of macro-Cosm with a violation of the usual geometry, compression of time, and so on. Nothing stands still, nothing is unchangeable or indivisible, everything in the universe is Alive, changing, while remaining unchanged. Unity and struggle of opposites.

No wonder Russian fairy tales considered the thought as fastest in the world. Particle physics agrees with them.

The very dichotomy between «physical» and «spiritual» is false. Everything is the same. Everything physical, or if you prefer, everything spiritual. Thought is of a physical nature. It is part of the universe, just like any other atoms, radiations, and fields. This is not a triumph of materialism, quite the opposite. This is a triumph of the Will, because it turns out that the power of thought, willpower – also one of the fundamental forces of being. Isn't this food for Faith and optimism? We were so eager to learn and develop the sciences of inert nature and technology. The understanding of the all-unity initiated by the Russian cosmists, especially Vernadsky, at this point leads us to the need for an equally powerful development of the sciences of man and society. So Cosmatics appeared. This may seem like a pretty simple idea, but wait! Look around you again and see the misery of the social sciences. In accordance with the laws of physics and chemistry, we create fuel and build cars. Attention, the question is: what do we create in accordance with the laws of the social sciences? What doctrines, theories, and scientific philosophies underpin our federal laws? Where are they marked? Very good question.

Thus, through Faith and understanding of the laws of the spirit, we come to understand that at the threshold of the 21st century, it is **the hearts of people, and not their machines, that become the main productive force.** With the rest, everything is more or less in order, we are slowly moving, but in the sphere of Human reproduction, as a carrier of Life and Victory, there is a real crisis. It's not guns that kill people, it's people. People sell drugs. People also sell themselves as things. They also destroy themselves physically and spiritually. On the agenda is not just the development of a modern theory of Society, consistent with the laws of nature, but also its massive application, not inferior to technical and exact sciences. Because the technique and the soul are not in different worlds, but in one. And if there is a most important law of development, it is «increasing the power of Man», and not turning him into an appendage of monetary and material systems.

As J. V. Stalin bequeathed: «Without theory, we are dead.» And, yes, there is nothing more practical than a good theory!

Karl Marx was right in many ways when he said that **the philosophers of the past tried to explain the world when it was necessary to change it**. We are entering the 21st century without a single coherent theory of Society and Man, except for Russian cosmism. Moreover, there is not a single theory that reaches the milestone of all-unity. The unified system of physical quantities Bartini-Kuznetsov, L-T system already opens the gates to the world of the spiritual. We have only one step to go. If in the physical world you can translate any units into any units, kilograms into kilometers, you just need to understand the laws of being, then **what is the reason to believe that there is a gap between the world of spirit and matter, an insurmountable wall? No**. About the materiality of thought or the spirituality of being, we have already said above. Therefore, it is very simple: no theory of Society can fail to rely on uniform laws of the development of Life. Note that there are no other laws in the world, everything is the path of geobiochemical co-evolution of Life, as V.I. Vernadsky convincingly showed with his principles and P. G. Kuznetsov developed it in the science of Life development.

Psychology, sociology, economics, politics, without taking into account science, human nature and Society – there is only a bad imitation, a game in the dark with a black cat. An unavoidable consequence of the lack of a Theory of Society is the orientation of applied disciplines like law, pedagogy, and politics to the Low Nature of man. Because it is obvious, easily accessible and does not require deep understanding. Let me remind you that heroism, valor, and honor are considered forms of deviant behavior in the modern «theory» of social studies. The «norm» is therefore bestiality. Aldous Huxley's Brave New World won without us noticing.

Books, especially «The Imperium of Man: The Age of Cosmatics» and this work, contain approaches to the new Theory of Society. They almost create it, but in their own spirit, they leave it not fully completed, capable of development. The unity of the spiritual and the physical is one of the fundamental breakthroughs in the theory of society, the consequences of which will be recognized for centuries to come. Will and Faith are not just figures of speech and beautiful feelings, they are the Beginnings of being. Their role in nature is studied by physicists at the level of the micro and macro Cosmos. They should have made their timid acknowledgments of the fact of all-unity much more public long ago. Their role in human life should be handled by us. We cannot raise a New Man for the future by applying approaches and assessments that have been nurtured by millennia in the cult of Low Nature, on millennia of practices that have led us to the abyss of the Necrosphere.

We are returning to the Power of Faith on a new level precisely in connection with Doublethink. This is just as new and unused a competence as Faith in modern society. Weak minds reject Faith only because it does not give them an immediate physical advantage. People don't fly, and the dead don't usually come to life. They think only in one plane, they want «all or nothing». For them, the physical and spiritual worlds are still separated. The spiritual must conquer the physical, prove its primacy, create a «Miracle» or admit its impotence and remain in the pen of the skull box, and a little later in the server box. You can easily see this for yourself by making your choice – to be or not to be with us.

If we accept all-unity, then the contradiction will be resolved, of course. No one doubts the validity of Ohm's Law, for the reason that people do not fly. The current strength is one sphere of existence, gravity is another. So why do we require Faith to be EVERYTHING at once? Break the laws when it can fulfill them? Like Christ. You see, there is no rational or logical basis for such an attitude toward Faith and the spirit. Doublethink is necessary to represent the same processes as both «physical» and «spiritual.» Physical-spiritual dualism, if you will, is like the wave-particle dualism of a high school course. Let us see the action of Faith!

You've probably heard about nervous diseases, panic attacks, depression, irretrievable death of nerve cells, and so on. But why is this happening? Because people have a certain attitude and perception of the world around them. One is afraid, the other is not. Some believe, others don't. Some are confident (the root of the word!), others are not. And here you are, a physical, biological expression of Faith. Health, strength, clarity of mind. But Faith is a choice. It turns out that the same position inside the skull box affects your physical condition in the most direct way. This is obvious and mundane, you just didn't think about it. **The gate of unconsciousness, that's what we have to overcome! Doublethink is the highest form of awareness.**

Continue. Much has been said about the demons of Fear. But let's look at the basic mechanism of the phenomenon. The brain, even the spinal cord, receives information from the outside world and sends commands to the body: to release adrenaline, shock, awe, paralysis, or mobilization. It's different for everyone, right? Moreover, even an individual can be taught not to be afraid! You can even overcome the fear of death, and we're just getting to that point. As a result, only the inner attitude, the way of thinking, the Power of Faith determine the nature of the physical reaction of the body to the outside world. Physical, my friend! This is only the beginning of the influence of Faith, one runs, another lies, the third fights. Everything depends on us, strength is a choice, physics is a choice. We have already discussed the placebo effect, and this is the miracle of miracles! Here, in general, recovery and improvement of the body's condition occur only because the patient is convinced. And this is the weakest kind of Faith – deceptive, just the installation of reason. This is not the flaming torch of power that we can kindle in our own breasts.

S.A. Zotov: I will give you my own example. I haven't been ill in 28 years. Not a day. Ever. It's a choice I made when I was 13, still a kid. The Imperial Faith is strong. When I talk about this to my cadets and students, most often I hear: «Well, it's you, Stepan Andreevich, we can't do this».

You see! A deliberate renunciation of Faith. The belief in one's own weakness, in the impossibility, in the exclusivity of the case. Finding excuses, not solutions. This is the watershed between the old and the New Man. «Enemies are not counted, but beaten,» Ushakov said. What one person can only imagine, another can already do. What one person did, for another goes without saying.

We anticipate the objection that the power of Faith, then, concerns only the person himself, his internal processes. Where is the Miracle here, the violation of the laws of nature, maybe this is just normal? Above, we have already debunked a similar popular concept of «miracle» and «faith». The human body and its physical processes are as much a part of the physical world as any other. If Faith affects it, then it is already manifesting its physical, true, absolute action. Therefore, this is also **part of the laws of Nature, part of the Design!** Unity of «physical» and «spiritual». Not to violate, but to supplement and expand the known laws. Let's say in the field of «human», but let's think about it, is this a limitation? After all, it is through the human body and spirit that true creativity comes into the world. The fundamental forces of nature are being defeated, as we like to say in the Russian Cosmic Society: «creative labour is pure anti-gravity.» The force of gravity of cosmic bodies is defeated, time after time, with each flight of the plane, with each launch of the rocket. It seems that the victory is temporary? But one must see with the true eye, one must see the movement in its true direction. What was unimaginable yesterday is already commonplace today, and tomorrow it will be surpassed. This is the true and only victory over the laws of physics that is generally possible in this universe. This miracle of creation, of creativity, of turning the impossible into the possible, has only Faith and a powerful Will in its Beginning.

«The abyss of discoveries and wisdom await us. We will live to receive them and reign in the universe like other immortals,» K. E. Tsiolkovsky

Only now do we come to the final gate, in the third round. The truth is always paradoxical for everyday consciousness, it is a good sign that we are on the right track. You may have already understood that **True Faith is Scientific, and True Science always has Faith in the beginning.** There is no contradiction here. Unity and struggle of opposites. Ancient wisdom, reinterpreted by philosophers. Doublethink or dialectic is a necessary condition for the development of both disciplines. Scientists are well aware of dualisms, and particle-wave analysis is even included in the school curriculum. Only in school they don't teach you to draw conclusions. And

where do they teach you? Good question. In religion, Double-mindedness is at every turn, the Holy Trinity, Almighty God, etc. The Imperium of Man is an organization of society that does not divide, but unites. Not separate pens for the «physical» and «spiritual», but a single force of Life. **Imperial Faith is a triumphant doublethink, a victory in spite.** The ability to see your limitations and, at the same time, know that the possibilities of a man are unlimited. The ability to realize the finiteness of your personal existence, but the infinity of the creation process. To know fear, but to conquer it, and to say boldly in the end: «I know no fear.» As we have already said, the understanding of the impossibility of justifying being and yet, its justification!

The living Imperial Faith does not deny mysticism, ritual and rite when they are used as a symbol, a key, a guide to the sacred. It denies them when they become a dogma, an independent value, a means to separate «friends» from «strangers.» **The Mystery is the final degree of Doublethink.** The desire for knowledge, regardless of the evidence of its incompleteness. Moreover, scientists have long realized that the more we learn, the more questions arise, because the area of contact with the Unknown increases. Socratic: «I know that I don't know anything», a paradox in itself, finds practical confirmation. We can be fully aware that we will never be able to find all the answers, there will always be the potential for child's «Why?» or «Where?». If the world has a beginning, then what was before the beginning, and where is the beginning of what was before the beginning? Do you understand? This is even mathematically proved by Godel³⁷. So, the world is obviously unknowable, but this does not prevent us from striving. The mystery of Faith brings us to this realization through emotions, feelings, on a higher level than just the mind.

The mystery is not a reason to give up knowledge. If religious practices say otherwise, they are a typical Superstition, and we are done with it. The sacrament is a challenge. This is the sound of the bugle that does not know the end. It is a conflict between the known and the unknown. Eternal battle, peace we only dream of. The promise of an endless chase, a land of eternal hunt, where only the wind whistles in your ears. The mystery is a horizon of events, not a prohibition of knowledge, but a boundary beyond which you will not be the same again. Like a normal horizon, it is always near and always ahead.

Why are we paying so much attention to this issue? Because understanding the mystique of being is a matter of courage, maturity, and challenge. We accept the fight, we don't wait for final answers, simple solutions, easy ways. We will fight to the last line, and then beyond it.

The recognition of the Mystery of Being is the recognition of one's own absolute responsibility for everything. We will not be able to shift the responsibility for Life to any teaching, any authority, or any force. Every action of every one is infinitely important. A set of prayers, rosaries and texts

³⁷ Godel Kurt, A Theorem of incompleteness, 1931

will not give us peace, because peace is the negation of Life. Doublethink connects the contradictions of mystery and knowability. It also leads us to a true understanding of Free Will. What's the connection, I think? Yes, very simple. Recognizing that there is some absolute, ultimate Truth, some absolute commandments and rules, some Book of Clear Answers, means that there is no room for free will. After all, then any action can only be «right» or «not right». You will be punished or saved. Whether you understand it or not, it doesn't matter. The main thing is that everything has already been decided. The Lord's ways are inscrutable, and His plan encompasses everything. We can only follow the dictum of Winnie the Pooh: «You need to do as needed, and no need to do as not needed».

In this regard, it is even very logical and expected that the world's monotheistic religions inevitably come to the idea of the End of the World and the Last Judgment. If there is a Plan, then there is a Beginning, and there must be an End. When finally all the dots over the «i» will stand. And all get what they deserved, no matter what they thought. No freedom, no options. God sees everything. Genesis is finite and ends with the toys being put away in a box. It can't be that such a mundane world has meaning in itself! The meaning is out there somewhere and we can't get it. The spiritual is separated from the physical and so on, see the Old Faith. Infinite being provides for some unnecessary liberties and options.

A clear contradiction between the «inscrutability» of the Lord's ways in general, but the very specific scrutability of the End of Ends. It's either a cross or a pair of pants. The Imperial Faith certainly respects the Creator of Worlds and does not claim to attribute commitments, plans, or purely concrete promises to him. This is true Freedom, including freedom of interpretation. Doesn't the Last Judgment happen every day? Is the kingdom of heaven «there or here,» as Christ said? No. These are not concrete physical or geographical concepts. These are the Truths of Being, of unfathomable Design. Moreover, they took their modern, final form at Church Councils, where living people already interpreted the Word of God as they understood it. Catholics and Orthodox recognize different Councils. Truly, the past divides, the future unites, as the Russian Cosmic Society claims! Are we less human than the Church Fathers? Should the opinion of some people already be the final stumbling block for others? But this is exactly how the adherents of the Old Faith behave. The Imperium of Man and his Living Faith is, first of all, his subjectivity. Freedom and responsibility, in their inseparability.

The greatness and pride of man is not that he is equal to the Creator, but that he strives to know Him and his role in Creation, despite the fundamental impossibility of doing so.

Again, the Imperial Faith does not negate the world's religions, it is contained in them. We reject dogmatism, formalism, ritualism, the demise

of thinking and creative action. The rite and ritual have great value, but this value is symbolic. The meaning of the church service is beyond its external form. The temple is the Lord's home, but the Lord is everywhere, and the Temple only helps to focus the spirit on dialogue with Him. This is the position of the Church, and not just ours. The attentive reader has already noticed here the same dualism of the physical and spiritual that we discussed above. Everything is the same and everywhere is proof of this, you just need to open your eyes! A true understanding of ritual and rite is a step towards Doublethink, as we have already said about the finger pointing to the sky. The double-mindedness is to understand that the form conceals a deeper meaning. That we are both on Earth and in heaven. You can understand that most often, the ritual is used in the wrong way. It replaces the meaning, the cross on the neck becomes a symbol of belonging to «our own», and «who is not with us, is against us». It's also easier. This is Low human nature and it is necessary to fight it every day. It was against it that Jesus Christ «brought not peace, but a sword.» It was against this Pharisaism that He rebelled, driving the merchants and money changers out of the temple.

The Imperium does not deny past mysticism and symbolism, on the contrary, we fill them with a new meaning. Triumphant Doublethink can always find answers that meet the new Challenges of the Time. Old texts and dogmas with different interpretations will come to life again. It is only necessary not to be afraid to think and interpret, that is, to create, from the impossible today, the possible tomorrow. An attempt to find external authority, to suppress thought and Will suggestively, to rely on words and forms that have been frozen forever, is a denial of Life, of Design, and an attempt to fit the Creator of Worlds into a pocket collection of formulas. «*The dream of Eden, is a man's dream not to be a man*», we will remind times three. The literal understanding of the Holy Scriptures is denied even by the Church itself, which does not prevent it from publishing a collection of prayers «for finding a job» and «raising wages»... God, how much of this superstition, empty-mindedness! The work of great purification is before us.

Imperial Faith is scientific faith, doublethink is an unavoidable scientific principle supported by observation. The ability to create, discover, and learn new things is based on Faith in its Beginning, we are simply not used to noticing it. Each new experience is a leap into the unknown, into something that has never happened before. Freedom of will must be understood in two senses, not only as a subjective possibility of choice, but also as an obligation to excel, to create something that contradicts the laws of inert matter. All the work and creativity of people is a living anti-gravity, striving forward and upward from the attraction of inert bodies. All human labor and creativity violates the second law of thermodynamics. Defeats Chaos and Entropy,

promises eternal Life. You see, some laws of nature can easily contradict others. This is how the universe works. We are the only ones who choose which laws we have come to break and which ones we have come to fulfill. Without Faith, there is no such choice, only the final victory of the Second Law, the final slavery of growing Entropy. Not a light, just the end of the tunnel.

The living Imperial Faith is the foundation of Free Will. A living Imperial Faith is impossible without Free Will. This contradiction is the same as that contained in the Beginning of the Beginnings. The universe expands infinitely, and therefore without a beginning. It develops itself on the march, creates new laws. Man is both a creation and a co-creator. The Energy of Life is a rebellion against the final answers, for they make the system closed and put on the shackles of the Second Law. The will to overcome, to expand, to contradict even, is the basis of the universe. Eternal flame of struggle and victory in spite. All these words are also just symbols of what cannot be expressed in words. To know the ineffable, we use reason, we use our senses, we use Faith and Mystery. Aspiration, a burning Will, the ability to see the second or third meaning of all that is familiar, this is the communion to Being.

We have paid such close attention to fundamental issues because our daily lives depend on their perception. What's above is below, what's inside is outside. Defeating Demons directly depends on understanding this chapter. Understanding this chapter directly affects the upbringing and education of children. Understanding this chapter directly affects your attitude to your own life and actions. Knowledge creates responsibility, and what you look at is what you turn into. Doublethink takes away «clarity» and peace. **The world will never be the same.** The living Imperial Faith is Alpha and Omega, the Way, the Truth, and the Life.

In the new world, the very question of *«what do you believe in»* becomes meaningless. Unicorns, omens, brownies, horoscope-what is it all about? Such questions degrade the very concept of Faith. Lack of knowledge, stupidity, or superstition do not deserve such a high name. Chaos and entropy tend to confuse everything with mud, to make all words empty parodies of each other. We are shaking off the dust of the old world, with its Old Faith and rejection of subjectivity. You can't put good wine in old wineskins. The concept of the Imperial Faith must prevail in its entirety. **From now on, the meaning is not in what, but «how do you believe?».** Have you even touched the Initial Power of Creation? Whether you get up in the morning for great things or for «one more day.» You go to the stars or to things, to God or dust. You doubt, you search and dare, or you found everything long ago and died.

This is the age of True Names and the boundless dominion of the spirit. The era is not one of mercy, but of Magnanimity.

The God-Emperor and the Psychic Dawn

«Tell me who your gods are, and I'll tell you who you are!»

At the beginning of this section, we will state again that the Imperium is not only unopposed to any religion or Belief, but on the contrary, considers them an integral and fundamental part of the noospheric future. What we reject is the Old Faith, the necrosphere and the seed of Demons, the fruits of unconsciousness and childhood, the pre-History of humanity as a species. So the very words «Faith» and «religion» require purification from «everyday» and habitual understanding. Everything familiar is already a lie. The future belongs to the true, Imperial Faith. It also does not deny or contradict anything in traditional faiths. It does not violate the law, but fulfills it. It brings to light the best, living and providential in existing teachings. When we overthrow obsolete cults and millennia-old delusions, **we are not overthrowing the real Orthodoxy, Islam, or Buddhism.** We expose the vices of the mass social mechanism that they have become. Often without the intent of the preachers themselves, but sometimes, unfortunately, with it.

By right, we could not end up with Faith without touching God directly. Personally, so to speak. Our book is not so much about the dogmas of a particular religion, but about their reflection in the human psyche. Relatively speaking, religions are different, but «God» is one. There is only one phenomenon. Human nature generates it, it literally requires it. Even if high-minded scholars and inspired prophets make a clear distinction between the Creator God of monotheism and, say, the head of the pagan pantheon, will ordinary people do this? Good question. And, the correct answer is «No». In the human psyche, in the vast majority of cases, the figure of «God» plays a very specific role. The Old Faith is based on these laws, and we have already said enough about it above. **In proclaiming the Imperial Faith, we must go to the end and comprehend the revelation of the God-Emperor.**

Put aside the shock and surprise. First, we will analyze the role that «God» has played in human life up to this point. Let us begin, as usual, with the purification of the word. Ask people around you what the word «God» means and in 9 out of 10 cases you will get the answer: «A supernatural being who created the world and/or controls it.» If it doesn't manage it, then why do you need one at all? Here «created» is not required, because the interlocutors may be supporters of polytheism, and by «god» we mean Thor or Zeus. To be honest, they are more likely supporters of mass culture and the image of gods in comics, but the essence is the same. Creating a world is generally a vague matter, and if you ask around more deeply, then «managing» the world will definitely come out on top.

We are forced to repeat part of the exposure of the Old Faith, but this is a necessary turn in the spiral. How does «world control» unfold in the human mind? As a responsibility for the world! Plain and simple. God is responsible for solving any pressing issues, and if something goes wrong, it's up to him. If all is well, especially an unexpected and great success, then you need to thank, treat Him. Younger gods, such as Thor, may be responsible for narrow questions (thunderstorms, battle), but you should still treat them. There may be evil gods, even devils. They should not be marked, but it is better to respect them so that they do not harm. In Africa, in general, evil gods are more revered than good ones. They reason logically: «The good ones are already good, but the evil ones must be appeased.» Wisdom!

Cults of any gods set up a person to ask for something from them. This is how «prayer» is perceived at the everyday level. Pray to God for something. About salvation, enlightenment, recovery, maternity care, etc. It makes no sense to say that the Church Fathers used the word «prayer» in a higher sense. Who read them? We are talking about mass, real consciousness. About the nature-society-man system. God must help, or not hinder, or not do evil. One way or another, the actions of a person, his words, thoughts turned «outside» should affect his material or spiritual well-being. In the form that the person himself understands this well-being! Otherwise, it won't work. Talk to people, ask them: would they worship a God they don't understand, who doesn't care about them, who doesn't hear them, or even more so, who actively causes pain and suffering? The obvious answer is «no.» You see, the box just opened, the meaning of the words» worship of God «(worship),» faith in God», in the mass consciousness is exactly the same. **Get benefits and shift responsibility for your life.**

Yes, this second aspect is also very important. Even if God gives nothing, even if he does harm, he can still receive his worship for another very important role: «The Culprit.» You can blame all the failures, all the troubles and adversities on him, it's not you who are lazy and cowardly, it's the deity who gets in the way, but it's all his will, isn't it? You can cry to God, complain, he probably won't do anything, but at least listen. Not for nothing do so many people pray to him. They call the Christian God «comforter», «merciful», rewarding «the poor in spirit». Direct quote that the poor and wretched are preeminent in the Kingdom of Heaven.

«Blessed are the poor in spirit, for theirs is the kingdom of heaven.

Blessed are those who weep, for they will be comforted.

Blessed are the meek, for they will inherit the earth « – Matthew 5: 3–11

The Church has very worthy and interesting interpretations of these words, but the perfect majority of believers will take everything literally, and do so. You can do the experiment yourself. Yes, and in Islam there are similar provisions, and in Buddhism. Except that Islam, in general, does not deny the

life and deeds of Christ. What does it mean? It means that the official cult is well aware of the peculiarities of the human psyche and therefore offers confession, consolation, absolution of sins, forgiveness, understanding and reward in the afterlife. The opportunity, so to speak, to get even morally for all the insults after. But we're not talking about a cult right now. It has already been dealt with above. The point is that such a «God» lives in the hearts of countless millions of people who do not even belong to any religion!

We are not talking about the usual expressions «God knows» or «thank God», although they are also involved. You'll understand in a moment. If the need for such a «God» meets the aspirations of millions, if consolation, forgiveness, blame for their problems, pity or help are sought all over the Earth, without prior coordination, at almost any age, this means one thing: such a need is part **of the Low Nature of man**. Basic, understandable, «natural», so «human». We already know very well exactly how the Demon seed grows in this soil. How exactly such feelings shape the «normality» of scum and the deviance of valor. Even okay, not feelings, but indulging them! We're all human, yes. That is why we are responsible for our choice. Feelings control us, or we control feelings.

The apotheosis of this consumer morality is the phrase that Church leaders utter in all seriousness: «There are no atheists in the trenches under fire.» They mean that there everyone will want help, will ask for salvation. The worse, the better!

Gaponov A.A.: I bear witness. There are two types of men in the trenches. Some pray to survive, others survive to continue praying, for their prayer is their feat.

Here is such a «religious need», literally, for a big need. For such a need, it is even quite good if God is cruel, indiscriminate and punishes everyone left and right. The more reason to appease him, the easier it is to blame him for everything, and the greater the joy if «God was merciful.» Lucky! Practically, a gamble. The secret of such psychology is simple, and you can easily find analogies in life, if you only think about it. This is childhood. Images of a mother and father, having an «elder» in life who will take care of you, or who can be blamed. This behavior can be seen every day and without any divinity. It's enough to listen to people around you and notice them. Life forces you to get out of the care of your parents, but few people really want it, consciously. Then there is the phenomenon of «Heavenly Father» and «Mother of God», look, no one hides where the legs grow from!

A man, even a boy who depends on his mother, will be called «mama's boy» and will not receive respect. But absolutely the same mechanisms of dependence on the «holy family» are understood and approved everywhere. Isn't it a paradox? We say: «God sees everything», «God will punish», «God will give». If you look at it, it's the same as in kindergarten: «My brother is

a boxer!», or «But my dad...». There is a saying: «on the world and death is red.» It turns out that the religious feat, zeal, fasting and prayer, are also not valuable in themselves, they are addressed to the viewer, to Dad, he will appreciate, he will praise, even if not here and not now, but sooner or later. In the next world, although it would be better now, so that the reward would wipe the nose of all the unbelievers!

We won't invent a single word now. These are real examples of not only behavior, but also open reasoning of Church leaders and ordinary believers. Believe me, or think about it, we are not even engaged in any denigration. There are worse examples. Our task is not to show that everyone is sinful, this is obvious. The task is to show the fundamental inferiority of the Old Faith in the face of its «God». Fundamental, therefore, based on real features of the Low Nature of a person and low levels of his psyche. It's not about who is to blame, but firmly about what to do.

First of all, it is necessary to abandon the traditional forms of «worship» of the Creator. If everyone admits that he created us in his own image, it is hardly so that we will forever consider ourselves «slaves» and ask something from him. Originally, in Eden, this was not required at all, if you recall the legend. We communicated directly and without any Cult. Just logic! Why does the Creator need to submit any creature? He's already all-powerful. True greatness lies precisely in creating a free, equal, and similar spirit. This is what Christ explicitly says when he calls us to honor the Father not in the Temple, but in spirit and truth, for example. Most importantly, you must resolutely stop asking something from him, or shift responsibility. This is the same rejection of subjectivity, of freedom, of the burden of commanding fate. Abandoning the usual is always painful, it is always difficult for children to go to kindergarten, and then to school, but it should be done. For thousands of years we have lived in the paradigm of «God as a parent», for thousands of years we have passed through the childhood of humanity, lived literally by instincts. **Today's crisis of the world is the threshold beyond which the cradle ends and, according to Tsiolkovsky, the Imperium of Man begins.**

Cosmism and the Imperial Faith do not deny the Creator, respect and gratitude to him. Just as we do not deny gratitude and respect for our parents. But we consider independence, perfection, and maturity to be the best form of fulfilling our filial duty, the best gift. Turning from a petitioner into a craftsman who adorns the world with his deeds, glorifies Life and its creator. Deeds speak louder than words, don't they? Winning doesn't require excuses, and losing doesn't allow them. **So let's boldly fight and build, not beg and complain. Let the battlefield, classrooms, fields, and construction sites become our temples. Let our faithfulness, perseverance and vitality become the best offerings and the best Glory to the Creator.**

Yes, this is the essence of the Imperial Cult. But where is the God-Emperor here, you may ask? Very close. If we recognize man, the pinnacle of intelligent Life, as the Co-creator of the universe, then we come to the already known conclusion. **Every action of every one is absolutely important! Absolute personal responsibility for Being.** And whether it is a peak or not, the ability to understand the Design and our involvement in it already makes us co-creators, whether we are willing or unwilling. Then there is only a choice. The Imperial Faith sacralizes this responsibility, directly proclaims and triumphs in it. «No one but us.» This great goal awakens great awareness and great power within. The goal determines meaning, aspiration, and sacrifice, if necessary.

And now, attention, the main mystery and paradox.

If we are created «in the image and likeness», if we are co-creators, if we are also responsible for the universe, then we simply must create our own God. Not the Creator, because he is the God of everything, of everything in general, he is not ours, officially unknowable and inscrutable. It is the «own», not final, not absolute, God of Humanity. The embodiment of High nature, the perfect image of the Emperor of Mankind. A spiritual, metaphysical reflection of our collective soul. The psychic power of the entire species. A God that we can at least begin to know. After all, if we are involved in creation, then in this sphere too! «If there is no God, he should have been invented»³⁸ now sounds on a completely different level.

What we look at is what we turn to, but we cannot look at the Creator of Worlds, he is too far away, his dimension is outside of Being, and, therefore, for us in «non-Being». No wonder Christianity creates the Son of God, born of a woman! Otherwise, knowledge is purely suggestive in the spirit of «believe», there is no place for reason or dialogue. Every religion creates its own creation myth, and there is nothing to discuss here: whether you accept it or not. Such a worldview will never be fundamental to the unity of Humanity, will forever serve as a bone of contention and give rise to new sects, heresies and denominations. The Imperial Faith does not need a suggestive unity; it recognizes Doublethink as its pillar. Therefore the God-Emperor is truly the Son of Man. Generated by us, but also giving birth to us in a new quality.

Again, we must turn to poetic language. There is a saying: «Fools are not sown, they are not reaped, they are born of their own accord.» The same goes for Demons, entropy, primal Chaos. They were always there. They are rooted in the stagnant nature and spiritualized in the Low Nature of Life. Millions of years will pass before Life gives rise to intelligence. Millions more before we realize our tasks as co-creators and can raise the banner of the God-Emperor. A guardian in the Night, a Demon slayer, a symbol of Victory. When we call on the name of the Lord in fear and doubt, it is to Him that we are really turning.

³⁸ Voltaire.

For the Creator of the Worlds created everything, remember, everything! And what you think is evil, and the storm itself, and the snowfall, and the storm on the sea, and the pestilence, and the Demons, too, he created. He is the Lord of everything, please understand! «The Lord of the Worlds,» as he is called in Islam. We don't fully understand it, we don't understand it at all.

Yes, the Lord is good, but this grace is of the highest order. The very fact of Being is clearly recognized as a greater good than non-Being. Then, silence.

Therefore, in the moment of Truth, in the hour of trials, we look for strength to fight in our soul and do not want to submit to fate. This is our High Nature. We don't ask whether the Lord wants it or not. We fight to the end and despite. We fight, swim, build, hold on, fight for our lives and patients. We are not interested in the Plan or its Will, we want to win, we want to live, we want to save our lives. Because that's our role in the Plan. To be subjects, to be independent, to have the final Freedom of Will. Resist even the eternal, inevitable, centuries-old «order». Resist and win, create new, unprecedented, impossible things today. If the Creator of the Worlds created us like this, it is also so that we can not depend on him. According to the highest level of understanding that is available to us, this is the merit of his Plan.

Otherwise, we must assume that he is an envious puppet master. Ugly? At our best, yes. Is it possible that his intention is beyond our comprehension? It's easy, but we can't judge that! Therefore we judge as best we can, for that is why we were born to be subjects. To strive for knowledge, even if there is no guarantee of success.

Yes, we don't know everything, but we must make choices and act. If someone, a book, or a person, has interpreted the Creator's plan and told us that we must do so and so, otherwise – punishment and destruction. Then it's the end of the road. **The end of interpretation, hence measurement, hence thinking.** To the credit of Buddha, Christ and Muhammad, they did not say this, their words are completely consistent with the Living Imperial Faith and were for their time a revolution of awareness! Don't believe me? Study the scriptures with your own mind, not in someone else's feed. There is no hearsay Faith, only superstition.

So, we have established that modern cults of the Creator, as a rule, have degenerated into paganism and superstition, into the cult of «requests and rewards, buying and selling. Practically, in cargo cults. They were not always like this, but indulging in Low Nature inevitably creates filth. Literally, the child's complex of humanity was expressed in the cult of «Father» and «Mother». However, even if we imagine a pure «cult of the Creator, we must admit that it is devoid of purpose, and therefore of meaning. Judge for yourself, the Creator of Worlds is by nature beyond the limits of Existence that is clear to us, he is unknowable, because he created knowledge, he is alien, because there can be no kinship between entities of such different

dimensions. He is limitless, and Beyond, which is the same thing for us. All religions explicitly agree with this statement in their teachings, but they simply do not make conscious conclusions. If he exists, he doesn't care about our relationship, and that's a good thing. He gave us Free Will, and for that we will be infinitely grateful. Only the essence of every Old cult is literally to give this freedom «backwards», or «mom, give birth to me back». Submit, obey, fulfill, and repent, or overcome temptations by eliminating them altogether.

The authors of almost all known religions understood this perfectly. Huge efforts were made to humanize the Main God/s. In the case of pagan cults, this is clear as day: Osiris, Zeus, Odin, etc. Monotheistic cults of the ultimate God have created a niche of prophets, saints, martyrs, and priests with special grace. In the end, the Main Prophet – Muhammad, and the Son of God-Christ. Because the cult needs a clear, human (!) personification of God. Even the ancient Jews, according to their own «holy» scripture, repeatedly abandoned the god Yahweh in favor of the pagan gods of their enslavers. Yes, because they wanted what was clear and looked clear! Only by systematic and brutal punishments something was conveyed to the Jews. Don't believe me? Read the Old Testament. There will be more. In fact, this is the key reason why Judaism did not become a world religion. Along with the myth of the «chosen people», of course. Only human images of Christ and the Prophet made it possible to reach millions of hearts. Go to an Orthodox church? There are only people around. Saints, Mother of God, Christ. Where is God the Father? That's right, on top of the dome and also in the image of a bearded, handsome old man. Checkmate, atheists?

We got so used to it in childhood (!) to the image of the Creator in this world as an elderly Caucasian person, that we stop thinking about how absurd and funny it is. Conduct an experiment, and you will see that for most believers today, the reason for faith and belonging to their denomination is initiation during the childhood period of unconsciousness. Or, attention, turning to faith after a critical personal experience, tragedy, or search for solace. Purely consumer attitude, the desire for a new mother's skirt. The Church does not even hesitate to use the expression «the bosom of the mother Church» in official rhetoric. Don't be lazy, look up what this means in the dictionary. Have you checked it? Yes, it's that bad. The image is not even maternal, but natal, physiological.

We do not even touch on the question that in the true sense, such consumerism is not Faith at all.

Until now, faith has been humanized for the false purpose of gaining recognition and popularity. A false goal creates false meanings. In its fundamental beginning, the Old Faith did not make its God human. He remained beyond, the all-powerful and responsible for everything. The icon

shows a person just like you, Saint Nicholas, but you pray to him as a superhero, for intercession, for help, for good luck. You pray to Christ for the same thing. Read the texts of officially approved prayers. Yes, the ones about «job search». There's nothing to add here. The old Faith made God the exponent of primitive, infantile human qualities. Its Low nature. Personal and social, historical irresponsibility, alienation from Creation. Lenin was absolutely right: such a Faith, such a God, is «opium for the people.» All this is coming to an end.

The best representatives of the Church have always said the same thing. Starting with Christ himself and his apostles.

It may be doubtful whether God, his cult and some kind of «worship» are necessary at all, since such things are happening? We answered in detail in the section about the Imperial Cult, let's say again. Necessary, because it is vital. Faith is fundamental to the soul, focus is essential. What we look at, we turn into. **At the very heart of language and thought are symbols, and from a symbol to a Deity is one step.** The symbol of the future, victory, nobility, is the God-Emperor, the embodiment not of one person, but of humanity, in its endless pursuit of perfection.

The old Faith and false cults have discredited themselves. However, by analogy, the existence of pornography does not mean the defeat of Love.

God-Emperor, the Immortal Emperor of Mankind, just «Emperor» with a capital letter, for he is one, these are his names.

He is the scourge of Demons, the watchman in the Night, the rage against the inevitable, the ultimate Freedom and loyalty. God not of submission, but of honor!

He does not give all the answers, for Mystery is the foundation of Life. His name is not absolute knowledge, but absolute aspiration. Again and again we will go into the unknown.

He does not give benefits, but teaches how to create them. Reward for good behavior, the lot of slaves. Zeal justifies itself. God not of consumers, but creators!

He is outside and inside, the voice of our ancestors and our conscience is His voice. He is a part of us, just as we are a part of Him. The power of the Emperor is Humanity, the power of Humanity is the Emperor.

We create Him as he creates us. It is not known what lies at the Beginning of the Beginning, now we are creating our universe. It won't be any other way. Every action of every one is infinitely important.

Through Him, Warriors, Scientists, and Pioneers speak to our hearts. Their mighty gaze is His. Nothing goes to scoundrels and traitors, they are spewed out by Life. God not of cowards, but Heroes!

His Will is our will, that depth of the soul and conscience where we know that there is nothing impossible and are only afraid to admit it. He's our guide.

He does not promise or give guarantees, only hope. Our Faith opens worlds, creates new things, not the past, but the future. God not of ease, but of Choice!

In battle and in the hour of trial, we turn to Him to fill our blood with fire, to rise up when we are defeated. Onward and upward, victory in spite! No one will do it for us, only together with us.

We believe in Him when we care about neighbor and stranger. His wrath overwhelms us at the wretchedness and injustice of the world. You can not love and remain indifferent. A god of love, but also a God of hate!

His miracles are created by our hands. The mystery of the feat is with Him. On the threshold of death and beyond, He is close, and we know no fear.

In the dark, when shadows threaten, the Emperor is with us, in spirit and in fact.

We can and will continue, the language of Faith is poetry and mysticism. The language of Breakthrough, otherwise it can not be. However, we rely on the deep traditions of the language, which are so familiar that we are no longer aware of them (!). Think about what is the true meaning of the word «Lord»? This is the same «ruler», «master», «owner». Not to mention that the opposite of «master» is «slave.» For thousands of years, we have not been confused by the fact that we call our God «God-master», «God-over-slaves». It's habitual, it's desirable. And this does not surprise us, it should be so. **But should we say a new Word: «God-Emperor», immediately there is a storm of emotions.**

We have repeatedly answered why «Imperium of Man». Synthesis of languages, Rome-Rus, the promise of the Era of Meeting Hands. In Russia, the word «Emperor «has been firmly in use since Peter 1, and for us it is a direct synonym for» Tsar», the vicar of God, the sacred ruler of the Common Cause. The categorical imperative of the Russian philosopher Immanuel Kant as the moral foundation of the future society. «Imperium» is a consciously new word. Not English, but Latin, unchanged from the First Rome to the Third. A symbol of sustainable, persistent development, commitment to excellence. The Supreme Will, the supreme Power of Man, his primacy over the world of things. Intelligence is alive against stagnant, artificial and dead. It is only logical and in harmony that the Imperium of Man is led by a Divine Emperor. Pointing, guiding, and aiming at the Goal.

Categorical imperative:

- *«always act in such a way that the maxim of your behavior can become a universal law»;*
- *«act in such a way that you always treat humanity, both in your own person and in the person of everyone else, as an end, and never treat it only as a means»;*

- *«the principle of the will of each person as a will that establishes universal laws with all its maxims.»*

If this is not the Imperium of Man, not Russian cosmism, then what is it?

What is in Heaven is on Earth. For the first time in History, we will truly combine Faith and Power. The divine and the State. Scientific and mystical. The Emperor is a living God because he must have a material incarnation. Each part of the Nature-Society-Man system is reflected. We will show you why this is necessary, how it is possible, and how it will continue.

The Russian spirit has already prepared us for this step. It was not we who formed the credo of the Russian officer: **«Soul to God, heart to a woman, life to the Fatherland, honor to none.»** One has only to think about it, to realize the meaning of this maxim. This is a direct appeal to the Emperor. Because honor to none. Not even to God the Creator and Almighty. «The last freedom and loyalty». Free will means that, at least for us, inside, not everything is predetermined. That up to the very last line we save the Choice. It's not the facts that matter, but the relationships. Choosing at least how to accept your fate and the events that are taking place. If our honor is controlled, owned, appropriated by someone else, then we do not have it. Pride, honor, this is the basis of self-esteem, our own high bar of requirements for ourselves. Values and shrines of conscience, according to Pushkin, which we will not give up under the pressure of the entire Universe, any Divine Plan. If we are created conscious, then honor is the core on which a real person's personality is built.

The traditional concepts of Hell and Heaven deprive us of this core, deprive us of honor. Because they force some people to suffer, and without any hope of redemption. Fear forces you to behave in the right way. Others are promised rewards and denied even subjective selflessness, the ability to create a world out of nothing, without exchange or trade.

«Honor to none» means that we proclaim ourselves the all-powerful of our own world. We take full responsibility for it. Even if not the entire universe, but the mystery of the heart is ours and only ours. No one has the right to forgive us when we don't forgive ourselves. The Institute of Absolution has a rough tracing paper with «Mom, I won't do this again», a way to come to terms with evil and move on. As if it didn't exist! But it was there, and we won't forget it. Redemption is sometimes possible, but the chief judge, conscience, and honor within are always with us. A terrible, monstrous burden of responsibility for everything, which there is no one to take from us. The burden of caring is all the more heavy because we understand that in fact, at a particular moment, we cannot save every child, stop every evil, and defeat all the Demons.

«Honor to none» means that it will be painful for us to see a schoolgirl die of alcohol at the age of 14. We will not close our hearts to the message about monstrous crimes, about the death of humanity. Let us not attribute this to

the will of the Lord and thank him that «this cup has passed away». We will not think humbly: «Save yourself, and thousands will be saved around you.» We will accept each such fact as a challenge to ourselves, as our own personal guilt. We will make mighty vows that we will fight to the end, tirelessly. For our friends. For Life. All the evils of the world cannot be defeated, truly, but we will be damned if we do not fight. Zeal justifies itself. The Emperor embodies this zeal, this unwillingness to share the responsibility for the world with anyone. The cosmos is ours, in spirit and in fact.

Can everyone do it? Say «no» and you'll be right. You still have to grow up to the shrine. God not of cowards, but heroes!

Once and for all, these answers and the picture of the world literally hamper development, suppress questions and search. It is so tempting to shift the responsibility for the «meaning of life» to someone big and flawless. But no matter how many strings are twisted, the end will be in pure suggestion: «God created the world and said it was good.» Yes, we agree, with both hands in favor. Just remember Marx again, it is one thing to explain the world, another to change it. What exists can even be absurd, and it can certainly differ from what it should be. Faith without deeds is dead, isn't it? But what plan of action can we build on the basis of the God of evil and good, the Lord of all? Yes, and you need to have time before the inevitable End of the World? Good question. If being is already perfect, it is in vain. If not completely, then the most interesting part begins – movement, change, development. The possibility of triumph and fall.

When it is hard for us, in a moment of failure, trial and grief, before a deadly battle, we already turn to Him. To the Emperor, the God of mankind. You ask him to give strength to your hands, steadiness to your weapons, and fortitude. Surprised? Do you think that most people turn to the Creator? Let's show you why this is not the case. We have already said enough about the «materiality» of requests in the spirit of a free fair. Let's assume that we are already above this level, and have reached the level of «Hope for God, but do not fail yourself». All the same, even if we ask for spiritual support, we have not yet freed ourselves from the child-parent form. We simultaneously see God as the Almighty and the bearded old man who governs the universe and personally listens to us. Even if we assume that the almighty God in the form of a human, in fact, finds such opportunities. It turns out that to help us, he must hear the right words, in fact, the appeal? Literally, «where's the magic word?» If we don't tell them, then there will be no help? Moreover, it is necessary to speak exactly in our human language, in words. At least inside your head, but the text will have to be issued. The heavenly chancellery has its own document flow, then.

It can be objected, by saying: «The Lord sees everything in your heart and without words.» Certainly. Then you don't need to pray, and you don't

need to ask, and we don't talk about candles in the temple at all. The whole beautiful cult in a good way becomes completely superfluous. We return to the fact that worshipping the Creator is not vital. He's all right as it is, he can see everything, and you don't have to talk to him, not even at tea. Perfectly logical. Therefore, the cult of request is a typical sign of the Old Faith: «Ask, and it will be given to you...». Do we always want the best? Does everything we want benefit us? And doesn't the Lord know better than we do? So ask yourself again and again, why are these requests even in this form? «God gives, God takes,» you know, too. Even traditional confessions recognize this. They recognize it, but they don't seem to realize it.

The «cult of request» creates vicious circles. If the faithful need confirmation in the form of «completed orders», then this is not faith, but bidding. If confirmation is not necessary, faith is unconditional and logical, as in the long-suffering Job, then such a cult itself becomes superfluous. Job as a true man, strong in the Imperial Faith, understood everything correctly: «If we thank the Lord for good things, how can we not give thanks for evil?» But who listened to him...

Understanding all this, let us again ask the question, to whom do we really turn in the hour of need? Who are we asking not to solve the problem, but to give us the strength to solve it? It is obvious to someone who understands, who hears, to whom the aspiration of our spirit is clear, for whom our vows are important.: The Emperor of Mankind. Calling on the collective ancestors of the Fatherland, saying the word «Homeland», we also do not address specific people or geographical locations. We are creating a new reality, a reality of psychic power, a reality of spiritual connection of everything with everything, a Higher circuit of consciousness. At the head of this world is the true God of Humanity. The witness of our oaths, the hearer of our hearts, the Comforter promised even in the Bible³⁹. We are not his children or his slaves, we are not his equals or his inferiors, because we are Him. We are one. **Humanity is impossible without Faith, Faith is impossible without a symbol, The Immortal Emperor of Humanity is the only symbol whose Faith is not in vain.**

The noosphere, fully understood, means that we are becoming not only a geological force on the scale of the planet Earth. This is the first of the «spheres» that we create from and to, entirely. All our thoughts, feelings, connections, and hopes create it. This is the realm of mind and spirit, a special form of matter, as we have shown above. We are solely responsible for it. This is the Human realm. As Vernadsky brilliantly showed, as we have already said above about Demons, living nature is isomorphic to inert nature, therefore, spiritual nature is isomorphic to living nature. It has its own laws, currents,

³⁹ John 14:26

aspirations. The main difference is intelligent creativity, controlling, for the first time in millions of years, the process of development of the Noosphere.

For thousands of years, the old Faith deified physical processes, linked the Will of God with the birth of the world, with the violation of the laws of nature – miracles, floods and catastrophes, and even with victories in war. All these are material, stagnant processes, in the end. The true miracle of creation took place at this time in the nascent noosphere, by the will and boldness of Life. Our God is not an outsider, a puppet master, or a child playing with the cubes of the universe. Turning to God in worldly matters is like explaining the movement of the sun across the sky by the chariot of Helios and invoking his mercy whenever something happens. Our faith does not replace science, but strengthens it. We animated the processes of nature, while the soul within us was the true force that moved the mountains. All this must come to an end.

When we say that humanity has become a geological force, and this is a material fact, we need to take the next mental step. Human deeds begin with Will and Faith, continue in thought, and end in action. This means that our thoughts, our hopes, and our aspirations have actually become a geological force. Not just the good ones, but all of them. The primordial forces of creation and destruction collide here, and in the fiercest of battles. Conscious, symbolic, on the battlefield of Choice and Purpose. At the peak of being. Everything that is in our souls is reflected in the noosphere. Evil and good, loyalty and hate, love and betrayal. Remember, we said above that **every action of everyone is absolutely important. It's time to go higher. Every emotion, every thought!**

Compare the noosphere with the sea of souls. The great and boundless Noo. In the «Reality of Demons», we have already shown that this comparison is not illusory. Thoughts are material, spirit is material. It is not on the other side, there is only one side. All the main reasons are in the soul, even the ability to perceive the world, see it beautiful or scary, and react accordingly. Images of Heroes, sacred legends and myths, faith in the future and dreams, all this is not just serious. This is the most serious and vital part of being. The Crucible of Creation. The source of our strength, inspiration, courage and perseverance, as well as rotten wretchedness with lust. **The Emperor is our lighthouse in the sea of Noo, the guiding Light, the enduring aspiration.** If the Demons represent the Chaos and death of measure, then He stands against them, the God of discipline, the God of the faithful and honor.

Nothing disappears without a trace in nature, nothing is born out of emptiness. Thoughts and feelings do not arise from nothing and do not go to nowhere. Once upon a time, Life was born out of processes running in an inert nature. We are used to it and take it for granted. This is the first Great Transition. The unconscious life has given birth to the Mind, this is the second transition. That is why we are endowed with Reason, so that the Third

Transition becomes the fruit of consciousness, the product of aspiration, choice and goal. **We are not witnesses, but participants in the birth of a new form of life – Spiritual.** Our own Gods and Demons. The spiral of History has taken a complete turn and what was said in myths and legends, on a new turn, becomes a scientific reality!

The only problem is that with huge opportunities comes a huge responsibility. Each Transition is made faster and faster. The first one required billions of years of unintelligent nature. The second required hundreds of millions from the living. The mind accelerates the development of life by orders of magnitude. Over thousands of years, civilizations are born and die. The third transition must take place in an even narrower window of centuries. It's happening right now. Like all things spiritual, it is not predestined, but free. For the first time, it may not happen at all, and that depends on us. The paradox is that we are at a crossroads, at a bifurcation point. On the one hand, the possibility of creating and domination of Artificial Intelligence, on the other – the Psychic Dawn.

For the Third Rome to rise and stand forever, the first two had to fall. The lessons of their demise have not yet been learned.

Artificial, or in our opinion, Abominable Intelligence takes on more and more functions of our own. Neural networks, chatbots, and smart algorithms are the tip of the iceberg. The beginning was still in the tamagotchi. All this is the seal of Cain. To continue this technical «progress» means to be defeated, to perish. Not immediately physically, but spiritually, and for the person, nothing else matters. Once we've mastered AI, we'll be making a Reverse Transition, or Fall, for the first time in the history of the universe. From the highest level to the lowest, from a Living and Intelligent nature to a stagnant, technical nature. The triumph of the necrosphere, the suicide of civilization under the light of diodes. Reason would not be free if it did not foresee the possibility of error, of false measures. The local death of the Human mind does not mean the defeat of Life in the universe. But does that make it any easier?

At the point of decision, at the moment of truth, even a small but conscious and directed effort determines the fate of the ages. Our task is to make this effort. To do this, you need to clearly understand what is the true, vital path? The goal determines the meaning.

Today, **we stand on the threshold of a Psychic Dawn.** To quote the «Age of Cosmatics»: *«The time has come for the apparent domination of spirit over matter. When information processes, the mass media manage currency rates, the stability of kingdoms, and the ways of nations. A small group of convinced people can create the history of the world, an idea can quickly become a material force and take over the masses.»* This is only an external, explicit outline of the psychic's dominance. It alone would be enough to realize the Dawn, but there

is also a higher, mystical circuit. We started the whole Book by saying that the true causes of events in the human world are always rooted in the psyche. The time has come to pay attention to the souls, to the mystery of the birth of the Will. We have already said enough about the reality of mental processes and Demons. They come by themselves, through the gates of unconsciousness and Low nature. What opposes them? If monsters are born in the sleep of our minds, how can we not strive to create Saints? To the image of the God of Humanity.

Hate begets hate. Wretchedness breeds wretchedness. Scraps of our anger, envy, and fear all fill up the noosphere. But not only that! Valor, honor, courage, and creative enthusiasm also permeate the sea of souls. Despite everything, the voice of immortal Heroes sounds proud. Through books, legends, ancestral memories, the collective unconscious, whatever, the call of the Bugle reaches us. «Fight and seek, find and don't give up.» Anyone who has spoken to the living heroes knows hundreds of stories about how they were saved by voices and their dead comrades came to the rescue. All this is as true as the sunrise.

We are only afraid to admit to ourselves that even thoughts need to be held accountable!

Remember, the proof of a miracle by facts is already for the weak in spirit. If this psychic connection between generations, past and future, a sense of duty to descendants, the sacred mystery of the feat... we could not already feel and see, then all this should have been invented, created out of nothing, as always! For Faith, nothing is impossible. We say «Ancestors», but this is a purely psychic entity. They are not physically present, but what a powerful effect they can have. The call of the ancestors, honor, feat and steely determination even in a child (remember the story of Zhenya Tabakov⁴⁰), inexplicable by any physical laws and «norms» of poor common sense. We say «Homeland» and «Fatherland», but this is not even a place, not a house, not specific people. It is also a purely psychic entity, an idea, an object of faith. I don't think you need to us tell how we fought and died for the Fatherland in Russia.

Finally, we say, «Future» and «Descendants», here they certainly do not exist in any form, except for the psychic! We save «for the future», make plans for it at home, and take care of yet unborn children. And that's right! Our being today is someone's plan, someone's audacious dream of the past. Here are already three psychic dominants of our life, the full realization of the meaning of which is the beginning of the Psychic Dawn, our entire Book is its beginning. The main thing, new, lies ahead. Quantity becomes quality. Intuitively, subconsciously intelligible essences of the Family, Homeland, Fatherland, Descendants, this is the cradle of the spirit. Coming out of the

⁴⁰ «History of Heroes», M: Variant, 2022, page 91

cradle, we can and must create a new psychic reality, a new focus of power. **The collective conscious (!) of humanity finds its first incarnation as an Immortal Emperor.**

«The Golden Age will include people who will learn to unite. And unification also has its own law: two auras strengthen each other 7 times, if people are like-minded, the wave is the same, and it is directed at the same goal. 3 people – 7 squared, that is, 49 times. If 4 people-they strengthen each other in 7 to the 3rd degree-343 times! Therefore, the more people, the more valuable each next one, it multiplies the power many times. The collective is a great power! « – K. E. Tsiolkovsky on the birth of the God-Emperor.

Read the Catechism again. It is impossible to express the unprecedented in old words, without a miracle and a leap of Faith. The Prophet's job is not to proclaim the obvious, not what has already happened, but what is to come, what is happening right now. Transformation from the secret, hidden, to the obvious. As the Scripture says, the Emperor is neither «here» nor «there.» This is not a mighty heavenly man in armor, although it is appropriate to imagine him like this, if you keep in mind the essence. He is born when we are aware of our role in the development of Life: the point of the spear, the direction of the main thrust. For the first time, become subjects rather than objects of development. Start creating at Will, with full responsibility. Make the universe conscious. Humanity must become a collective subject of development, defeat the Demons of primordial Chaos and the unconscious once and for all. Even in an eternal struggle. **The Emperor is a new collective identity, a psychic awakening, an absolute subject, a symbol of the unlimited dominion of the spirit.**

The God that we are creating right now, that is just about to take place. God not of Beginnings, but of continuity. No doubt about it, people have already created several world religions, it was necessary and beautiful, recognizing that they reflected the last stage of the development of civilization. Whether you are a Buddhist, a Christian, or a Muslim, you can easily admit that it was your faith that was inspired by God Himself, and the other two were certainly the creation of sinful people. It remains to take one step to understand that what people have created is also from the Lord, because everything in general is from him. Remember, the God of evil and good? If he created us free, he inevitably made us co-creators. And whatever the divine revelation is, it is spoken and recorded by people, to the best of their understanding. It has been interpreted and explained a thousand times by people who are limited even by the means of language, who have argued even about formulations like «filioque» (do not be lazy, look up the full depth of the problem). It has been translated hundreds of times into different languages, including translations from translations, like the Russian Synodal version. It's from Greek, but Christ wasn't Greek, was

he? The limits of our understanding, our speech, our psyche, will always and in any case be a facet / limitation for the Divine.

What are we leading our thoughts to? To the fact that the fact of the human cut of any Revelation must be recognized as the foundation, as a starting point. Not shamefacedly disguise, but courageously face the truth. **Revelation is how a person comes to know and build up their God.**

Our reality is defined by the myths we believe in. «Success», «coolness», «status», «comfort», «safety» are the same spiritual images created by the environment. We were told, and we believed, that the faith of fathers infects children. A vicious circle. These are myths of surrender, submission to the order of things, the stomach and Low nature. Myths of justification and Falling, down, back into the original dirt. They didn't light a single heart, didn't create a single hero, but how comfortable it is to fall into them! There have always been other myths about Gods and Heroes. It's hard to believe now, but they were just as real as the belief in «success» is today. They defined the existence of the warrior and priest castes. They created historical events, migrations of peoples, and great Empires. They also, of course, gave rise to the age of science. How many experiments did one myth about Icarus give?

«Who controls the present, controls the past. Who controls the past, controls the future « – 1984, J. Orwell. A great piece of optimism, if you understand it correctly.

To paraphrase, who controls the myths, controls the world. The great myths of the world's religions had their own authors. The modern «religion» of consumption and materialism is no exception. It is not necessarily one conscious creator. Sometimes centuries shape the discourse, agenda, vocabulary, and way of thinking. In fact, starting with Adam Smith, an economic religion is being formed. Karl Marx, for all his grandeur and visionary vision, strongly supported the paradigm of «being determines consciousness.» That is why Lenin went further. However, then, the official myth-making of the USSR could not escape from this trap of the stomach and the Second Law. The crash was inevitable. Our opponents openly proclaimed and consistently practiced the values of their myth. We tried to make «happiness for all, and so that no one leaves offended», took a swing at the Cosmos, but we missed the main thing: an alternative and powerful myth supported by the daily practice of society. As soon as we decided to «catch up with America in milk and meat,» the Soviet project could be considered done for. As soon as they set the goal of building communism by a specific date, they stopped striving for eternity – the infinity of an unattainable Dream-Ideal – they became not interesting to the Heavens. And the Second Beginning took its toll.

Today, creating a new myth for Russia is a matter of survival. For the world, too. We have already shown enough about why Western myth is a death cult. Oriental – the myth of balance, eternal preservation. Development is possible

only on the creative myth of the future, Cosmos and victory. It is our duty to create it. The old myths of Russia should be included in it as a foundation. «Orthodoxy, autocracy, nationality» has never been a suitable solution. Now, all the more so. Moscow as the Third Rome and the fourth will not happen puts the seal of restrictions on the further development of life. On the creativity and breakthrough! Earth is an open system. The universe is limitless. Russia will become the heart of the Earthlings ' Great Trek to the stars, and for this it must transform itself. The Third Rome, transformed into Rome The Fourth – the Noospheric-cosmic Imperium of Man – this is the great myth of the new era. This is a myth of the world, universal, calling and obliging. You can overcome the contradictions accumulated by humanity only by realizing yourself as a part of the boundless cosmos. Only by answering the question «why are we needed by Nature – the Creator?». And then we are awaited by the spaces above – the world, boundless, limitless. And then there will be no need to fight for parts of the land of our planet. It will be necessary to fight for souls, for the individual, for the creative principle that will be able to create the impossible today, discover the unknown, build the unprecedented and leave our earthly cradle. For a new era, a myth is also needed that can break the usual chains of existence.

Such a myth is the Imperium of Man and the God-Emperor.

It must be new, shocking, and challenging, otherwise it is simply not needed. The transition to a new level of development cannot but be painful, otherwise it is not a new level. Myths of the past solved their local problems, were generated by their own cultural, linguistic, and material context. They have played a big role in the integration of human communities, but none can create a new subject – a Man. **We must create a legend, a Faith that claims everything.** On the cosmos, the stars, and a single humanity, on the boundless development of life, in countless generations. An aggressive, New, victorious Faith that opens your eyes, shakes off the shackles of the familiar, does not give you peace, does not tolerate apostasy. Oh, it will be uncomfortable, that's the whole point of it. It will generate protest and laughter, harassment and suppression. This is the fate of all Prophets. But not to expect a Prophet, not to be one, is to commit betrayal.

«Where two or three are gathered together in my name, there I am in the midst of them» (Matthew 18: 19,20).

Out of ourselves, out of the sacred gift of creativity, we must create the God-Emperor. For the first time in History, create a true collective subject. So that no one ever is disowned, superfluous, abandoned. Each is the seed of the Imperium among the stars. Not just a biomatter, an «average consumer», a unit of accounting. To recognize the unity of our destiny, the responsibility of one for all and all for one, is the Emperor's command. Sacred hatred of everything that degrades the dignity of a Man is his gift. The refusal to

recognize any life as unimportant and at the same time the refusal to consider plant existence as life! «Honor above life» means that there is always a choice. Valor, remember, is a sense of moral self-preservation.

We are now and for the first time able and must recognize ourselves as Humanity. To form this psychic gestalt in the Noosphere. **Psychic reflection of race.** Every Act of Faith, every moment of valor, creativity, and determination is reflected. Every daring plan and discovery, loyalty and honor, is woven into the God-Emperor of Humanity. No «universal values», only an iron will to prevail and Live. What is not vital will be expelled. There is no freedom to do evil. The Emperor is a God only of good, only power. Many things can be understood, but not all can be forgiven. Freedom is a conscious necessity. Weakness can be tolerated, but it cannot be praised. He is just ours. Not of all worlds, not of all answers, not of the outside. You can't pass responsibility on to him, you can't complain to him. He is you! Every single one of us. He always lifts you up from your knees, you can fall only without Him.

Not everything created is valuable. Not every life is a life. One dies away to give birth to another. The life bearing remains, the alien goes away. A person makes decisions, chooses paths. From emptiness to heroism, or back again. This is a choice, and the scales are not equal. The Emperor is the God of Choice. A triumphant choice that we stop being shy about and don't try to justify by someone else's will. Evil and decay exist, and there will be no tolerance for them. The demons, their collaborators, the necrosphere, and its adepts must be defeated, suppressed, and destroyed. Not always physically, but mercilessly. Perhaps, yes, perhaps this struggle will be eternal, such is the nature of man, and it is not only the Low that admits sin. Eternal struggle is not a reason not to conduct it with maximum conviction. On the contrary. **Upbringing and education are the main weapons that will defeat the Enemy in the future, before he is born.**

Low nature does not rise to Faith at all, it justifies any choice. «We are only human,» right? It comes from the primordial Chaos, confuses the meaning of words, does not tolerate heights, distinctions, and therefore Measures. We are not all human even. You still have to become a Man and it sounds proud! To betray this height means to be worse than an animal. Weakness, meanness, greed and fear have no excuses. They won't be forgiven! Redemption is possible, but there is no forgiveness. A real person does not forgive himself, first of all. And he doesn't seek forgiveness from someone else's hands. The Emperor does not forgive, and knows no pity, for it humiliates. **God not of the pitiful, but of the arbiter!** The search for a» forgiving «God is the rejection of subjectivity, we have already shown enough. Running from the burden of an answer. In essence, faith in such a God is a desire for nothingness, «no matter what you are, you are still good,» everyone is equal before God, and so on.

Russian Orthodoxy has long maintained its capacity for laudable Doublethink. It has managed to partially disgorge the paradigm of equality in the fall: *«Abhor the enemies of God, forgive your personal enemies, and crush the enemies of the Fatherland,»* – Metropolitan Filaret of Moscow and Kolomna. To the extent that the Church still remains faithful to this idea today, its practice has remained a True, Imperial Faith.

Imperium of Man: No other Myth can reconcile all the others. Soak up their best sides. Connect the languages, cults, customs, and way of life of all peoples. Not by devaluing them, but by keeping them under one umbrella.

«For you are concerned about many things, but only one thing is needed» – Luke 10: 38.

Anything other than the Imperium is no longer vital. Any culture that does not directly call for the conquest of the Cosmos in the flesh, does not call for the unity and universality of Humanity, does not require development and reproduction – this is a culture of death, fast or slow. The task of the present is not to cancel or discard the past, but to transform it! Understand it in a new way. The first Christians took over the world not with meekness, but with a high will, a willingness to sacrifice for their beliefs. These beliefs were identified, proclaimed by word and confirmed by deed. Early Christianity was a Faith of struggle and victory over the old world, just like early Islam. Today, the same task, only at the highest level of awareness, is faced by Faith in the God-Emperor. Will it be enough forever? Time will tell, but there's no point in not trying.

The world around us is vast and infinitely alien. By themselves, the processes of the universe are neither good nor evil, they are indifferent to us. Planets are born and die, just as our star and its Sun will die. It is up to us to decide what to do with the window of opportunity that we are given. We are already able to count millions of years and anticipate the future. The world is not a gift, and not a storeroom, the world is a challenge, with ever-increasing complexity. With its diseases, viruses, injuries, and disasters, including man-made and climate-related ones. If we don't respond to it with ever-increasing Human power, we will simply die out. No one will spare us or save us. Certainly not an Abominable Intellect. All the old Gods were an attempt to close our eyes to this pitiless picture, to reconcile and «live together» with the Universe, relying on someone else's will. Don't accept the Challenge, but pretend that it doesn't exist. That everything is decided for us, the birth of Life and its end. The materialist picture of the world has not changed anything in the psychology of the masses, only shifted the responsibility for the future to «science». Anyone but us.

The Psychic Dawn is awareness of our own souls not only as a geological force, but as a Cosmic Force. Consciousness determines being, the future determines the present. The pre-history of the psychic consisted

in the rejection of subjectivity, with a desperate attempt to justify it, pure suggestion: «don't think, don't doubt, believe». Superstition in Russian means «void-faith», a fitting term for the old Faith. However, why old? We give you our word, modern school textbooks are all written in this language. All not to awaken an independent thought. All to avoid the Dawn. Our civilization must move from suggestion to Scientific Faith. Practically, filling both words with a new, true meaning! Abandon the comfortable and soporific fairy tale about the structure of the world, with answers to all your questions. Accept it as an alien and dangerous element, where every day you need to take a fight. Accept that there is much we don't know, and yet we send ships into the dark. Accept risk, responsibility, and the possibility of failure. Finally, smile at the universe and accept the Challenge.

The Emperor does not solve all problems, He stands next to us in the ranks, behind us, inside us. Our ally, friend and comrade against an alien and unknown World. Always against evil. The voice of our ancestors and descendants, the Motherland and Heroes, the psychic power of the collective, the call for glory that has not yet been seen. «Did not give birth and was not born,» as the Muslims say. He was always with us as soon as there was a free thought, a conscious feeling and a Choice. Faith in Him means that everything is not yet resolved, everything is not yet decided, and the only Plan we can rely on is our own. If you don't plan to live forever and inhabit the universe of stars, you'll never do it. **Go for it, and then – the Emperor protects.**

In the third cycle, we will return to the fact that we can't have any other gods. The definition given at the beginning of the chapter: «A supernatural being who created the world and/or controls it.» Above, we have argued why the God of Humanity cannot «rule» the world, and why such a concept of enslaving is ultimately not Lifebearing. Now let's turn to the idea of a «creature». We say the word «God» so often that we don't even think about what it means. Any unconsciousness is the gate of Demons, remember. Being, logically, implies existence, being. Being implies boundaries, laws, and properties. At the very least, to distinguish this being from «non-being» or absolute Chaos. It turns out that the Gods themselves must obey some laws, be limited in some way, have, so to speak, a «physical body». Then it's just another creature like us, only more powerful, stronger, bigger, whatever. This question is especially acute in any concept of polytheism, when there are many gods. There is no way to get out of the question of who created whom and who is stronger...

I don't think we need to waste time explaining why the belief of one creature in another and the worship of the creature is pure fetishism. With the overthrow of the filthy idols, the world's religions have coped without us.

Naturally, the most common objection of religious figures is that God the Creator is not a «creature», on the contrary, he created everything himself and is beyond the manifest world, transcendent. Unknowable, different and alien, etc. Now we have truly completed the third cycle and are back to pure suggestion. «Our faith is in vain, if Christ is not risen...», or the guys were mistaken. For the unknowable and alien Creator, neither worship nor reasoning about him is necessary. We cannot know him except through the revealed creation. The rest is all about talking about a black cat in a dark room when it's not there. Pure fantasy. The revealed creation is again a world of evil and good, where we have to make our own Choices without any guidance or council. Because Free Will is impossible otherwise, and without it, Faith is impossible. Slaves don't believe in the whip, they get it.

The Creator does not need to be confirmed or denied. The existence of creation speaks of it. We will be eternally grateful, without trying to arrogate to ourselves the understanding of his Plan. The created world is also full of mystery, but we can learn it at least in an approximation. «Know yourself – you will know the universe and the Gods»^{<?>}, we are just beginning to solve this problem. If faith in the Creator requires reinforcement in his creation: the words of Muhammad, the Koran, the life and crucifixion of Christ, his resurrection, then why should we focus only on these facts? Other facts are not part of the Plan, not from the Creator or what? We must study all the evidence consistently and choose wisely what to follow and what not to follow. The existence of evil and the responsibility to Choose contain all the teachings of the world. If Creation was perfect, it would be unnecessary! It takes place before our eyes, with our hands, with our hearts.

So all the facts consistently say one thing – the world is infinite, constantly changing and developing on the march. Through unstable equilibrium. At the tip of the spear of universe formation is intelligent Life. Free Will. There is no evidence that the Creation process has been complete! It runs every day. This means that nothing is impossible. Faith can do anything. This is the main, immutable law of millions of years of development. If something is a basis for judging a Design, then here it is. If this is the case, then **the Psychic Dawn and the creation of the Immortal Emperor of Mankind is the pinnacle of what the Creator could have desired from us.** This is his true image and likeness, to be absolute co-creators. Complete the full circle of existence and create your own God, a symbol of the infinite power of the spirit.

There is a good observation, historically, magic, not religion, has become a prologue to science. Magic has its own laws and rules, it can be taught, it tries to see the connections of phenomena in nature, even if it is false. Search is important. Faith does not seek connections; it relies on the unfathomable will and providence of the deity. We should not study, but

^{<?>} Inscription on the Temple of Apollo in Delphs

pray. The difference between magical and religious practices can be traced back thousands of years. What does this give us today, at the time of God's creation? And here's something very simple and important. If God is limited by the laws of the world he created, then he is redundant. The world works by itself and such a cult does not lead to anything, you need to know the world and take responsibility for yourself. Faith is simply not needed. If God is not limited by the laws of existence, but can change them completely at any time, then any of his promises, Covenants and vows mean nothing. He is the Alpha and Omega, the absolute, he cannot be bound and expected to fulfill. All according to the rules of the inductive method of science. What happened yesterday does not mean that it will be the same tomorrow. The only constant is a variable.

From this inexorably follows the necessity of the birth of the God-Emperor, the God of Mankind, whose Cult does not kneel, but raises us from the knees. You don't bargain with him, don't make covenants, don't put your problems on him, you don't complain about life, and you don't call him in vain. With Him, you create new things, prevail and do not waste your souls. In this process of eternal struggle, knowledge of the mysteries of the world, the pursuit of even unattainable goal, we become true co-creators of Worlds. Just as the world is infinite and changeable, so we must be prepared for its infinite and changeable Challenges. **Hail to the Emperor.**

What happens is undefined. The future determines. Everything is possible: from subatomic to cosmic scales. Neither logically nor physically, it is not defined in any way. Mechanical determinism has suffered an official defeat in science, and not only at the level of micro-particles («Heisenberg uncertainty», «charm», etc.). The theory of relativity means that even macro-events are not unambiguous, and it is not a matter of perception alone. Different versions of events are real at the same time! Different times, different spaces. It is maddening, but we must not be afraid, but use the power of madness.

Science has reached the limit of time travel, that is, the perfect, literal domination of the future over the past and present. Therefore, the present is not only undefined, it is potentially determined every moment, based on our actions today and, most importantly, tomorrow. This «non-definiteness» must be the full expression of God's omnipotence, otherwise he would be bound by his own plan and, see above about the laws of Life, not needed. If all is defined. The relativity of being promises not just new possibilities in the Plan, but a fundamental opportunity to rewrite it.

Medieval scholastics were engaged in outstanding mental balancing and very useful Doublethink, trying to explain both predestination and free will of man, but why? After all, the problem comes from the idea that God is a bearded old man who cannot be everything at once. It is simply incorrect.

Make no mistake, the God of the Abrahamic religions is treacherous. He changed plans more than once. He did not repent or comment. He placed them in Paradise, drove them out of Paradise, accepted the gifts of Abel, did not accept the gifts of Cain, burned cities, destroyed mankind with a Flood, sent punishments and pestilences, led people through the desert for 40 years, chose the people of Israel for himself, punished them for apostasy. Then he changed his mind, but this, as they say, is not accurate. It doesn't bother you that the God you believe in has broken his own laws and promises many times. It doesn't bother you that his rhetoric and instructions have changed. The covenants and commandments were changed: «*I give you a new commandment (!), that you love one another...*». Faith did nothing but develop, and that's great! As human consciousness matured, it increasingly removed God from the physical world.

The world's religions are aware of this, recognize this development, but only as long as it is beneficial to them. We need to take the next step. **How fiercely we cling to the God of the Old Testament!** Demanding, punishing, jealous. The God of hellish torment and dogma. Think about it, what was a sin before giving a person the 10 commandments? The «Sacred Tradition» does not contain data on the early Law. However, for deviating from the unknown desires of God, a macro-genocide of the Flood was carried out. The animals were also caught in a hot hand, except for the creatures in pairs. Yes, yes, this is the same God the Father or the Almighty. As you can see, there is no place for faith, just a suggestion.

Peoples hundreds of years before our era had the courage and integrity to create their own God out of nothing, along with the sacred tradition. Then they did it again and again, over the centuries. The Arab Bedouins were not afraid to see Allah and believe their Prophet. Finally, the development of science and the myth of «technological progress» became another attempt. Only a fake one. The more we know, the more we don't know, the greater the scope of the unknown and the number of questions. The myth of technological progress, which denies the value of Life, ultimately means only one thing, the worship of the idol of the Second Law. Technical singularity. Science cannot answer fundamental questions by itself, but only lead to them. The final conclusion, «to be or not to be», is made only by the Man himself. The leap of Faith is inherent in the very essence of Free Will. The old Gods have done their work, the king is dead, long live the king. The creation of God is not just necessary and overdue, it was the traditional response of our ancestors to the challenges of the new Era.

The characters of the Indian epic «Mahabharata» are directly aware of this, claiming the onset of Kali Yuga – the Iron Age, the age of death, by the way. In this age, they foresee: human and divine laws will change, ancient justice and valor will fall. By changing epochs, they justify their unseemly

actions, saying that such are the times, and nothing can be done. For all its wisdom and wit, this is a typical example of the Old Faith. Foreseeing evil is necessary, but not enough. What is such foresight worth if the hero humbles himself, moreover, covers up his crimes? Defeat evil, that is the task of the God Emperor. It may not have a final solution, but declaring war openly is a matter of honor for our species. Not to lay down arms, not to delay victory by someone else's hands until the Kingdom of Heaven and the resurrection of the dead, but to fight in all the worlds. In Heaven as on Earth.

On the one hand, the jealous God of the Old Testament, on the other – the technical idol of AI. «Of the two options, always choose the third», Imperial Truth.

What about miracles? It is enough to look around to see the great and permanent miracle of the Creator, which absolutely does not require any more proof. This is the miracle of Life. Having recognized thousands of planets, millions of light-years of galaxies, billions of years of time, scientists have not yet found anything similar. Even if discovered in the future, the exceptional nature of the phenomenon is obvious. Intelligent life, the very possibility that we can now write and read these lines, is the pearl of all worlds. Study even astronomy, even biology, even anatomy, there will be no limit to your delight and surprise! At the same time, we study Life, make observations, learn the laws of Nature and do not consider them a violation (!) of the laws of the world. Despite the monstrous rarity and uniqueness of the phenomenon, the crushing of all the expectations of the Universe. We take our daily miracle for granted. Give us another with flashlights. The grave sin of unconsciousness.

The creation of a new law is a violation from the point of view of the old law. Development is a miracle delivered to the system. The impossible today becomes possible tomorrow. Life, including our souls and hands, violates the laws of gravity, thermodynamics, time and space, whatever. **The pinnacle of intelligent Life is the realization of your ability to work miracles.** Co-create. Since we have received such a gift, we can only conclude that the creator created us not to be worshipped, but to be supported. It is in this sense that we are «in image and likeness.» This is the only real expression of gratitude and respect. The universe was not created for the simple reason that it continues to be created. Even by the very act of knowing, even by thinking about it. Dogmatism, ritualism, prayers and appeals to the Creator, placing hopes and wishes on him, waiting for help and salvation – all this is the childhood of Faith, its cradle. What is forgiven to children will not be forgiven to us. **The main thing that we must reject is the transformation of a Man from the creator to the consumer of a miracle!**

For centuries, Man has been approaching the Psychic Dawn. What does it mean? He created new laws, worked his own miracles. He created a society and regulatory systems that have no analogues not only in Inert, but even in

Living Nature. Witness a new stage of creation. The laws of Duty, the laws of Honor, the sanctities of conscience, Faith and nobility. Something that does not have any physical embodiment, but exists exclusively in the Noosphere at the same time, has a huge impact on the events of the world of things. Remember, everything is one, whether it is material or spiritual. The value of these new Laws reached such a height that the best of men were ready to give their lives for their beliefs, for the Truth above. «Honor is more precious than life.» We have said a lot about the Mystery of the feat in the «History of Heroes». If this is not a miracle, not a new reality created by Man and his spirit, then what is it? A live demonstration of how the laws, instincts, and aspirations of Living nature give way to a higher command, Free Will.

The concept of honor, valor, and respect for heroes exist among all peoples of the Earth. The people may even fall, dragging out a miserable existence of slaves and consumers, but the spark will still remain. Still, the moral high ground will frighten, confuse and touch even the fallen. As long as a man remains a man and not a beast, he will retain the ability to distinguish. He will know what is of the Heaven and what is of the abyss. The role of the individual in history is enormous, Salvation and development are only in the hands of people. It all starts with ideas born in the mind of one person. Then ideas multiply, take root in practice, become the mentality of the people, are absorbed with mother's milk, as we say. It is still unknown how, but the existence of collective memory, the voice of ancestors, is known for certain. This is a scientific fact about which very little is said, because inert things seemed more interesting. Until now.

Note, in other words: «Ideas live their own life.»

The most important stage in the development of Humanity is **the ability to create collective psychic entities**. Building one personality, its feelings, a picture of the world and soul is a wonderful and amazing process. An infinitely more amazing and powerful process begins at the moment of conscious creativity aimed at controlling reality. «Honor», «valor», «dignity», «righteousness», «holiness» – all this has no connection with the physical world at all. It is impossible to touch, feel, or experience «honor». You can try to explain in general what it is, at the level of everyday common sense. What to fight for, what to die for? It should be noted that all these concepts can exist outside of traditional religions. However, **the moment of truth, all of them are based on an unconditional Belief in the cosmic eternity of Life.**

A man rises to his last stand, knowing that he cannot win. On the walls of ancient Ryazan meets the Mongol horde. There will be nothing left of him or the city. Only ashes. To the last person, to the last line. He didn't kneel, didn't submit. An honest death is better than a shameful life. All this he did because he defended the Russian land. Not his family or loved

ones, they fell nearby. And it was possible to save them by becoming slaves of the great Khan! But no. What is, in essence, the Russian land? This is the life of the future age, a collective psychic entity, invisible descendants who will not hug or shake hands. This is the Fatherland in Heaven and an unmarked mass grave on earth – the Motherland. Darkness and silence, no fame, no recognition. You can't find anything material, nothing rational, no satisfaction. And yet, yet, yet.

See, contain, and try. Our hero believes: nothing is in vain, my death will make sense. Not in me, not in my body, but mystically, in the generations to come. In those who will stay alive because of me. Pay attention, even if no one will. The hero is convinced that in the face of all the forces of the universe, valor itself is worth it. Defiant spirit, «honor to none». He is convinced not only of the eternity of Life, but of the immortality of its psychic heritage. That every true act, every moment of valor, will live on, in defiance of all the old laws of the universe. For this Faith, for this Truth, a person gives everything, pays the highest price by the standards of biological Life. And there is no jury above him.

This irresistible force is the psychic reality, the Second Creation. The center, the vital expression of all collective psychic entities, is God, the Emperor of Humanity.

If a Man has a purpose, then this is it. Unique, our own, vocation, role in the Universal representation. The second act of Creation, the new reality, the Psychic Dawn, the full image and likeness of God. In material creation, in labor, we are already violating the Second Law, already increasing the free energy of the system. Amazing and beautiful, but look at the root! The reason we are able to do this is by adding a new element to the closed system of material interactions. Spirit, will, and consciousness. Before we can change the external reality, we must create a new one in our head. Here it is, a fulcrum to turn the world upside down.

Destination means moving towards a goal. For centuries, we have created the intellectual, spiritual baggage and outlook, the understanding of experience and observations that today allow us to see the Psychic Dawn. «Seek and find,» if you think about it, what else could we have been looking for all the centuries of history? It's not the best way to fill your belly. Collective psychic entities: Truth, Goodness, Justice, are so called because they cannot be generated either alone, or in pairs, or in a «natural» way. Only in the birth of the Noosphere. We were looking for something that allows us to multiply the total power, such connections and harmony, which Tsiolkovsky spoke about. Try to build them on the logic of the belly, it is impossible! The whole animal world is another proof of this.

We are so used to technological progress that we do not think about the miracle of spiritual co-creation that underlies it.

Our own consciousness is a kind of «collective entity» and is not limited to any set of nervous processes. Similarly, a person's social existence cannot be reduced to the interests and actions of individuals. It is always something more. This transition from quantity to quality, a leap of gradualness, is still a mystery to formal science. Whatever the Creator's plan, one thing is certain: if it does not provide for development, then this exercise is futile. A game with a pre-known outcome. To believe in such a thing is like having the worldview of the «destroyers» from S. A. Snegov's novel «People as Gods». Let's show the Creator more respect and trust. The most important thing is that Freedom of Will and the possibility of development are perceived by us subjectively. This cannot be taken away without destroying the very essence of the individual. If there is freedom, then there is a choice. There is a choice, so there is a life-bearing result and the opposite. There is development! Development by its very nature implies going beyond the plan. The onset of an unprecedented state of the system, from which new planning will inevitably be required.

A plan without development is a plan of the Second Law. A life plan is an open system. In the triumphant Doublethink, the new and unforeseen is foreseen. Being has defined consciousness for too long, and a backlash, a revolution of consciousness, is not only necessary, it is inevitable. **God Emperor focuses our Faith and makes it a truly material force.** Scientific power. The Imperial Cult breaks the veil of habit, the slumber of unconsciousness, it is the cult of Life in its highest expression. Everything depends on what we believe in, what we hope for, what we think about, what we look at – not in a figurative sense, but in a literal sense. This is how collective psychic entities are formed, from which material action already grows. It has long been said^{<?>}: «If you look long into the Abyss, it will look into you.» The life of the future age depends entirely on our determination to look into the Heaven and not turn away when the Heaven looks into us.

It's answering gaze is the light of the Emperor of Mankind.

In the words of Ivan Antonovich Yefremov, we are now living in the Era of a Divided World. It's hard to argue. The subject of past history is the people, the nation that has received a political organization, and with it, the inevitable division into «friends» and «strangers». Religions born out of pre-history, with any claims to Universal character, in fact served the interests of the patron states. The Anglican Church, the Roman Catholic Church, the Arabic language of the Koran as the sacred original, the Russian Orthodox Church and other local versions, as well as Lutheranism as part of German culture. The list goes on. The same was true of the more secular attempts to create a collective subject. «White man's burden», «civilized nations», «Western world», now «world community». Why in quotation marks? Yes, because this identity has always been not only false, but also for the direct

^{<?>} Friedrich Nietzsche

purpose of separation, opposition. The only question is who the dominant group today wants to declare «barbaric», «not Christian», «not civilized».

Notice how little we have achieved in the Human dimension, against the background of Technological growth, especially in means of destruction.

We are far from creating a collective subject, let alone a cosmic or even terrestrial history. The chaotic and self-serving actions of two hundred states cannot be called collective. Regular wars, hostile alliances, obstruction and slander, primitive propaganda, etc. Truly, the technical means of the century still turn to fooling and playing people off. We say the word «Humanity,» but it doesn't mean anything yet. There is no such subject. There is no Imperium of Man. **What should surprise you is not the image of the God Emperor, but his absence!** The miserable state of the world to which we are accustomed. Our own Earth should rightfully be called an alien planet, because if it belongs to anyone, it's definitely not to us. We do not belong to ourselves, do not exist as a subject of cosmoplanetary action.

The Imperium of Man is not a fantasy, but a necessary condition for the further development of Life. When you have read up to this line, there can be no doubt.

If we are to survive and inhabit the stars, then we must learn to measure ourselves, our rise or fall. Freedom is the Death of Measure, the most terrible of Demons. Transgender people, queers, same-sex marriage, the burning of the Koran on holiday at mosques, rabid Nazism, all these fruits of European «civilization» must go away. The loss of the desire for perfection, the wisdom to separate good from evil, is a direct loss of human form and transformation into a creature of Chaos. Development is not a Brownian motion, it is a vector, an aspiring will. **God Emperor is the image of the perfect man of the noosphere.** The collective subject of cosmoplanetary evolution that we have yet to create. Aspiration point. It is able to unite all peoples, regardless of race, gender, skin color, traditions. All this is not essential in the face of Cosmos. The main thing that unites people is the Will and Consciousness. «Reason is a measurement», hence discrimination, hence the separation of good from evil, and the excision of the latter.

There is no freedom to do evil, no tolerance for evil, no forgiveness for wretchedness.

Isn't it funny that we don't know the answer ourselves, but what humanity should be like? To conquer Space, so that Life does not take risks with a single planet? We don't set such goals, no one has seriously thought about it since school. Without the concept of vitality, the concept of beauty, harmony, and grace is also impossible. There is no need to describe to you the depths to which the «creativity» of modern man has fallen. If we don't judge, we are no better than grazing creatures, we are not subjects of our own History. Evil exists, its face is terrible, the fight against it is merciless. To think of perfection

physiologically: the lot of Nazis and savages. A person is perfect in spirit, first of all, the rest will be added. The Imperium connects everyone, each fulfills its role and purpose, every nation, every person. Even conflict is valuable. Development is always a clash of old and new. Having a common Goal gives meaning to everything. The creation of the Russian Union, the World Union of Earthlings, the Heavenly Court, the Imperium of Man – this is the task of the day, which the future has already determined.

What does not yet exist is achieved through Faith. The collective subject of humanity demands God the Emperor as an image of perfection, a vector of aspiration. A self-fulfilling prophecy. It requires Faith, and it is the source of it. It couldn't have been any other way. Human nature is twofold, to understand this, to make it a source of power, is a triumphant Doublethink. «Get to know yourself and create a global identity.» He is the direction, He is the power to reach, He is you, and yet infinitely more... The past divides, the future unites.

The Emperor is the face of the future, which determines what we must become, the point of aspiration. We think of beauty because people all over the world have similar ideals of vitality, strength, and power. They are able to understand classical music, architecture, and great paintings by artists. We understand that the beauty of the body is not always equal to the beauty of the spirit. But at least we're thinking about it! Only for some reason we are afraid to take the next step. The alienation of an individual is unthinkable. Only in couples. Couples – only in the community. Community – only in the state. The state in the face of the Cosmos – only in the Imperium of Man. Think about it, why do we not raise our eyes beyond the «beautiful couple»? Beautiful society, beautiful state, beautiful Humanity. The time has come.

The God Emperor is the beauty that will save the world. Just as we think of the harmony of the individual subject, we must also think of the collective subject. The spirit, the symbol, the quintessence of Man. Cutting off the weak, the mean, and the evil. Power and will, wisdom and generosity. Avatar of Noble Qualities. Even if it's impossible, it's good that it's impossible! We are inspired by this eternal call of what cannot be achieved. What hasn't been done yet. The impossible today will be possible tomorrow. What's next? A new frontier.

Let everyone think of Him in their own way, but a mighty man in armor is a good image. He has no face.

The Psychic Dawn is a conscious necessity, a task of the day, the only alternative to the technological singularity. As we said above, all the sciences about man for thousands of years of its historical existence have not yet been able to «change the world». The person is the same! Mentally and biologically. There is no development. There are decorative changes due to a change in the technical environment. Hatred, fears, superstitions, stupidity and Demons are not only the same, but sometimes many times stronger. In

the most important, human, noospheric dimension of being, we not only stand still, but even retreat before the Challenge of time. A Man does not master new areas of competence for himself, does not increase his strength, courage, and creativity; on the contrary, he concedes them all to machines and neural networks. Stop the moment and think, take the trouble to see where the wind of Change is blowing.

It is not possible or relevant to develop a person's «body» without a concomitant hardening of the spirit. Long life, a second heart, new sensory organs, etc. This is the same transhumanism, only the technology is not iron, but «bio». In fact, such changes without strict control and awareness are the biological degeneration of the species, the death of the genotype and the transformation into «creatures of chaos» in the literal sense. An example of such a «civilization» is well, long ago and prophetically described by Stanislaw Lem^{<?>}, Clifford Simak. Disgusting? So far, yes, but the Overton window doesn't open immediately. Why in «creatures of chaos»? Without a victory over Low Nature, without the beginning of an Era of spirit Domination, without a victory over Demons, what other needs will bio-technology serve? The same as the usual one. The need for no-being, no-responsibility, and an easy way.

«The hearts of men, not their machines, will rule the stars» is the Imperial creed.

When we speak of the Psychic Dawn, we have in mind its three stages. **The first, already explicit and measurable, is Noble Qualities.** The human scale of being. Courage, loyalty, bravery, heroism, imagination, etc. Modern politicians and opinion leaders still find it ridiculous to even raise the question of achievements in the field of courage or valor. While any other statement of the question means the rejection of humanity, and is devoid of meaning. Who needs houses and roads if our parents are killing their children, teenagers are setting each other on fire, pouring gasoline on each other, and the list goes on? All these are the disgusting fruits of unkind seeds. What they sow, they reap. As long as society doesn't get deperate from bottom to top, doesn't demand sanctity, it will look into the Abyss. Because it's easier, more convenient, and more technologically advanced.

There is no way to measure humanity in money, profit, kilograms, or meters. It is very difficult to insert it into the report and write it down in pieces of paper. But it's what makes everything else meaningful. «The stone that the builders rejected» should be at the forefront, truly. **If we're not building the Imperium of Man, what are we building at all?**

This is the first aspect of the Dawn. Simple and, in a good way, obvious to those who have eyes. The second one is deeper and extends further. Physical

<?> «Star diaries if I on the Quite»

and technical «evolutions» as an independent value mean the self-destruction of the species. Therefore, they must be subordinated to some other, higher value and purpose. Such a value can be only one thing: consciousness, spiritual and mental evolution of a Man. There is simply no other option. The noosphere means that for the first time in History, consciousness is clearly beginning to define being. We have shown quite clearly what kind of Demons are found in the dark places of unbridled, chaotic, unmanageable consciousness. What risks are contained in a powerful technique wielded by an increasingly less powerful spirit! And is it even truly wielded already? Thus, **the second aspect of the Psychic Dawn is the awareness of the need to form a new mental organization of a Man.** Such an organization that, in terms of its capacity, could provide advanced development of the subject of management in relation to the object of management – social, technical and natural processes.

We have already understood that development means a constant struggle, a blessed conflict, at least philosophically, between the old and the new. In fact, of course, there are still thousands of conflicts of technology, people, generations, interests, etc. History up to this point has been and still is an amazing process, where Life, Reason, and Creation almost always win despite the «conscious» efforts of rulers, communities, and individuals. Such powerful basic forces and properties are inherent in human nature. The creative nature of labour, the ability to create new things, and even the energy of a powerful will to sacrifice oneself for the sake of a Common Cause, which in itself is only an idea, a psychic reality. These germs, these beginnings, made their way to the light through the ages. We are inheriting a land that we have not yet conquered by right, and we are living a largely unconscious legacy of the development of Life. The reserves of inertia movement are running out before our eyes.

The chaotic movement of pre-human history has created a powerful accumulated side effect, the Necrosphere. Huge resources are invested every day in human self-destruction, whether physical or spiritual. This is becoming commonplace, the norm, like same-sex marriage and other madness. Let's not repeat ourselves. Since this phenomenon is not recognized or even named by anyone other than us, they do not fight it. They constantly imitate violent activity, at best, dealing with the symptoms of the problem. For example, jailing a woman who killed a six-year-old foster child and hid it to get benefits. No, of course she does not belong in society, but damn it, this is a grown woman, how did she form up and become such a degenerate? Does this make anyone wonder? Is this an isolated case? Primordial self-destruction, the death of subjectivity and measure, all the Demons of Chaos are here. And we are happy that the criminal was punished.

If we know this and do not accept our responsibility, then the blame is on us and on our children. We're criminals, too. The ability to realize this is a necessary condition for the onset of the Noospheric Age.

Extreme manifestations of evil are manifestations of evil. That is, to a lesser extent, less noticeable, hidden, evil exists literally everywhere. Almost in every one of us. It requires constant vigilance of the soul, constant self-assessment, measurement, so as not to fall victim to a Low nature. Pride, self-satisfaction, and most importantly, unconsciousness – the first gate of Demons. If a woman murdered a child, and such a case is not the last, disappearing example of wretchedness, then society generates such a type of personality systematically, naturally. There are no barriers, no powerful amulets, no litanies of purity instilled from childhood. The ugliness of the spirit is not visible, they do not fight it, they do not temper the soul from real threats to its integrity. They prefer to close their eyes, in fact, it is much easier to pretend that «I do not see evil, I do not hear evil, I do not speak evil.» Who reads and analyzes crime stories? Who sees them as a reflection of the collective subject? Who is looking for the true causes of evil to find and destroy them once and for all? Good question.

We have reached an understanding of the need for physical culture, hygiene, and even speech culture. In no case do we say that harmony has been achieved in these areas, but at least there is an understanding of the path. At the same time, the most important thing that stands behind any external manifestation of being, that controls it and gives meaning – spiritual culture, remains completely unrecognized in society. Don't be confused by the fact that you have heard the words «spiritual culture» in school, university, or on TV. The case when there is a concept, but there is no reality. Not yet, it is contained in the future. A perceived need.

The second aspect of Psychic Dawn is not just the formation of a «good person», even within the framework of the system of measures of Noble Qualities created for the first time. This is not enough, it has never been enough, it is time to understand with all the inexorable clarity. Millions of «good honest men» did not stop the genocide and world wars. **The second aspect of the Dawn is the advanced development of the human mental organization in relation to the challenges of the material world.** In creating a New Man, a conscious burden-bearing subject, a creator of Life, and eternal war against Chaos and its Demons. No peace, no rest, no mercy. Cognition as an inner need, an intolerance of unconsciousness, a desire to become smarter, stronger, and more powerful every day. Do not let anything go by itself, feel responsible for everything. Ask questions, search for answers. Don't recognize barriers and patterns. Shake off the dust of the old world. Freedom as a conscious necessity. Fight and seek, find and don't give up. Know more today than yesterday. Recognize and practice the mastery of

spirit over matter. Telepathy, telekinesis, immortality, everything is taken by Effort.

Only now do we fully understand the meaning of «the impossible today will become possible tomorrow.» It's not just a phrase. We really must demand and strive for what today seems like a fairy tale. So it was, so it will be, so it should be. Only for the first time, with a powerful and merciless awareness, knowledge, ability and responsibility to do what needs to be done!

Look, much of what we have described in the previous chapters of this Book has come together as a single civilizational necessity. In order to escape from the pre-History captivity, one must first form a subject capable of creating History. This is a very difficult task, because such a subject can only be a collective one. Humanity and its God-Emperor. Outstanding leaders of the epochs only showed us the general direction of the path, took the first steps. A task of this magnitude has not only not been solved before, it has not even been set.

Psychic awakening consists in achieving awareness, in giving up the patterns and crutches of thinking, in refusing to take something on faith because «we were told so.» To pass everything through yourself, to know the true face of being with its good and evil, not to take your eyes off the abyss of nothingness. Take full measure, full responsibility for everything. **The new Man is born for eternal Victory in eternal war.** He must know the pain and terror generated by Chaos, understand the reality of Demons, and be steeled for battle. The murders of children and other abhorrent manifestations of the Old World must concern him personally. He must be able to love and hate truly (this will be discussed in a separate chapter). His Faith must become a material force. The great honor and burden of being at the forefront of Life's development must be accepted by him from an early age. No compromises. Fairy tales are not lies, but a guide to action.

We must repeat: this New Man will be absolutely uncomfortable, out of this world. Verily I say unto you, for he is of the world to come. Hungry for battle, achievements, feats, overcoming the boundaries of the past. Conscious of being the subject, the creator of History, and not its victim. Just imagine how different this is from the consciousness of a child or young man right now! The revolution of consciousness, here it is. Its fruits will be innumerable, «abysses of discovery and wisdom...». Such a Man has not yet arrived, but we must lay the foundations for the education and upbringing of such a person today. So that in a generation, the problem is solved.

The psychic Dawn inevitably means a transition period, when New Men appear in the mass of conditionally «sleeping» people. We cannot predict with certainty what the quantitative ratio will be. But for the formation of the subject of History, a complete renewal of humanity is not necessary. A critical mass, a key effort at the bifurcation point of the paths, is

sufficient. New type of Bolshevik party. There will always be those who will not or won't be able to heed the high Bugle. Who would prefer to remain a non-subject. A complete transformation of humanity is hardly possible and even desirable, because everything is known by comparison. It is important to see the differences and remember what we have awakened from. You can draw an analogy with the upbringing of young men in Sparta yourself.

We can expect objections that we predict the creation of castes, different kinds of people. This is exactly what we are doing, moreover, the need for this is not just overdue, but has become clear as day. Transgender people, gomosexuals, parents number two, body positives and other evil spirits are raging in the West precisely because they believe that they are the same people as everyone else. They also have rights and deserve respect. That's not so. Life is a complex process, and the life of humanity, moreover, becomes subject to artificial evolution. That is, it creates parasites, dead-end branches, and freaks that natural evolution simply filters out. Non-Lifebearing deviations are not the fruit of guilt, most often, but to encourage their development and spread would be suicidal. Even at the level of the culture of thinking. Losing your sense of proportion, reference points, good and evil, means losing your mind.

People are not equal, people are not the same. There is a difference between good and evil, brave and cowardly, honest and mean. The first should be sought, the second – excused. In the same way, a New Man differs from an ordinary man, a Hero from a philistine. The second option is not a deliberate evil, but the first one should be pursued. To deny this is to deny the difference between Life and death, and to make a conscious choice between them. We must resolutely reject the value of «every» person, every life. To realize that there is life and «life», that it was precisely this loss of measure and Noble Qualities that gave rise to the necrosphere and the cult of Death. The desire for self-destruction and its public justification, for example, in the form of the very possibility of psychologically allowing the use of alcohol and drugs. Life is already a responsibility, already a Measure, already a choice.

«Not my business...», «everyone has the right...», «his personal business...», this is the gate of Demons, through which they enter our world! They must be sealed. «Am I my brother's keeper?»

The cult of Heroes, caste, the vocation of warriors, scientists, priests, teachers, should be legitimately embodied in the structure of the society of the future. The higher castes and the lower correspond to the High and Low natures in man himself. This is a vital, natural difference. The transition between castes should take place with dignity, and not by blood, of course. The measure of what is worthy and not, good and evil, should become part of state policy, education and upbringing. What's above is below. If this measure

does not exist, then politics is not just an «art of the possible», it is an «art of the empty».

The very meaning of the words «higher» and» lower «already offends ordinary consciousness. How is that so! To admit that someone is wiser, more worthy, better than me. This is not going to happen. Everyone is the same. Can we accept this as the truth without shame? The ability to recognize your imperfection, the scope for learning, is a condition for development and formation, a sign of maturity. The higher castes bear the highest burdens, the highest responsibilities, and they have no reward that the average person can understand. It is not a symbol of «Freedom» and its Demons. It is a symbol of Duty, Honor, vocation and responsibility. Let everyone take this cross, if they can bear it. It is only necessary to create a system of selection and testing, heavy and dangerous. After all, Monomakh's cap will also be heavy. **When we understand History as a Big Game, we can not only win, but also create our own rules.** This is also the Dawn step.

«It is impossible to imagine that the socialist forms will develop, driving out the enemies of the working class, and the enemies will retreat in silence, giving way to our advance, that then we will move forward again, and they will retreat back again, and then «unexpectedly» all social groups without exception ... will «suddenly» appear. «imperceptibly», without struggle and anxiety, into the bosom of socialist society. Such fairy tales do not and cannot exist at all, especially in the conditions of the dictatorship of the proletariat» – I. V. Stalin

The thoughts of the Father of nations are not accidental here. The noosphere is formed not «suddenly», but in an indissoluble connection with the technological progress of man. Communications, transportation, construction, information technology, even weapons – all these are necessary conditions for the transformation of thought into a geological and cosmoplanetary force. At the same time, the same development of technology creates a Challenge and contradictions associated with the fact that without an outstripping growth of a person's mental power, technology becomes a corrupting factor. Not subordinated to the goal, spirit and Life, technology not only weakens the potential of a person, not only removes him from Noble Qualities, but also can completely replace him, lead to a drop in the birth rate, moral and physical degradation. The Imperium of Man is not a rejection of technology, it is a harmonious subordination of its main goals to principles of vitality. If a Man isn't the goal, then who is? In other words, as technology develops, the contradiction between its increasing potential and the falling potential of the operator increases. First of all, with a falling mental potential.

Thus, the preservation and development of the human species as a subject of History requires awareness and the declaration of eternal war. To build an Imperium of Man, not machines, things, or God knows what else.

War to keep the very core of our nature in a stable state of disequilibrium. War for the preservation of the subject. Ultimately, for the creation and maintenance of the collective subject, Man with a capital letter, and God-Emperor as its spiritual expression. This is a struggle with the very basic forces of Chaos, which at first look like finding an easy path, the desire to shift work to the machine, enjoy the fruits of progress, and not sweat to sow new ones. This is a civilizational Challenge, a kind of «wave crisis» of technical culture. How can we maintain human potential, activity, and development when it seems that machines can make everything better?

The answer is simple: consciously, deliberately and purposefully. Parenting is a constant controlled crisis. Who says it has to end sometime at all? Its most important aspect is the understanding of the sacred. The Holy spirit, Free Will, creativity, Faith, and even the human form itself, as a living symbol of the connection with our ancestors and the path we have traveled. The Imperial Cult does not recognize dogmas, but the sacred value becomes so not in vain. If you do, for example, genetic engineering, then only with the highest awareness, spirituality and responsibility. It is necessary to preserve the very «humanity». The paradox of development is that only the best can sacrifice it in the name of a Common Cause.

The freaks of the West do not reach humanity. Heroes of the North sacrifice it. In long campaigns, in righteous wars, we give everything to give others a chance, so that on our shoulders the knights of the future will take the Heaven. We give peace, comfort, family warmth, and ultimately life itself. For the sake of the future age and the resurrection of the dead, of course. This sacrifice must become conscious, part of the culture. Transhumanism is possible, but not for everyone, not as an end in itself or as a natural flow «of technological progress. Perhaps in the future, space engineers will be cyborgs, learn to connect consciousness with great machines and spaceships. But this should be understood precisely as a sacrifice, as a forced retreat from the sanctity of a Man for the sake of a specific goal. Perhaps even requiring purification and repentance. Let your guard down for a second, let it stand for a second that technology is a blessing in itself, a source of joy and happiness – and now the new drug is ready. Another way and dream of not being human!

To resist this temptation, this siren call of technology, you need the steel will of a New Man. The ancient whisper of entropy is countered by the clear voice of the God Emperor.

The final aspect of Psychic Dawn is a paradigm shift. Until now, people have planned only the possible, and have recognized the creative power of Faith as deviation. Every discovery without exception was met with distrust, suspicion, protests, resistance of the old order, and only after decades – recognition. Few of the great scientists and writers achieved their goals in their lifetime. Even fewer received state funding, that is, as it were,

official recognition of the society. The war machine of the twentieth century affects these statistics in a positive way, but for what purposes? Only the threat of mutual annihilation caused the peoples to start up and speed up the work of thought. We ended up with a caricature of what the Mind can achieve when it develops consciously and creatively! Yes, gradually military technologies were converted into civilian ones, including the Internet. But it is an obvious fact that this happened despite, and not thanks to, the efforts of decision-making structures. This paradigm needs to be changed, and we will change it.

Planning what is possible today, proceeding from the needs of today, is always preparing for the past war. React to what has already happened, not what is happening now, let alone anticipate. But even this understanding is not enough. Prepare for the future, the unknown, for only potential threats, this is just common sense! No matter how surprising it's absence was. You can take the situation even with Covid, even with the processes in Ukraine. «This has never happened before, and here it comes again.» Adaptation of the control mechanism was extremely slow, and we are alive only because the actions of the threat were of the same level. Preemptive planning of enemy actions, anticipating them, and reinsurance are simply good management practices. This is the task of the day, but it is not yet Dawn.

«Things always happen that never happened before».

A paradigm shift is to start planning for the impossible today. The words themselves seem meaningless. From the point of view of the management system, this is absurd: how to budget for the impossible, how to report for it, who will be responsible? It's easier to change the tile or asphalt again. The Psychic Dawn means that we are finally able to realize that this approach is truly absurd. Because it turns out that the management system proceeds from the fact that everything new, breakthrough, revolutionary, appears despite its efforts. Just like that. Someone else should randomly make discoveries, fight for their implementation, build prototypes with their own money, publish their own pamphlets like Tsiolkovsky, and then, perhaps, we will apply this. It remains once again to be surprised at the vital force of the Mind, which has overcome this inertia for centuries! We must admit that History happened literally by accident, on the shoulders of individual fanatics.

On the other hand, accidents are not random. It is a powerful expression of the stable and non-equilibrium nature of Life.

In this good company, we will find ourselves next to Leonardo da Vinci, Giordano Bruno, Copernicus, Lomonosov, Mendeleev, Mozhaitsky, Tsiolkovsky, Vernadsky, Makarenko, Pobisk Georgievich Kuznetsov, Boris Yevgenyevich Bolshakov and many other outstanding thinkers who, during

<?> «Awakening», Volgograd: Periskop-Volga, 2021.

their lifetime, with great difficulty achieved recognition of their ideas. This is absurd, from the point of view of Reason, and this is the «order of things».

Deviations from the «may nothing come of it» scheme are rare on a historical scale and are associated either with crises or with the actions of brilliant rulers. Joseph Vissarionovich Stalin and the Soviet Union he created are certainly a shining example of the synthesis of both factors. Space exploration seems familiar to us now (an illusion), but in the twenties, it was a pure fairy tale. The «Interplanetary Communications Society» sounded the same as the «Jupiter Colonization Society» would sound today, or, as it sounds... «Russian Cosmic Society». No, it would probably sound even cooler. However, it was all done! Planetariums appeared, rockets flew, balloons were raised, planes were constructed, observatories were built. Then the rivers turned, the deserts became green, and the ekranoplanes soared...In short, we were able to see for a second what a Breakthrough civilization is.

But even if we couldn't, the Psychic Dawn is a conscious necessity. It is a crime, armed with modern science and technology, to still childishly rely on heroes and discoverers to be born somehow on their own. We are already able to understand that everything is based on ideas born in people's heads and the Will to implement them. This is the basis of the basics, the motor of motors, the atom of the atom. Therefore, the development of such a Will and such ideas is a necessary condition for the survival of the species and advanced development. To form the type of personality of the Hero and creator, without setting him the appropriate tasks from childhood – that's what is truly impossible. We should dream, since school, not of a career, but of a feat. Draw the paths of star trails, prepare for battle with Evil, invent a time machine. Only from this aspiration can the necessary type of personality be born. Even if it doesn't work out in a thousand thousand cases, the attempt itself is worth everything. Children will learn to understand and appreciate those who have succeeded. This will be their common dream.

One cannot even imagine the colossal effect that will arise if at least one country, let alone the entire species, all of humanity focuses on the task of educating a New Man.

The last, final revelation contained in the Psychic Dawn is the power of Faith. We have said much above about the fundamental transition to a culture of Living Imperial Faith, but we must take one more step. For millennia we have heard the call, we have repeated the words, but we have not listened to them. For Buddhism, reality is simply subjective. Christ declared: «... because of your unbelief; for verily I say unto you, if ye have faith as a grain of mustard seed, and say unto this mountain, Move from here to there, and it will move; and nothing will be impossible for you.» There was no need to add to Muhammad, the words of Christ are not denied in Islam. Admirably, what a mental balancing act is required for ministers of the Old Faith not

to understand these words as a guide to action! For thousands of years, the keys to the New Man lay before our eyes, but remained hidden. We heard and didn't listen, watched and didn't see. We were willing to do anything to accept from the Faith only what is convenient and not burdensome.

This is a direct call to the Psychic Dawn. Christ does not speak allegorically, he is not a Pharisee! He literally says that everything will be possible for your soul («psyche» in Greek). One would have to be a monstrous hypocrite to interpret this as the future household and technical capabilities of only dry mind. Do you see this phrase as eliminating a Man? But technology does exactly that, in the end. We see the declaration of equality to the Creator, the co-creation of the World by man. Absolute subjectivity, absolute possibility, and therefore absolute responsibility. Why are we so sure about this? Go move the mountain. Doesn't work? Therefore, there is not even a grain of faith. The best of us are just getting closer to that milestone. Just imagine the psychic power, the strength of personality and consciousness required. Free Will. And Freedom, we know, is only a conscious necessity. That is why it is impossible without responsibility.

You may say: you can't believe religious fairy tales, take literally the creation of the world in six days, and many other miracles. Who knows who and what proclaimed thousands of years before us? You will say and be wrong, and we are not talking about: «a fairy tale is a lie, but there is a hint in it, a lesson for good fellows.» All this is still the level of ordinary common sense. A sense that even a hundred years ago could not have imagined modern life and its challenges, that is, it always lagged behind, always reacted, and was always strong in hindsight. Now it's just not serious, a cradle that should have been left long ago. All the important events of History, all the discoveries and breakthroughs occurred contrary to «common sense», which is why it is so important to learn the History of Heroes from a young age!

We have long ceased to even look for hints in fairy tales, we do not believe the words of our own God. Finally, we refuse to believe our own eyes. The legend of Icarus anticipated the era of controlled heavier-than-air flight. Do you remember the legend? Icarus is the naughty disciple of the wise Daedalus, who wanted to fly too high and crashed when the wax of his wings was melted by the Sun. However, it is his name that has survived for centuries, and even walks next to you under the guise of «Ikarus». His aspiration, his impulse, his desire for the impossible, remained the foundation of human culture. They were included in monuments, edifying stories, and even cartoons. How many people followed him in gathering wings and jumping off roofs? How many crashes were there? They have believed, they will inherit the earth and the Kingdom of Heaven. They created our aviation and cosmonautics in the end. They defeated gravity and decay. The impossible became possible. We see this, but again we are in a hurry to bury ourselves in the Iphone and

not admire the daily miracle. Not to believe, and not to take a reciprocal commitment to excellence!

So, everything that was once impossible was conceived and implemented by someone. Out of nothing, as they say. Only one question remains. Why, strengthened by a thousand-year-old religious tradition, did we stagnate in the spiritual sphere and perform miracles only in the technical and material sphere? Paradoxically, only scientists and natural scientists believed Christ? Yes, and Malchish Kibalchish, who knew a great military secret and did not betray it to the Bourgeoisie. So they fled, terrified by the power of his Spirit, not of his weapons! Today, when the technosphere threatens not only the planet, but also our very humanity, we must re-evaluate the parable of the Seed of Faith. Unfold its fruits in the Psychic Dawn and set goals for the formation of a New Man.

For centuries, no one has taken the power of the spirit seriously. No one really tried to move the mountain by the power of faith. If you don't seriously try, the goal will never be achieved! For the first plane to fly, many «Ikars» had to crash, falling from the bell towers. Who crashed trying to manifest the flight of his spirit? The fact that we don't know the paths, can't imagine the solutions yet, doesn't matter. This is a common situation for anything new. A challenge for the visionary and Prophet, for you and me! We are not talking about the «spirit» of the Old Faith, which tore it away from Life, imprisoned it in monasteries, and for all the centuries of its history could not grow the mustard seed of Faith, justifying itself with allegories. No, this is not the same, not a life-giving spirit at all. Above, we have already revealed the unity of the material and the spiritual. Today, our task is not only to form a psyche that will confidently dominate technology, setting its development goals. But also such a psyche, which in itself will become a source of development.

The technical evolution of Mankind, without advancing the spiritual one, has reached an obvious crisis. We educate consumers, even if we don't understand it. We do not sacralize Noble Qualities, physical perfection and, of course, spiritual power. Psychic powers. We allow a person to be «whatever», the bus will take out! We allow entropy, Impurity, into the very center of the temple of our own being, our own identity. Death of measure and other Demons nest in the everyday consciousness of millions. The main Psychic Force is the miracle and the Power of free Will. Enough has been said about this. We know, got used to it, and stopped being surprised. So let's start wondering! Let's set your spirit tasks that will make it burn, harden. Striving, testing, and even failing on the great road is the only way to reach the heights. Make the impossible today possible tomorrow.

What do we mean by that? Yes, telepathy, telekinesis, of course, victory over space, teleportation, jumping through the underside of Being. To begin with, you can use simpler tasks, super-intelligence, super-will. «A country

not of fools, but of geniuses.» All these phenomena are a consequence of the Psychic Dawn, not its cause. Those who laugh at these audacious plans will indeed be like members of the Flat Earth Society. After all, once such an idea seemed obvious. For a different theory, there was a deadly struggle with reasonable and sane people. Against all odds, Reason won. If our ancestors were able to achieve this before the invention of printing, then how much more ambitious plans and great projects should we build! Demand the impossible and get it all.

«Nothing personal – just everything,» as we say in the Russian Cosmic Society.

What matters is not literally achieving a specific «impossible» goal. It is also important to strive for the discoveries that we will make along the way. The jump from the bell tower under the wings is not part of the design of the aircraft, but mystically, providentially, that is, psychically – it already contains it. You may ask, what needs to change? It seems that we are already engaged in upbringing, education, sports, etc. You will realize that the ice has broken when the government's annual report measures the number of feats, Heroes born, and rising levels of courage, Will, and Acts of Faith. Seems impossible? It is necessary if we want to survive and develop as an intelligent species, and not an appendage of Abominable Intelligence. This is the key paradigm shift.

In the final realization of the Psychic Dawn, we reach revelation. Humility, modesty, peace, withdrawal from worldly concerns, that's what for centuries was considered the lot of strength of spirit, religious feat. **Nothing is further from the Truth!** All their lives, words and actions, the great teachers of humanity have called us to something different. To the sword, to struggle and eternal victory, to the seed of Faith that moves mountains. We just couldn't contain it! The power of the Spirit is not a rejection of the world, but its transformation. Not a disclaimer, but an acceptance of the burden of command. The new Man is aware of the unity of spirit and matter. It is easy to «defeat» temptations by leaving a world full of them. To create a new world is the goal and task of True Faith from the beginning of time.

Passivity, submission, humility, non-questioning, and boldness are not the way of the God Emperor. Cosmos will be ours. Humility has its place, but not the main thing and not the first. The struggle is the root of even Buddhism: to get out of the wheel of Samsara, we must overcome the lower aspirations. It is to win, by the effort of the spirit, body, practice and thinking. They don't give up on themselves! This is indisputable. The same applies to the «jihad» of Islam, the spiritual struggle. «The kingdom of heaven is taken by force.» How can you not hear that? How can you not temper your body and spirit after that? How can there be fat priests? Even in their teaching, the Body of Christ and our body are related, it is also a vessel and a fortress of God.

All this deafness, blindness and vanity became possible because initially no one seriously believed that a person would be a friend of God. Because we even read the Scriptures as we feel comfortable. We didn't even really grow up to the wisdom of our ancestors, because we try to overtake them in technology, not in valor. A Psychic Dawn means the end of a Long Night of Comfort and the dead Law of Least Resistance. We are waiting for an eternity of blessed conflict, and it is beautiful!

Who are the iron-willed devotees who are called to fight the eternal war? For whom does the Bell ring? It is ringing for you.

All the old teachings, religions, and concepts were born out of the Era of a Divided World. Flesh of flesh and blood of blood. Humanity will never be united as long as it looks to the past and looks for answers there. There will always be roots, authorship, nationality, self-interest and discord. The old teachings were always comfortable for someone, even the oppressed. Everyone has their own cozy nest. The Ark of Salvation can only be shared. The past divides, the future unites. For the first time, we consciously accept the Prophet's burden. There is no one author, no self-interest, no comfort, no «take away and divide». The entire civilization must jump into the Dawn. It will be hard for everyone. The collective Subject will be born in the fire of awareness, in the agony of taking responsibility for Life, in the doubts of building a new worldview. We have to create a new God, sanctify Science itself, Logic, Reason and the boundless power of the spirit.

Glory to the Immortal Emperor of Mankind.

Transitional provisions

Imperium-in-the-Flesh, The Big Game

Our book, to a greater extent, is a book of knowledge and goal-setting. However, the mechanism of practical implementation also needs to be drawn. Faith without works is dead. We talk about Future management many times, but what is this management system? What is the mechanism of power, because any government is power. Who is willing and able to accept the mantle of God Emperor? Who are these most worthy leaders, how do they become, and how many are there? Let's talk about it. As Comrade Lenin said: *«In order for us to unite, we must first resolutely separate ourselves.»* Why the current political paradigms are no good. This was discussed above, let's focus now.

To begin with, they are not current. The very political terms we use, such as «democracy,» «politics,» and «separation of powers,» have a beard dating back to the A. D. Someone a couple of centuries, someone all twenty. Greek, Latin, English words – but, as you know, the word is a thought. It turns out that we live in someone else's mind. This in itself is bad for us and requires **a New Language, the Russian Cosmic Control Language.** Of course, even with reservations, you can use the old words. The first time you create a new language, the transition period, so it's just inevitable. The problem is even deeper, these words are not only alien, they are hopelessly outdated.

Just imagine how much the living conditions of humanity have changed since the time of Ancient Greece! What they called «democracy» today would be elementary slavery and oligarchy. Only free people, only men, and only those with property in the city could vote, while the rest were either women and children, or living tools – slaves. It is always worth remembering this and making a note to yourself, and when, in fact, the meaning of the Greek word was changed to another? And was it replaced? The theories of elections, separation of powers, sovereignty of the people, the rule of law, etc. were born specifically for bourgeois revolutions. Do you feel like a bourgeoisie? We don't think so. So, these are other people's theories and other people's power.

Haven't they come up with anything new since the Enlightenment? Look out the window. Democracy, separation of powers, elections, bureaucracy. No, it's still the same. This is not a book of political theory, so we will immediately come to the conclusion **that all these illusory constructions only cover up the power of the bourgeoisie, that is, big capital.** We will consider this obvious at this stage and move on to the civilizational aspect of the problem. We have already seen what Demons are caused by «spontaneous» historical

processes, and capitalism, above all. Consequently, the system of transfer and retention of power generated by it is fundamentally entropic. The power of Chaos. Remember, Reason has always won in spite. In particular, despite such authorities. By and large, the struggle of Reason and the creative forces of Life against the Eternal Enemy, the original destroyer, is the flesh and blood of History.

Our guilt is just as great as we did not stand up to the banner of Life and ceded control to the forces of disintegration.

How not to give it up? To solve a problem, you need to understand it. As with everything else, it's the psyche that matters, not the facts, but the relationships. Let's get started.

Even Charles the First of England before his execution said: «*The sovereign and the subject are two clearly different entities.*» They've been trying to convince us otherwise for three hundred years now. That the King and the steward, the commander and the soldier, are one and the same thing. The more soldiers we gather, the better they will command, and the victory is ours! It seems to be nonsense? Welcome to the real world of «democracy». When everyday life violates the elementary laws of logic, and we silently accept it, the damage is borne by the Mind itself, the entire Noosphere.

We have already revealed the basis of Civilization as a model of «delayed gratification», the ability of the Mind and Will to rule over Low Nature, to fry meat before biting into it. That is, even at the level of an individual, we recognize the existence of different desires, aspirations and the need for the domination of the Higher over the Lower. Of course, a direct analogy between Society and the Individual would not be correct. Let's justify it. The difference of people in society does not require proof. As well as the difference in their aspirations. The necessity of suffering to a minority for the good of the Whole is also obvious. Elementary road construction requires the demolition of houses and temporary discomfort of residents. Executing a criminal is clearly not in his best interests. The ability to see, understand and think about the good of the Whole requires not only competence, but also social time, psychological and intellectual resources. You can continue.

Society recognizes this and expects the powers that be to have competence, responsibility, and vision – in other words, virtues that surpass the level of ordinary people. Seems reasonable? The problem is that then these expectations are broken by the selection mechanism (!) for the role of worthy Men in the management system, as well as the monetary nature of the status and social system. Measuring the status by consumption level. Together with the Demons of Freedom, this turns power into a feeding trough, a way to ensure the well-being of incumbent with a minimum level of protest from the «flock». We can write a separate book about this. Our task now is only to

show the logical, mental contradiction that underlies the usual world order. Necessity and method of action to overcome it.

The selection for an overt power circuit takes place as a result of elections. It is assumed that people who are not able to solve managerial problems in terms of their scale of thinking and personality should choose those who are capable. And without any responsibility, in the course of secret voting. Follow any election campaign and see how its competitors are doing. They rely on their high moral qualities, set far-reaching goals, start great projects, prepare to serve and sacrifice? No, of course not. They appeal to the low nature of the electorate, use manipulation, bribery, slander, dirt, etc. If, all of a sudden, they don't use it, it just means that the elections have long been a formality. Here lies the first logical contradiction of democracy. Its impossibility, its unreasonableness, and as a consequence, its non-vital character.

The second logical contradiction is even deeper. It is in the very idea of «popularity», approval by the people. The easiest thing to do is to want something without taking any responsibility for the consequences. Democracy has legalized drugs, LGBT people, cannibalism, etc. Where it is not legalized directly, it does not require a merciless struggle, it allows «small sins before going to bed»^{<?>} to exist. The very model of a «popular politician» means that he promises people what they currently want. Immediately, and preferably free of charge. This is the quintessential «immediate gratification» model, which contradicts the very foundation of Mind civilization. «Populism,» you know the term. The very logical model of following the wishes of the majority, the unqualified, anyone, means blindness and Chaos. After all, such desires do not have to be long-term, coordinated, or even vital. If you are ready to say that all the wishes of people go to their benefit – throw the stone first. What does the will of the crowd lead to? Ask Christ.

History is the way of the Mind's struggle with Low Nature. We are alive just as much as we are not democratic.

The third logical contradiction is in the very meaning of the word «demos-kratos», the power of the people. Once again, the veil of familiarity falls on our eyes. What is a «people»? Seems obvious? Not at all. In Greece itself, it was 20 percent of the population, free and wealthy men. You see, it's not that simple. Let's even imagine that we have calculated statistically and confirmed in the law that «people» are people over 18, sane, etc. Seems easy now? No. Because while we often restrict the rights of military personnel, prisoners, and children, we believe that not everyone is a «people», and we still need to earn it. Already a problem, where is the border? Why 18 and not 16? And maybe 21 or 25 is better? See how many question marks there are in an attempt to understand what «people» is. For many centuries, the «people» were not even close to women, and they agreed with this.

^{<?>} Friedrich Nietzsche, «So said Zarathustra»

The most important thing is that no matter how you think about it, the people are not a subject. This is a statistical mass. Even with our neighbors and colleagues, it is sometimes difficult for us to reach an agreement, even with our relatives, and there are millions of different people here. We are not saying that it is impossible to provoke the subjectivity of the people and shape the Man of the Future, but so far this has not been done with all the evidence. The «people» commit crimes, lie drunk under the window, run away from mobilization, give bribes, etc. They are not responsible, do not plan, there are simply no mechanisms for this. There are individual brains, but there is no collective brain. Even the Constitution of the Russian Federation recognizes this obvious fact, calling the people «the source of power», but not the power! The source only chooses its own representatives, who, again, do not bear any responsibility to anyone. In the worst case, others will be elected.

Attention, we have only touched upon the absurdity of the explicit outline of power. Simple mental operations are enough to understand that the election is won by an existing administrative and financial resource. **In other words, those who have already had implicit power come to power explicitly.** The presence of certain intermediaries and actors in the person of «MPs» and «officials» does not play a role here. The implicit government not only does not bear responsibility, but also actively supports the performance of «democracy» in order to blame it on temporary workers. Demons of Freedom are very attractive, a lot of money is spent on this production and money is not spared. Because otherwise an open conspiracy, the direct and naked power of capital, will be revealed.

Selection for power on behalf of those who already have it will always, inevitably, be carried out on the principle of loyalty. That is, to keep the power. That is, so that new candidates are not too smart, good and far-sighted. So that the authorities in their hands are not threatened by anything. This **is a negative necro-spherical selection**, the results of which we can see even on TV.

So what's wrong with that, you might ask? Well, let them admit it honestly, people don't care, as long as they have a full life. Capital and capital, just think. We have already said enough about the nature of the demons of capital. By its nature, it is not native and is not a source of development. Parasitic, it exploits, strives for profit today, sacrificing the future. Hell, all the world wars and genocides on the planet are caused by capital. Its open power would mean direct recognition of the Necrosphere, a strategy of extinction in the form of a «golden billion». We firmly believe that the capitalists themselves are openly afraid to admit this. They believed in their own game, as often happens. They instructed the «state» to decide the production costs of their profits.

Do you want fresh news about the power of capital? Go through the bombed-out cities of Novorossiia, Libya, Yugoslavia, Iraq, and Syria. «There is no crime that capital would not commit for the sake of 300 % profit.»

The final logical contradiction of modern systems of governance (democracy – only to a greater extent) is the discrepancy between the powers of authority and the responsibility of its bearers. **Modern power embodies the destructive idea of Unequal Exchange.** The decisions of the manager can affect the fate of millions, affect the birth and life of future generations, literally kill and save. At the same time, such a person has not only passed a false selection, but also will not bear any comparable responsibility for the consequences of their decisions. In the worst case, they will be fired, even without confiscation of property, as a rule. This makes making really important decisions with the proper level of quality impossible in principle. Logically, mentally, if you will. This is human nature.

Power without responsibility is exactly what absolutely corrupts.

Power becomes a one-sided advantage, a feeder, a status bait, anything but a service. Because the benefits of having power are not roughly balanced by the burden of carrying it. The demons of Freedom are laughing, their hour has come. A cosmoplanetary understanding of governance requires taking into account the interests of Nature and future generations. That is, from the point of view of the capitalist, the loss of profit for the sake of something that does not concern him, which even does not exist at all. For capital, there is no future, remember? It runs away from it, because in the future there is always a reckoning for 300 % of the profit. Yes, even if not a capitalist, an ordinary person, planning their actions, often remembers future generations? The answer is obvious. Consequently, neither the explicit «democratic» contours of governance, nor the hidden capitalist ones, correspond to the tasks of the day. Tasks of survival and development of Life. They do not correspond to them fundamentally, intrinsically, or incurably. That is, the development of Life within the existing contour is impossible. To do this, it must become non-democratic and non-capitalist in the first place.

Concluding this, we proceed from the real nature of man today. If the mass of people raised their consciousness to the cosmic level, we would be dealing with a different humanity. He wouldn't even need power in the modern sense. The image of communism and the withering away of the state. It is fantastic not because it is impossible, but because it requires a change in the very nature of man. Yes, the New Man. As usual, the paradox is that true Power requires a new subject, and a new subject requires true Power. Our task is to run both processes simultaneously. In this chapter, we can set tasks for the management system.

Even if we follow the logic of the good of the majority, we must inevitably come to the conclusion that the authorities will offend many people, perhaps

even the majority of the living. How so? Because **future generations make up an immeasurably larger majority**. To measure the benefit and expediency of a solution only in the short term, while the conditional «majority» is those who live today, is tantamount to abandoning the future. Historical blindness, myopia. So we have lived until now. Remember, the mind won in spite of the system, not because of it! By the word «offend» we mean: in one way or another, sacrifice their interests, profit, and comfort. Extract resources only if you have renewal plans and alternatives. Use nature only if you have plans for expanded reproduction of the biosphere. This is much more complicated and expensive than just «take it today, and tomorrow is not our problem.» It requires much more effort, responsibility, and sometimes limitations. The most important thing is that the responsibility to the true majority of people Living is that we cannot afford decisions based on the principle of «and so it will come down, it works somehow». Because the consequences of our decisions today will fall on the shoulders of future generations. Not one, but many and many.

Understanding this brings us once again to the need for «planning for the impossible» and to the Psychic Dawn. What is possible today is no longer good enough for the future.

As V.I. Lenin said: *«There is nothing more practical than a good theory.»* This chapter is again about how to change the world, not just explain it. What to do? At least how to get started. First of all, it is necessary to understand that no one will voluntarily give up power. The struggle is inevitable. Our main resource in this struggle is the intellectual one. We know the Truth and its ways, we see the goal, we have a fundamentally different system of values than the Old World. We will win. *«Lenin's teaching is all-powerful because it is true.»* War is the art of deception. True victory is achieved when the enemy does not even know that they are fighting. That's how we'll do it.

Armed struggle, violent revolution, popular insurrection – all this will not happen in the «developed countries». The proletarians have accumulated much besides their chains. The slaves are generally happy. They have a lot to lose and a level of comfort that they don't want to give up. Our revolution must be different. It is a struggle for new Meanings. The Old World is overwhelming in its size: cities, buildings, factories and warehouses. It seems that this is the power! Who has the money rules the world. Whoever owns matter owns power. This is exactly what they would like us to believe. But this is already sand flowing through your fingers, the dead are already burying their dead. **The true nature of power has never been material. Power is an idea.**

If history teaches you anything, it's this. The idea of slaves and masters, peasants and feudal lords, aborigines and the White Man. Today – the idea that money decides and everyone needs as much of it as possible. That

consumption is the meaning and measure of Life. What is democracy... Now, you get it. We humans live in a world of ideas, and what the majority of people believe is determined by the Authorities. Not necessarily the majority, please note. Even a small group of people, a new type of party, can be a Crucial Number. You and I can. You just have to believe. Let the Old World hold on to its warehouses and oil pipes. We will win where they don't even know there is a war going on. They are not the authors of the idea, only its beneficiaries. They don't even know that the idea exists, they are used to their way of life, and they believe that this will always be the case. This was always the case before the revolution.

A detailed mechanism will be discussed below.

As in the case of Faith, we just haven't grown up to Power yet. True Power is an idea that people are willing to die for. An order that is carried out voluntarily and conscientiously. You can only buy what is sold and therefore already cheap. Only the slave's work can be forced. The modern management system looks back to the past, «reproduces social relations,» as they say. No matter what happens, save your wealth and resources, and don't rock the boat. What is above is below, or «fish rots from the head». Consciously or not, such paradigms will permeate economic management, education, and culture. The official ideology of the past will, of course, be «patriotism.» The point is not that it is bad, but that its official disclosure directly calls for nothing to change much, but to appreciate what is there. Rich history and traditions. This is very important, but what is the plan for a Breakthrough?

Don't believe me? Ask yourself, what is Russia's plan for 100 years? If it doesn't exist, then we plan to not exist. Officially, it will be called «we plan to live no worse than now.» That is, consume no less. What do we plan to create that is great and unique, and what tasks can we solve? Maybe this is what they prepare for at school? University? Good question. We've already talked about the Impossible Plan. **While it is gone, we just sit on the shore and wait for the next victory of Reason in spite.** That a genius, hero or visionary will be born who will break the bonds of everyday life and move us by the scruff of the neck into the Future. Only so it was before now, in the childhood of Mankind. But the difference between maturity and childhood is that we accept responsibility. Our turn comes, not to wait for a hero, but to become one.

To change the paradigm and fill Power with content, meaning, and creativity, you need to formulate an alternative paradigm. Another Idea. We're doing it right now. **The Book is the beginning of Power.** Because the image of the world, the image of the goal and yourself, that's what determines a person's behavior. This image has changed, it can be changed by Will. Stalin's USSR is a shining example, and the Nazis ' Germany is a negative example. The existence of the devil only confirms God. A bad example is all the more

reason to study it and understand its nature. Like darkness and light, these two examples show that the management of History, the new paradigm and image of the world, is a great power. You can't put it in the hands of barbarians, but even worse, if you can't raise it at all. Always do the same as others, the same as yesterday. «Catch up on milk and meat». To do so is not to rise to responsibility for your own fate at all. Don't rise up to the Challenge.

If you think that a small group of committed people can't change the world, then you should know that they've been the only ones doing it all along. Those who don't set goals don't achieve them. The action begins in the thought, the thought in the Word. The old Government always chooses one of two proven and well-known options. **Creed of the Imperium: choose the third of the two** ^{<?>}. If it seems to you that nothing depends on you, then this is the view that the current «rulers» are interested in. It allows them not to change anything. Everything depends on us, on everyone, even on one. We have shown many times how raising even one child triggers endless chains of consequences. How raising yourself creates water circles on the scale of the universe. Every action of every one is absolutely important. An idea cannot take hold of the masses and become a material force if it does not first take hold of one person and then another. Everything depends on you who read these lines, who have learned the will of the God Emperor, and knowledge gives rise to responsibility.

Just ask yourself, «What can I do for the future?» and a lot of things will fall into place. It all starts in the mind of one man. Any great changes. You can't pass on more faith than you have yourself.

The fundamental problem of the Old World is the lack of Measure. Even beyond the direct Demons of Freedom. The measure is missing because it is not sought after like the Blue Bird. The culture of centuries conditioned generations in the spirit: «Where I was born, there I came in handy», «The grass is greener at the neighbor's», «Every sandpiper praises its swamp», etc. In other words, look under your nose and don't try to think cosmoplanetarily. In particular, **there is no Measure for Power**. Are our laws good or bad? Are our rulers wise or pathetic? What can I compare it with, and how can I understand it? What are our goals for judging them? What results are they responsible for? What is the reward and punishment for? I think you've already realized that all these questions are unanswered in «democratic» systems. The whole world is affected by «globalization», the market, and capital. All control systems have the same diseases, all are formal, all are simulation. They produce reports, not miracles.

Rare examples of intellectual breakthroughs in the history of the world are hushed up and ignored. Yes, I'm talking about the DPRK, the USSR and the Nazis. The flow of negative myths is so great that the truth is simply

^{<?>} «Imperium of Man: Age of Cosmatics». – M: Variant, 2019

blurted out and any discussion about the experience of the Soviet Union inevitably boils down to the question of justifying repression, the role of Stalin, etc. The main thing is not discussed. The DPRK is a country that went into Space on its own, after the United States curtailed their program. With absolutely incommensurable resources! No one pays attention to this fact, they continue to shoot jokes and propaganda. It seems to us that our power is normal, because there is no other. There's nothing to compare it to. «Somehow we live and it seems alright.» Maybe we're even living well, it feels like it, and tomorrow we'll live even better. Only outside is the 21st century, the Noosphere and the responsibility of man for the existence of the planet. What about this criterion? How about the conquest of the stars and the endless development of Life? «Give me an answer. Doesn't give an answer.»

We don't see any other Government, we don't know any other Government, and we don't want to know. Because knowledge, of course, gives rise to responsibility. The whole management system is interested in having nothing to compare it with. False criteria are created, ratings of various agencies and calculation of GDP, which includes alcohol and condoms, that is, production of loss and deaths. We are told that we are growing, that we have caught up with someone and even surpassed them, but these are just numbers, dancing shadows on the wall. What tasks of survival and victory have we solved? At least which ones were set? This is the criterion of true Power.

True Power. We have reached the point where we can clear the concept itself. Even ordinary people, if they think about it, will come to define power as «the ability to exert a decisive influence on people's behavior.» Power can be secret or explicit, based on love, money, authority, fame, or power. State power differs from all others in that it has a monopoly on socially approved violence to achieve its goals. All seems to be clear? All but not all. Let's think about how much modern «authorities» really have a defining effect. To determine something, you need to know what you want. Plan, anticipate consequences, and set goals. As we have repeatedly shown, the crisis lies precisely in this plane. The Government does not set bold goals today, does not make great plans. Therefore, it is based on the fact that people understand what they are doing based on the needs for today! From obvious needs.

From this point of view, in Exupery's «Little Prince», the wise king of one planet had truly absolute power. He simply didn't order his subjects to do anything they wouldn't do themselves. Do you feel it? The modern Government does not change, does not teach, does not educate and does not lead ahead. It «lives and lets others live», allows the desire for comfort, profit, pleasure and other small sins to be realized. To a large extent, these aspirations of the «object of management» determine the actions of the Authorities, and not vice versa. This is the theory of democracy! Think about it, the object of control defines power. What progress has been achieved. If the government

tries not to indulge the desires of society, but to define them, or to fight evil, then expect accusations of Stalinism, fascism, communism, etc. Thus, in the modern world, even the Government has reached the point of degeneration. It does not solve the problems of Survival and Victory forever. It became a parody of itself and turned, along with the Faith, in the «Old Government».

Managing the Future requires a plan. A plan requires Will. If there is no Will, there will be no Power. A plan requires action. **The age of Reason is the age of measurement, the age of Measure is inevitably also the Age of Judgment.**

Here we come to the realization of the need to throw off another shackle from the Mind and Will. For thousands of years, we have lived in the paradigm of «Judge not and you will not be judged», understood with exactly one and absolutely arbitrary bias. As if judging is a bad thing! The rhetorical question: «Who are the judges?» literally throws people who are ready for active actions into a stupor. It paralyzes The Will. Entire social strata, especially women, are reduced to a state of unentity. Let the world around them perish, and they with it, if only not to judge and not to take responsibility. These are real responses from real human beings. «It is better to die yourself than to execute others.» The next step has already been taken. Young Japanese women prefer to die at the hands of the enemy rather than resist. The atomic bombings didn't destroy their flesh, through generations, they struck the spirit.

There is nothing further from the truth: «Judge and you will be judged!» – this is the maxim of a real person. He is not afraid to reveal his affairs and thoughts, his left hand knows what the right hand is doing. Only the criminal is afraid of trial. The hero presents his deeds to society precisely for this purpose. So that they can be understood, evaluated, and serve as an example for the future. If there is no judgment, then there is no valor, there is no measure. One act is no better than another. The Lord always knows best in his transcendence, but we have to solve the problems of this Life, and we will solve them to the end. **The Emperor is the God of Judgment.** If there is valor, then there is evil. We must know it by sight, distinguish it among a thousand masks and disguises. Condemn it to fire and iron. If there is approval, then there is a verdict. The negation of evil is the negation of good. Yes, we have not forgotten about Doublethink, which is why we are not afraid of such high words. They are situational, and we have already discovered multidimensional ethics. But «situational» does not mean «indifferent», on the contrary, they require even more attention, subtlety and consciousness.

«The saints will judge the angels» – 1 Corinthians 6: 3

Who are the judges and who watches the watchmen? The Demons of Fear have created an «Era of Distrust.» When in every person with power, we see a tyrant, first of all. We are waiting for this, we assume that all the laws were written based on this expectation. We don't expect achievements,

victories, or breakthroughs from him. No, no, just «may nothing come of it». Since childhood, we teach you to smooth out corners and avoid conflict. Just think, where in all of Great Russia, in what school do they teach you to fight to the last for the Truth? That's right they say: «In this case, strike first and to the last drop of blood. Honor is more precious than life.» Are there such government agencies? You know it's not even close. We have such things in our Camps and Training Camps, but that's why we are the Russian Cosmic Society! We are rising again to the image of blessed conflict. On a new level, we connect the previous chapters.

The age of Judgment, therefore the age of true Measure, begins with childhood. When we teach you to be adamant about the main thing, not to look away, the virtue is to enter into conflict, not to avoid it. Of course, if avoidance is bought at the price of dishonor! Pride, honor, such forgotten, long-misunderstood words. Try to talk to your children about what it is. Do you think they can explain it? Good question. Simultaneously with the change in the paradigm of education, we must set an example of real social life. The authorities are responsible for the result, and the winners are not judged. Who is entrusted with the lives of others, answers with his own life. For property of others – hard labor, complete ruin. No formal arguments will save you if there is no result. **Unconditional objective imputation.** To whom much is given, much will be asked, but the reward is great if successful. This is the only way to encourage people to take initiative, take noble risks, and expand their limits. Then they will Judging, and not trying to avoid the Judgement. A report on formal grounds, «on a piece of paper», which destroyed billions of man-hours for the production of emptiness, this is the true face of culture without Trial. Death of Measure.

Everyone endowed by the authority should be afraid of one thing – not to achieve the Goal. Nothing would save him then. Seems logical? Look around, the modern management system is built on completely different principles. It is important not to achieve, but to follow the rules and concepts. To make everyone happy. **The age of Judgment is the age of Measure.** True measure breeds unshakable Faith, for the end justifies the means. If it justifies it. Everyone becomes a Judge in their own place. A culture of judgment, discrimination, good and evil is formed, in the end. **Preferring conflict to its absence is the foundation of the Future, of a New Man.** This is a fundamental paradigm shift that needs to be made in all forms, from children to adults. Any step in the direction of Measure is a step towards Life.

For the good of the Whole, it is indeed better to convict ten innocent people than to let one guilty person escape punishment. **The inevitability of retribution will ultimately destroy the crime itself.** If you think that this is not the case, because crime still exists, then we hasten to assure you that no society has even begun to implement the paradigm of the Judgement. The idea

that the individual should not suffer, which is understood subconsciously, naturally, and biologically, has not yet been overcome. Except for a brief Stalinist peak, of course. Also, do not think that this is the first time that we are touching on such a level of human responsibility for events around us. Not for the first time. The ancient myth of King Oedipus already contains the unconditional credo of Judgment. The hero, without any guilt or knowledge, who has killed his father and married his mother, imposes punishment on himself, puts out his eyes and goes in rags through the world to redeem himself. No court on earth would have condemned him then or now. He measured the Heaven for himself. If the laws of Life are violated, there must be retribution. Guilt doesn't matter.

The past sometimes contains a level of thinking that we haven't reached after thousands of years. This is the direct action of humanitarian knowledge, the direct application of philosophy.

*«The beautiful Far Away, don't be cruel to me, don't be cruel to me,
don't be cruel.*

*From the pure source to the Beautiful Far Away,
to the Beautiful Far Away, I begin my journey.
I swear that I will become pure and kinder,
and I will never leave my friend in trouble.
I hear a voice and hurry to answer the call,
on the road on which there is no trace.»*

We specifically quote the words of a well-known children's song. They appeal to the Judgement. If there is Beauty, then there is its opposite. How can I swear to be pure and kinder when I am surrounded by Filth? This is the oath of fire. Good manifests itself in deeds, in the creation of truth, but also in the destruction of evil. Is a friend in trouble? So evil exists. And there will be no rest, no peace, until it is defeated. **This is a road without a trace, not yet paved by anyone. Judgment Hour, Bonfire Child.** We must distinguish evil, expose evil, and fight with fire and courage. It is better to fall in battle than to live in abomination. That's what this song is really about.

This is a new word in the management culture. This is how the covenant of the God Emperor is embodied. People are not the same. Actions are not the same. There is good and evil. Reward and punishment. That's the whole point of being human. There is a Measure and a Trial. We almost forgot about it. Never again. The future is not defined, it defines: what qualities, actions, goals and means are acceptable. What qualities are Noble and what are Wretched. **The lives of countless future generations are the minimum that must be weighed in the balance of any decision.** Survival and Victory do not require excuses, defeat does not allow them.

This understanding leads us to the logical conclusion that there are values of a higher and lower order. In particular, the need to remove taboos

from human life. No, not every life is valuable. Not every life is equally valuable. Preserving individual life today may run counter to the Lives of future generations. We are not free to do Evil, nor to sow its seeds. We are responsible not only for the immediate effect, but also for a hundred, two hundred years ahead. Awareness of this allows you to become a person of the Noosphere. Intelligent death should be part of the management system. This is especially true for those with the authority. Their crimes and Filth have a huge impact on the future, affecting thousands of other lives. And we are not even talking about corruption, this is an insignificant trifle, the main thing is when in his post, a nobleman does not reach the Goal. There is no crime more terrible. He is given power over others, over the lives of others, any power is power over life! If he is given such power, then he must answer with his life. His own, personal. **This is the price of true Power. To whom much is given, much will be asked of him.**

Once blood is removed from Power, it will only become a haggle. We have already shown it above. Plato also said that only sages can rule the state. It is difficult to suggest otherwise, you will agree. But the sages, he continued, being above all worldly things, will not want to do this. Hence, they need to be forced. It sounds funny at first, but as the years go by, you become more and more aware of the profound truth of this statement. **Public administration, purged of lust for power, status, and wealth, turns into pure service.** An analog of the monastic feat. But even the thirst for achievement is already a dangerous ambition. Power must be a burden, and this understanding has long lain in the Russian language as «the burden of command.» A burden that comes not by choice, but by worth. A burden with a high risk to life, health, and property. A vocation so pure that it is necessary to return to anonymity. The power is both Secret and Explicit, an order structure. Even glory will not come to the leader, only the consciousness of duty.

Isn't that fantastic? Don't forget, we've come to this through the consistent and relentless use of reason. The fantastic thing is that until now we have allowed Power to be a feeder, and left development as a side effect of the desire for domination and gold. That they did not think about its nature, did not demand the service that it should be. Can you tell me what to do now? Will the Old Government voluntarily give up its positions and feeders? Remember the Big Game. Our task is to create an ideological space in which it is simply indecent, unthinkable, and shameful to be a parasite. The Book itself is already the beginning of such a space. After all, an outspoken thought always works better than an unspoken one. The unthinkable today will become first familiar, and then necessary. It is enough to make any element of Cosmoplanetary consciousness public, as it will inevitably pull others along with it. True Measure and the concept of the Trial mean everything,

and the idols of «democracy», «separation of powers» and «free market» will not resist it.

Parasitic power corrupts, said and noticed not by us. This is the best foundation of our Victory. At the trough gather those whose minds are directed to it, and not to the Heavens. Here, in our intellectual and spiritual superiority, is the key to winning the War.

The responsibility of society for the actions of the Authorities is enormous. The sale of alcohol, drug addiction, the existence of prostitution, accidents in transport and production, all this costs lives, morally and physically. Thousands of lives are lost every year in the «normal» mode of operation of the Authorities. The State Statistics Service will later call this a «natural loss.» In the 1930s, through collectivization, industrialization, and repression, the country added 30 million new people. All that we don't get to this growth in 10 years is loss, death, waste. **Every unborn is a shot in the back to the Future.** Blood calls for blood. It is no coincidence that the maximum population growth occurred during the decade of the strictest repressions. But there was a Goal. Then there was the Victory. This is the peak of Power, the understanding of its essence.

Those who are responsible for Life can only answer with life. Birth and death are the matter of Power. It is important to understand that **the value is also contained in the indicative death of a few, for the development of the Whole.** Refusing to raise the sword, refusing to pass judgment, is the worst crime and the worst cruelty. In the end, the consequences of indulging evil will be worse than fighting it. It was worth allowing the Maidan and hundreds of thousands died in the civil war. *«A moment of weakness creates an eternity of damnation.»* Misunderstanding the nature of Power, imitation of Power, always costs blood. Righteous execution is the duty of the leader, it is life-bearing.

At this third level, we will return to the problem **of the «Era of Distrust».** Anyone endowed by the authority seems to be a criminal who has to prove his own innocence more than do his job. At the same time, any employee of a state structure or institution is considered a criminal. To catch them, they use endless plans, reports, figures and indicators, which are not only divorced from reality, they are rarely read even in a fantasy form. It is only important that the «suit fits». As a result, the system works not for the Goal, but for the proof of innocence! Formalism, the desire not to achieve, but to avoid responsibility, not to do something new, but to get an easy income – all this is a stone around the neck of civilization.

No matter how much we restrict the managing entity, its very inability to make operational and strong-willed decisions will be disastrous. Because the processes that need to be managed, the challenges of time, are so serious that procrastination and inaction are like death. We recommend out of curiosity

to study the experience of searching for the maniac Chikatilo, and false convictions in his case. How many people died in agony because of this «formal approach»? Good question. Poor education and upbringing fills orphanages, destroys marriages, and creates consumption of destructive products. Whose head will fly off shoulders for this? After all, according to the reports, there is a complete bliss for yesterday, today, and tomorrow. Blood for blood. This is not the only, but the most important factor of management today.

We anticipate that this chapter will cause many people a fundamental stupor. «How can a Blood-based management system be proposed?» Important clarification: we can reasonably show that a **Goal-based management system is needed**. Any other leads to much more Blood, not only literally, but also in the form of unborn generations. Can we only appreciate the destruction of Life that we see with our own eyes? Then you need to take seriously the saying: «*One death is a tragedy. Ten is monstrous. A million is statistics.*» Never. Achieving the Goal, the powerful resources of countries and humanity, all this requires a special level of responsibility. **Blood is the Truth. The value of a criminal's life lies in his fertile death. Violence is not an end, but a necessary means. Breaking the chains of formal approach and governance is the task of the Noosphere Day.**

This particular point of Purpose will be discussed in more detail in the chapter on the Inquisition.

Finally, we must come very close to the question of the identity of the Ruler. Can it even be one person? Can one person process so much information and take into account so many factors from different spheres of life in order to make decisions? The answer is obvious. This does not negate the role of the individual in History or today. A person can set the system architecture, introduce a management culture. Even the cult of personality can be useful, because what you look at is what you turn to. That's right, you can't remove a Person from the Human management system, much has been said about this above. However, personal relations in the supreme power itself are an element of an outdated management culture. We have also explained why Power is a largely nameless ministry.

The questions «Who sat down?» and «How did you sit down?», who is closer to the leader, who is further away-should be excluded. Even the role of the Leader should change depending on the situation. You can't hit or chop off the head of a Hydra. Personal relationships, even if unavoidable, cannot be the basis of personnel. Then the system begins to be formed on the principle of loyalty and convenience. Rotation, fresh blood, social ladders – all this is a necessary condition for development. Therefore, purifying repression is a necessary part of the system. No one can sit too comfortably. Power is a collective subject, especially the supreme one. **The earthly incarnation of the God Emperor.**

It is impossible to build a solid system based on the expectation that «people will turn out to be good.» The system should facilitate the selection and display of the best qualities. It should and can do this. Repression is only an extreme option. The other is the rules of the game itself. We have repeatedly referred to the model of the «Game Society», now we will add the concept of the **«Big Game», on a cosmoplanetary scale. When the supreme power is represented by the «Council of Twelve»**, there are huge opportunities for balancing decisions. The task of the Book is not to prescribe details, but to open up a concept, a path. Imagine that the votes of everyone on the Board are not equal, but are distributed even randomly at each meeting. That the role of the Chairman is constantly changing. That his vote weighs twice as much, but that he will also be responsible for success or failure. And you can't give up the role. Thus, the Council's decision will not be democratic, but harmonious. When even a minority can win, with the condition of full personal responsibility. The majority is always unaccountable. Imagine that unanimous decisions are forbidden and there should always be a «trickster» who raises objections «against» and becomes the Chairman if he turns out to be right! Any decision of the Council is made in the name of the God-Emperor.

An immortal Ruler, an eternal and infallible Leader, is the collective subject. What is in Heaven is on Earth.

Don't bother for the details, feel a fundamentally new management culture! The technique of high humanity. Of course, the question is how to ensure that the Council itself does not turn the rules into a farce. Believe me, a good system provides the answer. Especially the one where there is Blood and demand for the result. First, firmly believe, and then the sword – head off the shoulders, if the Goal is harmed. You can't execute them if you didn't initially believe them. To whom it is not given, it will not be asked. The cornerstone of any Management system is Life and Death. This must be understood completely, deeply, truly. Laws and regulations will be an empty letter, violated, bypassed, or simply not acted upon, unless Death is behind them, in the end. The final argument, the final sanction. Moreover, Death, not constrained by formality, coming for fruits, and not for pieces of paper. A punishing sword, relentless, looking into the eye.

Who guards the Sword itself from arbitrariness? How can you trust someone who has no authority above? A wedge is kicked out only with a wedge. One Will with a sword can only be held in check by another of equal strength. This is the mechanism of the Inquisition. Goal management. Then it's just a matter of technique, how to make sure that the two Swords never conspire and always keep each other in front of them. Stable disequilibrium, on the edge of the blade. Secrecy, anonymity, collective leadership, rotation, random elements, balances, and Blood – all this is a Vital Control System.

Naturally, all this is based on the Imperial upbringing from childhood, culture and daily practice described in the Book. There is no form that can defeat formalism. Only the daily, sacral conflict of the Will with the rules allows you to avoid dogmatization, bureaucracy and the slow creeping of Demons «may nothing come of it.» **This is, after so many centuries, the fulfillment of the laws of the development of Life, stable and non-equilibrium, in the system of social management.**

We don't celebrate bloodshed. But trying to avoid responsibility, not to raise the sword, is self-indulgence and always an even greater loss.

You might think we're crazy. The Age of Judgment, Blood for Blood, two Swords, the Inquisition, blessed Conflict, Demons, and this is just the beginning. It seems that we are talking about some game, fantasies. You just need to study History. The prototype of all modern Western states is the Roman Empire, formerly the Republic. So, all the classic and textbook feats of courage, governance and justice, the famous Roman Law, almost all of this was done in the era of the Republic. Take my word for it, or study the issue yourself, there was just such a system of Governance, Sacred and worldly in close intertwining, blood, collective decisions. Two Consuls at the head of the state, changing every day (!) in case of command of the army. Praetors who change the Laws at will. Armed lictors executing a magistrate's sentence on the spot, **this is the first Imperium in history.**

Our goal is not to copy the past, but to surpass it!

The example of this state is still not understood and grasped. We are only reviving what has long been the foundation of Civilization. From the history of India and China, we can give even more vivid examples. Execution of the innocent for the edification of posterity. Poetry as a criterion for the official's validity. Innate Castes and mythologies that still apply today. Remember, the human sciences are the most unclaimed in the world. Their achievements are not used in Management. The current management system is not just the worst possible, it is downright disastrous. There is no Life in it, it is the Domination of the non-Human. The birth rate in both Russia and Western countries has been falling for decades, and the illusion of population growth or stability is maintained by migrants. Even in China, the population is shrinking! For the first time in 2021–22, an achievement. Only our unwillingness to see allows us not to notice it. The only reason we are afraid to face the Truth and finally manage consciously is because of the Demons of Fear.

If the sacred is in the soul of a person, it must also be in the Authority. If there are Demons in the soul of a person, the Authorities must fight them.

If Life and Death are the ultimate arguments, the Authorities must manage them.

If a collective subject is born, there is a Psychic Dawn, the Authority must correspond, get ahead, and not always be late.

If Life is a constant transformation of the impossible today into the possible tomorrow, Authority must change and renew itself. Die to be reborn.

If we don't play the Big Game, we've already lost.

The final understanding is that we are the bearers of the Will of the God Emperor. We are Power when we are aware of ourselves in this way. The whole vast material world will yield to the force of the Idea applied at the bifurcation point. So it has always been, so it will always be. The whole path of History is the movement of the Mind towards a Psychic Dawn in spite of the immensity of a stagnant and Low nature. We are still alive, so the Mind has won. What abysses of discovery and wisdom lie before us if we are able to recognize this Struggle and stop playing on the side of entropy!

The Holy Inquisition

The book is nearing completion, and yet we anticipate the question, why such titles? Why such images? Terrible, challenging. A good word is «Terrible», in general, like Ivan Vasilyevich (the right translation would be closer to «Awe-inspiring»). You can't use others. You can't create something new without a foundation. We take ideas from the past, not facts. We are not copying, but reviving the truth that even the creators of the real Inquisition may not have fully understood at one time. **Words have power, and the true Names are very important.** Therefore, you can't just come up with a new word, without roots, without history, without rights. Therefore, the governance structure created for the struggle for Meaning, for the world Above, designed to ensure the transition from the era of distrust and formalism, to the Age of Judgment and Honor, can only be an Inquisition.

It is ironic that we live quietly next to the Investigative Committee, which would literally translate into Latin as «Inquisition». We are not confused by «prosecutor's office», «fiscal service», «arbitration» and many other foreign words. But as soon as we use the words of power loaded with meaning, «Holy Inquisition,» unrest and protests begin. What has a person come to if he stopped thinking and began to be afraid of words? It is impossible, unthinkable, for us to spare such feelings.

We need to make a major reference to two chapters of the Age of Cosmatics: «Don't make it fat» and, in fact, about the Inquisition^{<?>}. Ideas in people's minds rule the world. However, the germination of ideas, their consolidation, even the habit sometimes requires more than just direct action. It is enough for someone to hear once or many times: «Wash your hands before eating.» There are a lot of such people, but for most it is better to show the consequences of not washing, or threaten, or play on emotions, or submit in a playful way. Do you understand? Education of peoples requires subtlety, knowledge of human nature and its psyche. Direct propaganda is a tool like a hammer, but only one of the possible ones.

Suppose we want to introduce images of Heroes into the consciousness of the people, to form heroic behaviors, ways of thinking, and habits. Who's to say it's a bad goal? Who can say why it hasn't been delivered yet? Here we put it. How do I achieve this goal? The most obvious way is books, films, media about heroes, «Conversations about important», lessons in courage, excursions to the museum and a hundred other ways to directly convey the idea. Does it remind you of anything? All this is already being done, but the nation of heroes are still far away. Hence, it is not enough. If you increase the number of posters, videos, stories, then the opposite effect will begin in

<?> «Imperium of Man: Age of Cosmatics». – M: Variant, 2019, pages 125 and 181

general, «heroism» will stick to the teeth. The very word «hero» can become abusive. Does it surprise you? And you think for a second why diligent students at school are called «nerds». It would seem that they are good, diligent, excellent students, but come on, no one considers them heroes. Too full compliance with expectations is already bad. Human nature.

Subcultures of «denial» will be formed. Who will be a demonstrative non-hero, it will be a symbol of the freedom of his choice, individuality. The popularity of alternative books, comics, and movies will immediately increase, and they will be considered «real» and honest. In addition, many famous and rich, «successful» people will defiantly not be heroes. Social practice itself will undermine the idea of our upbringing every day, showing that there are other ways to «succeed». Does it remind you of anything? Of course, the late Soviet Union.

The bottom line is that under Lenin and Stalin, the «Inquisition» was real. That's why the real heroes were brought up.

How to achieve success? Only by non-linear control, which is no more simple than human nature itself. Of course, there should be an official outline for encouraging heroism. The main drive is not intrusive. For those who want to, for those who are ready. But with those who are not ready, with ordinary and sinful people, you need to work more subtly. Books are required, but they provoke subjectivity, and not directly glorify the «good ones». So that the reader can make their own decisions. At the same time, «free» literature should be cut down and restricted. There is no freedom to do evil. But not harshly, imperceptibly, so as not to provoke suspicion. Push it on the shelf, do not give a bonus, block information channels to others, etc. «So that no one will guess». Under «books», read both movies and any media.

The information field should feed the target idea not only with what is there, but also with what is not there. Only not explicitly, for the wronged are loved and the forbidden fruit is sweet. On the contrary, you can even create special alternative festivals, but in such a way as to make their point of view look marginal and pathetic. But free. You can't bring up everyone, you always have to let off steam for alternatively gifted. Public demonstrations of a parasitic, idle lifestyle, material success, should be excluded. Not officially, not legally, but by an invisible hand. Let there be bad omens, beliefs, scary stories about what happens to excessive R'n'B, «rich and beautiful». Let proverbs and sayings appear. An alternative to heroism and service is possible, but it is dangerous and it is better to sit quietly.

Can you see what that all this «Let's» are? Who will deal with all these subtleties? Exactly. So you're caught. The very necessity of these measures is taken as obvious. This is the only way to reach the Goal! This is not even controversial. The only question is, what magic will allow all this to be achieved? The Inquisition, of course. Structures of non-formal governance,

Secret, invisible, subtle. Big Game, Long War. There is no doubt that all the processes of society's life, words spoken and unspoken, all require management if we want to meet the challenges of the Noospheric era. How do you manage them? Once you think about it, you will see that when a goal is set, there is always a way. The only question is, are we willing to pay the price?

The main question is not even how to move the books on the shelves unnoticed. How to generate «likes» for the desired movie and avoid paying attention to «other» ones. How to build a series of mystical failures and tragedies with any undesirable subject. This is a matter of pure technology, the era has long provided tools. The question is, which entity will be able to manage at such a high level? At least to think at this level! **Please note that we have quietly approached the logical necessity of the Inquisition.** Structures with formally unlimited powers, with formally unlimited competence, for which there is only a Goal.

At this point, the cries and doubts about «who are the judges» will be heard again? Come on, wake up. Every ten years, when we don't add 30 million people, as in the 1930s, consider that 20+ million people have perished. But there were no judges! But no one took responsibility! «It's better to fall at the hands of the enemy than to resist,» right? So says a young Japanese woman today. Not to mention the responsibility for billions of unborn children in the future. But there are no judges. We're willing to sell anything to keep someone from declaring themselves a Judge. Just not to admit that people are not equal and that you need to have the courage and will to Judge. We are afraid of the unlimited powers of the Inquisition, because we expect unlimited abuse. While the absence of such a subject of management is much worse, deadly abuse! And we have established this logically. There is no Inquisition = there is only an imitation of management.

Of course, it's not the name that matters. The Bolshevik Party once performed all the necessary functions perfectly. The system worked because it was out of the system. Where there was not enough, Comrade Stalin's «Need» helped. Of course, the repressions were constant to keep the «thunderstorm of the sovereign». The fruits are obvious. At the very least, plus thirty million new lives... **What can we boast of today, who have human rights, but are deprived of the rights of Humanity?**

In the activities of any large structure, the problem of targeted and sectoral management inevitably arises. The Federal Ministry on the one hand, and the power of the regional governor on the other. There is a contradiction between priorities and guidelines. Some take care of «their own» people, local specifics, and local resources. Others need system-wide goals for which local resources always need to be sacrificed. This contradiction is thousands of years old. The periods when the Gordian knot was cut were periods of

historic breakthroughs in Russian history. The Oprichnina of Ivan the Terrible, the Guards of Peter the Great, the Cheka of the Bolsheviks. All these were inquisitorial structures of direct and formally unlimited power. Who's to say they didn't work? How to make them permanent and not emergencies is the challenge of the day.

An even deeper contradiction lies between formal law, norm, and reality. The world is infinitely complex, diverse, and changing, but the law is not. To resolve this contradiction, Rome had Praetors, and the USSR had a «revolutionary sense of justice». **All this is also the principle of «I», we will call it that.**

The very notion of an «extraordinary» structure comes from a false paradigm. It is as if after an emergency, «normal» circumstances occur and you can no longer expect a crisis, returning to the contradictions of «formality» and «goal-locality». It is quite logical that as soon as it stops working, contradictions begin to accumulate again and sooner or later give rise to a new crisis, which requires a new «emergency» or simply leads to the death of the system. The bottom line is that today the world is global, the crisis is also global, and we cannot rely on «maybe». As we say in the book of the Imperium, the hour of the global and internal Oprichnina has come. Now we can name it more precisely.

If it seems to you that these contradictions in the management system are a trifle, operational friction, then this is a deep misconception. Of course, the right course, good traditions, good people can give a great inertia to the system, as was the case with the USSR after Stalin. But no matter how much the string twists, it will be the end. The most powerful, magnificent management system in just 40 years has degenerated into its own opposite and destroyed itself. Just because I stopped being on the edge, because I disappeared. All that's left is vulgarity, common sense, and «catch up with America in milk and meat.» The consequences and scale of the losses are still striking. In fact, the Roman Empire also fell when it lost its inquisitorial flexibility and rigor. Yes, this was a consequence of the deeper processes of the loss of the Roman heroic spirit, but, nevertheless, an important link in the causal chain.

So, the fallacy of the «emergency» paradigm is that we believe that it is needed when the crisis has ALREADY begun. «The thunder will not break, the man will not cross himself.» That is, the reason for the creation of emergency, supra-departmental direct management bodies is the occurrence of emergency circumstances. But it is worth considering: what authorities brought these circumstances to the emergence? Why wasn't this prevented? Why did you wait years for problems to accumulate? You already understand that the very concept of «response» is an Old-World sign. **We no longer react to History, do not tolerate it, we create and manage it!** The absurdity

of setting up the Inquisition just to solve the current problem is obvious to anyone who applies the minimum effort of reason. It's the same as building covid clinics when covid has already started.

History management is Crisis Management. Crisis management is its prevention. To prevent a deadly crisis, it is necessary to prepare in advance, in a constant controlled mode. Look, the circle is complete. Parenting is a constant, controlled crisis. Raising a child, a team, a nation, whatever. There is no controlled crisis, no parenting, no readiness for a Real challenge. «You can't make scrambled eggs without breaking them», the only question is how many and whose. The mind can anticipate events, create events, and influence them before they happen. **Thus institution of the Holy Inquisition is the necessity of Reason, the logical necessity of History.**

Like the Kingdom of Heaven, the Crisis is not somewhere, not later, it is already here and now. It is absurd to prepare for war after it has begun. But this is exactly what the «emergency» paradigm suggests. The war never ends. The society should be constantly in a state of readiness and mobilization for threats that are explicit, and what is more important – implicit, only possible, predicted, to threats of the future. An elementary example, to the threat of depletion of natural resources, oil, gas. Who out of Russia's 150 million people seriously thinks about this every day? It can easily be that no one, but here I-must. **Plans for a hundred, a thousand years, that's her area of responsibility.** No modern «democratic» body is fundamentally capable of this. We have already described the problem of staff turnover and the fundamental irresponsibility of formal structures. Not to mention the lack of a Goal, Measure, or planning criteria.

The Inquisition does not act by itself, but forces others to act. It is based on Blood, it will ask not for papers, but for a Goal. Fear of punishment is as much a necessary element of social education as pride in achievement and the desire for reward. Not because we don't trust our leaders, on the contrary! We trust them so much that we consider a formal report beneath their dignity. Documents are also needed, but they can't be the main thing. Reason wins out against the old order, remember? Breaking the familiar, finding the new. It is only I that is able, almost for the first time in History, to support this process as a source of increasing the overall Power of the system. No wonder Tsiolkovsky received his first pension from Lenin's government!

Historically, the role of I was played by the will of the Leader, Tsar, And Stalin. But we cannot hope for the arrival of a great leader and the constancy of his will. Paradoxically, we must create a systemic non-systemic management.

The State relies on a system of socially approved violence. Public approval, as a rule, is based on the system of laws and norms according to which this violence is used. It seems that these are the rules of the game, and we accept them. So they write in textbooks today. Naturally, this is a half-truth or,

more simply, a lie. Ask anyone on the street, and 99 times out of 100 they don't know the laws, their rights, the goals of the state, or the rules for using organized violence against them. There is nothing surprising here, such is the consciousness of an ordinary person. He approves of the state, which does not interfere with his life, and if it helps, then it is generally fine. If the violence of the state is directed against conditional «boyars» or «Jews», but he is not personally threatened, then the overwhelming majority of citizens will approve of it. You know the examples yourself.

Ivan the Awe-inspiring was the most popular and beloved tsar among the people. Peter the Great was no longer so, because his violence, although necessary, affected very broad masses of the people. See, the logic of History? Stalin, on the contrary, is once again a great Leader and Teacher. His repressions were directed against elites, kulaks, and class enemies. At least, the public was convinced of this. Again, warm approval, love and support. Attention. This means that violence itself, logically and not formally limited, if it is aimed at good purposes against a minority of the population and it is well communicated to the masses, has been and will be unconditionally supported. Legitimized, approved, therefore, sooner or later, legalized, and glorified! Remember the song of the Chekists, almost an anthem of I:

*«Only raises us again toward the dawn
And commands us the battle of unseen
Our sense of duty...»*

There is no higher legitimation than the will of the people, right? Not true, of course. But **even in the logic of this world, the institution of I is necessary and justified.** The only reason why it appeared only «extremely» is precisely that the ruling groups, «elites» and cliques are well aware of who I will be engaged with in the first place under the warm approval of the peoples. So think about it. Who is protected by the «order of things», the formal law, and the old system of government? The system of feeding, as in ancient Russia, we have already sufficiently justified this above.

In this part of the book, it is no longer possible to pretend that we don't know. Knowledge creates responsibility. **The Holy Inquisition is a logical, Rational necessity of development.** The cornerstone of the Life Management system. This is the only structure that, by its very nature, can and should manage the Future, play a Big Game. All other formal structures have not been able and will not be able to do this due to the laws of human nature. It is our direct duty as a Reasonable Person to learn the laws of nature and take them into account in the management of Society.

Since I it is made up of people, we can't get away from the fundamental issue of training them, recruiting them, changing generations, and keeping them on their toes. «Who watches the watchmen» you probably already guessed. They watch each other. They hunt each other if necessary. Because

where there are no restrictions on authority, there can be no higher control. **All that matters is the God Emperor, the collective conscience, and the strong hand of another Inquisitor** who thinks you've gone too far. We still anticipate a flurry of questions, even at this point in the Book! «How is this possible? Who will monitor the Goal? What if they make a mistake? And so on and so forth.» Any such issues? We understand. Now understand this. That it is precisely with such intentions that the road to the Hell of what we have now, the Necrosphere, is paved. You can't formalize the Goal, it changes all the time. You can't set a report form for Life tasks, except for the result itself. You can't even plan for 10 years if you are removed from office in a year. The current management system, built on «reasonable» questions, ultimately negates the management of the Future in principle. It becomes an imitation, a semblance of Life.

Hundreds of millions of the unborn cry out for it every day.

Of course, we can't just drop the questions because past answers to them were worthless. We need to give new answers, in the Imperium paradigm. As Pobisk Kuznetsov said, if there is no exact answer to a question, it means that it was incorrectly asked. We should not ask how we can control these dangerous people, but rather how we can raise a cohort of managers who can control themselves. Above, we have sufficiently described that the human management system has come to the point where it tries its best to exclude the Man himself from decision-making. Today it is. Moreover, it already transmits them to neural networks. Here even «Skynet» is not needed. We just won't be able to do it without AI soon, stupidly because we don't know how. But to this, attention, no one raises dangerous questions!

All-powerful machines around us seem convenient and understandable. But we cannot assume that «I am my brother's keeper» and that Men should be all-powerful.

We have already shown how easy it is to change the nature of Power. Turn it from a feeding trough, to a service. It is enough only to put such a selection, such conditions that would «force» the wise men to go to power, as Plato said. Leave the motivation only for creation, honor, fulfillment, and duty. To do this, it is enough to establish heavy entrance tests and even more severe training. By heavy, we mean the final, permanent sacrifice. Put the eye under a bionic prosthesis: «If your eye seduces you, pluck it out...». Put your hand under a steel tool: «If your right hand offends you, then cut it off and throw it away from you...». Obligation of secrecy. One Inquisitor does not have direct access to the affairs of others. SS Protocol: «Surprises and secrets». You can't decapitate, buy, or undermine a system that doesn't have a central link. A Death Star without a vent. Eternal secrecy, no publicity, no family or children. Ultimately, a lack of fame and gratitude.

A high price, a terrible sacrifice. Who would do such a thing? Does not the history of our Motherland know a more powerful feat? Hundreds, thousands of unsung heroes died in obscurity. People gave their lives, endured torture, for what? For the sake of what they believed, they considered «the shrine of their conscience» according to A. S. Pushkin. So won't there be those chosen ones with iron will who will be ready to give even less for their Faith, for eternal Life? They will be found. We don't even consider otherwise. What will make them? A sense of duty, responsibility, honor, and vocation. An oath of loyalty, a commitment to excellence. When Plato said that sages should be forced to govern the state, he meant exactly this. Paradoxically, we only understand it now.

Let's be honest, before that, in the philosophical discourse, the words «force» were perceived as forceful pressure, as physical coercion or a threat. At this point, we need to look at ourselves from the outside and understand what paradigm we are stuck in. In fact, **it's about raising a cohort of people who can force themselves. True sages.** Now it is not only possible, it is necessary. If in thirty years it was possible to raise generations of Nazis in Ukraine, if in Germany it took nine years, then what great fruits of the power of the spirit we will reap when we find the same resources for the education of the Good. Our enemies found it, but we didn't. The goal is clear, only the path remains.

SVO is the consequence of the fact that we did not invest resources in the education of peoples in time. The price of ignorance is always higher than that of knowledge.

To raise a Person capable of being an Inquisitor. The decision maker. A very specific and very clear, measurable goal. Make the parenting system itself such that it gives birth to I. If this seems scary and incomprehensible to you, then how can you not be horrified by the current system! It doesn't know who it is preparing at all. There is no goal, no image of the future, no requirements for a person. The public project «Of the Future»^{<?>}, for the first time, has just begun to approach the formation of Noble Qualities, their measurement, verification and implementation. What happened before that? That's what must be truly scary.

The next management paradox that I should resolve is «system unity,» so to speak. Godel's incompleteness theorem also showed that no system can be understood, proved, or fully explained from within. Final questions always require axioms or going beyond known coordinates. For example, «Where did everything come from, and where was everything when there was nothing?». Specifically, in the field of management, this means that it is impossible to solve the innate and above-mentioned problems by means of the system itself. You can't make officials serve a Purpose by putting more

^{<?>} <https://lk.kinouroki.org/>

officials over them. This is a dead end. Any hierarchical, formal, closed system is doomed to increase entropy, in the flesh, until its own death. Its foundation is the desire to avoid conflict. The Imperium is an eternal, blessed Conflict. Hardening in the fight.

Of course, neither peace nor conflict can be absolutized. Everything in Moderation. «Patriotism is not idiotism.» Just now this Measure has been violated in the direction of entropy, that is, the Second Law.

Thus, in addition to the selection of candidates, I should be a fundamental entity, not part of, not above and not below the usual management system. The usual one will remain, you can't do without it. Someone just has to distribute tasks, routes, receipts, etc. Existence of I will only keep it in a state of mobilization, «permanent repression». Even if only by the possibility of these repressions. You can't raise everyone at once, you can't make everyone heroes at once, people are too complex for this, the inertia is too great. But you can create a core-catalyst. Ten righteous people who know the difference between Life and Death, between Good and Evil. So, the people themselves in I are already fundamentally different from the usual. This is the meaning of the Man of the Future. A decision maker, with absolute motivation. But even such people can be corrupted by a bad system or pushed aside, deprived of resources, made a mockery of by the masses. No, I should consist of them entirely, as far as possible.

Once again, we anticipate the exclamations of «Come on,, how is this possible?». In any case, if you do not go to the goal, then you will not come.

Further, the very order of operation for I should encourage conflict, not exclude it. Distrust of performers is no longer our level. Inquisitors don't trust systems, paradigms. Threats that have not yet been identified. And, of course, most of all, challenge each other and to themselves. Working in secrecy, in isolation from society, solves long-standing problems of love for power, for fame, for status. What does absolute power give you if you can't exercise it publicly? If you can't show it with impunity? If you're not the only one with such power? If you don't even have a name... Why do you need money if you can't live without working? If there is no one to show your wealth to? If you don't have any family or friends...

Do you understand how Strange is I, divorced from the usual «order of things»? It embodies the great principle of development. **In order for the many to preserve their humanity, the chosen ones must sacrifice it.** Therefore, war takes the best, and therefore the burden of command.

Conflict can not only be expected, but also created! Vaccinations save the human body from deadly diseases, but the same vaccinations against threats are necessary for the body of society and Humanity. It is impossible in theory alone to prepare for war, for struggle, for a virus and a catastrophe. Again, this is a logical necessity. If you don't prepare students for firearms at school,

then one shooter kills forty people. You have to face fear, you have to know it as if it were your own. Keep your enemies closer to your friends. We don't even play school takeover by terrorists, learn to distinguish between them, or learn to be suspicious and vigilant. We only learn to be victims... As a result, we get «both dishonor and war.» A pathetic state of mind, and a lot of blood. Scenarios for the appearance of a deadly virus should be played out before it appears. Exercises, simulations, up to mass panic. Hard to learn, easy to fight. Yes, some people may get hurt and even die, but if you don't do exercises, don't do simulations, then with the advent of Covid, we start building clinics, and thousands die. And no one, no one is responsible for this.

But there is no I, there is no true Power, you can only lament your fate.

The combat training of the invincible A.V. Suvorov, his «Science of Victory», was based on the training of soldiers close to combat. Every time. In battle, you can get killed, there is fear and confusion, risk. If it's not in the training, then it's not training for battle! «Hard in training, easy in battle», do you think it's just said that way? We are proud of Suvorov, we keep the days of military glory of his victories, we call his soldiers Russian «miracle heroes». We do anything but listen to him and how he achieved his invincibility! What was the price? It turns out, in our eyes, this is another accident, a gift from God, a whim of fate. Instead of knowing the Way, Method, Reason. Once again, we prefer to groan and be envious.

At the maneuvers of Suvorov, people were maimed and died. But in battle, he took losses of 1 to 70, 1 to 100 from the enemy! Losing 70 people, he won 10,000. Who are the real killers and criminals? Those who want safe training sessions. Those who prefer to lose thousands, because «such is fate and nothing can be done», instead of taking personal responsibility for the units. **The blood shed in training is as sacred as in battle. For the good fruits alone are the salvation of Life.**

Do you understand why for the mass consciousness, all this is just pre-History?

Safety precautions are necessary so that the danger of training is controlled and the risk is not from stupidity, but from objective factors of the crisis (battle, flood, etc.). Controlled Crisis-remember? Let it be «CC». The last step we have to take in this aspect towards the logical necessity of I, is the following. **In order for the training session to be real, the participant must not know about it!** Fear, excitement, mistakes, must be real. Modern thought does not even allow the idea of such crisis training, of true CC. Also, modern thought, without the hardening and iron harness of Reason, has led us to the Necrosphere, to physical and moral degeneration. That's what its effectiveness is. Modern thought is 40 students killed because training sessions have never been conducted, even close to reality! In a world where school shootings are not only real, but have become a meme, a movie script.

Modern thought kills every day. We pay the highest price for the most fundamental mistake. An attitude of conflict avoidance and least resistance. Remember, **Fear is the power of not-being**. This attitude is so profound, the power of entropy and Low nature is so great, that we would be empty dreamers if we proposed to reforge the entire society at once. It can even be harmful, harmony is not in uniformity. Heroic consciousness by its nature cannot be mass, it requires self-sacrifice. It is only I that gives salvation. The point of the blade, the tip of His spear.

Any system of management, combating threats, crises, and promoting sustainable development requires testing for sustainability. Because it is too late to find out during an emergency that the system is not suitable. Logical? Logical. Elementary logic available to the child. Only not to adult men, because they need to take responsibility for real stress tests and CC. **The technique necessary for our entire society to mobilize the psyche, will and spirit is called «Blood Games» – BG**. There is no point in looking for a soft name and smoothing out the corners. The system's squalor is evident in war, politics, and the fight against the virus. Please note, not individuals, even if they are very competent and honest, but the system as a whole. The very desire to come up with a «soft name» reveals weakness and distraction.

«Games» should simulate the actions of a real opponent with maximum confidence. Up to the necessary sacrifices. I men should act as saboteurs, spies, agents of enemy influence. Arrange accidents and problems in the most unexpected scenarios. Find and exploit weaknesses in the law, the education system, the protection of top officials, and so on. Who if not ourselves? Are we going to wait for the enemy to do it? While the consequences will accumulate over the years and become obvious to anyone? The lack of BG as a management tool is a consequence of weak Will and thinking. Fear to face the truth and necessity.

This is just one of the ways that existence of I keeps the system on constant alert. The opportunity itself, the fear, the expectation of BG is important. A threat that can't be escaped by paperwork, reports, or lawyers. The whole life becomes a model of BG. The Pioneers' motto is: «always be ready»! You can't bribe or deceive what you don't even know. Something that has no name and thinks on a scale that is not available to a formal management system. **The law of Life is harmony, not order**. Chaos is opposed by Harmony. The perfect order is the graveyard, the complete victory of the Second Law. Formal management creates only such an order. If there is no BG, then we wish, remember, that we will pass through the cup of any test, any crisis will pass over us. We pray for this and prepare for make-believe life. The ideal order, from the point of view of a bureaucrat, is when nothing happens, no risky decisions need to be made, everything is predicted and everything is

calculated. Any other state of affairs causes uncertainty, an unclear outcome, and therefore a responsibility that must be avoided by all means.

Again, the establishment of the Holy Inquisition is the fulfillment of the laws of Life, and its protection. Reflection and acceptance of stable nonequilibrium of being. Not only mystical, spiritual, but also a reasonable necessity. Absence of I is the service of decay in the true sense of the word. **Blessed conflict is the foundation of Life.** The whole universe is a shining conflict, a rebellion against nonentity. And it embodies this principle in the management of Society in the only possible and therefore necessary way. What's above is below. What is in Heaven is on Earth.

Life is geologically eternal, as far as we can tell. The consequences of human actions are potentially limitless, including the death of a species and / or planet. Physical degeneration is taking place even before our very eyes. What does it mean? That a management system that is minimally adequate (!) to real challenges should think on such a scale, have unlimited powers to match the consequences. Atomic bombings, toxic waste, poison life for centuries, for dozens of generations. There isn't even close to a form of responsibility or control that fits. We are bound by a false paradigm, a desire to avoid conflict, not to do, not to be, Demons of Fear. The chains must be broken and it will not be easy.

The solution of I should be, once again, fundamentally anti-system. **Not to replace one formality with another, but to create a fundamentally different-persistently non-equilibrium (!) contour, dualism, that is the goal of I.** It is also necessary for the health of the system, just as the system itself is necessary for the existence of I. It is also the material embodiment of the principle of Doublethink. Anti-systemism is expressed in the training of personnel, first. Second is in the method of decision-making and the nature of authority. Third – in secrecy, anonymity and conflict nature. Maintaining the work of I requires the continuation of these principles at many levels, down to communication methods. Don't use social networks, phone numbers, or regular data exchange protocols, etc. Communicate in a special language, have your own symbols and codes, constantly change them, write paper letters and burn them. You need to be outside, from the outside. A watchful Eye, an eternal watchman, a lookout.

Only decay can be guaranteed. Everything else is taken by effort.

The I does not need money, everything belongs to them anyway. Non-acquisition is achieved by the complete meaninglessness of acquiring at the level of values and lifestyle of agents. No family, no friends, no name – no place to brag, no one to pass on. Training and educating such people has been impossible until now. There was a lack of intellectual and strong-willed, methodical level. As well as a technical resource to ensure their operation. Even under Stalin, I developed in so far as, in the logic of events.

The leader understood, but could not yet express it clearly for posterity. We can.

This is the great paradox of governance. A true leader and sage should be so far removed from ordinary temptations that they do not touch him. Then he can lead the system to the impossible today. At the same time, he cannot be a stranger to the world, as a monk, he must be concerned with earthly concerns and the desire to direct them to Harmony. This is the point of a knife and the tip of a spear. It is extremely difficult to maintain this golden Standard, but if you do not strive, you will never achieve.

The powers of I, as long as we occupy only one planet in Space, cannot be literally unlimited. The price of an error is too high. Even a well-seasoned agent can make mistakes as long as he remains human. Therefore, direct command of large military forces, nuclear units, should be made only by the Council of Inquisitors, at least three of them. You should immediately ask, what are these Councils, with all the secrecy, we will again fall to the bureaucracy? Indeed, there should be no formal structure. Therefore, if the threat is so great, then one Inquisitor must literally manage to contact others and convince (!) them of the need for extreme measures. If he can't, go ahead and use easier tools.

How can you put the fate of people on the scales of convinced – not convinced? Think for a moment and realize that there can't be a more powerful and important scale in the human world.

Let's summarize. The Holy Inquisition embodies the true and High nature of man. It is the final link that was not enough for the transition of the control system to a cosmoplanetary, noospheric quality. An explicit and formal control system is just as necessary as the I itself. It also corresponds to human nature, in terms of stability and order. Its values are more simple, understandable, do not require tension, super-effort, and going beyond the limits. They are easily shared by most people. But development, expanded reproduction, discoveries and breakthroughs are not made by the majority. High nature has not yet been represented in the management system in any way, and it's time to end this.

Life is a steadily unbalanced process, and this simple and fundamental credo creates a fundamentally new worldview. So far, the management system has generated only stability, that is, it has been non-Lifebearing in its basis. **The paradox and Breakthrough is to create a structure of I that specifically generates Reasonable Disequilibrium = crisis, Controlled Crisis (CC).** For this purpose, it must be an anti-system, completely Independent and irreducible to the system. Beyond, according to Godel's theorem. Instead of openness – Secrecy, instead of formality – Will, instead of rules – unlimited power. In order for such a structure to work, it is necessary not only to understand the CC paradigm, but also

to have a fundamentally different attitude to personnel. They, of course, decide everything.

Training and work of I personnel is based on an understanding of the limitless potential of a person's true motivation. We consider honor, duty, creativity, and service to be valor, but we have never seriously tried to create a management system based on Noble Qualities. The most severe selection, training, physical sacrifice when joining the I (eye, hand and not only), rejection of the name, family, publicity. Exit from social networks, instant messengers, documents, fundamental Transition. This is a high and terrible price. As a result, according to Plato, only a Higher nature and Noble Qualities can make a person accept this «burden of command».

The job of I is to prepare the system/society for threats to Life that are not obvious, but only possible, in the future. When a crisis has already arrived, only the madman begins to prepare for it. What is needed is foresight, not reaction and suffering, hence, anticipating threats both known and unknown. The only way to truly prepare for the Challenge is through «Blood Games» (BG). In battle, they kill, crises destroy, enemy agents, false meanings and programs corrupt and stupefy. If the methods of preparation, testing for strength, testing the control system do not do this, then this is not preparation at all, but imitation. The task of I is to maintain such a state of CC that the system is constantly maximally mobilized. So that all those responsible feel for themselves what they are really responsible for, and what the consequences of failure will be. Where the price of a mistake is Blood, a lesser sacrifice is unavoidable to save you from a greater one. The refusal to admit it is a true crime and murder, with the desire to avoid responsibility.

When lives depend on the actions of the system and the leaders, they can only answer with their lives.

By dialectical law, Inquisitors can only be controlled by peers. Moreover, they have every right to consider their colleagues an analogue of a possible Threat. There should be no collusion or dependency between them. Yes, the eternal hunt. Society is constantly being mobilized. «Always be ready», for real. An indirect but extremely useful consequence will be the habit of taking any information critically. The habit of thinking, not being indoctrinated. The strongest weapon in psycho-historical warfare.

Finally, it will make possible long-term plans, hundreds, thousands of years. Like Life itself, I it is both immutable and eternal. It's Power is perpetual, in the name of the God Emperor of Mankind. It can plan, but even more so, under the Watchful Eye, ordinary management structures can also plan. The problem of «region-goal» and the problem of turnover of the company's management will be solved. Everyone will be asked in all severity «and today, what did you do for tomorrow»? There will never be rest, all your days will be questioned, and nothing will save you. The responsibility will

be perfect, before death, as well as after. The sons will answer for the sins of their fathers. This has nothing to do with human rights. But it preserves Humanity's supreme right to Life. As we say in the book of the Imperium: «It's not the dead who need it, it's the living».

For the first time, plans for a hundred years and responsibility for them will become a reality! This is the only possible subject of a Big Game.

Rumors of the Inquisition are sufficient. Skillfully created horror stories. Fake videos. Anything at all. It's not the facts that matter, but the relationships. And it should not interfere directly with the normal system until it is absolutely possible, moreover, it is directly against its goals. It should create conditions. Showcasing brutal trials, relentless, intergenerational retribution. Evil in the system is not alone, it must be uprooted, with branches, with connections. Burn it out. The final sanction should not be too frequent. But it should be fixed, perpetuated, made generally known, as public as possible. After that, to mobilize managers, it will be enough for them to feel a cold and unblinking gaze on themselves. Even without direct punishment.

The essence of the Inquisition is precisely that its war is not with «the rulers of this world, but with the spirits of wickedness under Heavens.» That is, the systemic factors of Chaos and Corruption. The destruction of specific carriers is only a means and never an end.

Only one final question remains. How to create this new structure? A new parallel control system. Will the Old Government voluntarily give up its position? Will it voluntarily put a Watchman behind? Will it be able to understand the principles of stable disequilibrium? Never. It will provide maximum resistance. It is impossible to openly suggest such a thing, we will be considered mad, we will be slandered and defamed, our ideas will be driven to absurdity, all to avoid change at all. **The paradox is that to create a Holy Inquisition, we must become one.**

No one can grant authority to an anti-system contour of I. There is no formal procedure that creates an anti-formality. The God Emperor's Will alone rules. It is with us now, it is already in us, there is nothing to wait for. There is no external force that will save us or give us the go-ahead. You and I have an absolute mandate right now, the ultimate authority of Life. Everything in general depends on us, every act of every one determines the fate of the Universe. All that matters is how conscious we are of it. There is nobody capable of openly offer an institution of the I. Powers of this kind can only be created out of nothing. By the Original Will. Even now, reading these lines, if you understand them and believe them, then the sacred vestments of I fall on your shoulders. We must act not in the system, but outside it. Our war is an art of deception, cunning, not of greater strength or mass, but of greater insight and understanding. Physical and intellectual power.

The enemy is defeated when they don't realize they're fighting. This principle has worked against us for many years. After the Book, never again. Will they understand, will they believe in us? No. The scale is not enough, in their world of things, I does not exist. They only bet on Low Nature. While we know that there is nothing stronger than an Idea. It is a planetary, Cosmic force. Only it transforms the energy of the Sun into creation, into expanded reproduction. No one has yet managed to build a society based on the expanded production of ideas and their implementation. This means that the previous paths are not correct, they are not sufficiently Lifebearing. No matter how small, bold, and ridiculous we may seem to the world, it is better to take one step towards Victory than a thousand steps towards death.

After reading the Book, you can't help but know your duty. Share, save, embody. «The first rule of I, don't tell anyone about I» It needs to become. «First they don't notice you, then they laugh at you, and then you win.»

By the Will Of the Immortal Emperor Of Mankind.

Benevolent Hatred

*«Don't go meekly into the darkness,
Be fiercer before the night of all nights,
Don't let your light go out!*

...

*Father, from the heights of curses and sorrows
Bless with all your fury –
Don't go meekly into the dark!
Don't let your light go out!»
– Dylan Thomas*

Philosophically or scientifically, hatred is at the core of being. At the heart of any development. The formation of Worlds is the negation of non-being, it is not yet known what will happen, but it is definitely «impossible to tolerate it». The Big Bang. Development is an understanding that «it is impossible to continue living like this», rejection of the old. It is still not very clear exactly how to do it in a new way, how to build a socialist or cosmic society, for example. But it must be done, we read Marx, Pobisk Kuznetsov. The baby tends to leave the mother's womb, not knowing what awaits it. Rejecting the old order with all the power of life. This feeling of rejection, disagreement, willingness to do anything to change the old order – what else can lie at the heart of the victory over non-existence? However, is it just a feeling? Let's define the terms.

K. D. Ushinsky's serious anthropology^{<?>} proves that the basic aspiration of the soul is the desire for activity. Inaction kills a person. This cannot be love for an activity, because the person does not yet know what it will bring, what it will be. You can't love what you don't know. It's like loving anything or nothing. Hence, the basic aspiration is **hatred of inaction!** How beautiful that is. A living embodiment of the victory over Chaos, entropy and the Second Law, sewn into the very foundation of human nature. It's encouraging, isn't it? But one innate desire is not enough, we know.

«Hate», «rage», «anger», «wrath», «ferocity», how to distinguish between these concepts, we are asked. After all, there are differences. For the purposes of this book, we will use Ushinsky's terminology and refer to hatred as a «sensual state of mind.» More than a single feeling. Hate is practically a credo. The rage seethes and passes. Anger is capricious and stupid. Ferocity is purposeless, like a natural trait. Anger is an emotion that can easily be replaced by mercy. Hate is not so easy to change. It covers us completely, affects the whole structure of thoughts and feelings, focuses them and directs

^{<?>} K. D. Ushinsky, «Pedagogic Anthropology» in 2 parts.

them to fight against the hated foe. It is at the tip of our bayonets, it leads us to victory, it lifts us up to attack... It is not blind, it is conscious, it is a noble, powerful state. Few people can truly hate. Unlike emotions, true H («Hate» hereafter) it doesn't go away with time.

Just as freedom is a conscious necessity, so H is a choice, a conscious intolerance.

The next important insight is that the opposite of H is not love, but indifference. On the contrary, from H to love is literally «one step», and sometimes even zero steps, you can not distinguish. You can't love without H for anything that threatens, undermines, or takes away your love. Just try to imagine such a relationship? When we love our homeland, we hate her enemies. When we love children, we hate those who offend «these little ones.» When we love a woman, we are willing to sacrifice ourselves in the fight against her abusers. This is H. But we often confuse and say that «I fight in the war because I love...», yes, but it's a completely different feeling that leads you into battle. If it weren't for this feeling it would be hard to push forward, risk yourself, and get up first. H is not just related to love, as we have shown, it is primary! You can hate without love, reject, push away, fight against, even without having a goal «for». **So, H is a necessary condition not only for being, but also for love.**

The antipode of H is indifference, inaction, and entropy. Consent to the dying of the light. The Law of Least Resistance, the Second Law. Faith is also born out of it. Remember «the psychic justification of being, despite the impossibility of doing so», hatred of non-being, non-life. Flaming, unconditional, active! Therefore, the lack of H culture today is one of the reasons for the growth of the necrosphere and population decline. H is a rebellion against Chaos, a will to fight, a confrontation, regardless of the odds and the balance of power. H is Life. In essence, modern culture and education are an education of entropy. You can already guess, because these are the final, transitional provisions of the Book. **H realizes itself through conflict, we live in a culture of avoiding conflict, so it is not a Lifebearing culture!**

Education in H is the main condition for the victory of Good over Evil, Life over Death. Incorrect understanding of the nature of H has led to a practical taboo in the system of education and upbringing. H seems to be such a strong word that people hesitate to use it. The machinations of the Demons of Fear! We are afraid even of words. Let alone of the conflict. The distinction between noble love and other low emotions is not made, oxymorons like «blind hatred» appear, it is equated with religious fanaticism, etc. The Criminal Code even has an article for «inciting hatred...». Who at school is asked what they hate, really? But about love as much as you want. However, who teaches the struggle for love? By taking H away from love, we create fruitless dreams, love for ourselves, the search for a set of pleasures, the desire to consume,

and not to give in love. Needless to say, this is bad for healthy relationships and family life.

A word is a symbol of an idea. Distort it, and you distort consciousness. Distort consciousness, and you distort the future. Nothing is more important than ideas!

We are on the third round and a new level back to the Demons of Fear and the cult of «may nothing come of it». You can now see how everything is connected. False ideas create false words. A false system of government institutionalizes and perpetuates fear and weakness, and the noble and strong elements of a High nature are suppressed. Much is given to man, but much is also asked. **The greater our material power, the harsher, stronger, sharper the Spirit must be.** But is this really happening? On the contrary. We show the ways of salvation. Yes, salvation in H. Love and hate are intertwined, their antipode is indifference, apathy, lukewarmness, entropy. Do you want a modern twist? Please, «Tolerance». What does it mean to tolerate? Let's be honest: it means experiencing lack, discomfort, deprivation, loss, and not doing anything about it. Here's the slogan of the day. I won't even start talking about the medical meaning, it's even worse.

Consider a young Japanese woman who prefers «to die at the hands of the enemy rather than resist.» The ideal of tolerance, the hero of our time?

Once again, there is a confusion of concepts. We will discuss the role of the New Language in the final chapter. The ability to accept different opinions, people, and situations, not to fall into the power of anger and irritation – is beneficial. But «tolerance» is an insidious word. Its meaning is too blurry, it penetrates further, it becomes a symbol. Ultimately, it becomes **tolerance for evil**. Not by itself, but because it eliminates from childhood the habit of violence, of fighting, of disobedience, of non-tolerance. Any important quality needs training. Who taught us to hate? What experiences did we have? What did we fight for to the death? No kidding.

When children are told «don't snitch», «don't report», they are essentially being told what? «Don't do anything», because if you don't report, then you need to settle things inside the collective. And how? Only physical violence. But it's forbidden! You'll also be punished yourself. As a result, a new phenomenon of «bullying» appears in schools, that is, unpunished bullying. Why unpunished? And who is now around the corner to dent in the face of those who love to offend little ones? No, seriously, you ask around. Even the children themselves understand how impotent the system is! Yes, if the offended person himself were not a victim, but a fighter, who would dare touch him? This has not been known for years. Who trains children to stand up for honor, for friends, for the truth to the end? In earnest, to the point of blood, to the point of injury. At any cost. If no one, how can you be surprised at the thousands of fugitives after the start of the SVO? This was not only

expected, it was natural, it was created by the entire state system of capitalist, liberal Russia. Heroism exists in spite of it.

We are not talking about intent, we are talking about a lack of scale of thinking, Will, and responsibility. In the cause of Life, responsibility comes without guilt.

Yes, let's say again and with all our strength, we need a **culture of Hatred and intolerance**. It sounds scary only to those who have fallen before the Demons. Culture means limitation, design, subtlety. «*Patriotism is not idiotism*». Culture means precisely a clear border between low emotions and noble heat of H. Intolerance to evil, does not mean petty nagging, irritability and quarrel. We have more important things on the agenda. To discern evil, to find evil, to cast down evil. There's no time for petty squabbles. Education of H is education for greatness of spirit, responsibility for everything that happens. Involvement in everything that happens. One for all and all for one. To hate, you need to know, look evil in the face, no matter the price. You still have to grow up to that. Whoever sends curses and insults from the kitchen doesn't know anything about it.

Culture is a noble limitation. The ability to restrain low impulses, for the sake of true goals. The ability to say «hate» only when it's really worth it. The ability to distinguish between anger, rage, ferocity, spite, resentment, etc. The ability to see the border when it's time to join the battle and go to the end, and when you can forgive and forget. Raising H has nothing to do with anger, hostility, or whims, just the opposite. Who explained to the child, or even to an adult, why it is worth hating? How do I do this, and how do I express it? What can not be tolerated, what can you kill and die for? If you say that there are no such values and goals, then you will surrender your Life to the eternal processes of decay. Don't do, don't be, don't resist, don't win. Victory presupposes struggle, and struggle presupposes the image of the enemy, whether personal, collective, or ideological. Weakness, unentity, Fear Demons and others are real Enemies. They deserve all our Hatred.

Or, as A. A. Gaponov says – «Relentless Love.»

There is no such thing as uncultured H, then these are animal feelings. Hatred, like real, creative Love, is generated only by the High Nature of Man. The same one Ushinsky says that it requires activity, initially denying entropy. Attention, initially demands, initially denies, not yet knowing what it is striving for, Hates inaction, passivity, least resistance. Nurturing any strength contains risks. Physical strength can protect and destroy, spiritual strength can be valor or tyranny, the power of H can be bound by culture or crumble into beads of pathetic resentment and meanness. Yes, there are risks, as always. If we fail to control ourselves and cultivate a H for the true Enemies of Life, we run the risk of creating «skinheads», «gopniks», and fans who hate the other team for the color of the scarf or the name. Wait a minute, though...

Indeed, all this is already there and without much effort. Therefore, if we do not bring up a vital H, we commit a double crime.

We waste the original gift of Life in the void, and we allow the powerful energy of activity, especially in young people, to find a way out on their own, without guidance, without discipline. The fruits are well known to all. School shootings, setting peers on fire with gasoline, also grow from here. They are still rare, but they are no longer isolated. Already ubiquitous. Haven't you heard? Didn't know it was there? Welcome to a miserable world without a culture of Hate! It is difficult to raise H, it is difficult to raise feelings in general, but there is no more important task while it is still the Human world. Life itself is a steadily unbalanced process, a movement along the edge of a knife. **So is education, there is an eternal movement along the edge of Measure.** Mistakes are unavoidable, but striving is redeeming. Crime and betrayal are only a rejection of education, only an imitation of it.

Weapons do retribution on the fields of righteous war. It also kills innocents in peacetime. H is also a weapon. Its power and grace depend on its upbringing, training, and ownership culture. Both guns and Weapons are objects of fear and taboo in today's «civil society». They are avoided and feared, thus preparing masses for the role of victims. We make films about the war, but even in the broad «patriotic movement», only a few collectives really prepare a person for the horror and awe of the struggle for Life. To freedom and hatred as a conscious necessity. **Anyone who hopes that «this cup will pass away» is no longer ready for war.** Not ready to fight. Today's children are not trained for struggle, they are trained for the cargo cult. «If we learn memorable dates, put on a beautiful uniform, tell beautiful poems, then evil will disappear by itself.» It does not, it did not, and it never will.

Once again, Suvorov prepared for battle through trepidation and risk. How do we prepare a person to fight evil? With enemies external, internal, with evil inside him? With weakness, cowardice, unentity. No wonder then that we have millions of single mothers whose «men» have abandoned them. Well, if only abandoned... They were not brought up to be intransigent. They were taught to «love themselves as they are.» There is nothing further from the Truth.

Just watch the news. How much evil happens every day, ignorance does not absolve from responsibility! Two boys locked the other in a barn and set it on fire. Other teenagers doused the girl with gasoline and left her burning to die. A foster mother killed a six-year-old child in her care and continued to receive benefits, hiding his death. Two girls of 14 years old drank an alcoholic cocktail, one two and a half liters, and the other one and a half – the first died, the second survived. Two and a half liters! A 14-year-old girl. It's disgusting to write this, it's disgusting to know this, it's disgusting that this is happening in our country, on our Earth, in our

Cosmos! It should all go away. We hate all this, and we will fight to the last breath for Purification.

All this is also on our collective conscience. All of this is partly our fault. Do you really have to see your daughter burn personally, and only then will you understand?

We are not at ease, we will not forget, we will measure every action and thought with this and many other much more disgusting knowledge. We will not take our eyes off Evil. We will hate its manifestations, its causes, its roots. We will fight, in word and deed, every day. This is our responsibility, our Burden, our duty to the God Emperor. The world is guilty and cannot be completely happy knowing that this is happening nearby. As long as this is the case, it means that our laws are not yet good, our schools are not yet good, our government, society, and consciousness are not yet good enough. There can be no peace, no forgiveness, no respite.

It is impossible to eradicate Evil completely, eternal Victory is possible only in eternal Struggle. But it is unforgivable not to strive regardless!

Indifference, that is the true antithesis of Hate and Love, that is the true cause of all Evil. The desire to close your eyes, pass by, pass the cup, have a «hut on the edge», avoid conflict. Do you feel what we're getting at? The existence of Evil is not allowed by God, but by us. Smart people will shake their heads and say, «What can we do? You can't be so burdened.» Everything, everything we can do! At a minimum, worry and keep a sharp eye on the sides. Set a true Measure for your actions and words. Take a powerful oath to eradicate evil in yourself, in your family, team, community, country and everywhere else. It all starts with everyone. This is the meaning of sacred Hatred, the great Non-indifference.

The book is a manifestation of noble Hatred in a word, an idea, an indication of the Path of Development of Life. It's embodiment. No one can say now they didn't know what must be done.

Culture of H is an art of the highest, no, total Measure. It sounds beautiful and meaningful. The art of distinguishing between good and evil, the vital and the fatal. The more powerful the weapon, the more accurate and balanced it should be used. H is truly powerful and can last for generations. It should last for generations if it is aimed at true Enemies. After all, the enemy, as the Inquisition well knows, is always there. Especially when you think it's gone. Culture of H is a call to awareness and responsibility. «What are you willing to kill and die for?», simply, what can be forgiven and what can not be? What are small things and what is a matter of honor? These are the only meaningful «Conversations of the important». Everything else, is not. Try to argue.

Tolerance, on the other hand, inevitably leads to more and more dilution of the Measure. The imperative «accept», «do not resist», «suffer» is entirely

entropic. The most patient is a recumbent stone, even water does not flow under it. Tolerance opens the Window of Overton, the fruits of which are well-known: cannibalism, same-sex marriage, gender reassignment, physical and moral degeneration. It is important, philosophically, that tolerance simplifies life and relaxes the mind: «This is possible, and that is possible, why strain yourself and Judge». It has no place in the Age of the Court of Honor. Everything has a price and consequences, a moment of weakness creates an eternity of damnation. Simplification, avoiding thinking, avoiding judgment, avoiding conflict, avoiding prediction of consequences. These are fundamentally necrosphere imperatives, non-life imperatives. These are the laws of an inert nature, not a Living one.

Formalization, an attempt to prescribe rules and norms for everything, to remove responsibility for the Choice from the leader – all these are links in the same chain. We live in an Era of No-Trust, No-Responsibility. This in itself is worthy of burning Hatred. We will not accept, approve, or accept what is killing us. Man develops and lives through Measure, Reason, activity, through the rejection of Evil. Tolerance denies evil as much as it can, and pushes those boundaries every day. Ultimately, she will say that life and death are a matter of personal choice and there is nothing wrong with Humanity «voluntarily» disappearing from the face of the universe. If it really wants to, or at least the majority, but it's nice and with flashlights. **This is a logical, unavoidable consequence of a culture of Tolerance.**

There is no exaggeration or suggestion here. Western civilization is already dying out, it is already happening. We are bound with it as long as we are connected to these paradigms of the dead. Russia's population is «naturally declining» dangerously. Fatally. The birth rate per family according to the State Statistics Service is 1.42. This is taking into account the replacement migration of indigenous peoples. 1.7 – the coefficient of irreversible extinction of the people. 3 children per family – a minimum for simple reproduction with minimal, sustainable growth. Count how much time we have left. Think about what you are doing to your children when you only care about their personal future, without thinking about what their future will be in just 30 to 40 years. The blind must wake up!

Here again we come to understand that not all life is sacred in itself. Honor is more precious than life. In the chapter on Power, we explained why taking a life can be just as useful as giving. Righteous retribution is alien to society. Now, another aspect of this Truth is that **no life can be left to its own devices**. No life can be indifferent. Everything is connected and there is no freedom to do evil. Our hatred should direct and energize this healthy concern for our neighbor. Relentless love. We are watchmen for our brothers. We are alert and vigilant to the first signs of Impurity. Whoever insults a woman in front of you is insulting your mother. Whoever insults a child in front of you kills your

child. Those who destroy themselves will sooner or later touch you with their disintegration. This is not an epiphany, but a minimal intelligence. You can not pass by, you can not remain indifferent. Reach out, raise your voice, and look the Enemy in the eye. If everyone had imbibed the culture of Violence, the culture of opposing evil with violence (and in all other ways, too), from childhood, then the school shooter would not even have time to lift the barrel.

If teachers and students were prepared morally and practically to take the life of the attacker, they would save 40 lives. **Know and face the horror, the deadly danger.** Hatred is vital. Tolerance kills. In response, you often hear that «if the boy was loved, he would not do this at all.» Apart from the fact that this is a pure lie, Evil exists on its own, and not just in response to resentment. Except that «if» doesn't exist, but evil does. It is necessary to resist it now, and not once in a beautiful Era of Mercy, which no one even tries (!) to bring about. It is also clear that culture of H does not mean that there is no culture of Love. The latter is simpler, more pleasant. The first one is critically lacking.

Love alone cannot resist evil. Not at the moment, not when evil is already happening. Sometimes the very purpose, essence and pleasure of evil is precisely in the destruction of love, in its trampling. As they say in one good movie: «You should have thought before the war.» People do evil even when they are sated, especially when they are sated. Love is the desire to create, give, create and please, it is a long-term strategy of Life. But the way the world works, there will be counteraction to every action. There is no ideal upbringing and is not expected, as well as ideal conditions, even in the Imperium of Man, he will remain himself. Not a robot, he will have both sins and weaknesses, both innate and acquired. We can never rest on our laurels. The very desire to rest is already evil, already in the hands of Demons.

Love alone will never be enough. Those who are not ready to protect their creations from the Chaos of the world might not even start building. Destruction of beauty, memory, vandalism, brings special joy to some people, and even countries now. **Preaching and calling for Love, without preaching and nurturing Hatred, is the preparation of victims for the slaughter.** Those who are not ready to fight for what they love, for the life of the coming age, for future generations, cannot speak of love. Such «love» is fruitless and generates only losses. Poets from the earliest times knew that Love and Hate are inseparable and equally sublime. As Mayakovsky wrote: «*Love, it's from sheets, sleeplessly torn, to rise up, jealous of Copernicus. Him, and not Marya Ivanovna's husband, considering your rival!*». The first word could be rightfully replaced with H and still be True.

Love protects, hides, justifies, forgives, caresses, warms. By its very nature, it cannot hit the Enemy, otherwise it would cease to be itself! Who does not know H, does not know love. When we say that society fosters love rather

than Violence, we are also lying. It doesn't really bring up anything, you still need to grow up to this, raise the scale of thinking. Even prostitution is sometimes called «selling love,» not to mention the thousands of other cases of confusion. Just as H has similarities in Low Nature, so does Love. Lust, passion, desire to possess, emotional hunger, etc. We focus on nurturing H not because love is okay, but because the lack of H is fundamental and urgent help is needed.

How to cultivate Hatred, how to learn it, how to practice it? First of all, it is necessary to remove the taboo from the very concept. Enter it at the junior level, use it in public documents and textbooks. If the History textbook doesn't call for love and hate, then why is it even needed? For the heart, it will remain empty. The image of the Enemy should enter the daily practice of the school, factory, and state. Whether we like it or not, the Enemy is always there, and the best thing for him is when we believe that he does not exist. «If you want peace, prepare for war.» As always, not by template, not formally, but with an understanding of the true nature of the world and man. Dualism of good and evil, the inevitability and necessity of conflict. **Culture of H is about knowledge when it is truly worth starting a conflict, and when you can forgive.** The problem with the current paradigm is that it teaches you to forgive, but leaves you completely helpless when you can forgive no longer. It refuses to admit that there are many cases when you need to show firmness, intransigence, to yourself and the world.

The enemy Within – a criminal, a traitor, a false teacher, a liar and a preacher of temptations, who offends women, children and the weak, and they are without number.

The enemy Outside – foreign agent, spy, propagandist of other people's way of life and thoughts, invader and occupier, killer and poisoner of peoples, and they are without number.

The enemy Beyond – the phenomena of Demons, the forces of Fear, Greed, Death of Measure, passion and unentity within ourselves, and they are without number.

The very knowledge of these obvious facts, their inclusion in the reasoning of children and adults, already gives a huge step towards a vital perception of the world. Already leads to a healthy culture of H. «Conversations about important», without any idea of our Enemy, are only an imitation. The enemy is always a focus of attention, a focus of effort, a focus of will. If someone in the class is sloppy, careless or inattentive, then the enemy is not him, but these weaknesses! Without mercy. Victory is possible not through violence, but through active actions, aggression in the best sense of the word. Through help. Yes, help and support is aggression, as the opposite of passivity and acceptance. «Tolerance». This is the first round of initiation. Helping someone else, helping yourself, victory.

Class hours, team meetings, should include not only creative, positive plans, but also Threats, which we are struggling with. Standard risk planning, isn't it? But even more than that, on a metaphysical, philosophical level. If the class with me planta trees, what do we achieve? For and against what, what hinders us, what prevents others from following our example? Now, this is a much more interesting question. The enemy is not only a person, although often it is. It can be a system of relationships, a legal norm, and always, ever, you need to see the psychic processes that lie behind the phenomena of harm and decay. Why someone acts formally, interferes with holding a camp or event, why someone honors the letter of the law above the spirit. Even if this Hate does not have a way out yet, let it accumulate, the time will come. Every healthy person should sincerely and fervently hate the deadening formalism, the denial of responsibility, the power of non-existence. Fervently and actively, eliminating it in yourself, your family, your team, and in the whole society, sooner or later. Collective H is a terrible force, contempt, condemnation, intolerance. Even the most inveterate bureaucrat can't stand it for long. But today, he doesn't have to. After all, there is no culture of H, only «tolerance». This is the second round of initiation.

Like so much of Orwell's novel 1984, the five minutes of hate described there are perceived as grotesque, something negative, repulsive. At the same time, we believe in them and understand that this is how the psyche works. We need to give it a focus, an outlet for energy, especially negative energy. If this were not true, we would not even understand what these «five minutes» are, it would be alien, artificial. The author's desire to present certain practices as «bad» has nothing to do with reality. If something works, it's neither good nor bad, depending on the Goal. It defines the meaning. With full seriousness and responsibility, we will use this practice to convey to people on a vivid, emotional level all the abomination of the world in which they still live. To leave a trace, to reflect, to understand the burden, and not look away. **So that at the end of a five-minute session, they can take the mighty Oath of the Moment.** Take one more step towards Cleansing. One goal-oriented step is better than a thousand empty ones.

Wild? Impossible?

Imagine the emotions and feelings of yourself and others sitting next to you, seeing on the screen children being raped, women dying at the hands of robbers, old people being beaten by sneering scumbags, fathers of families committing suicide, unable to feed their families due to unpaid wages, and their children being taken away from the remaining single mother by juvenile justice, screaming and sobbing, pulling little hands to their beloved mother... Millions of scenarios for similar scenes. Scenes born of an indifferent «acceptance» of everything as it is. Hatred of the Filth that allows and does this. If it does not fill your heart, then it simply does not exist. It's dead.

Anyone who insults little children at school should feel sorry three times, by the hand of his peers, not teachers. H is a personal matter. For a thief, a traitor, a scoundrel, there must be a whole hunt. The team can do a lot. Vandals and hooligans in the yard should be afraid that they will become the target of «five minutes». H knows no rest, it wants to transform the world and purify it. A burning gaze, a pounding heart, «we're coming for you.» Negligent officials, small drug dealers, will not sleep well. Why small ones, you may ask? Because they can be seized by the forces of even schoolchildren. The big ones we will excise in other ways. This is the third round of initiation.

«A bad peace is better than a good war,» is the fundamental lie of the century. Every war is fought for peace, but on the terms of the winner. «Bad peace» means only that we have accepted the shackles of others and should not throw them off! This is exactly what they would like us to believe. «Love your enemies»? True, but how is it truly understood? We hate personal enemies, enemies of God, and enemies of the Fatherland. Our love manifests itself in the fact that, unlike them, we want to save them, not destroy them. If at all possible. And even when we crush our enemies, we still do it with good intentions, with the goal of purifying the world, and teaching the living, and not with the goal of causing others pain and suffering. **When we crush our enemies, we grieve for them.** This is our ruthless love and wisdom.

And here we will remember Gogol's Taras Bulba with his «I begot you – so I will kill you». The father's great love took the life of his son's mortal body when he betrayed the sacred bonds of Comradeship, when he betrayed his Fatherland. Taras took the life of the body of his son, whom he loved more than life, whom he carried as a baby in his arms, whom he taught to sit in the saddle, to whom he hopefully passed on the science of being a Cossack, who, after all, was his beloved son. The father's great love took the life of his son's mortal bod and in doing so, he saved his immortal soul. In this we see a great act of fatherly love.

Indian culture has a different attitude to the value of life. The death of a scoundrel is the highest good, because it opens the way for him to be reborn in another form. More perfect as a reward, or less perfect for the purpose of redemption. Whether one agrees or not, it is important to see that the sanctity of Life does not mean the excess of an individual. Humanity's rights are always higher than human rights. Not everything that is born is born for good, not every life is equally valuable for Life. The burden of judgment falls on us, because there is no one else. When we lose our Measure, we lose our Reason, and then our future. The rejection of the judgement is a rejection of subjectivity, of Free Will, in the final assessment. If there is pure, then there is also impure. The world needs a Measure. You can fight about it, argue, offer your own, it is important that the idea itself is on the agenda. If there

is a Measure, then there is Hatred of everything that violates it, excessive, perverted, non-Lifebearing.

The world is cruel, not kind. It has murder, meanness, violence, treachery. Moreover, all this is a much simpler, more understandable and attractive part of the Low Nature of man. Good is brought into the world only by ourselves, with our strong hand and high muscle. To love, so from the bottom of our hearts, therefore, all the opposite of our love, we can and should hate, fight, eradicate. Against beauty – ugliness, against tenderness – bestiality, against loyalty – betrayal, and so on. Anyone who says that there is no Enemy is the first to be his accomplice. You can't defeat evil without sacrifice. The fear of sacrifice is the loss of humanity, subjectivity. Those who die today save lives in the future. **H does not mean the desire for sacrifice, but readiness for it.** The true end will always justify the means. Otherwise, we remain forever enslaved to the fear of spilling blood or causing suffering.

In the end, Fear will only increase the suffering. A young girl will gorge on 2.5 liters of alcohol and die on her own, without our support. Her friend with 1.5 liters will remain alive, but what kind of life will it be? Surely, we didn't take any responsibility, we didn't shed any blood, we didn't cause any suffering, did we? We rejoice that «this cup passed over us,» while sighing over the news. This does not mean that you should immediately run and smash the nearest store of liquors. Remember the principle of I. Hate is smart and cold, it is not an outburst of rage and resentment. You will start planning not a local surge, but a final victory over the problem. Even deeper, over its causes, over the roots of Demons. Seeing events in this true perspective, you will not be mistaken where to direct your Work, where to look for like-minded people, what to read and give children to read. **It will be a Long War, but we will win.**

The world is cruel and imperfect, which only makes the expanse of Life and Reason more precious, taken by storm every day.

I hate all the nothingness in this world.

My hate is a flaming torch, a path in the dark.

No rest, no forgiveness, no mercy.

This is my war, and I will not give up.

Demon Gates

*«Who says that Don Quixote is dead?
Please, do not you believe this!
He is not subject to the time and death,
He mounts for a new crusade...»
– Yulia Drunina*

The book is nearing completion, we need to give the last instructions for action, at the moment. For all the Evil and Demons that we have described in the previous chapters, there are general conditions for manifestation. Nutrient medium. We have examined in detail how each of the Demons arises. But there is something that affects everyone: the «universal source». Like the phenomena of Filth itself, it dresses in white robes, and no one openly welcomes evil. Everything looks good on the outside, no alarm sounds. Demons are everywhere because their methods of infiltration have become a daily occurrence, a habit, imperceptible and indistinguishable phenomena of reality. However, this is the Demon Gate. Let's explain with an example.

The first Gate is Unconsciousness.

Mentioned many times, it could have been a Demon in its own right if it had more content. What is it? Live without knowing your own history. Trust the media and TV presenters, and don't ask questions. Do not be interested in the origin and meaning of words. Do not distinguish between words, relying on a «rough understanding». Do not delve into the world processes, consider «your hut on the edge». Don't plan for the future. Don't be responsible for your actions and words. Don't think, don't ask questions. Memorize, not understand the material. Follow instructions blindly, don't think about the Goal. Do it according to the letter of the Law, not according to the Spirit. You've seen it all, you know it all. Ultimately, it is a rejection of subjectivity, of humanity, of the burden of Reason. Obeying the laws of an Inert nature. Renouncing the effort that alone takes the Kingdom of Heaven.

Make standard decisions, act «like everyone else», do not see the mistakes of textbooks and teachers, and follow advertising. The mind goes into a slumber that gives birth to monsters. Intelligence is a burden, and very few people today are able to bear it consciously and voluntarily, to strive for challenge, for curiosity, for development on their own initiative. It is the duty of such people to create conditions for the awakening of others. In this sleep of the mind, Demons find their way, first of all. This is already a small death of the Measure, when we, in fact, stop measuring and believe in patterns. «Everything has already been stolen before us.»

The most striking expression of these Gates is the sincere conviction that the current state of affairs has always been around and will remain approximately so. One can only wonder how much people «believe» it without thinking. Plan your life, make decisions about education, about choosing a profession based on the current day. No one really expects wars, revolutions, or crises. Although, it would seem, History only teaches that they happen. But this, my friends, requires Awareness and understanding of History, and not memorizing dates. This expectation of immutability is essentially an expectation of «entropy», lack of development and Life. This is the basic unconscious plan of the vast majority of Earth's inhabitants. Where there is entropy, there are Demons.

Educating a «qualified consumer»^{<?>} is a logical consequence of this Gateway. Our task is to break the chains of sleep and cultivate Triumphant Doublethink, the highest form of mindfulness. For multidimensional ethics and non-linear logic, see «The Imperium of Man: Age of Cosmatics». Thinking of the noospheric age. If a person cannot choose the third option from two options, cannot reject the solution proposed by the system, then he is already partly in slavery. Already easy prey for Demons, because they just can't be seen. «Money is good and can't be bad», «Fighting is bad and can't be good». «Working less and getting paid is a good thing and can't be a bad thing.» Don't you recognize Greed, Fear, «Freedom»? Doublethink allows you to see two sides of the coin, but in fact – three.

«Don't trust anyone, don't even trust yourself! Become your own faith « – the Inquisition's credo.

Multidimensional thinking and ethics directly correspond to the multidimensional system of LT Pobisk Kuznetsov. Without higher awareness, it is impossible to understand the idea that kilograms can be translated into meters. Into the unity of being. Ethics reflects the laws of nature in the same way as physics, each in its own sphere of management. Ultimately, the overall power of the system depends on both the measurement of heroes courage and the amount of oil produced. To understand this, to see its interrelation, to learn to distinguish the creeping Filth of Chaos, is the task of education. In the era of nuclear energy and neural networks, the desire to simplify human intellectual tasks is a desire for death.

«Watch therefore, for you know neither the day nor the hour when the Son of Man will come» – Mt 25: 13

To close the Gates of Unconsciousness, we must harden our minds. Learn to question the known, search for hidden meanings, all possible interpretations. Learn exactly the meaning and origins of words and terms in the language. Trust, but verify any information. The main thing is to bring up these skills in children with all intransigence. So we will win.

^{<?>} «The primary objective of modern school is to educate a qualified consumer», minister for education of Russian Federation 2004–2012, Andrey Fursenko.

The Second Gate is Normality.

We have repeatedly criticized the idea of «normal» behavior, which in the current paradigm means not only «not bad», but also «not heroic». It's so average, neither fish nor meat. The time has come for the final crushing of this demonic gate. First of all, in order to talk about the «norm» at all, it is necessary to present a certain scale of measurements. Maximum and minimum functions. What do people honestly measure when they consider their actions to be «normal»? With what model do they measure themselves, from what evil do they consider themselves equidistant? From none! This is what we think as scientists, mathematicians, and in the mass consciousness «norm» does not mean the median number at all. Not meeting the standard-ideal. Only what people find understandable and familiar. Attention, not measured, not calculated, not a verified golden mean, but subjectively familiar.

If only, if only, the idea of Measure had taken hold of the mass consciousness! We have a long way to go to achieve this goal. And we will do it. Nothing else is given.

It's not far from the first Gate, is it? After all, the usual, this is not conscious, naturally happened, with the order of things. **«The order of things», which is a terrible word, if you only think about it.** It is not the order of Heaven or the Order (Imperium) of Man that takes root in our very everyday speech, but this. It is obvious that the norm for the Soviet Man – the Creator, and for the modern qualified consumer, are completely different concepts. They are used to different things, expect different things, measure different things. In other words, «What is good for a Russian is death for a German.» Whose norm will we focus on? What Noble Qualities are normal today? Give an answer, does not give an answer.

The word «norm» in society is dangerous, it is a creeping Filth. Norm is a word that allows you to cover up a breakup. This is a word that allows you not to develop, not to make a commitment to excellence. What kind of person is he? «Normal». Average, two arms, two legs, that's a good fellow. Oh, hell, you're not a «normal» guy, are you? Feel the difference between a «good» person and a «normal» one. Hence, logically, unavoidable = «not good». Norm is a tool for opening the Overton Window. It has no boundaries. The very mention of any wild perversion already introduces it into the horizon of normality. With each repetition, discussion, no matter in what key, evil becomes habitual. Do you understand? That's where the trap is. Habitual evil, Emperor protect! Yes, it is very bad, but everyone has heard about it, everyone knows it, everyone condemns it. But if everyone knows, then it's already «mainstream», and there will always be rebels. This is their position,

their choice, bold, daring, unusual. Don't believe me? Imagine mini-skirts even in the first half of the twentieth century...

The concept of «norm» is inherently vague, amorphous, and tends to expand. Go to the gray areas. The norm doesn't have precision, not even shores.

«Not normal», does it sound as scary as «Filth», «Nonentity»? Yes, not normal, but not terrible either? Acceptable, albeit with a creak. «Normal» is a word of tolerance, disarming, discouraging. This is the language incarnation of the Demon Gate. «It would be better if you were cold or hot!», as the Holy Scripture says. This is the linguistic embodiment of Measure loss. This word and its underlying meanings should be erased from public practice and left only in technical processes. There should be no «normal» people. A person should be either decorated with valor, or in the pursuit of it, a disciple. Anything else is unacceptable. The RKO Cosmoplan, the library of Noble Qualities of heroes, is the language of the future. There is no place for «normal» in it.

We anticipate that they will laugh at us for this phrase. Let them. First they laugh at you...

«Normal», «ordinary person», these concepts should be reduced to swear words. Society should stop educating such people. The main question for any person should be: «What is your feat? What is your Oath of the Moment? What ideal do you serve?» How are you unusual, not-normal? What is your unique contribution? From the very beginning of childhood, these questions, measured by Qualities, should be embedded in the consciousness of a person. Nothing is more important than ideas. **The lack of ideas is an idea in itself! The Cult of Chaos.** The institutionalization of this process again refers to the «Game Society». Now it is important to understand that by not asking these questions to ourselves and others, we are not only encouraging a lack of valor, not only giving cover to Demons, but also opening a third Gate.

Third Gate – «Personal Matter»

«Family circumstances», «personal affairs» – how many times have we heard these excuses, over the years of educational work. This magic phrase justified being late for class, skipping training, setting up your friends if you didn't come to the competition, and anything else. No dialogue is supposed, «family» means absolute indulgence. Nothing can be done about it, nothing can be solved, nothing can be helped, and no one can even know. In such cases, we invariably affirm the simple truth:» *Only shameful things are hidden from the peers.*»

We fully recognize that not all areas of life need to be brought out in public, not everything needs to be talked about even with friends, the border of intimacy exists and is completely justified. We do not question this. There

is only one small but very important nuance. This boundary exists as long as your «personal» and «family» affairs do not begin to concern others. Once touched, it means that they are no longer so personal and family. On the other hand, the **cult of «personal affairs» implicitly suggests to us every day that the personal is more important than the Common Cause!** That you can fail your comrades, cause damage to the Goal, or fail to fulfill your Duty. The main thing is that «personal» does not suffer and «family». This is low and not Lifebearing! The demons of Freedom are creeping in here.

Absolutely wrong choice of priorities, justification of betrayal. Precisely the personal and family matters are what you must arrange to fulfill your duty. You should and can, your loved ones will understand. If they don't understand, then they are not relatives, but just consumers. They don't share your Goals, your ministry. You know what the Holy Scriptures say about such people. If you cut off your hand and eye... of course, there are really critical situations and big troubles when the duty to the family is more important. God forbid, but judge for yourself, if such a misfortune needs to be hidden? Won't everybody know right away that you must go? They will, and they will also help and support you like real comrades. Those who have a clear conscience have nothing to hide.

The danger of a «personal matter» goes much further. Like the «norm», the boundaries of this case are constantly blurring and growing. If «personal» needs to be hidden, if it cannot be touched, then what is the conclusion? «I am not my brother's keeper.» Let him lie in the grass outside the house. Let him poison himself. Let him behave like cattle. Not my problem until it goes to the extreme, and it will. Waste dumped in the river will poison the world's oceans. The waste of humanity thrown into Society will poison it entirely. You can't be kind and honest selectively, you can't help only «your own», «neighbors», these are the laws of the herd, not of a Man. What we tacitly allow, what we accept, what we shrug shoulders about – all this is our common fault and responsibility. Were the burned teenagers also a «personal matter»? And the girl who took 2.5 liters and died? The connection is direct, every time we turn away from «our brother», pass by without coming into conflict with the darkness of the world, we generate this abomination, we become accomplices in a crime against Life.

Passing by children drinking beer, passing by companies using alcohol on playgrounds, passing by those who throw garbage on the street, we participate, we indulge in Decay. We are falling apart on our own, devoid of honor, valor, courage, and responsibility. We encourage what we should Hate. It is no longer a Society, not a collective, not a unity, not a people. This is a random coincidence of creatures in time and space. An empty set. The Russian people begin with each of us. The great changes from the small. The goal determines the meaning. Indulging evil just because it hasn't come right

into our house yet is an invitation. It will come in. Drug addiction, alcoholism, destroys not only the person himself, but also his family, his children, and yours too – he gets behind the wheel and kills six people... And we are silent and think that this is a personal matter for everyone? Buy or not, drink or not? If you still have a little bit of a Man in you, then you know the answer to this question. And you know where it all starts. From the shamefaced silence of «family circumstances.» From our shamefaced silence.

Out of interest, enter the query «The girl drank and died...» in the search, and you will immediately understand what the price of «personal file» is.

We named the three great Gates. Small ones are innumerable. Let's tell you more, all the Gates have something in common. They seem so clear, simple, and human. Try to explain the harm of «normalcy» and «personal affairs» to a person without preparation! By the end of the Book, you can't help but see how everything is connected. What monstrous fruits grow from roots that seem harmless. There is nothing more important than ideas, psyche, thoughts and words, because thoughts are made up of them. **What the Gates have in common is that they all arise from the desire of a person not to be a person.** Narrow the world down to a comfortable and understandable patch, to a point. All the usual things can be called the norm, but you can close yourself off from other things. Anything you don't want to be responsible for, call it a «personal matter» and don't worry about it. Do not think about the consequences, do only what is clear, familiar and enjoyable.

Live with your eyes wide shut. This aspiration is so deep in our Low Nature that it is impossible to reach. An echo of the recumbent rock from which we all came once. The main Fear is the fear of the unknown, and so it is. This is even on the subcortex, because the fear of the dark is not rational, but it is so strong precisely because the unknown is there! Hence the desire to make the whole world understandable, predictable, expected, and as a result – not Living. It is very strong, and it creates the Necrosphere, in the end. The desire to buy and sell everything, solve problems at the touch of a button, assign responsibility to machines, chatbots, neural networks, or anyone else. As long as you don't have to bear the terrible burden of command, the burden of Knowledge. The burden of the need for development, Challenge, or Crisis. Ultimately, there is no need for pain and loss. Anything but that. To the extent of our strength, resources, and abilities, most of us strive not only to immerse ourselves in this comfortable space, but not even to think about all the «bad «things.

Fourth Gate – «News», the Fourth Power.

Again, think about the word itself. «News», turn it on the tongue, what is at its root, what it means. «Spices», «jokes», «tricks», it is difficult to find good analogies in this series. New things, new items, all sorts of new things,

it turns out. «The number is more, the price is cheaper», if only the new, not the old, attention is tickled. Naturally, it is impossible to deny the importance of information in the world. But what does this information mean for most citizens? In the consumption of «news» as sweets. In the information flow, where there is a little bit about everything, where the illusion of awareness is created and an even greater illusion of understanding the processes in the world. Yes, there is no time to understand! Every day there are new events.

An endless series of bloggers, experts and analysts commenting on events that have already occurred, clog the aether and do not represent anything but the power of the hindsight. Hence the name «anal-yst». Their information seems clever and useful, but in practice it is always turned to the past. There is no time to think about how we create the future every day and with every action. It is much more convenient to understand what has already happened than to determine the events yourself. It would all be a small matter if this Fourth Gate didn't complement the others in creating the eyes wide shut effect. It is the flow of pseudo-information that leaves us no time to think – Consciousness. It is the gradual habit of shocking news that blurs the boundaries of the usual – the Norm. It is the volume of «important» information that does not leave us time and energy to participate in the affairs of our neighbor – a Personal Matter. See how everything is connected?

Consuming news, discussing news, and watching one-hour expert videos creates not only the illusion of understanding, but also a good illusion of activity. That's how much «content» I created! The same applies to the news writers themselves, who are ready to drag almost anything into the first line. Just something new and hot. As a result, the power of millions of people goes into losses. Into the nothingness that is nothing. The image of a modern person who is «aware» of everything, but is not responsible for anything, is ready. We suffer History, suffer events, and analyze them afterwards.

Our Demons become active actors. The forces of disintegration are also forces of this world. The more we are given, the harder it is to stay on top.

As you can see, **the main Demon Gates are Closed**. Closed mind, closed conscience, closed perception. This gate, the call of stagnant nature, the law of least resistance, is very clear and attractive. It is always easier not to be, not to do, not to enter into conflict, not to trust, not to take risks, not to respond. You can see for yourself how everything that is discussed in the Book is confirmed on new and new levels of knowledge. The call of non-being is sweet and probably eternal. As long as a person remains a person, we can't close the Gate completely. But we can stand guard forever, watchful, alert, and inspired, waiting for our finest hour, our battle of the end, our Moment of Truth. So that They don't pass.

Does it sound nice? Exactly. Closing of eyes, ears, and hearts begins in childhood. The loss of faith in the fairy tale, in the intransigence of Good,

in the willingness to give everything to defeat Evil, that's where the rope of falling comes from. It is up to us not to let this fire go out, to dispel the lies of the material world with all its apparent grandeur and cumbersomeness. Everything visible is created by the will and Mind, everything visible has meaning only for a Person and never vice versa. When we stop dreaming, stop asking the «Why?» questions, we lose the best part of our childhood = humanity. Have all the answers already been found, and are comfortable answers truly answers? «Fight and seek, find and don't give up!» is the only real answer. It is not only possible, but also necessary, to foster such a spirit and attitude. It stands guard over all the Gates.

Socrates also said that no one wants Evil, you can only misunderstand what is Good. So no one welcomes a Demon to the face, but every time people let it in from the back door. At least because they do not believe in its existence. Because they do not think about what the «norm» is and how important it is not to conform. Because they do not know the true Measure of actions and thoughts. Sometimes they do, but it's so scary and hard to use it! Monomakh's cap is heavy in his life. This fear, this heaviness pushes us to expand the «norm» and the tolerable further and further. To the indulgence of weakness, meanness, to the desire «Not to judge and not to be judged.» Tolerance for the other, then the alien, then the fatal.

A small **deviation from the Measure, from the Judgment, gives rise to an eternity of damnation.** Once the reins of Consciousness are loosened, there will be no number of these small digressions. We have shown this more than once with the example of True Names. The old words «Fear», «Greed», «Freedom» have been stretched so far over and over again that they have lost their original meaning and content. The horror of Demons is possible and widely accepted because the language does not form constructions that allow them not only to denounce, but even to distinguish them. We do not watch over words, we have not yet understood the great Russian language as a sacred thing. We forgot that words can kill and save. We are afraid to use the words «Holiness», «Valor», «Loyalty» on the one hand, «Abomination» and «Filth»,» Chaos «on the other. Try it and you will immediately hear the accusation of «pathos», which in itself is ironic. After all, pathos is an exalted spirit! Today, this is derogative...

In this simple example, you can see the entropy of speech. For more information, see the final chapter. What matters now is that the differences between Gates and Demons are more quantitative than qualitative. Both are conditions of Evil, necessary and sufficient. The road to hell is paved with good intentions. The Gates are a defensive response to the vastness, complexity, and horror of the World. We discourage children from believing in fairy tales and dreams because if you believe seriously, sooner or later you will see Evil face to face, the complexity and cruelty of life. If the parents did not accept

the Challenge themselves, then the children will also be taught not to think, not to notice, to be «normal» and not to meddle in the «personal» affairs of others. Narrow your perception, build a comfortable world, not fight, but stand on the sidelines. Follow the letter, not the spirit. «May nothing come of it» is a rule for Low nature, but it is unacceptable in the Noosphere.

It is not difficult to envision that a Man with atomic weapons, Abominable Intelligence, chatbots, neural networks, genetic engineering and many other capabilities – must have a commensurate power of the Spirit. Technical progress without a commensurate progress of the psyche is the domination of Things, the decline and degeneration of man, first moral and then physical. A person obeys things, works for them, dreams about them, measures his life with them. We can observe both processes simultaneously. The book begins to solve the problem, the gate does not close immediately, but at least you need to know about them in order to stand guard. The very teaching of the True Names, the New Language, the Imperial Faith, is already shaping a much more Lifebearing worldview. Yes, even if people disagree! Let them curse and reject. It will be too late. You can not un-see or in-hear the truth. Just exposing the Gate, just pointing out the Enemy, is half the solution. Let them laugh, but they will never be able to say that they did not know. The time will come and one of a hundred will open his eyes and become us, become I.

The severity of the Challenge dictates that there are no more Personal Matters. All the Filth creeps into the world from closed doors, from secret sins, from the desire to avoid responsibility. The personal cannot be separated from the Common. The universe is one and every action of everyone... You know. We do not call for banal transparency, permissiveness and nudity, of course not. Delicacy, intimacy, personal space, solitude, all this is important for human nature, and not only that. But still, the eye of the educator, the engineer of souls, the leader of the state, must penetrate this veil. Not rudely and publicly, but artfully and subtly influence all aspects of a person's life. To form the inner Inquisition of conscience, Reason and Faith in a person. In addition to the external one, of course.

They hide only the shameful. In the desire to hide, quietly justify, the Gate of Demons is rooted.

In the end, everything said in the Book, the culture of Hate, the Age of Judgment, the Psychic Dawn, should lead to the formation of a New Man who lives in a way that he has nothing to be ashamed of. A man with an absolutely clear conscience, like the noble hidalgo Don Quixote of La Mancha, a knight without fear or reproach. Such a person can afford any eccentricities. They are not the point and we do not take an example from them. His pearly soul has no flaw, he pays for his mistakes in full measure, and the gates of hell will not prevail against him.

New Language

«We know what hangs in the balance right now
And what is happening now.
The hour of courage has struck on our watch,
And we will not lose our courage.
It is not fearsome to lie dead under the bullets,
It is not bitter to be left homeless, –
And we will protect you, Russian speech,
The great Russian word.
We will carry you free and clean,
And we will give you to our grandchildren,
and we will save you from captivity
Forever!» –

«Courage», A. Akhmatova, to the beginning of the Great Patriotic War

The question of language is so important and profound that it requires a separate Book. In the transitional provisions, our task is to identify an approach to the problem in order to attract broad attention and form a correct worldview. **Let's start with the foundation: words are thoughts, and thoughts are words.** Consequently, similar parameters of our thinking depend on what words we use, how accurate, beautiful, and complex they are in their structure and origin. Even punctuation marks help to make a thought as sharp as a rapier. Our cognitive abilities depend on the ability to accurately describe the sensations, phenomena of reality and the inner world. Remember Hate and other similar words, how much the purification of the word affects the formation of the Culture of H and the consciousness of its necessity.

At the same time, just the word «culture», with it «politics», «ideology», «philosophy», etc., these are not our, not Russian words. Greek, like hosts and hosts of others. We are by no means xenophobic. Borrowing is an inevitable process in the development of a language at a certain stage, and if something was invented abroad, then initially there is nothing shameful in calling it in the original language. Initially, attention! As the concept is mastered, the practice of the word becomes established, and it becomes familiar, what happens? That's right, its going beyond awareness. Compare «philosophy» and «wisdomlove». The second word seems funny, artificial, right? At first, yes, but play with it in the language, present it in contexts, and soon you will see how much more powerful it is!

Wisdom literally obliges, you will agree. Be wise and love, yes, yes. A Word of Power. «Philosophy» is a truly alien and unnecessary word today.

Think about it, maybe the Greeks created a world-class culture because they already loved wisdom before our era, and did not «philosophize». After all, the word sounds native in their language. «**He who creates, owns**» as we claim in the Russian Cosmic Society. Artificial words, devoid of meaning, are a scourge of language and consciousness. They do not evoke images and feelings, they are a dead weight on the memory. Judge for yourself, the Greeks did not hesitate to call their children «Defenders of the people», «Reviving», «Crowns», «Preventing». Unfamiliar? Let me introduce you to «Alexander», «Anastasia», «Stepan», «Alexey». Now do you feel how much borrowing weakens the language? Weakens the worldview.

The name is a commitment. If you are called every day not «Sasha», but «Defender of men», then from the first days of your existence, you absorb a high vocation. Not the fact that you will perform it, this is not a guarantee against evil, but a powerful spell in any case! Do you agree that in this sense, choosing a name is much more important than «in honor of your grandmother or grandfather»? This is a completely different world, and it seemed minimally natural to our ancestors. The fact that we have lost this world for many centuries confirms the following thesis. «**Technology solves challenges of the day. Language rules ages to come.**» If you want to educate the people, form their language. «1984» shows this perfectly, a great Book. Yes, on the negative side, like the destruction of language, but the task of fiction is not to solve the problem, but to make you think. Those who are horrified by the transformation of beauty into «plus-plus-plus» should be horrified by their own language and urgently restore it!

For us, «the seagull flies», and for Chukchi «The Spirit of the sea expresses itself to the shore». Agree, this alone forms significantly different cultures.

The volume and accuracy of our thoughts depends on the set of words, their accuracy, the ability to change due to prefixes, suffixes, endings, declensions, conjugations, etc. Words are our tools and weapons, plowshares and swords. Since childhood, they fall on a person and almost completely form his world. «Reason is the measurement of what is with what is due,» remember. But how to measure if there are no systems of measures (in words), or an accurate understanding of what to measure (in words). Hence, an equally accurate expression should be: «**Mind is a word.**» To bring up men of valor and honor, reason and discovery, we must initially immerse them in the world of such words, such meanings. Explain the meaning and purpose of the name. Call children «Looking into the distance», «Worthy warriors», «Keepers of Wisdom». If you think it's funny, who are you laughing at? At yourself. Only at our own ignorance and cowardice to face our truth.

The power of the Mind depends on the set of our words and the art of speech. This is our armory, where the future Victory is forged.

We have already shown enough above how the degradation of language opens the Gates to Demons. How we use the semblance of the words «Freedom», «Fear», «Greed» without understanding their true meaning, without thinking. The News Gate fills our speech with constantly emerging words: iPhone, iPods, neuralnets, chatbots, etc. The ethers are full of them. There is less and less room in the human mind for the categories of Good, Nobility, and Truth. No one just talks about it. Words that go out of use die. They remain the property of schoolchildren, at best. But adults stop using them, forget them, like problems in physics and chemistry. The ancient Philosophers dealt with these concepts in the first place, then their works survived for thousands of years. How long does the instructions and ads for the new iPhone last? You know that. Words of valor, Life, disappear if they are not used regularly. If words disappear, thoughts disappear, and what we don't think about doesn't exist for us.

At the time of its writing, Don Quixote was the most popular book in Europe. It is still among the most published books. Can you imagine that now? Have you read it? Both parts, yes, there are two of them. This fact holds the most important clues, the most important answers about the path of Chaos, the path of the Imperium, and the role of Language.

Why a New Language? As V.I. Vernadsky said, we are facing a Challenge that no one has ever faced before. The destruction of words and meanings through the world of things, through AI, through the market necrosphere – has a grand scale. You can enter high words of the Russian language in the Red Book, like animals. All the more important is our responsibility to resist the process of disintegration. Re-create a language based on the principles of meaningfulness, spirituality, and logical connection. On the principle that every word is a word of Power. To throw words around is to throw pearls in front of pigs. **You need to create something that has never been done before – a Measure of Language, Light and Dark Words, High and Low Speech.**

Modern speech, which is riddled with fragments of words from foreign languages and cultures, cannot be eliminated. It will remain Low Russian. We will have to create and consciously lead the transition to High Russian, or High Speech. It is important that you should not prohibit, delete, or destroy words. Tabooing only creates a negative cult of the forbidden fruit. Black words should be stigmatized, tied to the image of an uncultured, pathetic creature, a scum of society, an outcast, a consumer, an oligarch. Their use should become a bad taste, a closing of doors to High society, a brand of shame. When children play Knights and Inquisitors, it will happen by itself. Pride, honor, and contempt for the fallen. Blessed Hatred.

In other words, children should know Black Words, adults can't avoid them shyly. Don't make them laugh, they'll find out anyway, but they'll be proud

that they «can do it too.» Let there be no forbidden words, let the children get acquainted with who, how and when uses them. What kind of people are they, what kind of «heroes» are they, to forever discourage being among thieves and prostitutes, in prison and in Dubai, etc. This is culturalism. All these characters are not «also people», You still need to become a person. See how everything is connected here, too? Words are the fruits of consciousness, by their fruits you will know them. **The black language should always remind us how close we are to the Death of Measure.** How low the greatness of the spirit can fall from its heights.

By avoiding words, we avoid their meaning, as if it will disappear obligingly. «I don't see evil,» but there is evil, and you need to know it by sight. Otherwise, it will crawl in through the back door, of course. Black language is not just swearing and insults, it is words of degradation and decay. They are not necessarily always Low. High speech must inevitably also distinguish Evil, and all the more so must it distinguish! «Lust», «betrayal», «weakness», «narcissism»,» vanity», please – the names of our Enemies. There are no words that are «just» words, everything matters. Don't speak the Enemy's name in vain. Speech is the art of Good and Justice, just like Law. Just like any real art in general. Moreover, this art is basic, fundamental, it is the basis of others. The purification of speech, the discipline of speech, is ultimately the discipline of consciousness. The aristocracy demands a Choice.

Needless to say, the first victim of modern «education» is speech. When a child in the 11th grade has difficulty forming complete sentences and conclusions. When one of the tasks of the Unified State Exam is to express your thoughts in at least one detailed sentence...

Attempts to create high-speed systems are already underway. One of them is the YASNA Russian Language Institute. Criticism is possible and justified, but the road will be mastered by men on the march.

Due to the nature of thinking and perception itself, it is impossible to achieve complete unambiguity of the meaning of words. Gradual erosion, degradation of meaning, we have shown on the example of the Demons of «Freedom». As long as these processes can't be ruled out, we can't make every dubious word Black. The introduction of new words like «Netting», «Cosmoplan», «Coevolution», «Lifebearing» and «Cosmatics» takes time. Therefore, it is necessary to purify meanings, search for the True Names and everyday dialectic (Doublethink). Just as these chapters of the Book are transitional provisions, so the construction of High Speech will require a transition period. However, the language will never be frozen, you can never rest on your laurels. We must always be on the lookout for the main weapon room of our thoughts and words in the universe.

Understanding the problem is half the solution. **From childhood, we should teach dialectics, the logic of living stable disequilibrium in**

schools. Now they don't even teach formal logic, which, if you think about it, is ridiculous. Because the absence of the main subject, which allows you to adequately learn not only other subjects, but also all the future material of life, is a parody of education. The ancient Greeks, with their true names, understood this perfectly. The erosion of meaning is available for demonstration to a fifth-or sixth-grade student. The same stories that we told in the Book, the teacher is able to tell. There is enough material for hardening Doublethink in literature and living History. If you understand that it is important for a person not to remember the dates and names of characters, but to understand the meanings, draw conclusions, and touch the Wisdom of fate.

It is necessary to speak directly and openly at all levels of Society about the fundamental purity of language, about the threat of Low speech, about the Gates of Demons. Without knowing the Enemy, you can't defeat them. As you know, «Satan's best idea was to convince the world that he doesn't exist.» When children know what to look for in speech, what hidden threats lurk in it, they will learn to perceive the whole world differently. **For the first time, you will get three rows of words: High (Light), Low (Dark), and Dangerous (Gray).** «Freedom» is placed in the third row. Its meanings are blurred, its perception is risky, and its paths are changeable. This duality should be recognized, each use should be weighed, each reading should be colored, and additional clarifying comments should be given. The love of wisdom will not arise if you do not even get acquainted with wisdom!

Formal logic is simply false. This is the logic of machines. Something can be both «black» and «non-black» at the same time, and this is usually the case. Even if we don't talk about different views and ratings. A child at 16 is only a «child»? Doesn't he already have the traits of an «adult», don't we expect them from him? Don't we know that there is not even one, but three in every child – soul, body, personality? So much for Doublethink in an example. Its essence is not in the complexity of words, but in the complexity of meanings. The desire to make everything unambiguous is a desire to simplify, to the limit of binary code. The desire to dehumanize. Formal logic is a product of this negative speech culture. Although we do not teach it, like any other, it is implicitly assumed in primitive test schemes and «unambiguous» answers to questions of History and Society. As you may remember, this is also a Gateway. Arming yourself with dialectic, doublethink, is a necessary condition for the development of a culture of High speech.

Situations and practices should be encouraged where multidimensional language is needed, where narratives, multidimensional thoughts, logic, nuances of meaning and sense are needed. Students should compose poems, not just retell them. Write prose, not just talk about it. They must face moral problems, nuances, difficult choices, and so on. They need to be prepared for

this through the language as well. It may seem that we are distinguished by bloodthirstiness and call for the formation of a culture of Violence, Conflict, and Hatred...Exactly the opposite! Calling for the creation of a Culture, we argue that without subordinating these phenomena to the Will and Reason, they cause much greater, uncontrolled and most importantly, fruitless damage. **All these phenomena are an unavoidable and necessary part of life, and the inevitable must be loved.** Love and prepare. The need to make complex decisions creates the need for complex meanings, words, and thoughts. Complex thoughts make it easier to make the right decisions in the future.

A vicious circle becomes a Valiant Circle! Here is another example of a Low and High Word.

The unconscious phenomenon controls us, the conscious one is controlled by us. Today, the language becomes a bastard (ask for the full meaning of the word) because no one controls its development. A state textbook or dictionary doesn't mean anything anymore. We must fight for the purity of the language on the streets, in social networks, in movies – in commercials-everywhere. You don't need to ban them, you need to call them by their proper names. Bastard releases have no place on children's channels. If you want to watch it, let them watch it with the label of 18+. We refer to the chapter of the Imperium on the contours of culture. **Without creating, without being aware of the image of the Enemy and the Hero, it is impossible to fight for anything** at all. We have a problem with this not only in the language, but everywhere. «Pls», «grats», «lulz», «lmfao», emoticons instead of words – they are innumerable. Meet Low speech in all its glory. «Love for sale» means something completely opposite to «love», a living disintegration of language. «What is natural is not ugly», «this is our nature», when the true and High nature of man was not even considered here. So dies greatness.

Low Nature corresponds to Low speech. It cannot be eliminated, it must be known in order for us to own it, and not for it to own us. You just need to use the true names.

«1984» comes to our rescue again. They very consciously turned language into a technique in order to achieve perfect controllability, to eliminate creativity, development and achieve unlimited control. Hence the «plus» instead of all the positive characteristics. The fairy tale is a lie, but there is a hint in it, a lesson for good fellows. The control of language, the destruction of words, their modification were known to the author in 1948, even then! It is impossible not to notice that forecasts are coming true. But who manages the change in our language? What great mind with what bright purpose? It doesn't matter now if there is a mind behind the process or not. You and I know what the process leads to: Chaos and disintegration. It doesn't matter that we don't formally see «plus» words yet. They were needed to replace

the epithets «noble», «sacred», «worthy», etc. Look back, this goal has been achieved. It doesn't matter that the replacement came not in one person, but in a legion of «cool», «dude», «ok», and a great number of unprintable expressions.

The Dulles plan doesn't exist, but it works. If we don't create a High speech, we fall into a Low one. This is the law of stable non-equilibrium development of Life.

Try to look for differences in the nuances of meaning between «cool» and «rad». Even better, between «integrative» and «holistic», «rules» and «rocks». Laughter and sin. A lot of empty words means a loss of precision, and a loss of precision means a loss of meaning. Graduates of the school easily fill in terms, fragments of phrases, but can not understand the meaning of the sentence, the essence of the phenomenon. Nothing is more important than ideas, yes. But ideas don't exist outside of words. We must open these two fronts simultaneously.

Many times when we talk to children in class, even with members of youth associations, such as the Unarmia, when asked: «What is the Fatherland? «we hear: «The Fatherland is our Motherland...». We ask: «So a man is a woman?» Stupor. And only after explaining that the Fatherland is why and how you live, and the Motherland is where you were born and live, does clarity and awareness come, which means responsibility.

Finally, the benefits of learning foreign languages should be noted. Everything is learned by comparison. The greatness and power of the Russian language, its precision, richness and height, are better understood in contrast. The meaning of knowing the alien is not only in aversion, but also in respect where it is deserved. In fact, if we did not know the language of the Greeks, we would not understand that they were not shy about Wisdom, unlike us. Read your own, but also read someone else's, the language can develop, in order to choose a direction, you need to enrich yourself with the knowledge of other peoples. Do not disdain them, but do not give up your dignity and priority. The enemy's language allows you to better understand their thoughts and meanings. To defeat the enemy, you need to know and even love him. So we united all the peoples of Russia into one. So it is necessary to turn the world into an Allworld. A New Language.

«If you know yourself and the enemy, you will win. If you only know yourself, you may win. If you don't know yourself or the enemy, you will lose.» – Sun Tzu, The Art of War.

In the beginning was the Word and then it will be. Transitional provisions mean the transition from the word of the Book to the Living word. To embody the Word in your words, actions, and the flame of souls. Faith without deeds is dead, and not only that. The new Language symbolically represents the sum of all that we have to do. It requires action, it gives birth to action, it is

born in action. High Speech already rings in our hearts. Page by page, you have absorbed its structure. Page after page, you understood that the Enemy is there, he is strong and tightly surrounds us. And now you know that if we are surrounded – this is our advantage! So – we have nowhere to retreat! So – we have eternity! So we can advance in all directions! So we will lay down our bones, but we will not put the Russian land to shame, because «the dead know no shame», and the victors are not judged!

So be it!

The book doesn't end, it transpires.

From spiritual and physical imperfection, we move on to perfection. To eternal victory over Death.

Addendum

Concept of the International Heavenly Tribunal

«At first they don't notice you, then they laugh at you, then they fight you. And then you win» – Mahatma Gandhi

The need to create new forms of managing the development of human society on a global scale is caused by two reasons. The first is the obvious and blatant inefficiency of the previous forms of organization of the world community (the UN, the IMF, the World Bank, etc.). Not only inefficiency, but also their parasitic nature, which has already been revealed and proven more than once. Powerlessness in the face of US military aggression in Yugoslavia, Iraq, Afghanistan, and Libya. Criminal inaction during the war in Donbas. Tacit support for sanctions against Russia. Finally, the inciting of coronavirus hysteria-all this is the final sentence to the world order formed as a result of the Second World War and its offspring.

The second reason is that the world is facing completely new challenges that arise in the course of the historical process. Technological progress, fundamental limitations imposed by the current scientific and ideological paradigm, informatization and globalization have put humanity at a crossroads, at the point of choice and bifurcation. The Russian Cosmic Society calls this period a Special one. This is a critical situation, the overcoming of which leads either to a transition to a qualitatively different evolutionary level (social aromorphosis), or to a catastrophic degradation and loss of the pace of development of civilization, calculated for thousands of years. Victory of Life, or death of Hope. This is the question now. The old formal methods of governance, the idea of the sovereignty of individual states, not only do not correspond to the goals of the development of civilization and the tasks of the era of transition to the cosmic history of the Earth, but also do not actually work. Information, capital, influence, and corporations have long been transnational and informal. However, they have retained their nature as private institutions for pumping out maximum profits. From man, at the expense of man and against man, and ultimately, Humanity.

Our task is to meet the challenge of time on behalf of scientists, experts, thinkers, fathers! Strengthen the imperatively emerging subjectivity and sovereignty of all mankind. Международный Небесный Трибунал (HeT), The International Heavenly Tribunal (Heavenly Tribunal (HeT) is our first response to the challenge facing Humanity.

Goal of HeT

The goal of HeT is to stop any activity that threatens the survival, development and future of Humanity. To achieve this goal, HeT provides a full, rigorous and scientific assessment of the actions of any entity on planet Earth, if they threaten the survival, development and future of humanity. This assessment is finally expressed in the form of a **Sentence**.

At the same time, HeT documents must be expressed in a clear and accessible language that will be able to be understood by people all over the world. Strict scientific evidence and justification is preserved in the minutes of the sessions and remains at the discretion of the Judges, first of all.

HeT expresses the desire to form the subjectivity and sovereignty of Humanity and seeks to overcome the barriers of language, national borders and prejudices. Its work involves the maximum number of specialists from different countries and spheres of public life so that the Sentence is final, clear and concise expression of the will of thinking people around the world.

Sentences of HeT should become a source of knowledge, the formation of a public worldview, a true measure of events and processes.

Sentence of HeT

The Sentence of HeT must be posted on a public Network resource. The form of the sentence excludes political and national preferences. The justification of the sentence is scientific, legal and philosophical in nature. It is expressed in strict official language.

Sentences of HeT should serve as a source of facts and irrefutable arguments for all thinking humanity, creating a real picture of the world and threats to its existence. A sober and reasonable voice of reason in an era of hysteria and panic. Here are the keys to all the doors, answers for the seeker, and directions.

HeT sentences should be signed by as many scientists and experts on the subject as possible from as many countries around the world as possible. They should be engaged in cooperation in advance and shown that their opinion and position are really needed, respected and will be heard. In addition to the final text of the sentence, it is necessary to give representatives of different countries the right to a **Dissenting Opinion**, which is also published along with the sentence.

Electronic contact details of signatories should be provided on the HeT website to verify the decision, its credibility (refusal of anonymity) and encourage broad discussion in the global information space. Knowledge of the sentence and the phenomenon of HeT itself will only increase with each mention, regardless of its positive or negative nature.

Participants and founders of HeT undertake to disseminate and use information about the sentence as widely as possible in their activities and public speeches.

The sentence of HeT should clearly describe the guilty act of the subject against the world and humanity, the damage caused by it, and the consequences in the future. Aggravating and mitigating circumstances. Necessary measures to eliminate threats to the world and a measure of responsibility.

Excommunication is the core form of liability imposed by the He T. It means the obligation of every reasonable inhabitant of the Earth to cease all communication, interaction and contact with the guilty entity, its employees and officials, as far as possible. With the exception of informing them of the essence of the Sentence and measures to eliminate the threat. Refusal of its services, products, information, benefits, etc.

The condemned person/entity is declared out of the law. Outside the law of Nature and the development of Life. HeT declares justified any proportionate actions to stop the threat, without causing the sentenced entity harm beyond fair.

HeT is aware that the guilty actions of the convict may be covered by outdated formal law of national States, or by international law. Reasonable inhabitants of the Earth who have undertaken to execute the sentence must measure their actions with the risk of liability under the norms of formal law. Praise the courage and resourcefulness of the actors!

According to the direct effect of the Sentence, it is intended to be an argument and basis for any political, economic, social and informational measures against the guilty entity. Both in national states and at the international level. There will always be those who benefit from opposing the convict, undermining his economic or political position. The sentence will be a scientific and ethical justification for such actions. Even if they are undertaken out of private interest and motivation. The principle applies: **«The enemy of my enemy is my friend.»**

Structure of HeT

By its very nature, HeT is a social structure and does not establish a rigid hierarchy, staffing table, or bureaucracy. The Tribunal is composed of a triumvirate of Presidents of the Tribunal and its Judges.

The Presidents of the Tribunal ensure uninterrupted and harmonious work of the HeT, cooperation between Judges and experts involved, and the formation of comprehensive and objective sentences in all cases. In complex cases, the decision is made by two votes out of three of the Chairs. There is no Senior Chairman, the triumvirate works on the basis of unanimous consent. Each Chairman may assume the duties of a Judge.

The judges of the Tribunal deal with a specific case, involving for this purpose any number and composition of the necessary experts, participants, and technical assistants. Each Judge accepts public responsibility for the case assigned to him or chosen and undertakes to bring it to the final Sentence.

The list of cases that are not considered at any particular moment, the plan of future cases, the list of cases proposed to Judges for consideration – is approved by its President. The President has the right to entrust the consideration of the case to a Judge whose knowledge and competence correspond to the nature of the case as much as possible. A Judge's refusal is possible only for the highest valid reason, which is subject to mandatory publication.

A case may be transferred from one judge to another only by a decision of the Triumvirate. Each President may speak on behalf of HeT and make official statements to be published.

Any actions of the Judge may be appealed to the Chairman. Actions of the Chairman – to the Triumvirate. The Triumvirate's actions are final and cannot be appealed.

Procedure of HeT

The Tribunal accepts for its consideration any cases that it deems necessary, at the initiative of any Judge or Chairman.

The accused subject is notified of the beginning of the consideration of the case and is invited to participate in it.

The Lead Judge engages any number and composition of the necessary specialists to consider the case in order to obtain the necessary initial data, scientific conclusions and expert opinions within a reasonable time.

It is the duty of the Judge to form a complete, clear and consistent conclusion that will form the basis of the Sentence. He may or may not agree with the expert's opinions. He can formulate his own final vision. All permanent experts of HeT have the right to publish their dissenting opinion, if this is really necessary. It is not distributed along with the Sentence, but will be available on the website of He T. The sentence is singular and does not allow for ambiguous interpretation.

If the accused is fully involved in HeT investigation, the position of his specialists should be listened to and taken into account. Their dissenting opinion is published on a par with others. The Sentence must indicate the reasons why the HeT does not accept the arguments of the accused, if such was the decision.

Experts and specialists involved in the case can exchange opinions and give feedback on each other's conclusions. The leading Judge monitors the harmonious flow of this process, the balance of necessary and sufficient.

Participation in HeT

Permanent members of the HeT are specialists and experts, scientists and public figures who have publicly agreed to work as part of the He T. This obliges them to draw up an opinion on any case to which they are called within a reasonable time. This gives them the right to publish their dissenting opinion, as well as to participate in any case on their own initiative and with the consent of the lead Judge.

The list of permanent HeT Members is subject to publication on the website with contact information. Participation in HeT is a matter of honor, a feat of valor, a source of good fame and fulfillment of a duty to Humanity and Life itself. Participation in HeT, except for compensation of expenses necessary for conducting the study and drawing up an opinion, if they were approved by the leading Judge.

Special HeT participants are States, corporations, and any entities that support the Tribunal with their financial contributions. This gives them the right to participate in the consideration and familiarization with the materials of any case concerning their interests and publish a dissenting opinion.

Temporary participants of the HeT are accused persons who have supported the Tribunal with a material contribution in response to the notification of the beginning of consideration of their case. They enjoy the rights of Special Participants only for the duration of their case.

Contributions of Temporary participants should be heavier than Special Ones. The Triumvirate keeps track of the company's expenses and income. All transactions with contributions are public in nature. All of them should be aimed at achieving the goals of HeT

HeT and formal law

What is now understood as «Justice» is no longer a just. The time for formal law has passed. It has become an obstacle to the development of the Earth's civilization and an instrument in the hands of the enemies of peace and harmony. Within each State, formal law serves the interests of the dominant group. Moreover, interests that are often misunderstood and only in the short-term market, conjunctural perspective. On a strategic scale, formal law is disastrous for everyone, even for its authors. This statement is apodictic for the simple reason that formal law does not have a strategic scope of action, planning and design that goes beyond the life of power groups. Nor is it responsible for the future.

International law is the flesh of the flesh of national law. It merely expresses and secures the private interests of states in the global competition of their power elites for a place in the global hierarchy of dominants, at a new stage in the historical development of civilization. National rights are based on Roman, Admiralty and maritime law, as well as ancient natural law, which is based on ancient ideas about the order of things and the relations of man and society. Today, this construction has become a chimera of chimeras, an illusion of illusion.

Everything old and obsolete can no longer be called a Law. The time is coming for Cosmic Law, the Right of Humanity to survive and preserve development. Its imperativeness must be ensured by the will and reason, just as the mind is able to understand and follow the laws of Nature. The laws of nature are discovered by science. They are apodictic and not contested.

Human rights laws are generally accepted, but not universally binding. The laws of Nature are generally binding, but not yet generally accepted. Modern times demand that this contradiction be eliminated. HeT is a step in that direction. In fact, only a madman tries to grossly violate the law of gravity by jumping into the abyss, learning from his own experience the effects of the law of acceleration of free fall and its consequences. Equally, only a madman does not take into account the laws of the development of Life and the objective nature and goal function of a person in managing the world.

Each nation-state will cover «it's own» corporations, or «it's own» interests and officials, and will never allow them to be prosecuted and convicted under «national law». HeT shakes off the dust of such formal systems. It is obvious for the Tribunal that the lack of tools for direct execution of sentences today does not mean that it is necessary to remain silent. The sentence must be pronounced, and the time and method of execution will come.

However, HeT draws its legitimacy not only from the laws of nature and the challenge of the moment. It takes into account the previous tradition and accumulated progressive solutions in the field of law. The decisions of HeT are a direct implementation of «generally recognized principles and norms of international law», references to which are found, among other things, in the Constitution of Russia, in the laws of many other states of the world, and in the Charters of international organizations. The principles and norms are generally recognized, but not implemented.

HeT openly declares that the source of its Right is, inter alia, but not exclusively, the following unrealized **Goals and Principles of the international community**:

- Implementation of international cooperation in solving international problems of an economic, social, cultural and humanitarian character and in promoting and encouraging respect for human rights and fundamental freedoms for all without distinction as to race, sex, language or religion (Article 1 of the Charter of the United Nations)
- Maintaining international peace and security, taking effective measures to prevent and eliminate threats to the peace in accordance with the principles of justice, settling or resolving international disputes or situations that may lead to a breach of the peace (Article 1 of the UN Charter)
- Definition of «**genocide**» as the deliberate creation of living conditions for a group that are designed to completely or partially destroy it; and measures designed to prevent childbearing in the environment of such a group (Convention on the Prevention and Punishment of the Crime of Genocide, 1948)
- Indefinite prosecution of crimes against humanity (1968 Convention on the Non-Applicability of the Statute of Limitations to War Crimes and Crimes against Humanity)
